TRAVERSE DECK: RAE0141Z MECHANISM SERIES

■SPECIFICATIONS

■Audio

No. of channels: 2 channels (left and right, stereo)
Output voltage: 0.6 V (50 kΩ) φ 3.5 stereo mini jack
Frequency response: 20~20,000 Hz (+0.5 dB, −1.5 dB)
S/N: more than 94 dB*
Wow and flutter: Below measurable limit
DA converter: 1 bit, MASH*
Headphone output level: max. 9 mW+9 mW/16Ω (variable) stereo mini jack φ 3.5
Digital filter: 8 times over sampling

■Signal Format

Correction system: Technics New Super Decoding Algorithm

■Pickup

Type: One beam
Light source: Semiconductor laser
Wavelength: 780 nm
Lens: Glass pressed lens

■Playing time;

[When used in hold mode, at 25°C (77°F) temperature and on flat and stable surface.]

Batteries used	DSSP OFF/ON
Rechargeable batteries	About 3 hours/ About 2 hours 30 minutes
Panasonic alkaline dry cell batteries	About 10 hours/ About 7 hours 30 minutes

The play time may be less depending on the operating conditions.

Recharging time; About 3 hours

■General

Power requirement: AC; with an included Panasonic AC adaptor
RFEA401E-3S (GK)
RFEA401E-2S (GH)
Batteries; DC 3 V (two "AA" size batteries, not included)
(Panasonic R6P/LR6 or equivalent, not included)
Rechargeable Batteries; DC 2.4 V with an optional Panasonic Rechargeable Batteries (SH-CDB8D set of 2)
Car Battery; with an optional Pansonic car adaptor (SH-CDC9)
DC IN: DC 4.5 V ⟐-⟐-⟐
Operation temperature range: 0°C−40°C (32°F−104°F)
Rechargeable temperature range: 5°C−40°C (41°F−104°F)
Power supply: DC 4.5 V
Power consumption:

Power source	DSSP OFF/ON
Using AC adaptor	5.5W/5.7W

Dimensions (W×H×D): 128×29×140 mm
Weight: 225 g without batteries
270 g with batteries

*These specifications were measured in the DSSP OFF mode.

Note: Design and specifications are subject to change without notice. Weight and dimensions are approximate.

WORLDWIDE WARRANTY

Panasonic/Technics

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

■CONTENTS

■PRECAUTION OF LASER DIODE

CAUTION: This unit utilizes a class 1 laser. Invisible laser radiation is emitted from the optical pickup lens when the unit is turned on :

1. Do not look directly into the pickup lens.
2. Do not use optical instruments to look at the pickup lens.
3. Do not adjust the preset variable resistor on the optical pickup.
4. Do not disassemble the optical pickup unit.
5. If the optical pickup is replaced, use the manufactures specified replacement pickup only.
6. Use of control or adjustments or performance of procedures other than those specified herin may result in hazardous radiation exposure.

Caution:

This is a laser product.

Improper process of control, adjustment and operation not written in this hand book may cause serious radiation leakage.

⑤ Hold switch (HOLD)
⑥ Clip
⑦ Volume control (VOL)
⑧ Plug

■ POWER SUPPLY PREPARATIONS

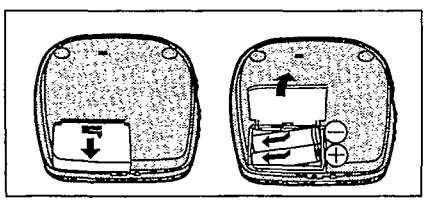
Refer to the specifications (page 12) for the duration of the play time provided when rechargeable or dry cell batteries are used.

Using the rechargeable batteries (not included)

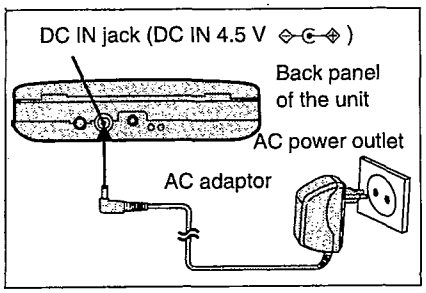
Obtain the optional rechargeable batteries (SH-CDB8D).
Make sure that the rechargeable batteries have been recharged before use.

