CDR26

Dual Tray CD-R/CD-RW Recorder/Player

PRELIMINARY SERVICE MANUAL

CONTENTS

harman/kardon, Inc.
250 Crossways Park Dr.
Woodbury, New York 11797

CDR 26 TECHNICAL SPECIFICATIONS

Signal Format

Playback Sampling Frequency	44.1kHz
D/A Conversion	96kHz, Multi-Bit Delta-Sigma Conversion
Oversampling	128 Times

Playback Specifications

Frequency Response	2Hz – 20,050Hz
Playback S/N	100dB
Playback Dynamic Range	95dB
Playback THD	0.01%/0dB
Analog Audio Output	2V RMS, ± 2dB
Digital-Coaxial Output	0.5Vpp/75Ω
Headphone Output	1V RMS/32Ω Load

Record Specifications

Digital Input Sample Rates	32kHz – 96kHz
Recording S/N: Analog	80dB
Recording S/N: Digital Dub Mode	Equal to Source
Recording S/N: Digital External Source	Source –10dB
Recording Dynamic Range	90dB
Recording THD	0.01%/0dB
Analog Input Sensitivity	330mV RMS 47kΩ = 0dB
Digital Inputs (Direct Recording)	44.1kHz, ±100 ppm/min.

General

Power Requirement	110~240 VAC/50~60Hz
Power Consumption	20 Watts
Dimensions	
Width	17-5/16"/440mm
Height	4-7/16"/112mm
Depth	13-15/16"/355mm
Weight	13 lb/5.8kg

Depth measurement includes knobs, buttons and connection jacks.
Height measurement includes feet and chassis.
All features and specifications are subject to change without notice.

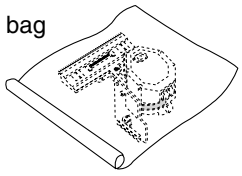
SERVICING PRECAUTIONS

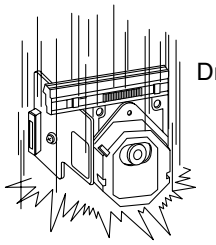
NOTES REGARDING HANDLING OF THE PICK-UP

1. Notes for transport and storage

1) The pick-up should always be left in its conductive bag until immediately prior to use.
2) The pick-up should never be subjected to external pressure or impact.

Storage in conductive bag

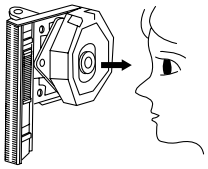




Drop impact

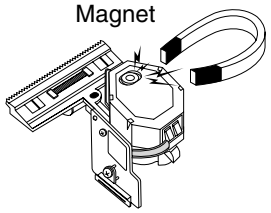
2. Repair notes

1) The pick-up incorporates a strong magnet, and so should never be brought close to magnetic materials.
2) The pick-up should always be handled correctly and carefully, taking care to avoid external pressure and impact. If it is subjected to strong pressure or impact, the result may be an operational malfunction and/or damage to the printed-circuit board.
3) Each and every pick-up is already individually adjusted to a high degree of precision, and for that reason the adjustment point and installation
screws should absolutely never be touched.
4) Laser beams may damage the eyes!
Absolutely never permit laser beams to enter the eyes!
Also NEVER switch ON the power to the laser output part (lens, etc.) of the pick-up if it is damaged.

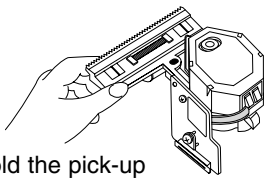


NEVER look directly at the laser beam, and don't let contact fingers or other exposed skin.

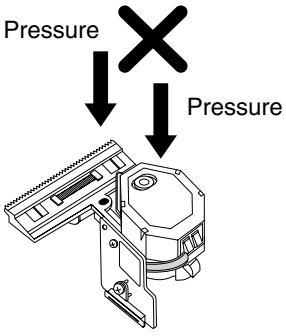
5) Cleaning the lens surface
If there is dust on the lens surface, the dust should be cleaned away by using an air bush (such as used for camera lens). The lens is held by a delicate spring. When cleaning the lens surface, therefore, a cotton swab should be used, taking care not to distort this.



Magnet

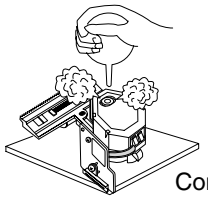


How to hold the pick-up



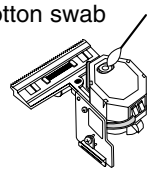
Pressure

Pressure



Conductive Sheet

Cotton swab



6) Never attempt to disassemble the pick-up.
Spring by excess pressure. If the lens is extremely dirty, apply isopropyl alcohol to the cotton swab. (Do not use any other liquid cleaners, because they will damage the lens.) Take care not to use too much of this alcohol on the swab, and do not allow the alcohol to get inside the pick-up.

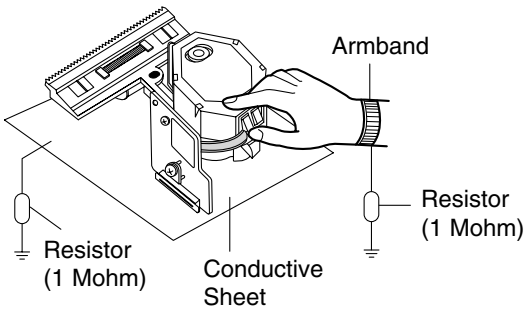
NOTES REGARDING COMPACT DISC PLAYER REPAIRS

1. Preparations

1) Compact disc players incorporate a great many ICs as well as the pick-up (laser diode). These components are sensitive to, and easily affected by, static electricity. If such static electricity is high voltage, components can be damaged, and for that reason components should be handled with care.
2) The pick-up is composed of many optical components and other high-precision components. Care must be taken, therefore, to avoid repair or storage where the temperature of humidity is high, where strong magnetism is present, or where there is excessive dust.

2. Notes for repair

1) Before replacing a component part, first disconnect the power supply lead wire from the unit
2) All equipment, measuring instruments and tools must be grounded.
3) The workbench should be covered with a conductive sheet and grounded.
   When removing the laser pick-up from its conductive bag, do not place the pick-up on the bag. (This is because there is the possibility of damage by static electricity.)
4) To prevent AC leakage, the metal part of the soldering iron should be grounded.
5) Workers should be grounded by an armband (1MΩ)
6) Care should be taken not to permit the laser pick-up to come in contact with clothing, in order to prevent static electricity changes in the clothing to escape from the armband.
7) The laser beam from the pick-up should NEVER be directly facing the eyes or bare skin.



ESD PRECAUTIONS

Electrostatically Sensitive Devices (ESD)

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive Devices (ESD). Examples of typical ESD devices are integrated circuits and some field-effect transistors and semiconductor chip components. The following techniques should be used to help reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any electrostatic charge on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging wrist strap device, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ESD devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ESD devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ESD devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ESD devices.
6. Do not remove a replacement ESD device from its protective package until immediately before you are ready to install it. (Most replacement ESD devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive materials).
7. Immediately before removing the protective material from the leads of a replacement ESD device, touch the protective material to the chassis or circuit assembly into which the device will by installed.

CAUTION : BE SURE NO POWER IS APPLIED TO THE CHASSIS OR CIRCUIT, AND OBSERVE ALL OTHER SAFETY PRECAUTIONS.

8. Minimize bodily motions when handing unpackaged replacement ESD devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity sufficient to damage an ESD device).

CDR 26 SPECIAL NOTICE

Under certain circumstances, the CDR 26 may operate differently than the description in the owner's manual.

In particular, the unit will not be able to make a digital recording from an external source such as a CD player, DVD player or MiniDisc (MD) player (as shown on page 20 of the owner's manual) when that player blocks a special electrical signal, called "Sub-Q," from the digital output. This signal contains some of the data needed to tell the CDR 26 that the original disc has started playing, and without it the CDR 26 cannot begin a recording.

This is outside of our control, as some manufacturers design products this way to prevent digital copies from being made. Should you find that a digital recording cannot be made from an external playback source, you may always use an analog connection to make the copy by pressing the Input Select Button on the front panel or remote control until *ANALOG* appears in the Information Display.

This does not affect the CDR 26's ability to make high-speed dubs using the unit's own internal playback deck, and in many cases you will not encounter this problem at all, since it is related to the brand of playback deck being used.

35 Play-Deck Play
36 Play-Deck Stop

1 Power Switch: Press this switch to apply power to the CDR 26. When the unit is first turned on, the Status Mode Indicator **2** surrounding the switch will turn green. Once the unit has been turned on with this switch, it may be operated from either the front panel or remote control. Press the switch again to turn the unit completely off.

2 Status Mode Indicator: When the CDR 26 is in the ON mode, this indicator will glow green. When the unit has been placed in the Standby mode by pressing the Power-Off Button **30** on the remote, the indicator will glow amber, indicating that the unit is still connected to the AC main supply and is ready to be turned on from the remote control.

3 Play Deck: This disc deck is used to play back conventional CD discs and CD-R or CD-RW discs that have been finalized.

4 Headphone Jack: Connect standard headphones to this jack for private listening.

5 Headphone Level Control: Turn this control to adjust the volume level to the headphones. Note that the use of this control will not change the analog output levels at the rear-panel audio output ❶.

6 Play-Deck Open: Press this button to open the Play Deck **3**.

7 Record Button: Press this button to begin the recording process. See pages 19–22 for more information on CD recording.

8 Synchronous Recording (CD Sync) Button: Press this button once to begin an automated recording of a single track from an external CD player when a digital connection is used. Press it twice to begin automated recording of an entire disc. See page 20 for more information on CD Sync recording.

9 Dubbing: Press this button to begin the process of making a complete copy of the disc in the Play Deck **3** to a CD-R or CD-RW disc in the Record Deck **15**. See page 19 for more information on dubbing.

10 Speed: Press this button to select the recording speed for internal dubs. See page 19 for more information on selecting the proper speed.

11 Track Increment: Press this button during recording to insert a new track marker at that point in the recording. The current track number will be incremented by one.

12 Erase: Press this button to erase one or more tracks or the entire contents of an unfinalized CD-RW disc. When a CD-RW disc has already been finalized you may erase the entire disc or you may "unfinalize" the disc by erasing the TOC data. See page 21 for more information on erasing CD-RW discs.

13 Finalize: Press this button when a recording is complete to initiate the finalization process. The Play/Select Button **20** ❿ must be pressed within three seconds to activate finalization. Until this button is pressed and the finalization process is complete, CD-R discs may not be played on conventional CD machines. See page 21 for more information on finalization.

14 Record-Deck Open: Press this button to open the Record Deck **15**.

15 Record Deck: This disc deck is used to record or play back CD, CD-R and CD-RW discs.

16 Optical Digital Input: This optical digital input may be used to connect a portable digital audio player to the CDR 26 for digital recording. Remove the dust cap before connecting a cable to this jack. Keep the dust cap in a safe place and replace it when the cable is disconnected in order to prevent the possibility of dust getting into the jack and damaging it.

17 Coaxial Digital Input: This coaxial digital input may be used to connect a portable digital audio player to the CDR 26 for digital recording.

18 Analog-Record Level Control: The control is used to adjust the input level when making recordings from analog sources such as cassettes, or when CDs are recorded in an analog mode. See page 21 for more information on record levels.

19 Record-Deck Stop: Press this button to stop the CD in the Record Deck.

20 Record-Deck Play/Select: This button has two functions. It may be pressed when a standard CD is in the Record Deck to put the machine in play, or it may be used to enter a selection or start certain record functions.

21 Record-Deck Pause: When the Record Deck is in the Play mode, pressing this button will pause the disc. If the disc has previously been paused, pressing this button will restart the playback.

22 Record-Deck Program Button: Press this button to begin the programming sequence for the Record Deck. See page 18 for more information on programming playlists on the CDR 26.

23 Record-Deck Next: When a disc is playing in the Record Deck **15**, press and hold this button to play the disc in a fast-forward mode to quickly locate a desired passage. At any time, tapping the button and quickly releasing it will move to the next track on a disc in play.

24 Record Deck Previous: This button has two functions. When a disc is playing in the Record Deck **15**, press and hold this button to play the disc in a fast reverse mode to quickly locate a desired passage. At any time, tapping the button and quickly releasing it will move to the beginning of the current track, and the next press will move to the previous track. When a disc is stopped, each press will move back one for programming or play when the disc is stopped. Once a track is entered, it may be played by simply pressing the Play Button **20** **10**.

25 Input Select: Press this button to select the input source (analog or digital) for recording. See page 20 for more information on input selection.

26 Record-Deck Time Display Select: Press this button to cycle through the time display options for the Record Deck. See page 17 for more information on the time display.

27 Information Display: The indicators in the Information Display provide status reports on the operation of the CDR 26. See page 7 for complete explanations of each indicator.

28 Remote Sensor: The IR sensor that receives the commands from the remote control is behind this area. Do not cover or obscure this part of the front panel, to avoid any malfunction with the remote.

29 Play-Deck Time Display Select: Press this button to cycle through the time display options for the Play Deck. See page 17 for more information on the time display.

30 Continuous Play Button: Press this button to place the CDR 26 in Continuous Play mode, which causes it to alternate play between the discs in each deck continuously, so long as the next deck to be played contains a disc and play has not been stopped. To return to the default Single Play mode, in which play stops after the disc in the selected deck has played once, press this button again.

31 Play-Deck Next: When a disc is playing in the Play Deck **3**, press and hold this button to play the disc in a fast-forward mode to quickly locate a desired passage. At any time, tapping the button and quickly releasing it will move to the next track on a disc in play.

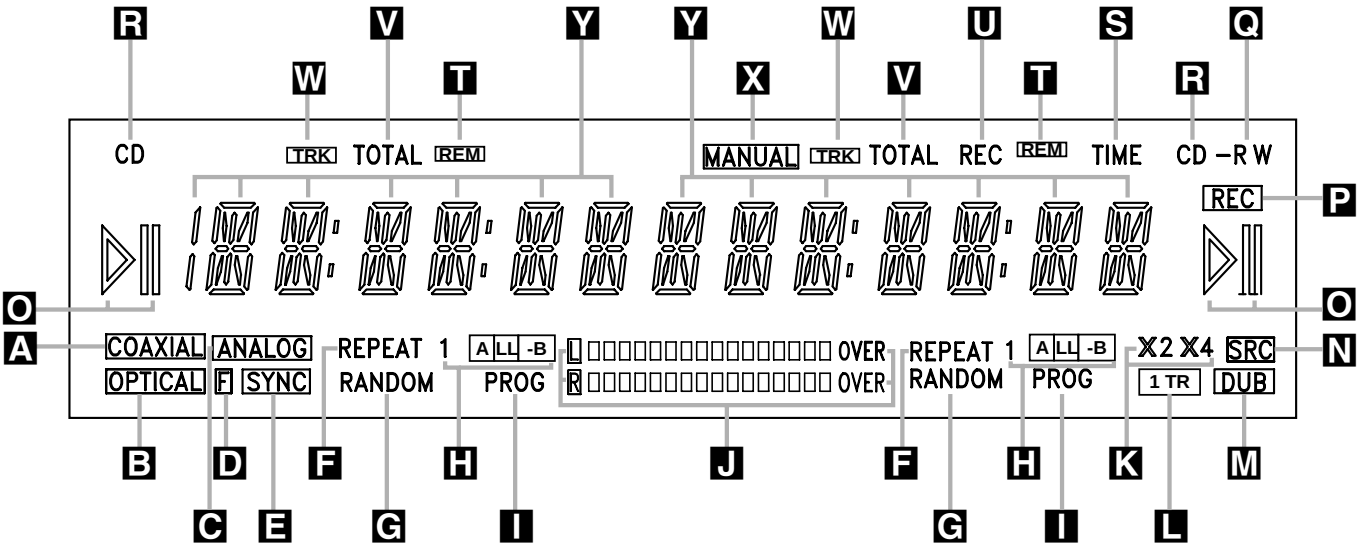
32 Play-Deck Previous: This button has two functions. When a disc is playing in the Play Deck **3**, press and hold this button to play the disc in a fast-reverse mode to quickly locate a desired passage. At any time, tapping the button and quickly releasing it will move to the beginning of the current track, and the next press will move to the previous track. When a disc is stopped, each press will move back one track for programming or play when the disc is stopped. Once a track is entered, it may be played by simply pressing the Play Button **35** **10**.

33 Play-Deck Program Button: Press this button to begin the programming sequence for the Play Deck. See page 18 for more information on programming playlists on the CDR 26.

34 Play-Deck Pause: When the Play Deck is running, pressing this button will pause the disc. If the disc has previously been paused, pressing this button will restart the playback.

35 Play-Deck Play: Press this button to begin playback of a CD in the Play Deck or the dubbing process.

36 Play-Deck Stop: Press this button to stop the CD in the Play Deck.



A Coaxial Digital Indicator
B Optical Digital Indicator
C Analog Indicator
D Front-Panel Input Indicator
E Sync Indicator
F Repeat Indicators
G Random Indicators
H Repeat Status Indicators
I Program Indicators
J Level Indicators
K Speed Indicators
L 1-Track Dubbing Indicator
M Dubbing Indicator
N Sample-Rate Conversion Indicator
O Play/Pause Indicators
P Record Indicator
Q R/RW Indicator
R CD Indicators
S Time Indicators
T Remaining Time Indicators
U Recorded Time Indicator
V Total Time Indicators
W Track Time Indicators
X Manual Indicator
Y Information Displays

Important Note: Since the CDR 26 is a dual-deck player/recorder, there are two separate sets of indicators for the Random, Program, Repeat, Repeat Status, Time, Total Time, Remaining Time and Track Time. In addition, there is a separate Information Display, Play/Pause Indicator and CD Indicator for each deck. As the function of these indicators is identical for both decks, they are described in this manual with a common letter. When the CDR 26 is playing or recording a disc, any indicators that light on the left side of the display describe the status of the Play Deck, while those that light on the right side of the display describe the status of the Record Deck. Depending on the activity of the unit and the settings you select, different indicators may light on the two sides at the same time.

