

SERVICE MANUAL

MODEL 4VN-770

SOLID STATE 4-CHANNEL INTEGRATED AMPLIFIER

DIMENSIONS: Height 5½", Width 16½", Depth 12", Weight 21.4lbs.

SPECIFICATIONS

POWER AMPLIFIER SECTION (OCL Pure Complimentary Circuit)

Total Dynamic Power (IHF):	100W (25W+25W+25W+25W) at 4Ω Load
	64W (16W+16W+16W+16W) at 8Ω Load
	100W (50W+50W) at BTL 8Ω Load
R.M.S. Continuous Power:	12.5W (Per Channel at 8Ω Load in each 4-channel)
	30W (Per Channel at 8Ω Load in each BTL 2-channel)
Total Harmonic Distortion:	0.5% (at Rated Output)
Intermodulation Distortion:	0.8% (at Rated Output)
Power Bandwidth:	10~30 kHz (IHF)
Frequency Response:	18~40kHz (±1 dB)
Damping Factor:	50 at 8Ω Load
Load Impedance:	4~16Ω (B.T.L. 8~16Ω)

PRE AMPLIFIER SECTION (2 Stage Direct Coupled Equalizer)

Total Harmonic Distortion:	0.05% (at 1 volt Pre Amp. Output)
Frequency Response:	20~40kHz
S/N Ratio:	Phono 65 dB
	Aux 75 dB
	Tape 75 dB
Input Sensitivity:	Phono 2.5 mV
	Aux 75 mV
	Tape 75 mV
Recording Output:	100 mV (DIN: 30 mV)

ADJUSTMENT (for TAD-95J Power Amp. Section and TAC-177J Protector Section)

1. CENTER VOLTAGE TEST

Connect probe of DC. V.T.V.M. to positive pole of Speaker Terminal. And connect ground or earth lead of V.T.V.M. to Speaker Earth Terminal or Chassis.

And turn to Power Switch On. V.T.V.M. should read 0 volt. If V.T.V.M. read no 0 volt adjust the VR. (R437, R438, R439, R440) for V.T.V.M. read in 0 volt.

Note: Set the VR (R437~R440) at middle position before switch on.

2. IDLING CURRENT TEST

Connect DC. V.T.V.M. to the check point of Resistor (R485, R486, R487, R488) at both ends.

And V.T.V.M. should read 10 mv. If V.T.V.M. doesn't read 10 mv, adjust the VR (R453, R454, R455, R456) deliberately for V.T.V.M. readin 10 mv. (Idling Current: 20 mA)

Fig. 3

3. PROTECTOR ADJUSTMENT

The protector circuit doesn't operate at 4Ω load, 7.5 volt (14 watt) output. (All channels are driven.)

Adjust the R522 in order to activate the protector circuit by grounding the speaker terminals when the out put is 2 volt at 8Ω load.

And adjust R514 in order to activate the protector circuit by applying DC 0.25 volt to point A.