Recharging procedure

1 Place the rechargeable batteries inside the unit.
(No batteries other than SH-CDB8D can be recharged.)



2 Connect the AC adaptor.



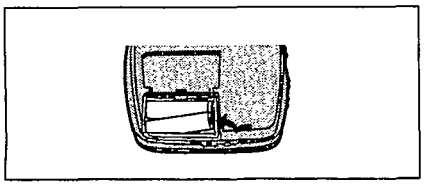
It takes about 3 hours to recharge the batteries fully.

3 *Upon completion of the recharging, disconnect the AC adaptor from the DC IN jack and power outlet.*

- The batteries can be used for about 10 months (300 times) if they are used every day.
  They will need to be replaced if the duration of their operation drops drastically.
- You can operate the unit with the AC adaptor while recharging the batteries, but it will lengthen the recharging time.
- Recharging should be performed at 5°C–40°C.
- While recharging, the AC adaptor and rechargeable batteries may get warm. This is normal.

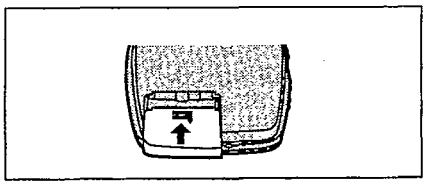
Removing the batteries

Push the batteries upward in the direction of the arrow to remove them.



If the battery compartment lid becomes disengaged

Position it horizontally and press it back into position.



Using dry cell batteries (not included)

Disconnect the AC adaptor and then install two LR6 (UM-3) alkaline batteries.

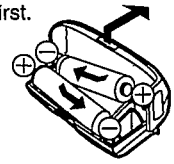
The batteries are inserted and removed in the same way as for the rechargeable batteries.

To play for even longer durations

Disc play can be enjoyed for an even longer duration by using two additional size LR6 (UM-3) alkaline dry cell batteris.

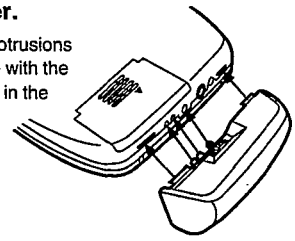
1 Open the battery case lid, and insert the dry cell batteries.

Insert the ⊖ end first.

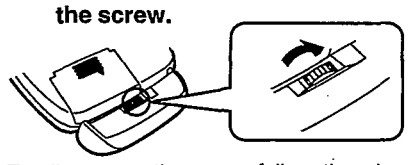


2 Attach the battery case to the player.

Align the protrusions on the case with the five cutouts in the player.



3 Lock the case into place using the screw.



To disengage the case, follow the above procedure in reverse.

Notes

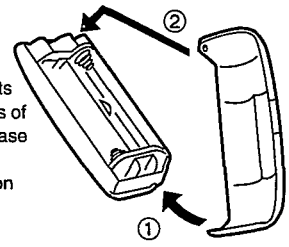
- Do not insert rechargeable batteries in the battery case.
- If rechargeable batteries and dry cell batteries are to be used at the same time, use fully charged rechargeable batteries and new dry cell batteries.
- If four dry cell batteries are to be used, do not use old and new batteries at the same time.

For your reference:

- The player can be powered by the batteries in the battery case alone no batteries need to be loaded in the player.
- The play time differs according to the type of batteries (rechargeable or dry) which are loaded in the player.

If the battery case lid becomes disengaged:

Fit the cutouts on both sides of the battery case lid over the protrusions on the case.



Battery indicator

Battery indicator

This starts flashing when the batteries have run down, and after a short while the power is automatically cut off.

(The amount of time during which play continues after the indicator has started flashing differs slightly depending on the type of batteries used.)

Type of battery	Action
Rechargeable batteries	Recharge the batteries again.
Dry cell batteries	Replace with new batteries.

(The battery indicator may not flash if rechargeable batteries, other than those designated by our company, are used.)

Using the AC adaptor

Connect the AC adaptor supplied.