A Coaxial Digital Indicator: This indicator lights when a digital source is being recorded. See page 20 for more information on source selection.

B Optical Digital Indicator: This indicator lights when a digital source connected to one of the optical inputs is being recorded. See page 20 for more information on source selection.

C Analog Indicator: This indicator lights when an analog source is being recorded. See page 20 for more information on source selection.

D Front-Panel Input Indicator: This indicator lights in conjunction with the Coaxial Digital Indicator **A** or the Optical Digital Indicator **B** when either the front-panel coaxial or optical input has been selected. See page 20 for more information on selecting an external source.

E Sync Indicator: This indicator lights when the unit has been programmed for a CD Sync recording. See page 20 for more information on CD Sync recordings.

F Repeat Indicators: These indicators light when a repeat function is being used. See page 18 for more information on repeat play.

G Random Indicators: These indicators light when random playback has been programmed for one of the CD decks. See page 16 for more information on random play.

H Repeat Status Indicators: These indicators display the type of repeat function being used. See page 18 for more information on repeat status.

I Program Indicators: These indicators light when one of the CD decks is being programmed for playback options. See page 18 for more information on programmed play.

J Level Indicators: These LEDs display the input level during an analog recording, and the output level during playback. See page 21 for more information on record levels.

K Speed Indicators: These indicators show which record speed has been selected for dub recordings. See page 19 for more information on record-speed selection.

L 1-Track Dubbing Indicator: This indicator lights when a single track is being dubbed by itself, as opposed to the entire disc or a programmed playlist. See page 19 for more information on dubbing.

M Dubbing Indicator: This indicator lights when a dub is in progress between the two CD decks. See page 19 for more information on CD dubbing.

N Sample-Rate Conversion Indicator: This indicator lights when the Sample-Rate Converter is in use to change the digital sample rate when the incoming signal is not the standard 44.1kHz used by standard CDs. This is an automatic function and does not require any user intervention.

O Play/Pause Indicators: These indicators show the status of the individual CD decks. The ▶ lights when the CD is playing, and the ▶❙❙ lights when the unit is in a Pause mode.

P Record Indicator: This indicator lights while the unit is making a recording and flashes during the preparations for recording.

Q R/RW Indicator: This indicator shows which type of recordable disc is present in the Record Deck **15**. When a CD-R disc is present, only the R is lit. The RW lights when an erasable CD-RW disc is in use.

R CD Indicators: These indicators light when a standard CD is playing in either deck **3** or **15**.

S Time Indicators: These indicators light in conjunction with one of the time indicators **T U V W** to show which of the time status modes is active.

T Remaining Time Indicators: These indicators light when the Information Display **Y** shows the time remaining on a disc.

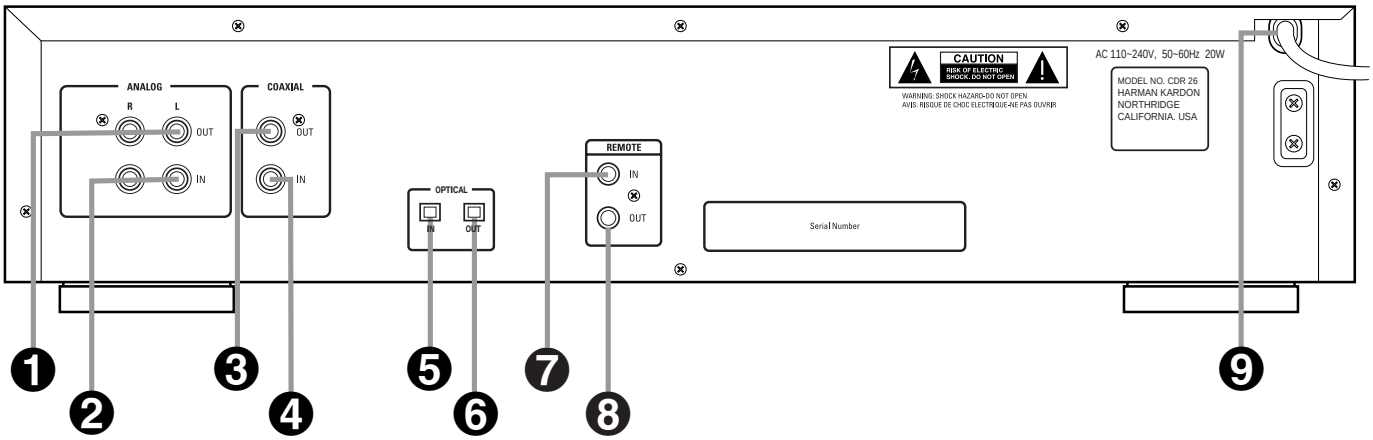
U Recorded-Time Indicator: While a recording is in progress, and up until a CD-R or CD-RW disc in the Record Deck **15** has been finalized, this indicator will light, and the Information Display **Y** will indicate the total amount of time recorded on the disc thus far.

V Total Time Indicators: These indicators light when the Information Display **Y** shows the total time of all tracks on a disc.

W Track Time Indicators: These indicators light when the Information Display **Y** shows the running time of the individual track being played.

X Manual Indicator: This indicator lights when the manual method of incrementing tracks is selected for a recording session. See page 20 for more information on track increments.

Y Information Displays: These displays serve two functions, showing the time displays for discs playing, and displaying messages about discs or recordings.



❶ Analog Output
❷ Analog Input
❸ Coaxial-Digital Output
❹ Coaxial-Digital Input
❺ Optical-Digital Input
❻ Optical-Digital Output
❼ Remote IR Input
❽ Remote IR Output
❾ AC Power Cord

❶ Analog Output: These jacks carry the analog audio output signal from the deck currently playing. Connect them to the Tape Play/In input jacks on a receiver, preamp or processor.

❷ Analog Input: These jacks accept the analog signals that are used for CD recordings. Connect them to the Tape Rec/Play outputs on a receiver, preamp or processor.

❸ Coaxial-Digital Output: This jack carries the digital-audio output signal from the deck currently playing. Connect it to a coaxial-digital input on a receiver, processor or digital decoder.

❹ Coaxial-Digital Input: This jack accepts the digital-audio input signal from a compatible digital audio product and should be connected directly to a digital player or to a coaxial-digital output on a CD or DVD player or an A/V receiver or processor.

IMPORTANT NOTE: The coaxial digital input should only be connected to digital input or output jacks. Even though it uses the same RCA-type connector as standard analog audio connections, DO NOT connect it to conventional analog input or output jacks.

❺ Optical-Digital Input: This jack accepts the digital-audio input signal from a compatible digital audio product, and should be connected to the optical-digital output on a CD or DVD player or an A/V receiver or processor.

❻ Optical-Digital Output: This jack carries the optical digital output signal from the deck currently playing. Connect it to an optical digital input on a receiver, processor or digital recorder.

❼ Remote IR Input: Connect the output of a remote infrared sensor or the remote control output of another compatible Harman Kardon product to this jack. This will enable the remote control to operate even when the front-panel Remote Sensor 28 is blocked. This jack may also be used with compatible IR remote control-based automation systems.

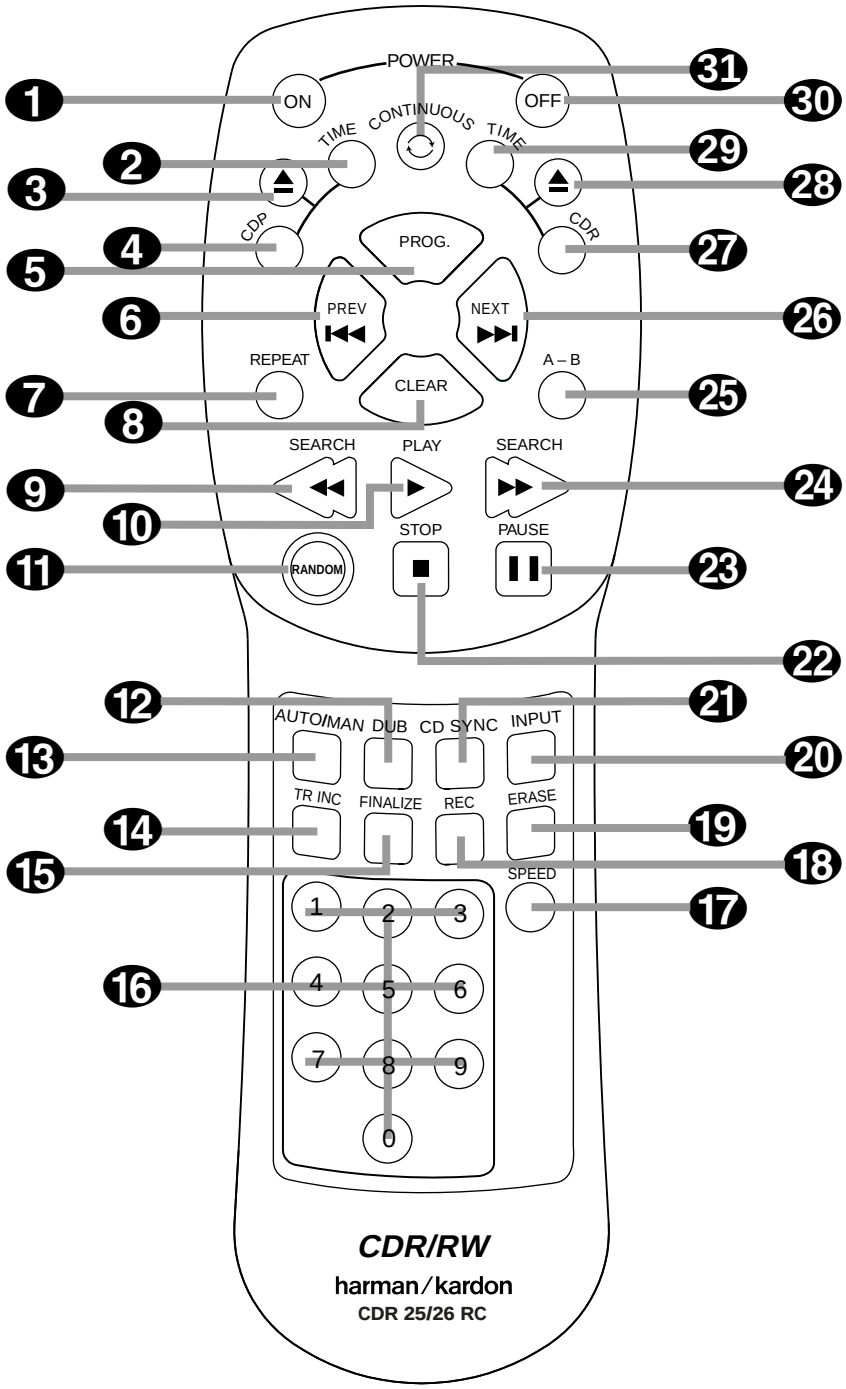
❽ Remote IR Output: Connect this jack to the IR input jack of another compatible Harman Kardon remote-controlled product to have the built-in Remote Sensor 28 on the CDR 26 provide IR signals to other compatible products.

❾ AC Power Cord: Connect this plug to an AC outlet. If the outlet is switch-controlled, make certain that it is in the ON position.

REMOTE CONTROL FUNCTIONS

1. Power On
2. Play Deck (CDP) Time Display Control
3. Play Deck (CDP) Open
4. Play Deck (CDP) Select
5. Program
6. Previous-Track Skip
7. Repeat
8. Clear
9. Reverse Search
10. Play
11. Random Play
12. Dub
13. Automatic/Manual Track Increment Selector
14. Track Increment
15. Finalize
16. Numeric Keys
17. Speed Select
18. Record Button
19. Erase Button
20. Input Select
21. CD Sync
22. Stop
23. Pause
24. Forward Search
25. A-B Repeat
26. Next Track/Skip
27. Record Deck (CDR) Select
28. Record Deck (CDR) Open
29. Record Deck (CDR) Time Display Control
30. Power Off
31. Continuous Play

IMPORTANT NOTE: Some of the remote's functions, including Play, Pause, Stop, Search, Next and Previous Track, are shared between the two decks. Always remember to press the **CDP Select Button** 4 to use the remote to control the Play Deck, or press the **CDR Select Button** 27 to control the Record Deck. When you press one of these buttons, an indication of CDP or CDR will appear in the appropriate **Information Display** Y.



❶ Power-On Button: Press this button to turn the CDR 26 on. Note that in order for this control to function, the front-panel Power Switch 1 must first be pressed so that the unit is in the Standby mode.

❷ Play Deck (CDP) Time Display Control: Press this button to cycle through the various time display options for the disc in the Play Deck 3. See page 17 for more information on time-display options.

❸ Play Deck (CDP) Open: Press this button to open the Play Deck 3.

❹ Play Deck (CDP) Select: Press this button to control or program the functions of the disc in the Play Deck 3.

❺ Program: Press this button to begin the programming sequence for one of the CD decks. See page 18 for more information on programming playlists on the CDR 26.

❻ Previous-Track Skip: Press this button to skip backwards to the beginning of the track currently being played. Press it a second time to move back to the beginning of each previous track.

❼ Repeat: Press this button once to repeat the current track. To repeat an entire disc, press the button twice.

❽ Clear: Press this button to clear an item in a program sequence. See page 18 for more information.

❾ Reverse Search: Press this button to play the selected disc in reverse to locate a desired passage.

❿ Play: This button has two functions. It will most often be used as a standard play button, but when setting up certain record functions, it is also used as an Enter or Select button.

⓫ Random Play: When the CD deck is stopped, press this button to begin random play of all tracks on a disc.

⓬ Dub: Press this button to begin a dub. See page 19 for more information on dubbing.

⓭ Automatic/Manual Track Increment Selector: Press this button to select between automatic and manual track incrementing during a recording session. See page 20 for more information on track incrementing.

⓮ Track Increment: When the Manual mode for track incrementing is selected during recording, press this button to increase the track number. NOTE: This function does not operate during CD Sync or dub recording.

⓯ Finalize: Press this button when a recording is complete to initiate the finalization process. The Play/Select Button 20 ❿ must be pressed within three seconds to activate finalization. Until this button is pressed and the finalization process is complete, CD-R or CD-RW discs may not be played on conventional CD machines. See page 21 for more information on finalization.

⓰ Numeric Keys: Press these buttons to access a specific track for playback or during the programming process. See page 18 for more information on programmed playback.

⓱ Speed Select: Press this button to select the recording speed for internal dubs. See page 19 for more information on selecting the proper speed.

⓲ Record Button: Press this button to begin a manual recording.

⓳ Erase Button: Press this button to initiate the erasure of a track or of an entire CD-RW disc or to unfinalize a disc. Erasure is only possible on CD-RW discs. See page 21 for more information on erasing discs.

⓴ Input Select: Press this button to select the input source (analog or coaxial- or optical-digital) for recording. See page 20 for more information on input selection.

㉑ CD Sync: Press this button once to begin an automated recording of a single track from an external CD player when a digital connection is used. Press it twice to begin automated recording of an entire disc. See page 20 for more information on CD Sync recording.

㉒ Stop: Press this button to stop playback or recording.

㉓ Pause: Press this button to momentarily pause playback. Press it again to resume playback.

㉔ Forward Search: Press this button to play a disc in fast-forward mode.

㉕ A-B Repeat: Press this button to specify a segment of a disc for repeat play. See page 18 for more information on repeat play.

㉖ Next Track/Skip: Press this button to skip forward to the next track on a disc.

㉗ Record Deck (CDR) Select: Press this button to control or program the functions of the disc in the Record Deck 15.

㉘ Record Deck (CDR) Open: Press this button to open the Record Deck 15.

㉙ Record Deck (CDR) Time Display Control: Press this button to cycle through the various time-display options for the disc in the Record Deck 15. See page 17 for more information on time-display options.

㉚ Power Off: Press this button to place the unit in a Standby mode.

㉛ Continuous Play Button: Press this button to place the CDR 26 in the Continuous Play mode. In that mode, the unit will play all tracks on the disc in one tray, switch to the second tray and play all tracks, and then continuously alternate between the two discs until the unit is stopped or the button is pressed again to return to the Single Play mode.

Important Note: To prevent possible damage to your speakers or other components in your audio system, we strongly recommend that ALL system components, including the CDR 26, be turned off and unplugged from their AC power source when any connections are made or a new component is installed.

Placement of the CDR 26

Since the CD transports in the CDR 26 are precision instruments, they are subject to interference from vibration. To minimize the possibility of skipping during playback or recording, it is recommended that the unit be placed on a level, solid, vibration-free surface.

When installing the CDR 26 in a cabinet or tight space, always make certain that there is enough room in front of the unit for the disc drawers to open fully, and that there is enough space above the unit so that discs may easily be inserted in the disc drawers.

In addition to the safety considerations outlined on page 4, it is also recommended that the CDR 26 not be placed in a location that is subject to direct sunlight or extreme heat or cold, as these conditions may damage the discs used in the player, or the player itself. Note that audio amplifiers or high-power receivers, as well as certain other electronic products, may generate significant heat. For that reason, do not place the CDR 26 directly on top of an amplifier, receiver or other heat source. Always allow at least one inch of free space on all sides of the CDR 26, as well as other electronic products, to allow for proper ventilation.

