PROTECTION OF EYES FROM LASER BEAM SERVICING

This set employs laser. Therefore, be sure to follow carefully the instructions below when servicing.

WARNING!!

WHEN SERVICING, DO NOT APPROACH THE LASER EXIT WITH THE EYE TOO CLOSELY. IN CASE IT IS NECESSARY TO CONFIRM LASER BEAM EMISSION. BE SURE TO OBSERVE FROM A DISTANCE OF MORE THAN 30cm FROM THE SURFACE OF THE OBJECTIVE LENS ON THE OPTICAL PICK-UP BLOCK.

- Caution: Invisible laser radiation when open and interlocks defeated avoid exposure to beam.
- Advarsel: Usynlig laserstråling ved åbning, når sikkerhedsafbrydere er ude af funktion.
Undgå udsættelse for stråling.

VAROITUS!

Laiteen Käyttäminen muulla kuin tässä käyttöohjeessa mainitulla tavalla saattaa altistaa käyttäjän turvallisuusluokan 1 ylittävälle näkymättömälle lasersäteilylle.

WARNING!

Om apparaten används på annat sätt än vad som specificeras i denna bruksanvisning, kan användaren utsättas för osynlig laserstrålning, som överskrider gränsen för laserklass 1.

CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

ATTENTION

L'utilisation de commandes, réglages ou procédures autres que ceux spécifiés peut entraîner une dangereuse exposition aux radiations.

This Compact Disc player is classified as a CLASS 1 LASER product.

The CLASS 1 LASER PRODUCT label is located on the rear exterior.

ADJUSTMENT

※ Connect the $\ominus$ probe of the oscilloscope to TP3 (VREF) for each adjustment.

Note : Connect a probe (10:1) of the oscilloscope to a test point.

① Tracking Balance Adjustment

1. Connect an oscilloscope to test points TP1 (TE OUT) and TP3 (VREF).
2. Turn on the power switch.
3. Insert test disc YEDS-18 (YEDS-1) and press the PLAY (▶) switch.
4. Press the REPEAT switch to set to the REPEAT mode.
5. Press and hold the $\blacktriangleright\blacktriangleright$ switch. (MS condition)
6. Adjust SFR2 so that the waveform on the oscilloscope is vertically symmetrical as shown in the following figure.
7. After the adjustment is completed, remove the ground lead wires from the terminals.

② Focus Bias Adjustment

Make the focus bias adjustment when replacing and repairing the optical block.

1. Connect an oscilloscope to test points TP2 (RF) and TP3 (VREF).
2. Turn on the power switch.
3. Insert test disc YEDS-18 (YEDS-1) and play back the second composition.
4. Adjust SFR1 so that the amplitude of waveform on the oscilloscope is maximized.

③ Laser Power Adjustment

This check should be performed whenever the optical system block is replaced in repair.

1. Connect an oscilloscope to test point TP2 (RF) and TP3 (VREF).
2. Turn on the power switch.
3. Insert test disc YEDS-18 (YEDS-1) and play back the second composition.
4. Adjust VR1 (into pick up assy) so that the waveform appears as shown in the figure below.

Note : The current of the laser signal can be checked with the voltages on both sides of R13 (10 Ω). The difference for the specified value shown on the label must be within ±6.0 mA.