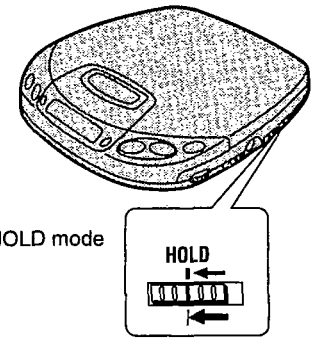
Refer to the section on "Using rechargeable batteries" for details on the connections.

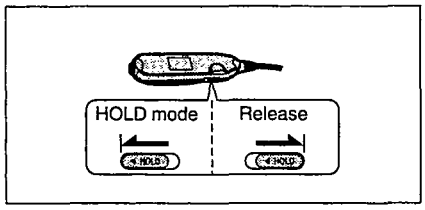
Using the car adaptor (not included)

Be sure to obtain the car adaptor (SH-CDC9), available as an optional accessory.

The batteries can be recharged inside the car using the car adaptor.

■ACCIDENTAL OPERATION PREVENTION FUNCTION





This function prevents the unit from operating even if a control button is pressed in error. (The disc lid, however, can still be opened and closed.)

Use the function to prevent the following situations:

Example 1:

While the unit is not in use, the power is inadvertently turned on and the batteries run down.

Example 2:

Play is interrupted while the unit is in use.

To use the accidental operation prevention function

Set HOLD to the HOLD position.

The unit and the wired remote controller has a HOLD switch, each of which works independently.

"hold"/"HOLD" indicator

[Unit]

If the unit is in the hold mode, the "hold" indicator appears when any of the unit's function buttons (except OPEN) is pressed.

When the unit is turned off

The "hold" indicator appears only when ▶❚❚ is pressed.

[Wired remote controller]

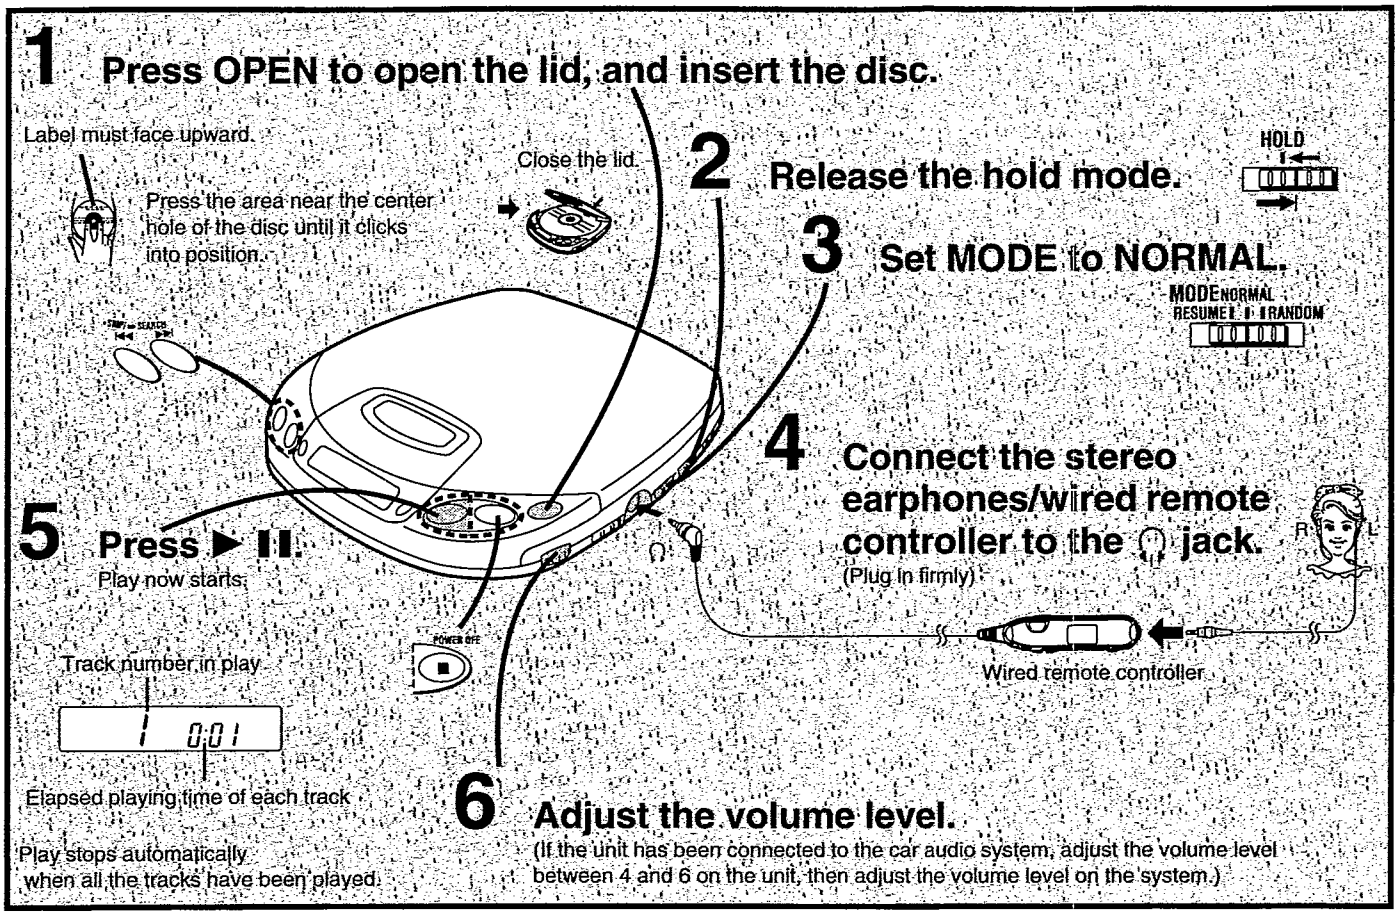
The HOLD indicator appears when the wired remote controller is set to the hold mode.