The unit should also be kept away from sources of water or damp conditions.

Connections to Your Audio System

When connecting the CDR 26, think of the process as if you were connecting a standard tape or cassette recorder, with the addition of the digital connections.

Depending on the capabilities of your receiver, preamp or processor, you may find it convenient to connect the analog inputs and outputs to the jacks marked for a tape recorder. As the CDR 26's functions resemble those of a standard tape recorder, this may make it easier to select it as an input on your receiver or pre-amp. Connect the Analog Output Jacks ❶ to the Play/In jacks of a Tape or Aux input on your receiver or preamp. Connect the Analog Input Jacks ❷ to the Tape Rec/Out jacks on your receiver or preamp.

To play the output through the digital decoder in your receiver or an external processor, connect the Coaxial-Digital Output Jack ❸ or the Optical-Digital Output Jack ❻ to the matching digital-input jack on your receiver or processor. You may have to change a setting on the receiver or processor to link the digital input to the "Tape" button or the specific input selector associated with the digital inputs. Consult the owner's manual on your receiver or processor for details, as this configuration may vary from unit to unit.

To make recordings from external digital sources, such as a CD, DVD or MD player, connect the Coaxial-Digital Input Jacks 17❹ or Optical-Digital Input Jacks 16❺ on the CDR 26 to the digital output jacks on your receiver or processor. If your receiver does not have digital-output jacks, you may connect the Coaxial-Digital Input Jacks 17❹ or Optical-Digital Input Jacks 16❺ on the CDR 26 directly to the digital outputs on your CD player or other digital device.

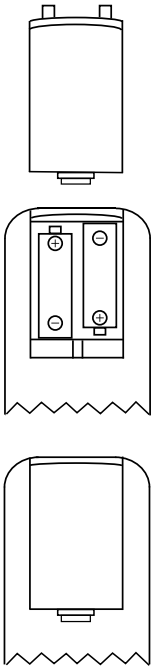
Connections to a portable digital CD or MD player may also be made by connecting the Coax or Optical Digital Output of the player to one of the front-panel Digital Inputs 16 17 on the CDR 26.

IMPORTANT NOTE ON DIGITAL CONNECTIONS:

Although digital-coax connections use the same type of "RCA" phono jack as standard analog signals, please take special care to connect digital signals only to digital jacks. In many cases, the digital jacks may be identified by an orange-colored insert ring around the center of the jack. When making digital connections, be sure to use coax-interconnect cables, such as the one supplied with the CDR 26 or cables intended for video applications. Even though they have the correct type of RCA connector, do not use audio-interconnect cables that have twisted-pair construction, as they are not appropriate for digital signal use. If you have any questions about the type of cables to use with the CDR 26, consult your dealer.

Batteries

Insert the two AA batteries supplied with the CDR 26's remote by turning the remote over so that the bottom of the remote is facing towards you. Gently lift the plastic tab on the battery cover up and away from you, and lift the lid off. Insert the batteries in the remote, being careful to follow the + and – polarity indications in the bottom of the compartment. Replace the cover by first seating the two small tabs into the mating holes at the top of the remote, and then gently push the cover down until the latch snaps into place with an audible click.



NOTE: When replacing batteries, it is always a good idea to replace both at the same time. When the remote will not be used for an extended period of time, it is also a good idea to remove the batteries to avoid the possibility of damage due to corrosion. Batteries contain chemical substances and we recommend that you dispose of them properly and in compliance with any local regulations.

IR Remote Connections

If the CDR 26 is installed behind a cabinet or other obstruction that may block the path between the front-panel Remote Sensor 28 and the location where you will use the remote, an optional external IR sensor may be used. Connect the sensor to the Remote IR In Jack 7 on the rear panel. This jack may also be connected to the IR Output jack of another compatible Harman Kardon component or a compatible IR system remote product.

You may also use the IR sensor in the CDR 26 to send commands to other compatible remote products. Connect the Remote IR Out Jack 8 to the input of the other product or system.

Power Connections

Connect the AC Power Cord 9 to an AC power source. The CDR 26 uses sensitive, high-performance computer-grade CD drives, and to protect them we recommend that you consider the use of a surge protector, just as you would for a computer.

If the rear-panel AC outlet on a receiver or other product is used, make certain that the total power of all products connected does not exceed the maximum rated output of the product containing the outlets. If the CDR 26 is connected to a switched outlet, remember to turn on the outlet or product controlling it in order for the CDR 26 to operate.

TROUBLESHOOTING GUIDE

SYMPTOM	POSSIBLE CAUSE	SOLUTION
Unit does not operate when Standby switch or remote Power-On is pressed	• No AC power • Main Power Switch is off	• Make certain AC power cord is plugged into a live outlet • Check to see whether AC outlet is switch-controlled • Turn on Main Power
Remote does not function	• Wrong deck selected • Dead batteries • Sensor blocked	• Press the CDP Button 4 to control the Play Deck 3; press the CDR Button 27 to control the Record Deck 15 • Replace both batteries • Remove obstructions from front panel or connect a remote sensor to the Remote-In Jack
Disc does not erase	• CD-R disc in use	• CD-R discs do not erase; only CD-RW discs may be erased
Recorded CD-R disc does not play in another CD player or DISC ERROR message appears in play deck	• CD-R disc not finalized	• Finalize the CD-R disc in the CDR 26's record deck (see page 21)
Recording suddenly stops	• Input source stopped or paused	• Recordings will stop when the input source is paused for more than three seconds for digital recordings and 10 seconds for analog recordings

ERROR MESSAGES

MESSAGE	EXPLANATION AND PROBABLE CAUSE	SOLUTION
CHECK DISC	• A record-related button has been pressed when a finalized disc is in the Record Deck 15 • A record-related button has been pressed when a standard CD is in the Record Deck 15	• Unfinalize the disc to add tracks to a CD-RW disc • Replace the disc with a blank CD-R or CD-RW disc • Replace the disc with a blank CD-R or CD-RW disc
DATA DISC	• A non-audio CD-ROM or a CD Video disc has been placed in the machine	• Only CD Audio and DTS® discs will play in the CDR 26; replace the disc
DISC ERROR	• An unfinalized disc has been placed in the Play Deck 3 • A DVD has been placed in the unit	• Finalize the disc (see page 21) • Replace the disc; the CDR 26 does not play or dub DVDs
DISC FULL	• There are only four seconds of record time remaining on the disc being recorded	• Use another blank CD-R or CD-RW disc • Erase one or more tracks on a CD-RW disc
ERROR	• The disc is not seated properly • There is a problem with the disc	• Open the drawer and check to see that the disc is properly seated • Try another disc
FAILED	• A dub has not been completed properly	• Check the play disc • Repeat the dub process
FULL	• More than 99 tracks have been recorded	• The CDR 26 does not record more than 99 tracks on a disc
NO AUDIO	• A record-related button has been pressed when a non-audio disc is in the Record Deck 15	• Replace the disc with a blank CD-R or CD-RW Audio disc
SVC-1	• There is an internal problem with the CDR 26	• Contact an authorized Harman Kardon service center

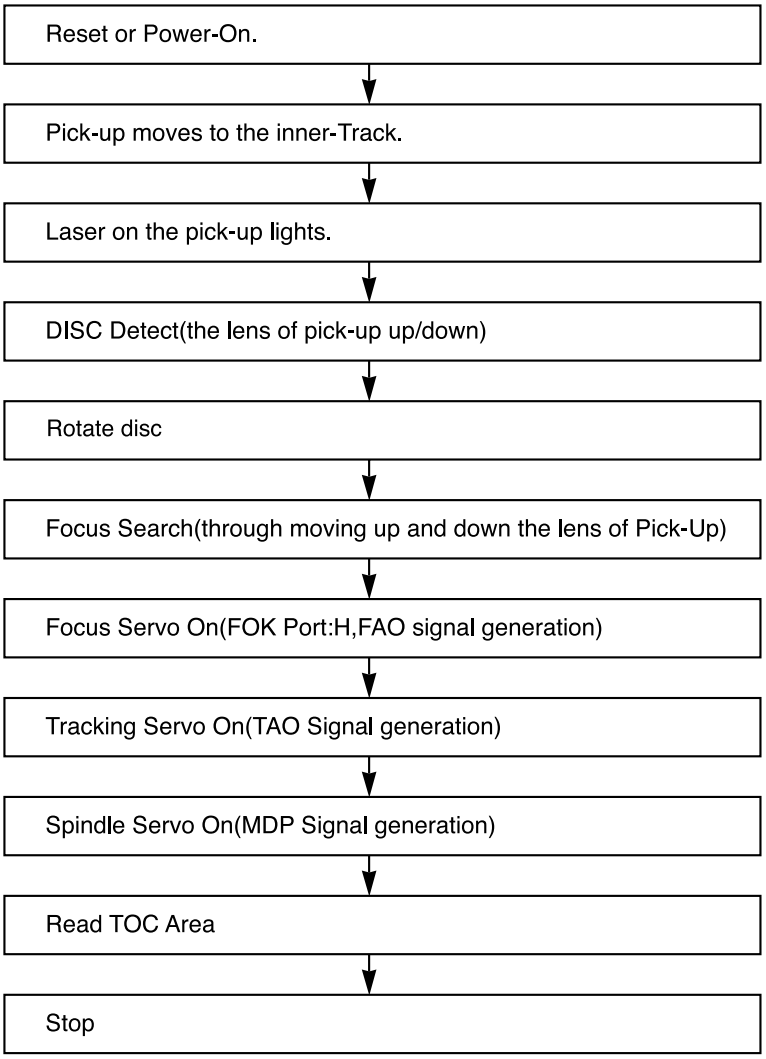
TROUBLESHOOTING GUIDE

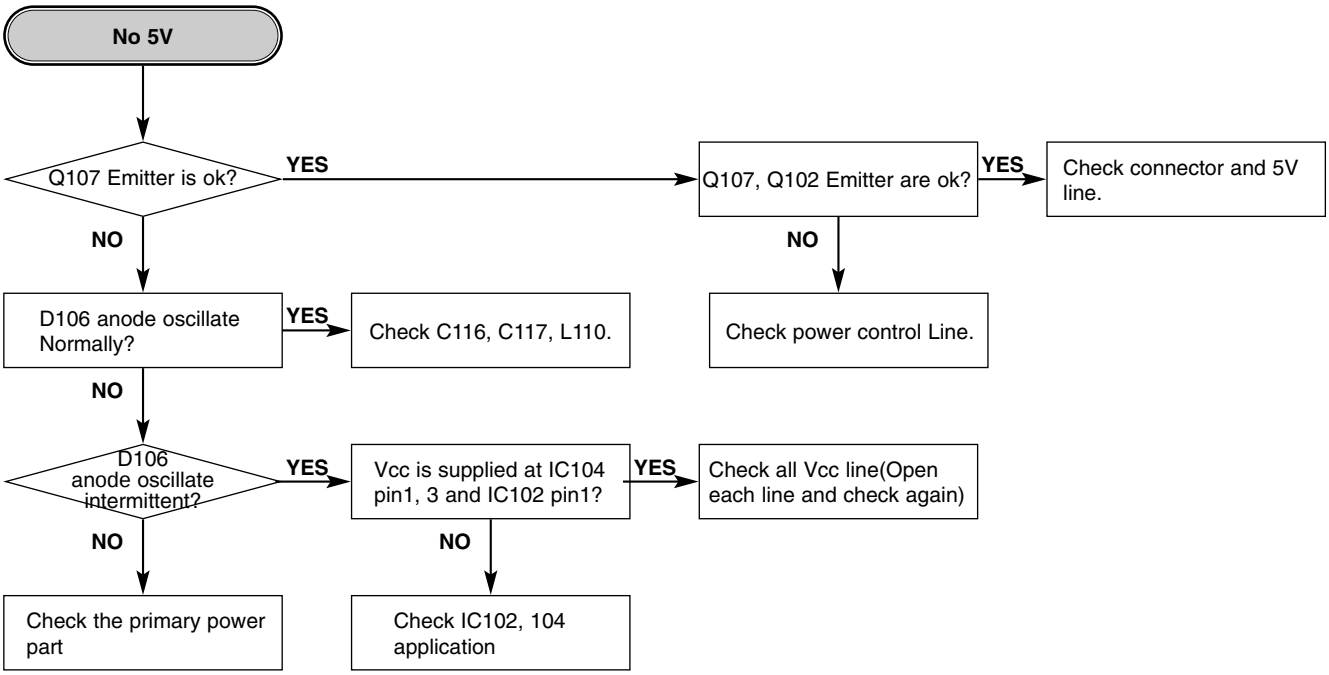
1. Initial Lead-in Operation



2. Trouble List(Circuit)

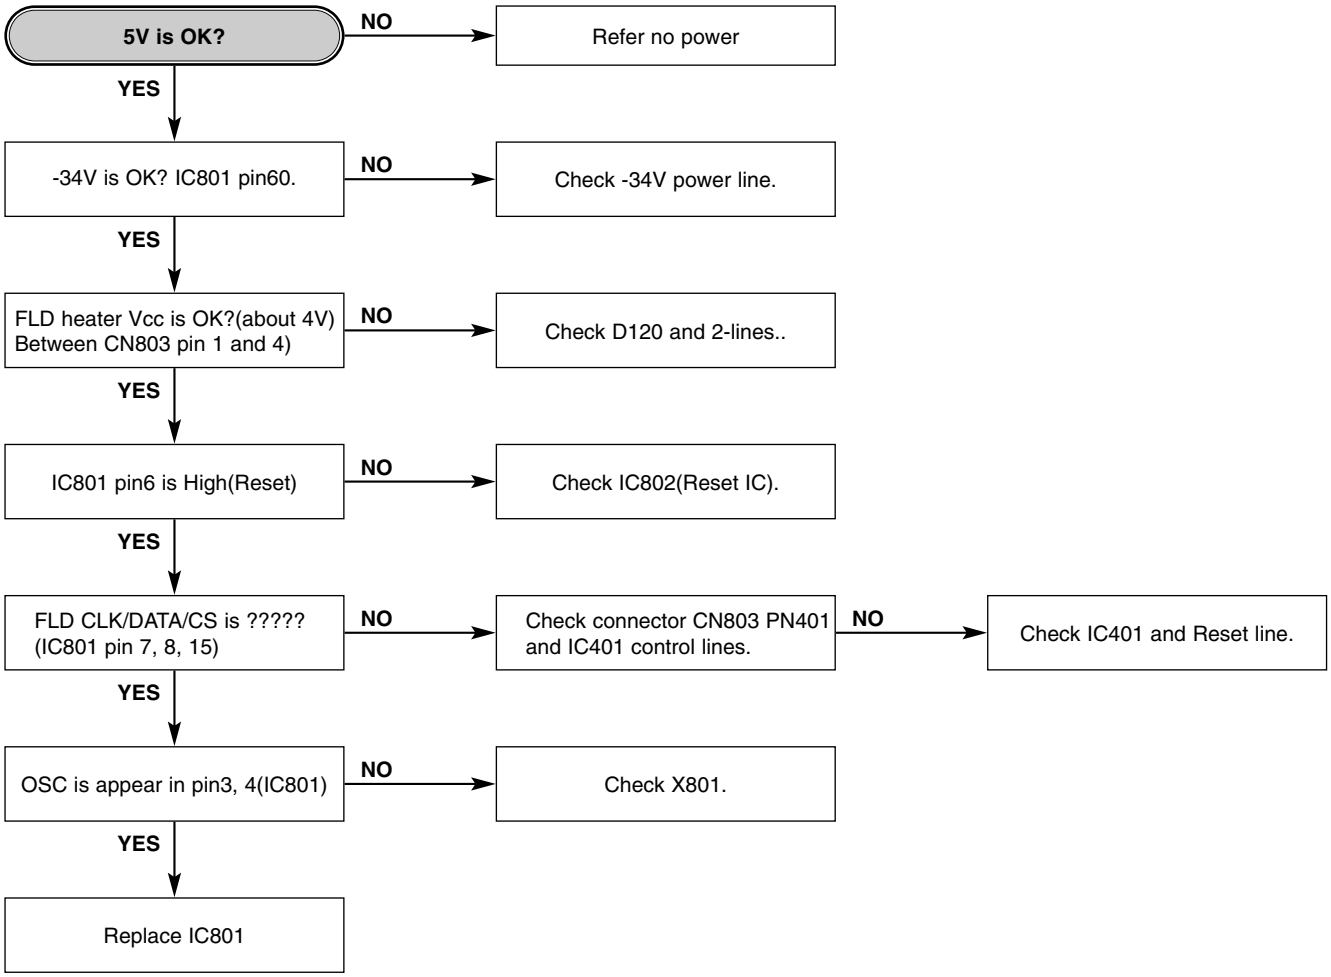
(In the Initial Lead-in Operation Mode)
A. Pick-Up doesn't move to the inner-track.
B. Pick-Up lens doesn't move up and down.
C. Disc doesn't rotate.
D. The Laser(RED) of Pick-Up doesn't light.
E. TOC isn't read.

