

ONKYO® SERVICE MANUAL

Ref. No . 3680

052001

STEREO TUNER MODEL T-405TX

Silver models

SUPT	230V AC,50Hz
SUDT	120V AC,60Hz

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK  ON THE SCHEMATIC DIAGRAM AND IN THE PARTS LIST ARE CRITICAL FOR RISK OF FIRE AND ELECTRIC SHOCK. REPLACE THESE COMPONENTS WITH ONKYO PARTS WHOSE PART NUMBER APPEAR AS SHOWN IN THIS MANUAL.

MAKE LEAKAGE CURRENT OR RESISTANCE MEASUREMENTS TO DETERMINE THAT EXPOSED PARTS ARE ACCEPTABLY INSULATED FROM THE SUPPLY CIRCUIT BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

SPECIFICATIONS

FM

Tuning Range:

87.90 - 107.90 MHz, 200 kHz steps
(U.S. & Canadian models)

87.50 - 108.00 MHz, 50 kHz steps
(Other area models)

Usable Sensitivity:

Mono : 12.8 dBf 1.2 μ V, 75 Ohms IHF

Stereo: 19.2 dBf 2.5 μ V, 75 Ohms IHF

50dB Quieting Sensitivity:

Mono : 18.0 dBf 2.2 μ V, 75 Ohms

Stereo: 38.0 dBf 22 μ V, 75 Ohms

Capture Ratio : 1.5 dB

Image Rejection Ratio : 85 dB

IF Rejection Ratio : 90 dB

Signal-to-Noise Ratio : Mono: 73 dB IHF

Stereo: 66 dB IHF

Selectivity : 50 dB DIN ($\pm$ 300 kHz, 40 kHz dev)

AM Suppression Ratio : 50 dB

Total Harmonic Distortion : Mono: 0.5%

Stereo: 0.8%

Frequency Response : 30 - 15,000 Hz ($\pm$ 1.5 dB)

Stereo Separation : 40 dB at 1 kHz

30 dB at 70 - 10,000 Hz

Output Level : 0.5 V (U.S. & Canadian models)

0.75 V (Other area models)

Muting Level : 17.2 dBf 2.0 μ V, 75 Ohms

AM

Tuning Range :

530 - 1,710 kHz, 10 kHz steps

Usable Sensitivity : 30 μ V

Image Rejection Ratio 30 dB

IF Rejection Ratio : 40 dB

Signal-to-Noise Ratio : 40 dB

Total Harmonic Distortion : 0.8%

Output Level: 0.15 V

General

Power Supply :

AC 120 V, 60 Hz

AC 230-240 V, 50 Hz

Power Consumption : 9 W

Dimensions (W x H x D) :

205 x 76 x 279 mm

8-1/16" x 3" x 11"

Weight : 1.7 kg, 3.7 lbs.

AM reception is available only on the U.S. and Canadian models.

Specifications and external appearance are subject to change without notice as a result of product improvement.

SERVICE PROCEDURES

1. Replacing the fuse

This symbol located near the fuses indicates that the fuse used is fast operating type. For continued protection against fire hazard, replace with same type fuse. For fuse rating refer to the marking adjacent to the symbol.

Ce symbole indique que le fusible utilise est a rapide. Pour une protection permanente, n'utiliser que fusibles de meme type. Ce dernier est la qu le present symbol est appse.

CIRCUIT NO.	PART NO.	DESCRIPTION
F901	252075	2.5A-SE-EAK,Fuse

2. To initialize the unit

This device employs a microprocessor to perform various functions and operations. If interference generated by an external power supply, radio wave, or other electrical source results in accident which causes the specified operations and functions to operate abnormally.

To perform a result, please follow the procedure below.

1. Set the unit to the standby mode
2. Press and hold down the MEMORY button, then press the DISPLAY button.
3. The segments of the F.L.tube light on and the unit is set to the test mode.
4. 'Clear' is displayed when the power switch is pressed in the state of the test mode and the memory is cleared.

ADJUSTMENT PROCEDURES

Preparation

Input

FM mono: 1kHz, 75kHz devi., 60dB / μ V

FM stereo: 1kHz, 67.5kHz devi., 60dB / μ V

Pilot signal: 19kHz, 7.5kHz devi.

AM: 400Hz, 30% mod.

1. Clock adjustment

Connect the frequency counter to the test point TP701.

Set the unit to standby.

Press and hold down MEMORY button, then press DISPLAY button. (The all segments on the fluorescent tube light on)

Adjust the trimming capacitor C755 so that the indication of frequency counter becomes $524.288\text{kHz} \pm 1\text{Hz}$.

After adjustment, turn POWER switch to OFF.

2. FM Adjustment

Item	Step	Connection of instrument	FM SG output	Stereo modulator output	Tuning frequency	Output indicator	Adjustment point	Adjust for	Remarks
FM IF/RF	1	Fig.1	98.1MHz 1kHz 75kHz devi. 65dBf (60dB)	—	98.1MHz	DC voltmeter	L101	$0 \pm 20\text{mV}$	FM MUTE/MODE switch: ON/STEREO Repeat the steps 1 and 3 until no further adjustment is necessary.
	2					AC voltmeter	IFT on the front end	Maximum	
	3					Distortion analyzer	L102	Minimum	
Stereo Distortion		Fig.2	98.1MHz Ext. mod.	Channel L or R 1kHz	98.1MHz	Distortion analyzer	IFT on the front end	Minimum	Don't turn more than $\pm 180^\circ$.
Muting Level		Fig.1	98.1MHz 19.2dBf (14dB)	—	98.1MHz	Oscilloscope or TUNING indicator	R111	Signal output or light on	

Reference Specification (Other models)

FM tuned voltage: 87.5MHz $\sim$ 108.0MHz

$1.8 \pm 0.5\text{V} \sim 7.8 \pm 0.5\text{V}$

ADJUSTMENT POINT

Using the timer

The T-405TX features a Timer function that enables you to start playing or recording a specified component at a specified time. To use this function, you need to configure a system that includes an ONKYO amplifier A-905TX connected to the T-405TX and other components via **RI** REMOTE CONTROL jacks.

Button and modes for the Timer function

The following button and setting modes are used to operate the Timer function. You can use the remote controller (that comes with the ONKYO amplifier A-905TX), as well as the front panel of the T-405TX.

Timer setting modes

WEEKDAY This mode enables you to listen to a specified component at a designated timer on weekdays. You can change the day of the week in DAY SET mode.

WEEKEND This mode enables you to listen to a specified component at a designated time on weekends. You can change the day of the week in DAY SET mode. You can define the same day of the week as both WEEKDAY and WEEKEND. To set two Programs for one day, specify the same day of the week as WEEKDAY and WEEKEND and set the time for each program.

TIMER button

Use this button to select a timer mode. The timer mode will change each time you press this button.

PRESET (◀/▶) buttons (T-405TX), or
UP/DOWN (▲/▼) button (Remote controller)

Use these buttons to select the details of the mode or to change values.

MEMORY button (T-405TX), or
ENTER button (Remote controller)

Use this button to enter the selected mode or numbers.

REC

This mode enables you to record your favorite broadcasting program(s) starting at a designated time. You can select from NEXT, the day of the week, and EVERYDAY. Except for EVERYDAY, the unit performs the timer recording once at the designated time.

DAY SET

This mode enables you to change the day setting (definition) of WEEKDAY or WEEKEND.

ADJUST

This mode enables you to set and adjust the clock. If you have adjusted the clock, you do not need to set it again.