[In the off mode (see pages 4 and 8), the HOLD indicator appears only when Play/stop/off button is pressed.]

Before operating the buttons

Be absolutely sure to move HOLD to release the unit from the hold mode.

■SEQUENTIAL PLAY



Operation	Button	Display
Pause: Press during play/press again to resume play	▶ II	7 0:18
To stop play: Press during play [Stop mode]	■	Total number of tracks: 10 44:48 (Total playing time)
To turn off the unit: Press during stop mode [Off mode]	■	
Skip forward/backward (skip function): Press during play **Rapid forward/backward (search function):** Keep depressed during play.	▶▶I: Forward direction I◀◀: Backward direction	—

Skip and search functions

- During program play (see page 6) the tracks are skipped in the forward or backward direction in the programmed sequence.
- During program play, random play or 1-track repeat play (see page 6), only the track being played is searched.
- During random play, it is not possible to skip to the track which has already been played.

For your reference:

"no dISC" display

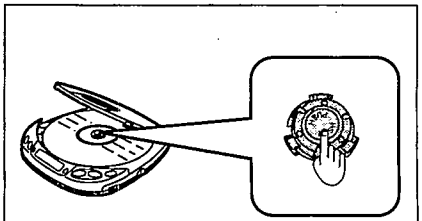
This appears for about 30 seconds when a disc has not been inserted or when a disc has not been inserted properly and then ▶ II is pressed.

"OPEN" display

This appears for about 10 minutes after the lid is opened. (It does not appear when the unit is turned off.)

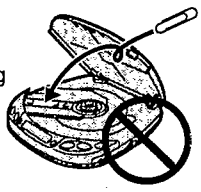
Removing the disc

After the disc has stopped rotating, press PUSH and release the disc. (Do not open the lid during play.)



Note

Do not put anything inside the unit.



Automatic Shut-OFF function

When the unit is left for about 10 minutes in the stop or pause mode, this function automatically shuts off the power in order to prevent the batteries, etc. from discharging needlessly.