3. No power

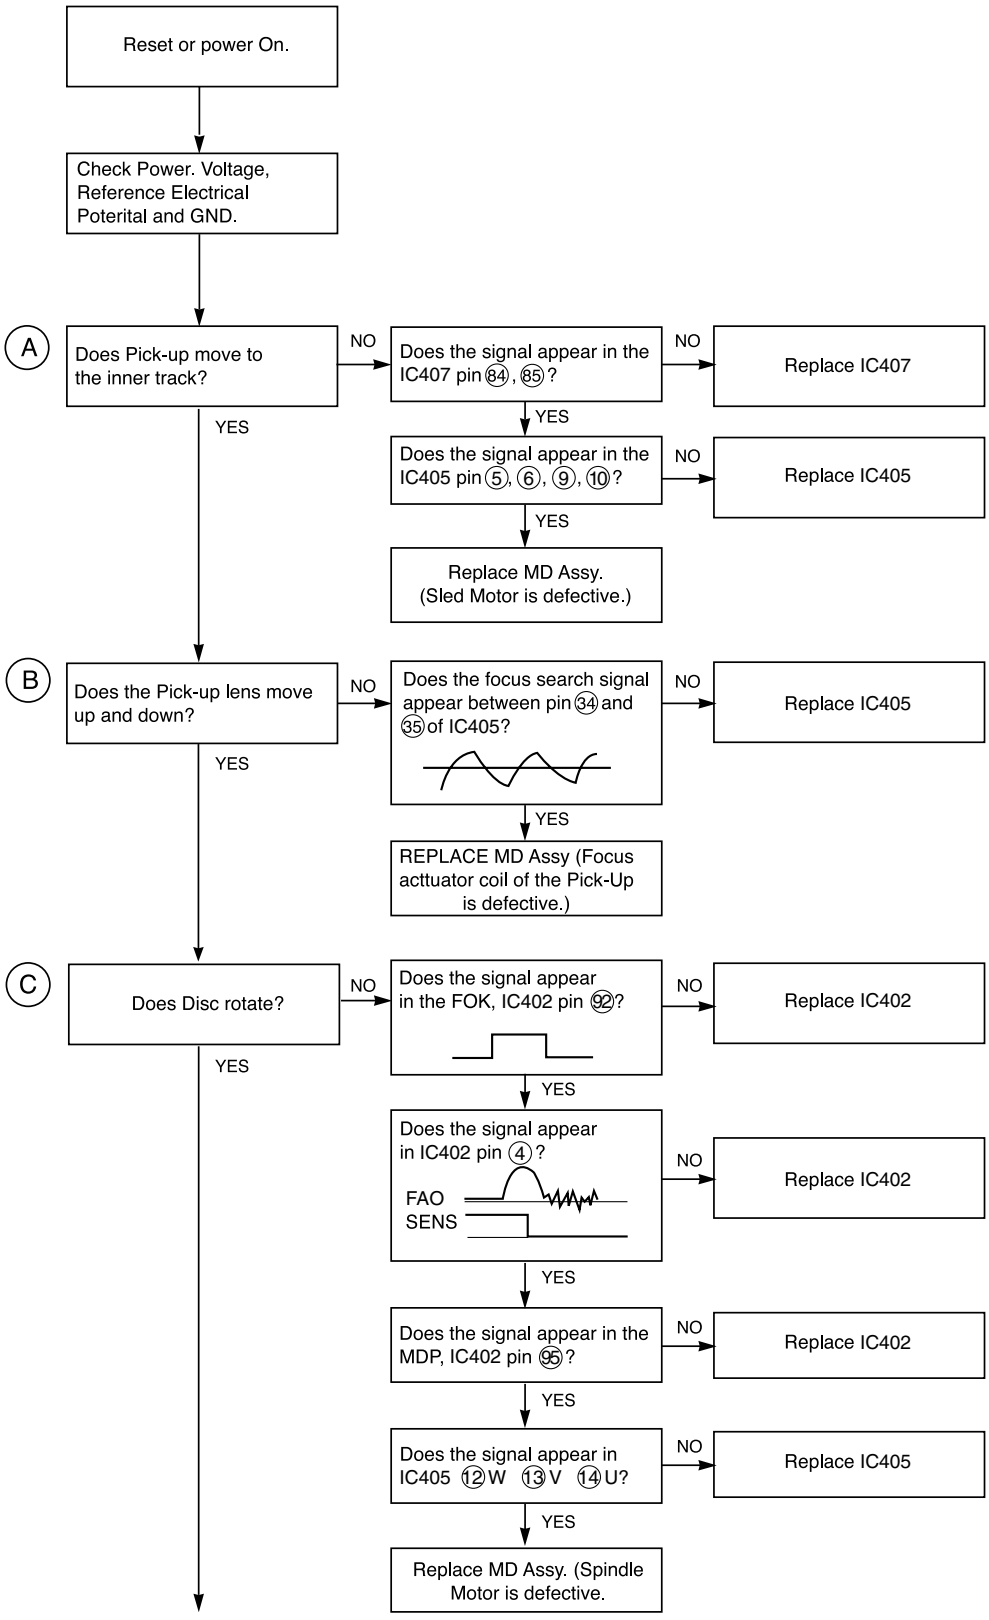


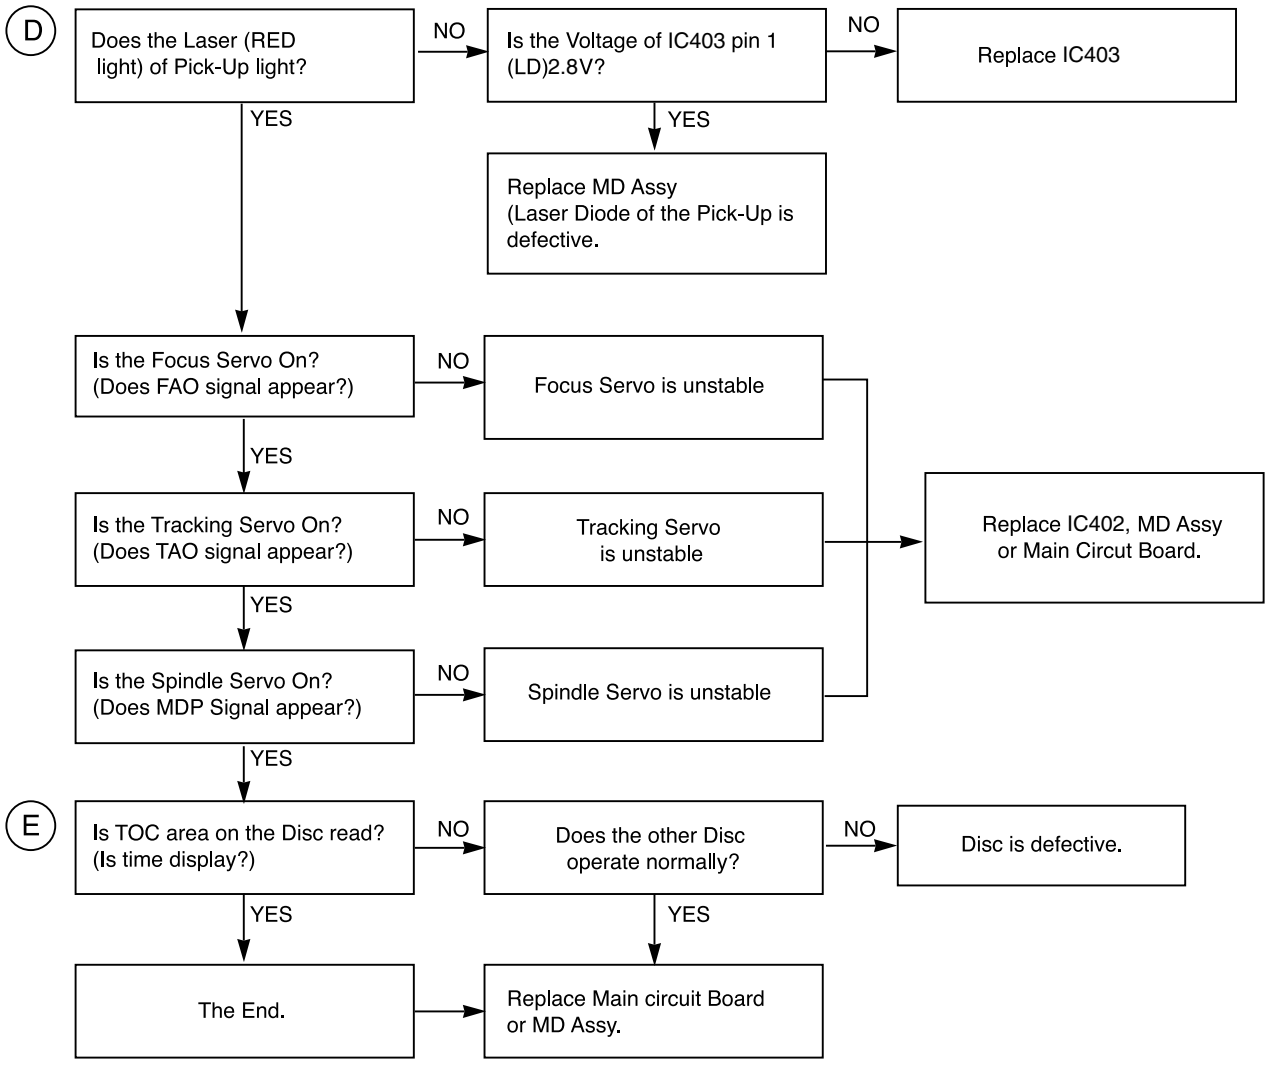
No 5V
Q107 Emitter is ok?
YES
Q107, Q102 Emitter are ok?
YES
Check connector and 5V line.
NO
NO
D106 anode oscillate Normally?
YES
Check C116, C117, L110.
Check power control Line.
NO
D106 anode oscillate intermittent?
YES
Vcc is supplied at IC104 pin1, 3 and IC102 pin1?
YES
Check all Vcc line(Open each line and check again)
NO
NO
Check the primary power part
Check IC102, 104 application

