## SERVICE TECHNICAL INFORMATION

### ONE POINT REPAIR

UTSUNOMIYA, JULY 15, 1996

REF. NO. : SI-96-016

CUSTOMER RELATIONS & SERVICE DIV.

MODEL : Portable digital devices such as AM-F3

SUBJECT : Providing a new fiber-optic cable

CONTENTS : A 3.5  $\phi$  pin jack is used as the optical input jack in portable digital devices such as MD and DAT. However, a square optical output jack is generally used in the source-side devices (CD player, audio devices, etc.). Because such fiber-optic cables with both types of jacks are becoming more common on the market, and because many service engineers have told us that it is still difficult to obtain such cables, we will now be providing a fiber-optic cable with a 3.5  $\phi$  mini plug and a square plug. This cable will be provided as a jig.

#### DETAILS

Part No. : 82-HM1-202-010

Name : CABLE OPTICAL

Price : US\$ 8.00

Length : 1 m