4. FLD No Display

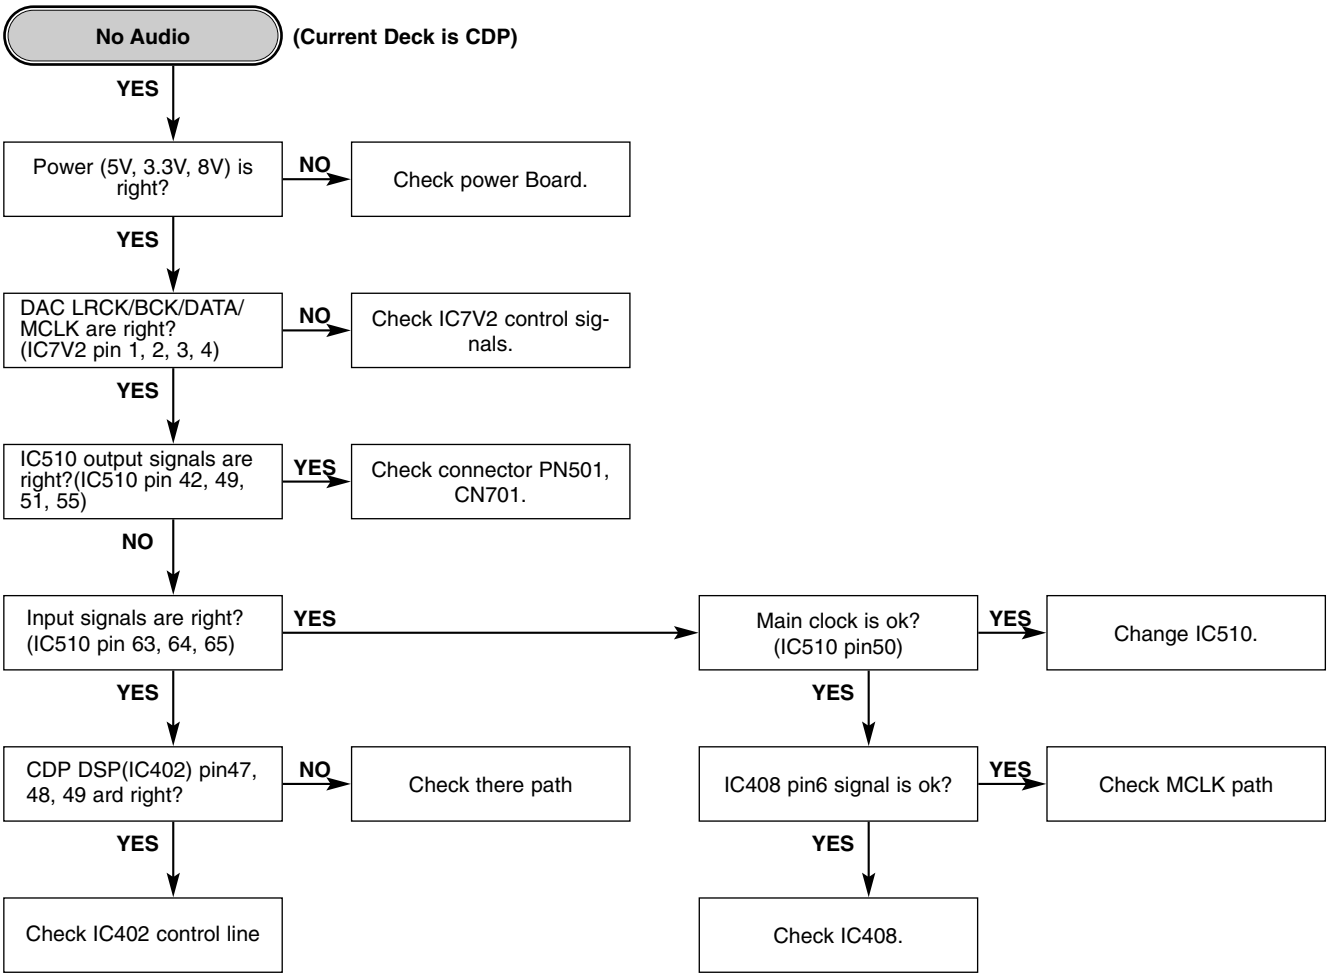


5. Troubleshooting Guide(In the Initial Lead-in Operation Mode)

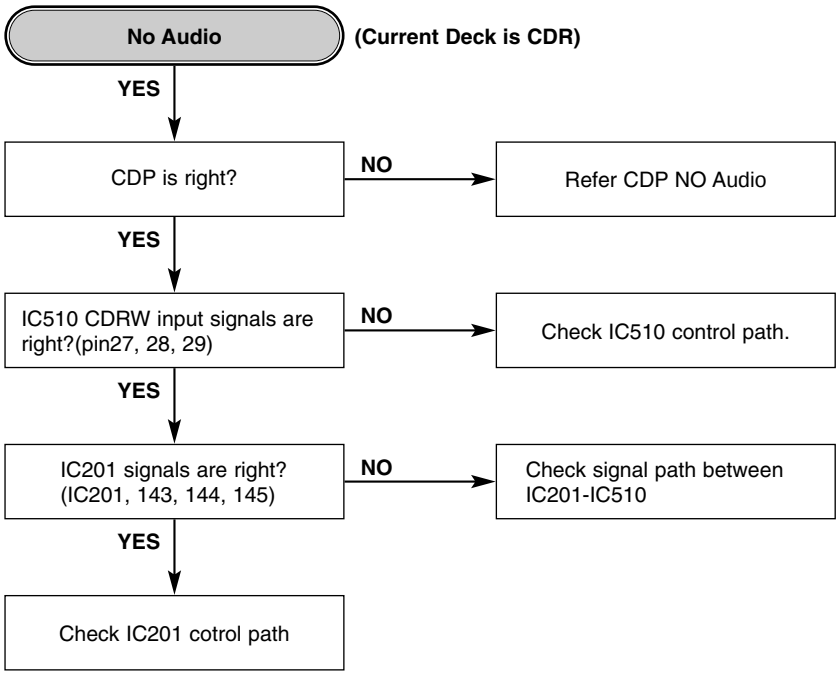




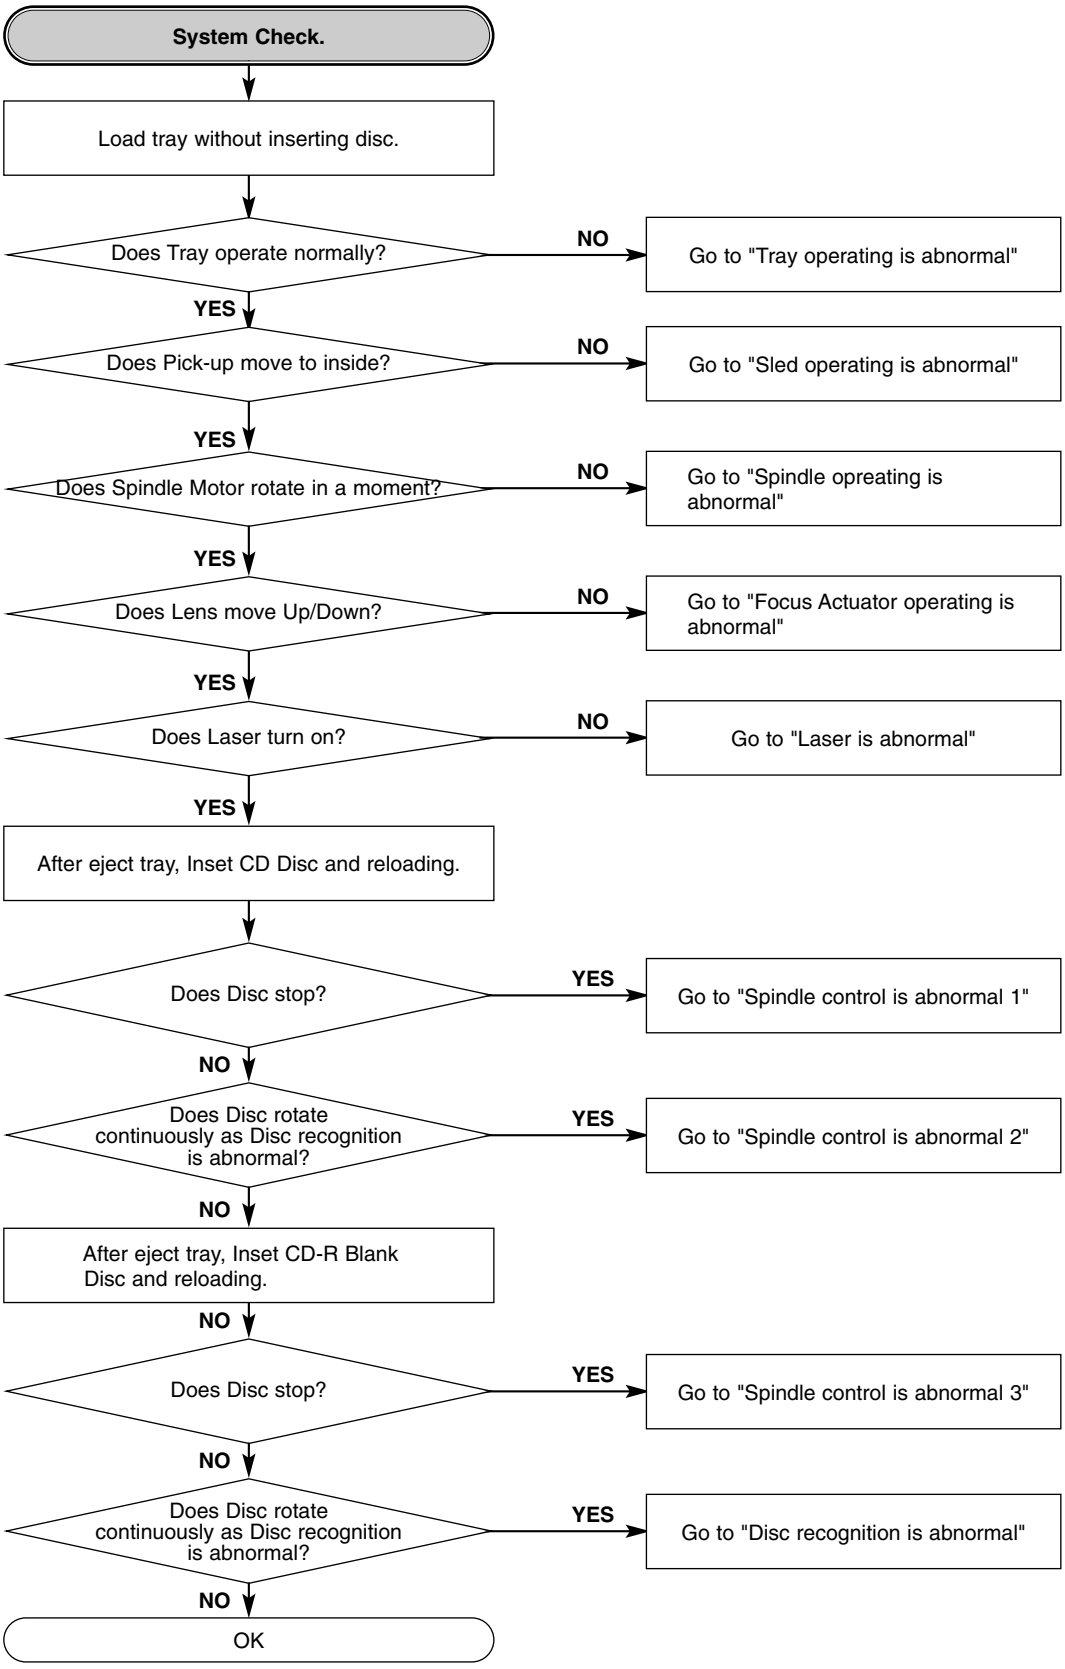
D
Does the Laser (RED light) of Pick-Up light?
NO
Is the Voltage of IC403 pin 1 (LD)2.8V?
NO
Replace IC403
YES
YES
Replace MD Assy (Laser Diode of the Pick-Up is defective.
Is the Focus Servo On? (Does FAO signal appear?)
NO
Focus Servo is unstable
YES
Is the Tracking Servo On? (Does TAO signal appear?)
NO
Tracking Servo is unstable
Replace IC402, MD Assy or Main Circut Board.
YES
Is the Spindle Servo On? (Does MDP Signal appear?)
NO
Spindle Servo is unstable
YES
E
Is TOC area on the Disc read? (Is time display?)
NO
Does the other Disc operate normally?
NO
Disc is defective.
YES
YES
The End.
Replace Main circuit Board or MD Assy.



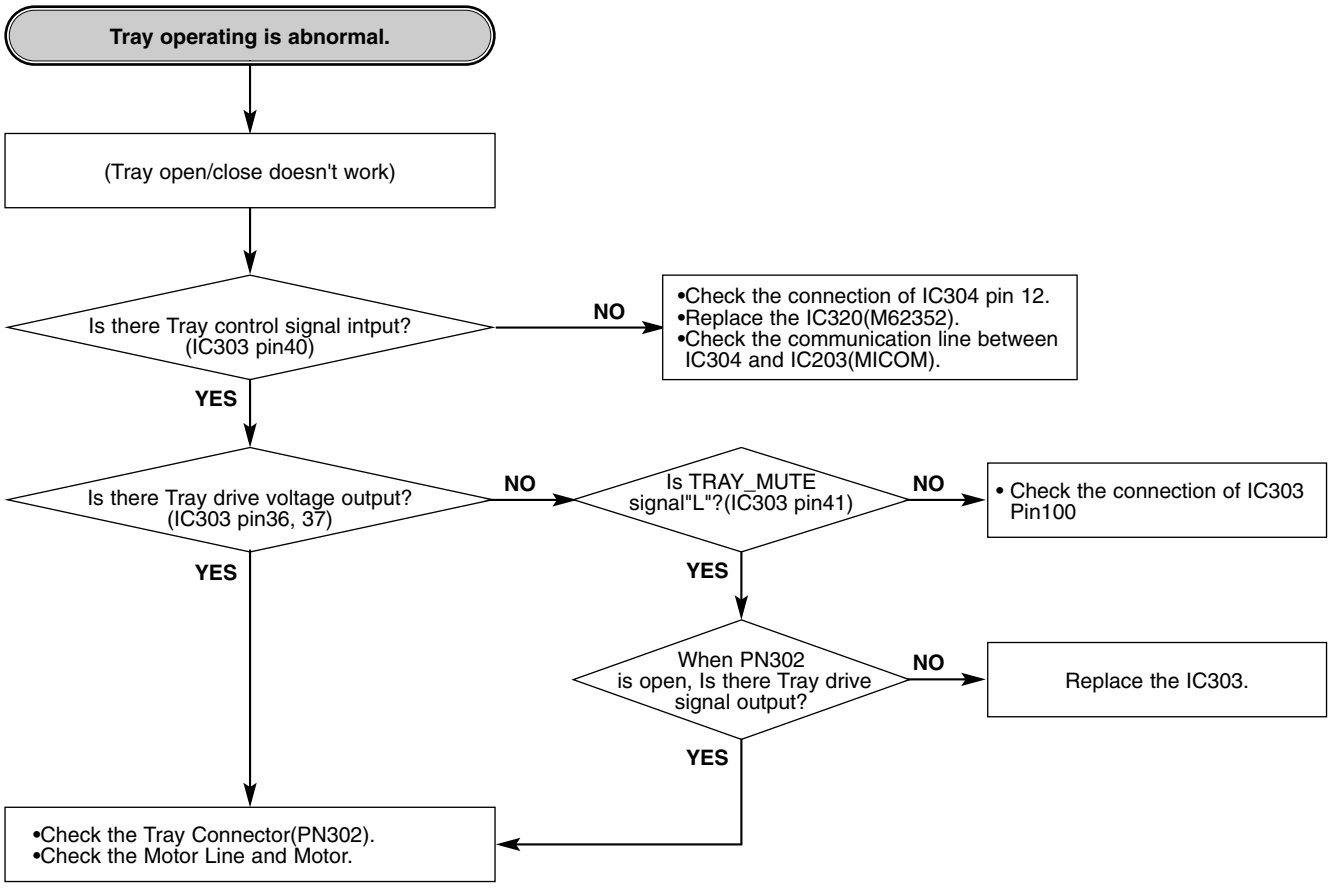
No Audio
(Current Deck is CDP)
YES
Power (5V, 3.3V, 8V) is right?
NO
Check power Board.
YES
DAC LRCK/BCK/DATA/ MCLK are right? (IC7V2 pin 1, 2, 3, 4)
NO
Check IC7V2 control signals.
YES
IC510 output signals are right?(IC510 pin 42, 49, 51, 55)
YES
Check connector PN501, CN701.
NO
Input signals are right? (IC510 pin 63, 64, 65)
YES
Main clock is ok? (IC510 pin50)
YES
Change IC510.
YES
YES
CDP DSP(IC402) pin47, 48, 49 ard right?
NO
Check there path
IC408 pin6 signal is ok?
YES
Check MCLK path
YES
YES
Check IC402 control line
Check IC408.



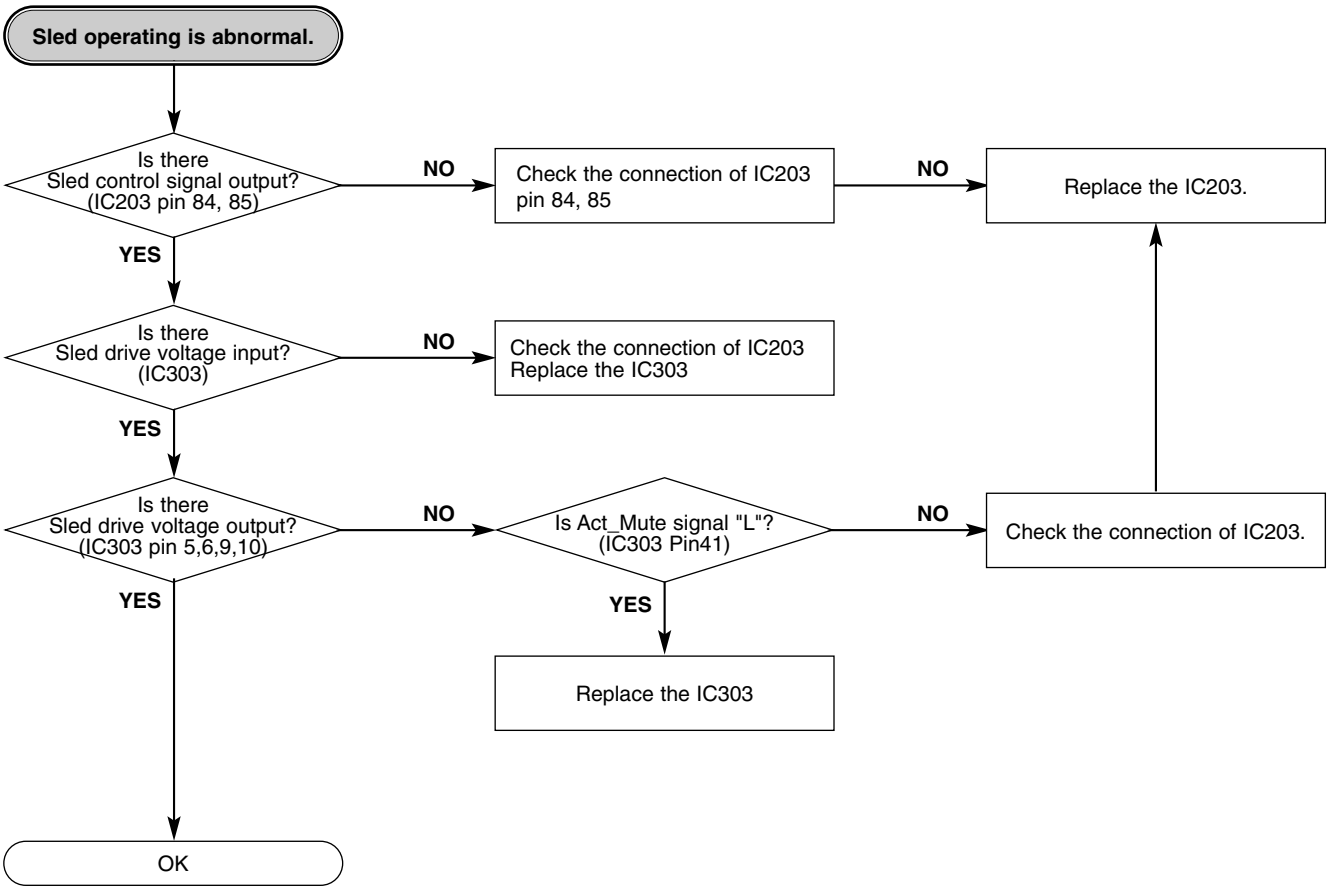
No Audio
(Current Deck is CDR)
YES
CDP is right?
NO
Refer CDP NO Audio
YES
IC510 CDRW input signals are right?(pin27, 28, 29)
NO
Check IC510 control path.
YES
IC201 signals are right? (IC201, 143, 144, 145)
NO
Check signal path between IC201-IC510
YES
Check IC201 cotrol path



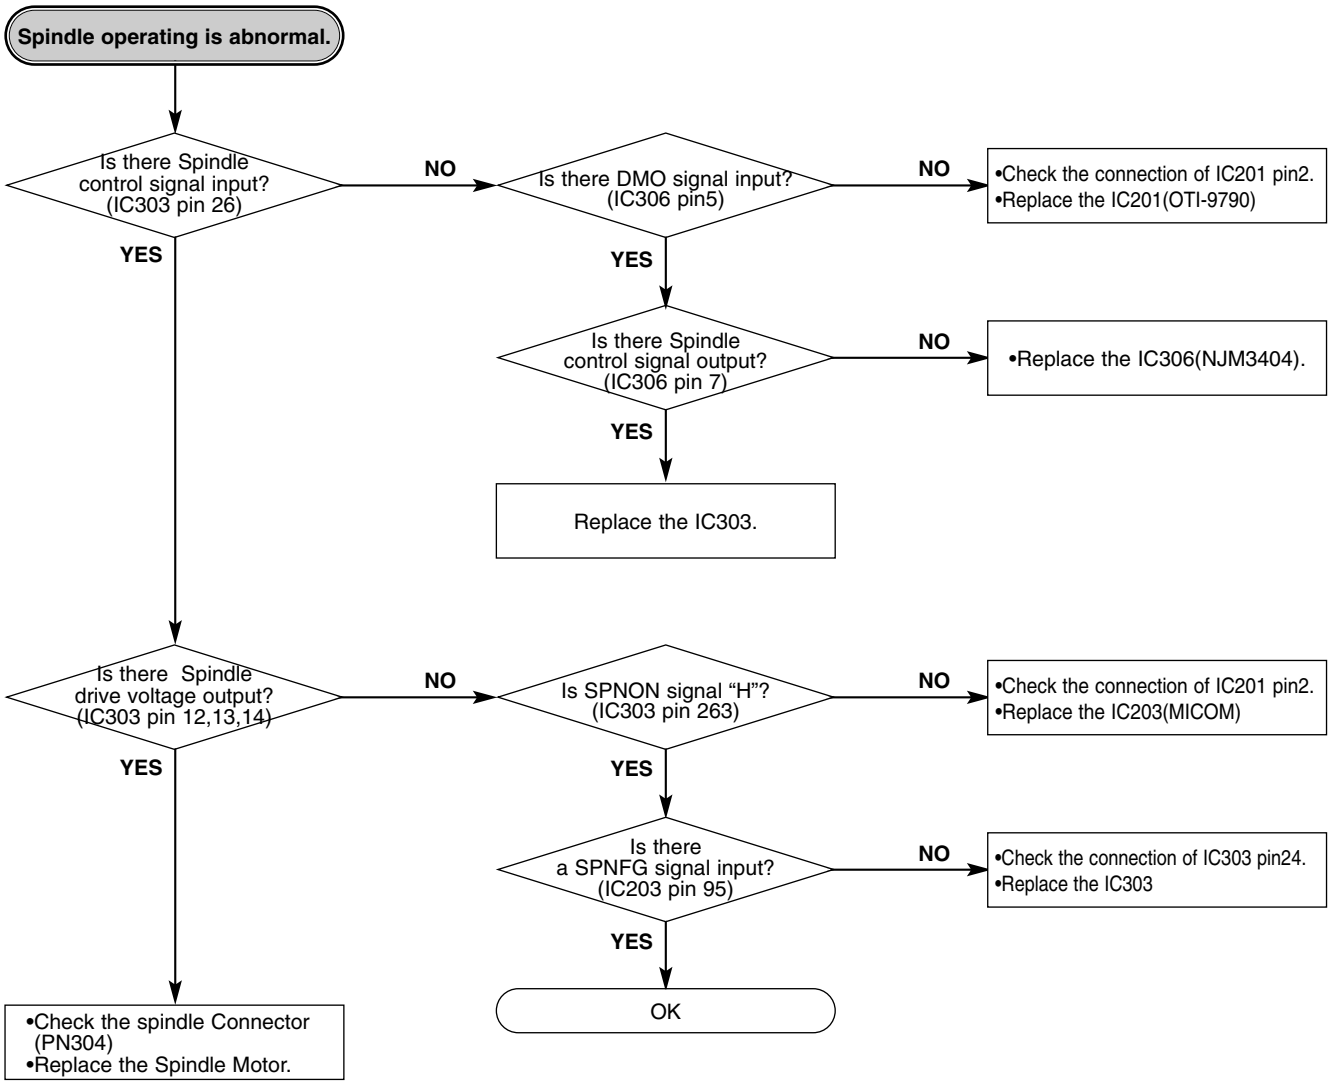
System Check.
Load tray without inserting disc.
Does Tray operate normally?
NO
Go to "Tray operating is abnormal"
YES
Does Pick-up move to inside?
NO
Go to "Sled operating is abnormal"
YES
Does Spindle Motor rotate in a moment?
NO
Go to "Spindle opreating is abnormal"
YES
Does Lens move Up/Down?
NO
Go to "Focus Actuator operating is abnormal"
YES
Does Laser turn on?
NO
Go to "Laser is abnormal"
YES
After eject tray, Inset CD Disc and reloading.
Does Disc stop?
YES
Go to "Spindle control is abnormal 1"
NO
Does Disc rotate continuously as Disc recognition is abnormal?
YES
Go to "Spindle control is abnormal 2"
NO
After eject tray, Inset CD-R Blank Disc and reloading.
NO
Does Disc stop?
YES
Go to "Spindle control is abnormal 3"
NO
Does Disc rotate continuously as Disc recognition is abnormal?
YES
Go to "Disc recognition is abnormal"
NO
OK



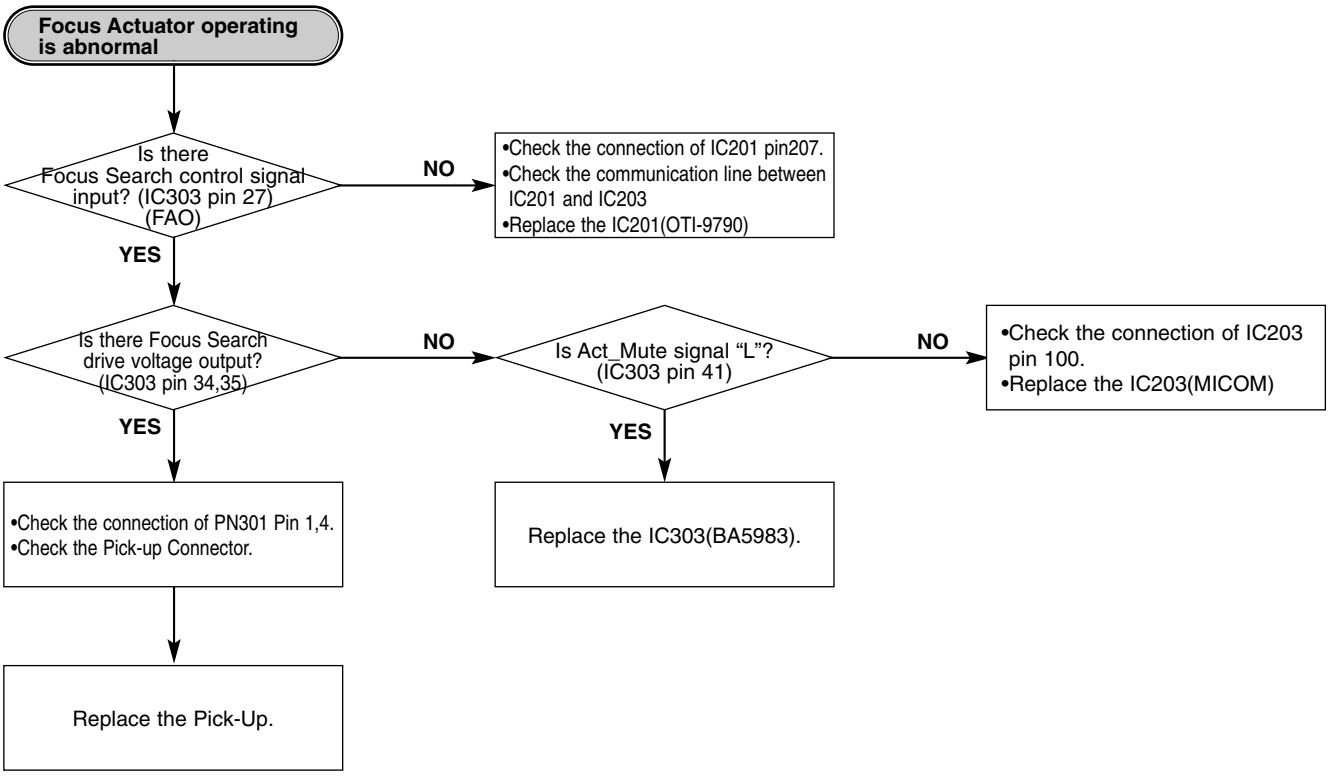
Tray operating is abnormal.
(Tray open/close doesn't work)
Is there Tray control signal intput?
(IC303 pin40)
NO
•Check the connection of IC304 pin 12.
•Replace the IC320(M62352).
•Check the communication line between IC304 and IC203(MICOM).
YES
Is there Tray drive voltage output?
(IC303 pin36, 37)
NO
Is TRAY_MUTE signal"L"?(IC303 pin41)
NO
• Check the connection of IC303 Pin100
YES
YES
When PN302 is open, Is there Tray drive signal output?
NO
Replace the IC303.
YES
•Check the Tray Connector(PN302).
•Check the Motor Line and Motor.



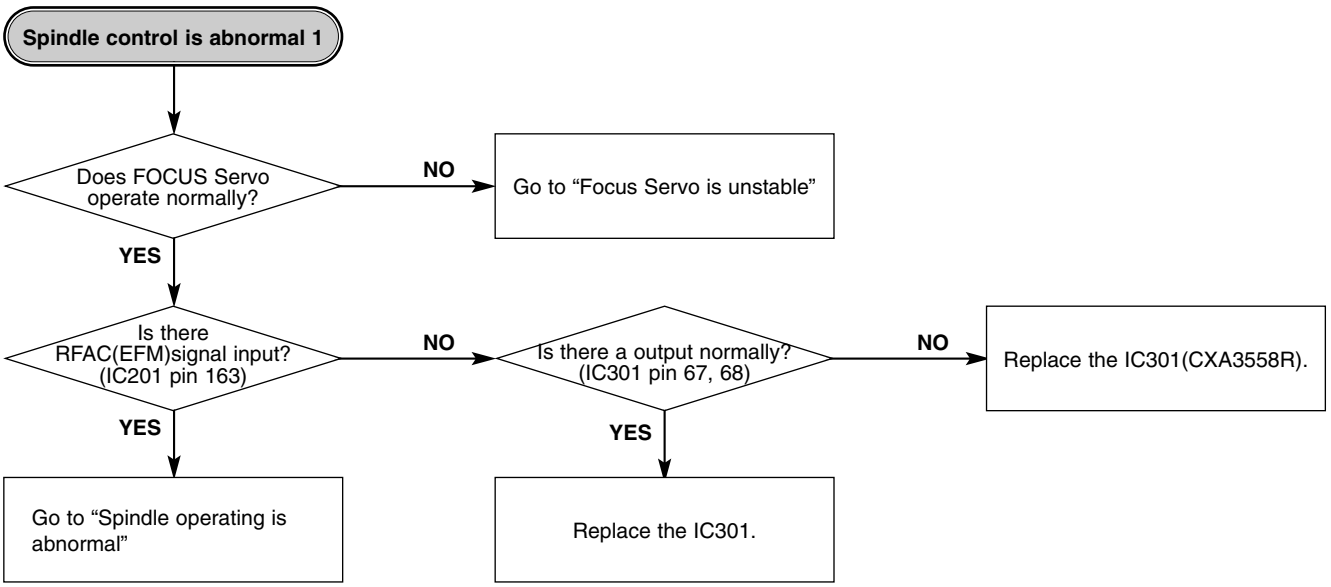
Sled operating is abnormal.
Is there Sled control signal output? (IC203 pin 84, 85)
NO
Check the connection of IC203 pin 84, 85
NO
Replace the IC203.
YES
Is there Sled drive voltage input? (IC303)
NO
Check the connection of IC203 Replace the IC303
YES
Is there Sled drive voltage output? (IC303 pin 5,6,9,10)
NO
Is Act_Mute signal "L"? (IC303 Pin41)
NO
Check the connection of IC203.
YES
YES
Replace the IC303
OK



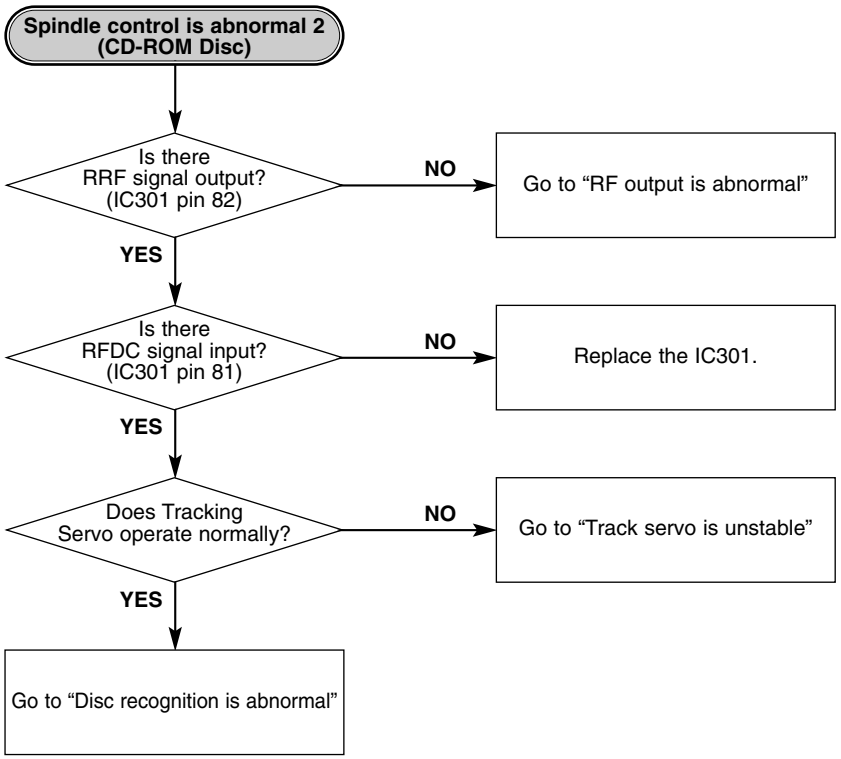
Spindle operating is abnormal.
Is there Spindle control signal input? (IC303 pin 26)
NO
Is there DMO signal input? (IC306 pin5)
NO
•Check the connection of IC201 pin2.
•Replace the IC201(OTI-9790)
YES
YES
Is there Spindle control signal output? (IC306 pin 7)
NO
•Replace the IC306(NJM3404).
YES
Replace the IC303.
Is there Spindle drive voltage output? (IC303 pin 12,13,14)
NO
Is SPNON signal “H”? (IC303 pin 263)
NO
•Check the connection of IC201 pin2.
•Replace the IC203(MICOM)
YES
YES
Is there a SPNFG signal input? (IC203 pin 95)
NO
•Check the connection of IC303 pin24.
•Replace the IC303
YES
OK
•Check the spindle Connector (PN304)
•Replace the Spindle Motor.



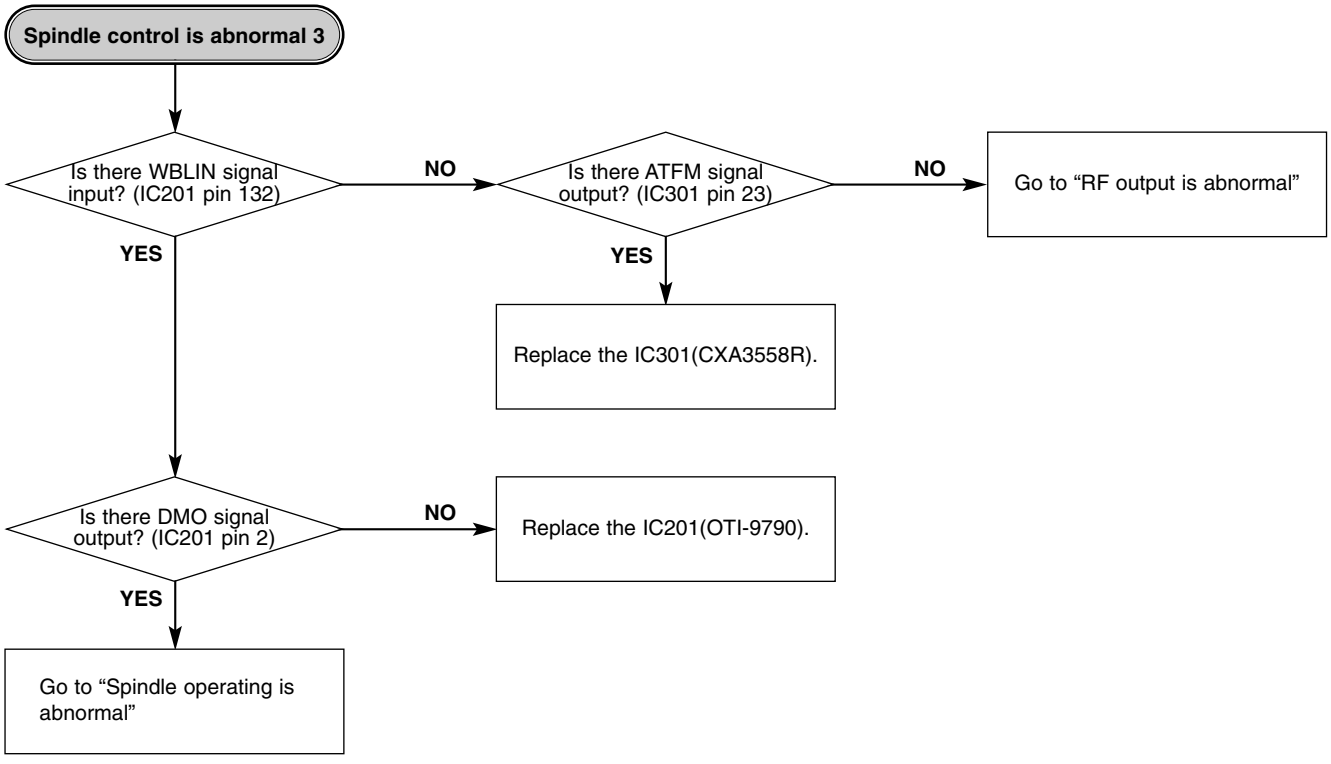
Focus Actuator operating is abnormal
Is there Focus Search control signal input? (IC303 pin 27) (FAO)
NO
•Check the connection of IC201 pin207.
•Check the communication line between IC201 and IC203
•Replace the IC201(OTI-9790)
YES
Is there Focus Search drive voltage output? (IC303 pin 34,35)
NO
Is Act_Mute signal "L"? (IC303 pin 41)
NO
•Check the connection of IC203 pin 100.
•Replace the IC203(MICOM)
YES
YES
•Check the connection of PN301 Pin 1,4.
•Check the Pick-up Connector.
Replace the IC303(BA5983).
Replace the Pick-Up.



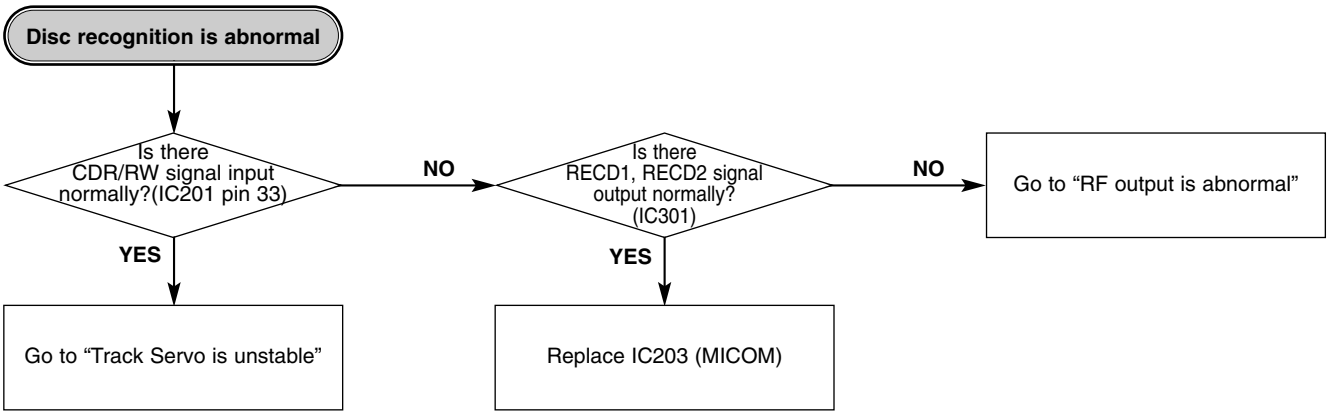
Spindle control is abnormal 1
Does FOCUS Servo operate normally?
NO
Go to "Focus Servo is unstable"
YES
Is there RFAC(EFM)signal input? (IC201 pin 163)
NO
Is there a output normally? (IC301 pin 67, 68)
NO
Replace the IC301(CXA3558R).
YES
YES
Go to "Spindle operating is abnormal"
Replace the IC301.



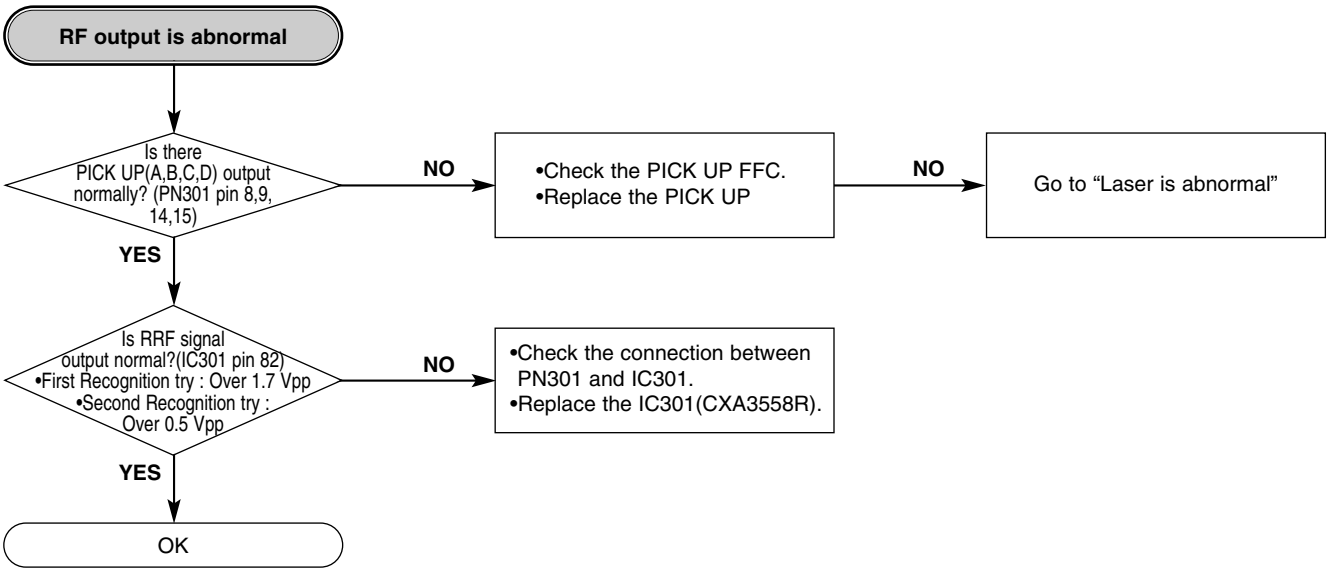
Spindle control is abnormal 2 (CD-ROM Disc)
Is there RRF signal output? (IC301 pin 82)
NO
Go to “RF output is abnormal”
YES
Is there RFDC signal input? (IC301 pin 81)
NO
Replace the IC301.
YES
Does Tracking Servo operate normally?
NO
Go to “Track servo is unstable”
YES
Go to “Disc recognition is abnormal”



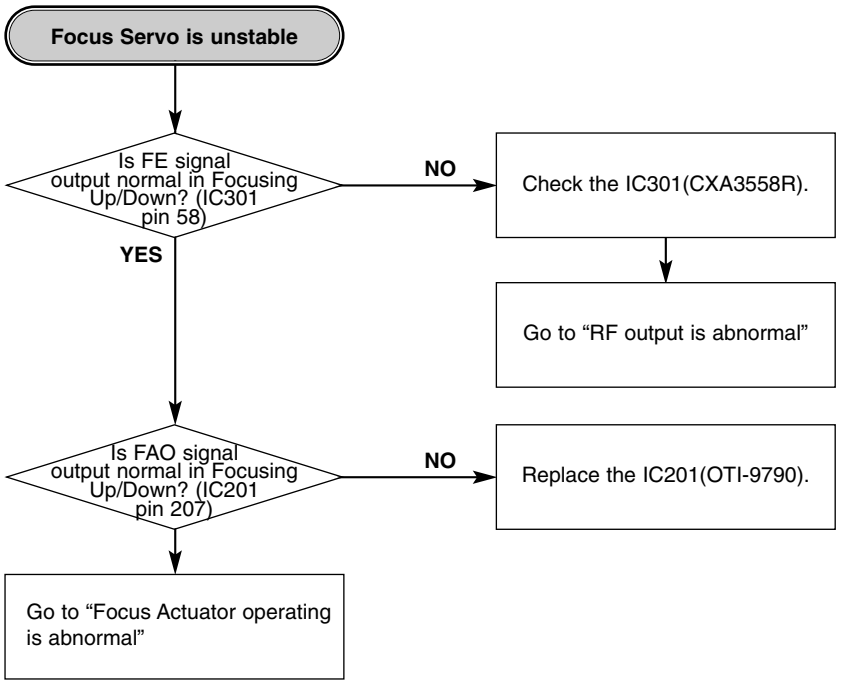
Spindle control is abnormal 3
Is there WBLIN signal input? (IC201 pin 132)
NO
Is there ATFM signal output? (IC301 pin 23)
NO
Go to “RF output is abnormal”
YES
YES
Replace the IC301(CXA3558R).
Is there DMO signal output? (IC201 pin 2)
NO
Replace the IC201(OTI-9790).
YES
Go to “Spindle operating is abnormal”



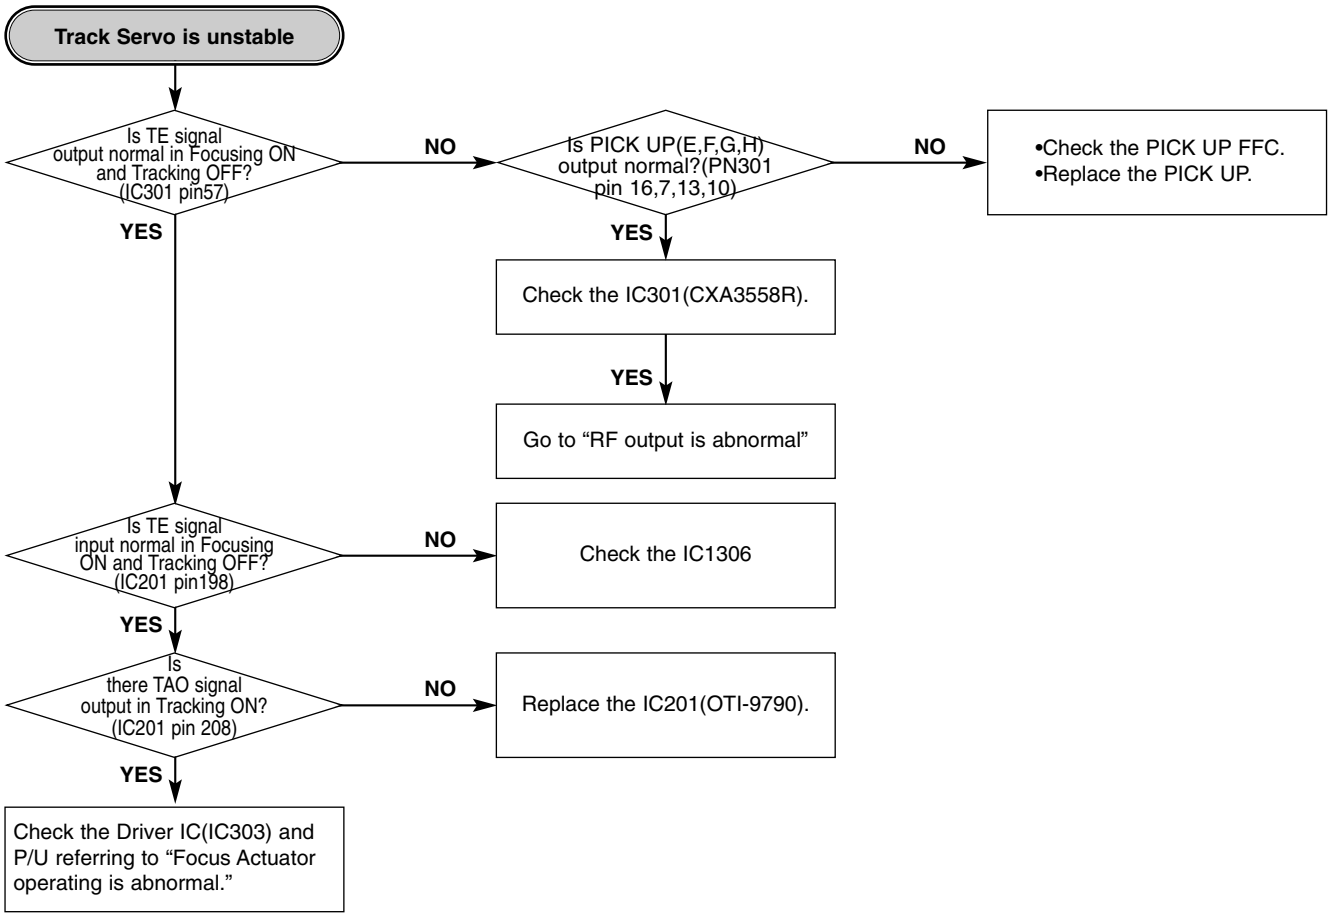
Disc recognition is abnormal
Is there CDR/RW signal input normally?(IC201 pin 33)
NO
Is there RECD1, RECD2 signal output normally? (IC301)
NO
Go to “RF output is abnormal”
YES
YES
Go to “Track Servo is unstable”
Replace IC203 (MICOM)



RF output is abnormal
Is there PICK UP(A,B,C,D) output normally? (PN301 pin 8,9, 14,15)
NO
•Check the PICK UP FFC.
•Replace the PICK UP
NO
Go to “Laser is abnormal”
YES
Is RRF signal output normal?(IC301 pin 82)
•First Recognition try : Over 1.7 Vpp
•Second Recognition try : Over 0.5 Vpp
NO
•Check the connection between PN301 and IC301.
•Replace the IC301(CXA3558R).
YES
OK

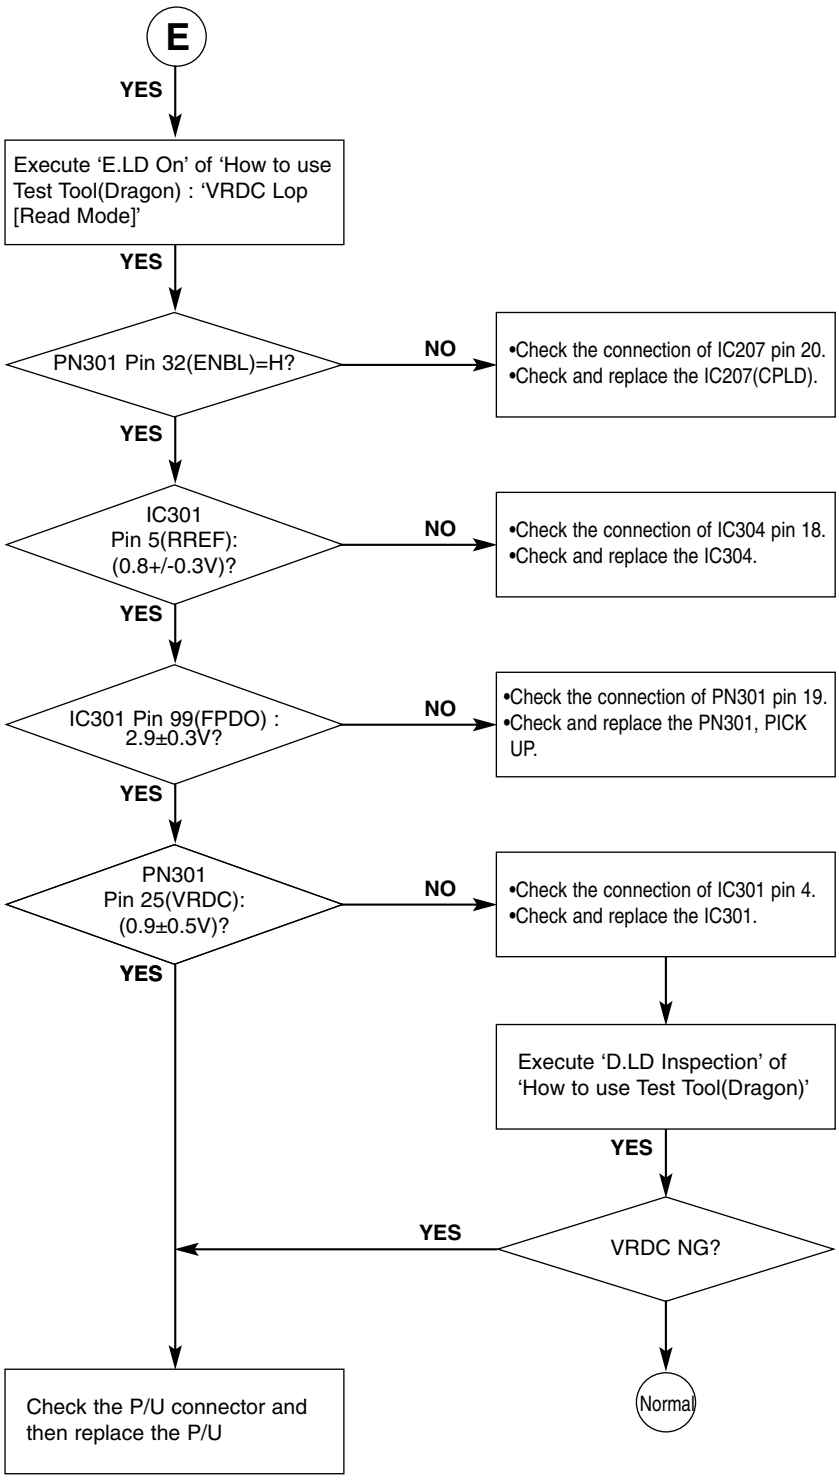


Focus Servo is unstable
Is FE signal output normal in Focusing Up/Down? (IC301 pin 58)
NO
Check the IC301(CXA3558R).
YES
Go to “RF output is abnormal”
Is FAO signal output normal in Focusing Up/Down? (IC201 pin 207)
NO
Replace the IC201(OTI-9790).
Go to “Focus Actuator operating is abnormal”

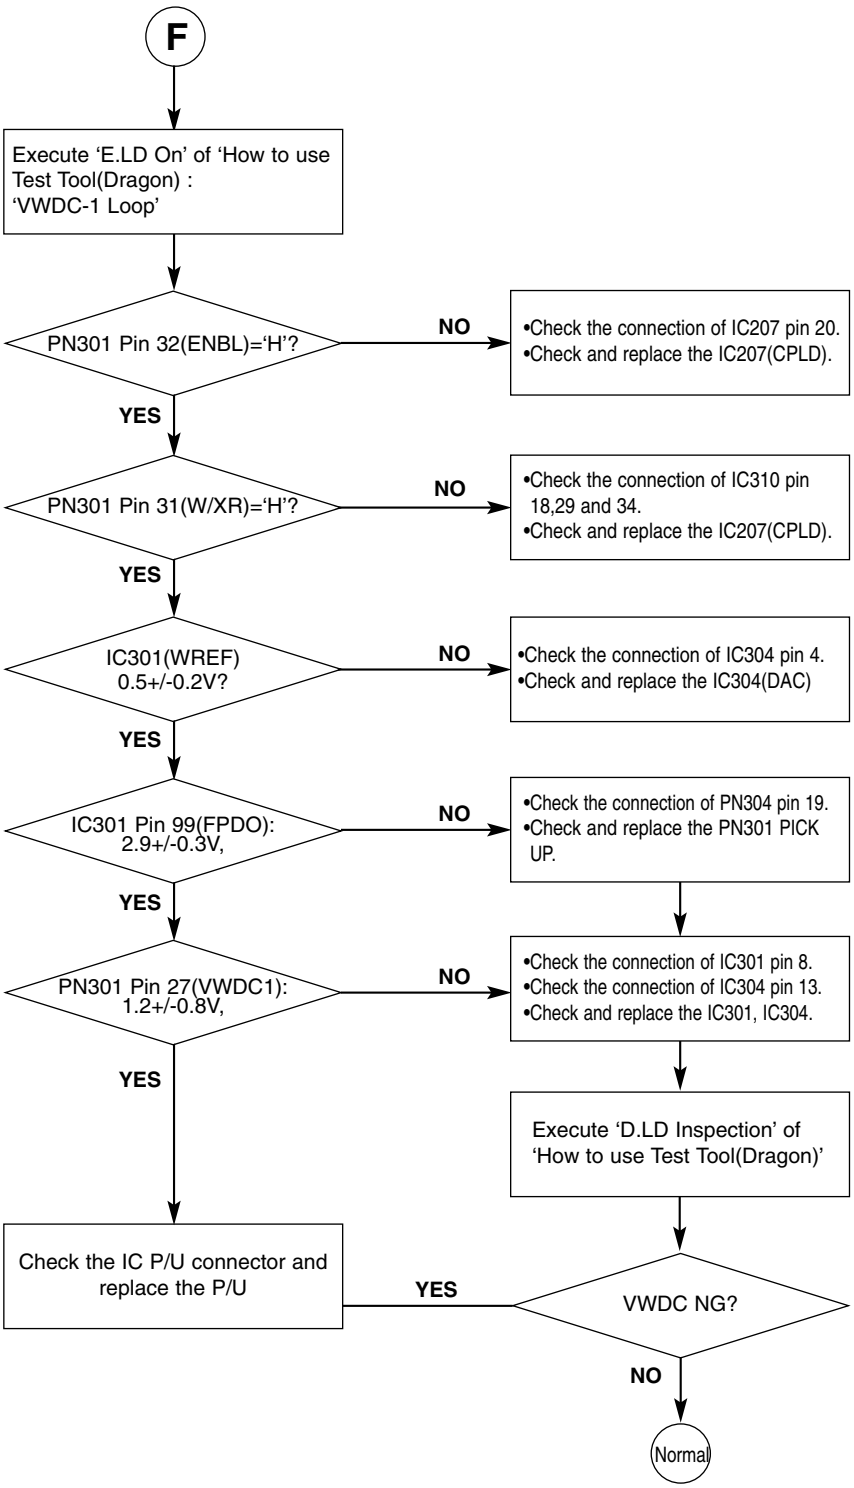


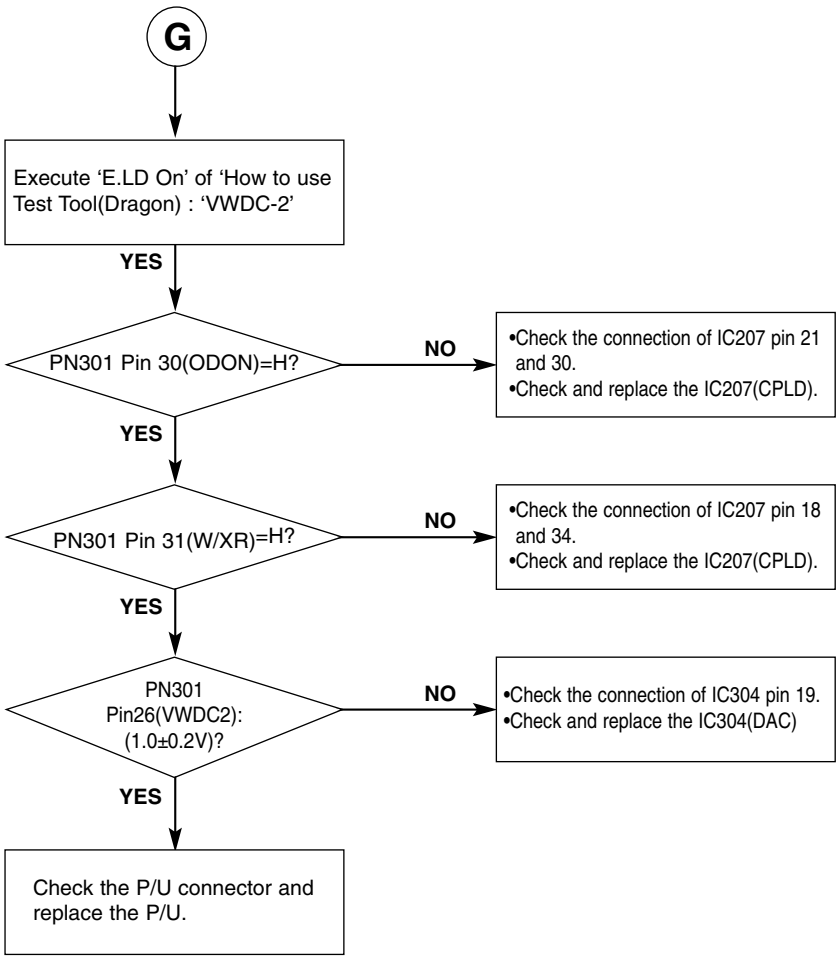
Track Servo is unstable
Is TE signal output normal in Focusing ON and Tracking OFF? (IC301 pin57)
NO
Is PICK UP(E,F,G,H) output normal?(PN301 pin 16,7,13,10)
NO
•Check the PICK UP FFC.
•Replace the PICK UP.
YES
YES
Check the IC301(CXA3558R).
YES
Go to “RF output is abnormal”
Is TE signal input normal in Focusing ON and Tracking OFF? (IC201 pin198)
NO
Check the IC1306
YES
Is there TAO signal output in Tracking ON? (IC201 pin 208)
NO
Replace the IC201(OTI-9790).
YES
Check the Driver IC(IC303) and P/U referring to “Focus Actuator operating is abnormal.”

LD CHECK (Not Read)



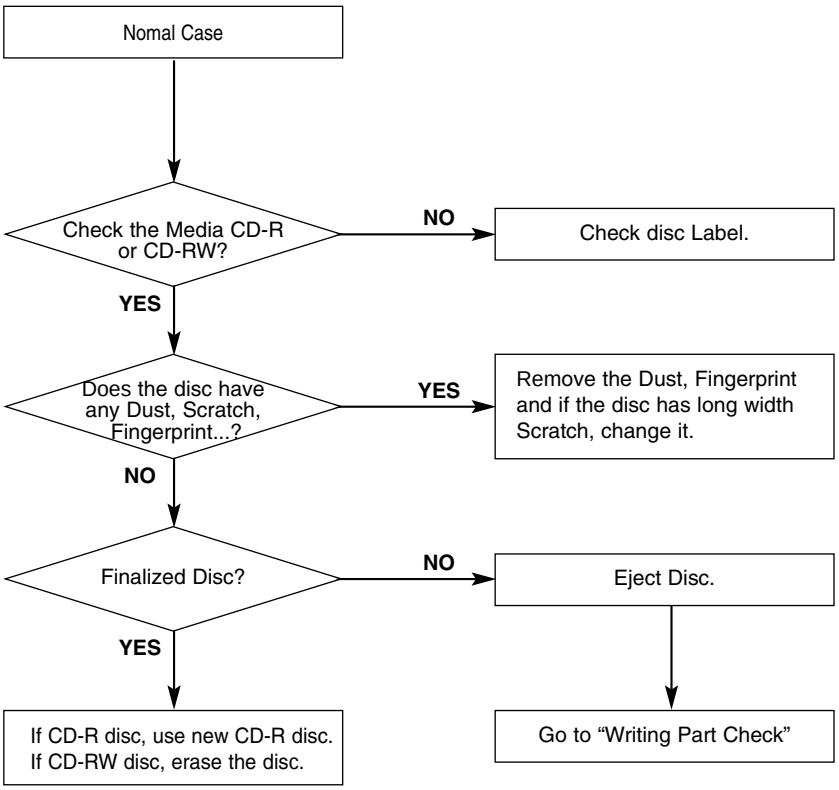
LD CHECK (Not Recored)

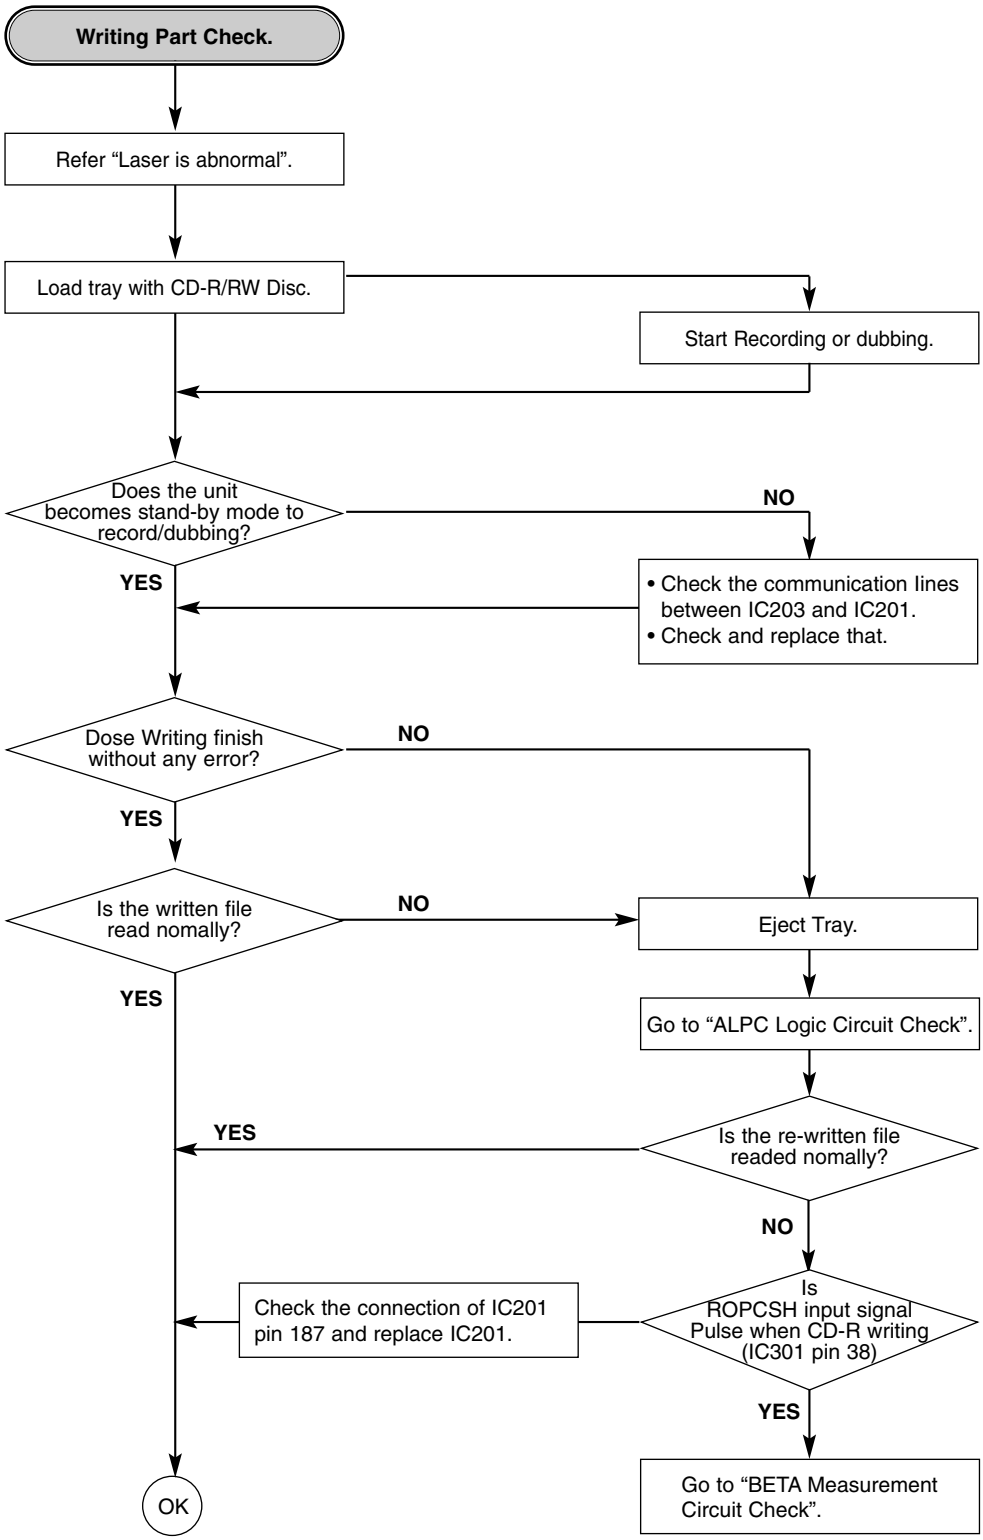




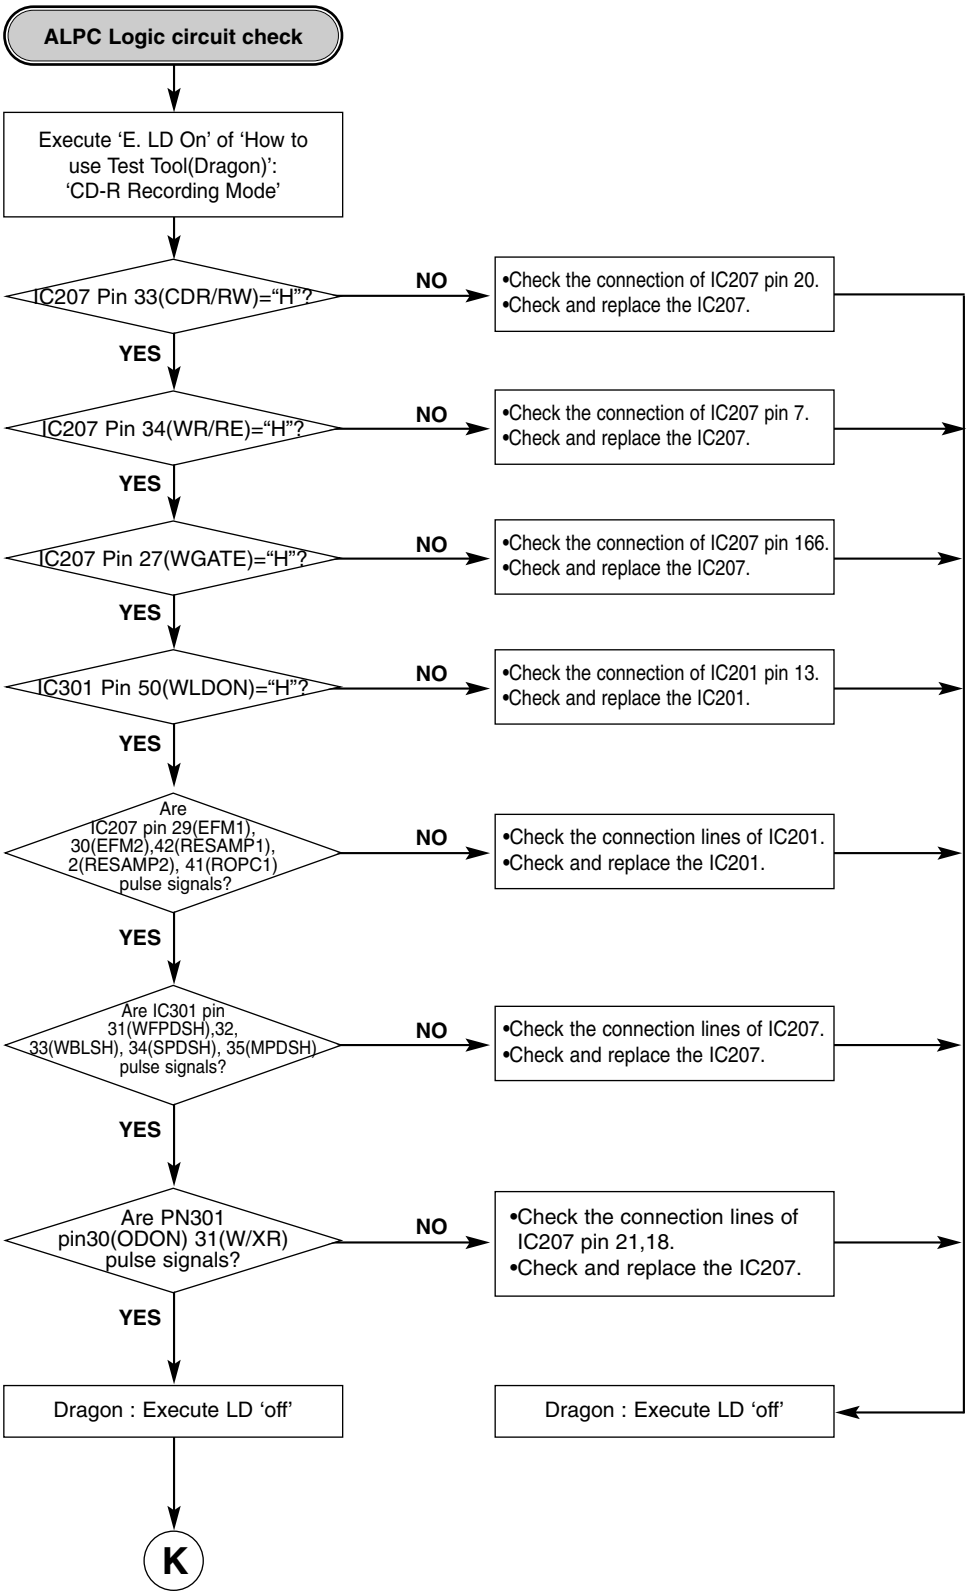
G
Execute 'E.LD On' of 'How to use Test Tool(Dragon) : 'VWDC-2'
YES
PN301 Pin 30(ODON)=H?
NO
•Check the connection of IC207 pin 21 and 30.
•Check and replace the IC207(CPLD).
YES
PN301 Pin 31(W/XR)=H?
NO
•Check the connection of IC207 pin 18 and 34.
•Check and replace the IC207(CPLD).
YES
PN301 Pin26(VWDC2): (1.0±0.2V)?
NO
•Check the connection of IC304 pin 19.
•Check and replace the IC304(DAC)
YES
Check the P/U connector and replace the P/U.

In case of writing fail.





Writing Part Check.
Refer “Laser is abnormal”.
Load tray with CD-R/RW Disc.
Start Recording or dubbing.
Does the unit becomes stand-by mode to record/dubbing?
NO
YES
• Check the communication lines between IC203 and IC201.
• Check and replace that.
Dose Writing finish without any error?
NO
YES
Is the written file read nomally?
NO
Eject Tray.
YES
Go to “ALPC Logic Circuit Check”.
Is the re-written file readed nomally?
YES
NO
Is ROPCSH input signal Pulse when CD-R writing (IC301 pin 38)
Check the connection of IC201 pin 187 and replace IC201.
YES
Go to “BETA Measurement Circuit Check”.
OK



ALPC Logic circuit check
Execute 'E. LD On' of 'How to use Test Tool(Dragon)': 'CD-R Recording Mode'
IC207 Pin 33(CDR/RW)="H"?
NO
•Check the connection of IC207 pin 20.
•Check and replace the IC207.
YES
IC207 Pin 34(WR/RE)="H"?
NO
•Check the connection of IC207 pin 7.
•Check and replace the IC207.
YES
IC207 Pin 27(WGATE)="H"?
NO
•Check the connection of IC207 pin 166.
•Check and replace the IC207.
YES
IC301 Pin 50(WLDON)="H"?
NO
•Check the connection of IC201 pin 13.
•Check and replace the IC201.
YES
Are IC207 pin 29(EFM1), 30(EFM2),42(RESAMP1), 2(RESAMP2), 41(ROPC1) pulse signals?
NO
•Check the connection lines of IC201.
•Check and replace the IC201.
YES
Are IC301 pin 31(WFPDSH),32, 33(WBLSH), 34(SPDSH), 35(MPDSH) pulse signals?
NO
•Check the connection lines of IC207.
•Check and replace the IC207.
YES
Are PN301 pin30(ODON) 31(W/XR) pulse signals?
NO
•Check the connection lines of IC207 pin 21,18.
•Check and replace the IC207.
YES