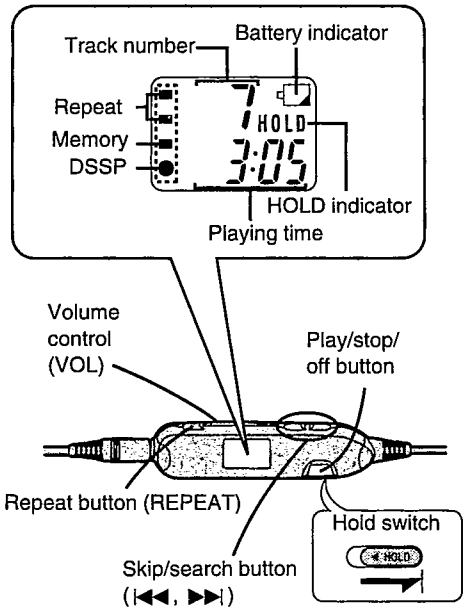
■ USING THE WIRED REMOTE CONTROLLER

The wired remote controller can be operated regardless of the hold mode of the unit.

Preparation:
Release the remote controller from the hold mode.

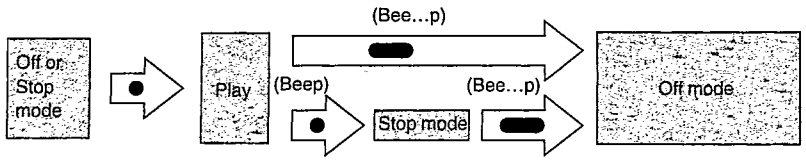
To adjust the volume

When adjusting the volume using the remote controller, position the volume control on the unit to between 4 and 6.



How to use the wired remote controller

How to use the play/stop/off button



Parentheses represent confirmations tones.

● Press once. ▬ Press and hold.

An operations tone ("Beep") sounds whenever the remote controller button is pressed. In addition, a confirmation tone sounds following every operation.

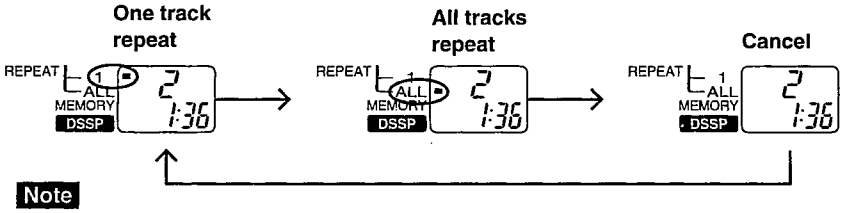
How to use the skip/search buttons (|◀◀ and ▶▶|)

Skip forward/backward: Press during play.
Rapid forward/backward: Keep depressed during play.
Listening from a desired track:
Press during stop mode to select a desired track, and then press play/stop/off button.

|◀◀	▶▶|
	Backward direction (Beep Beep Beep)	**Forward direction** (Beep Beep)

How to use the repeat button

Operation is the same as for the same button on the unit. (Except a beep is heard when a key is operated.)
Each time you press **REPEAT**, the repeat function will change as follows.

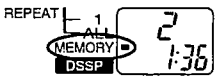


Note

When the repeat button is operated, the sound will be interrupted for an instant. This is normal and not indicative of a malfunction.

For you reference:

When the unit is in the programmed play mode.



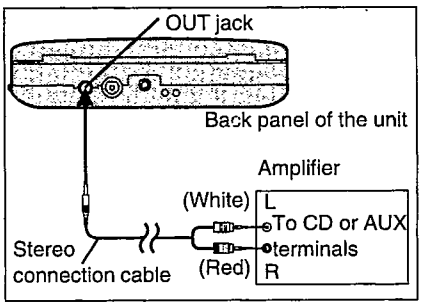
When the unit's DSSP switch is ON.

■ USING THE UNIT WITH OPTIONAL ACCESSORIES

Using the unit with an audio system

Using the stereo connection cable (not included), you can hear CDs on your audio system.

- Connect the cable to the amplifier after turning off its power.
- Do not connect the cable to the PHONO jacks on the amplifier.
- Obtain the optional connecting cable if the amplifier comes with mini-phone jacks.
- Adjust the volume level on the amplifier.



Using the unit with a car stereo

Items to be purchased

For connection to the car audio system:
Car stereo cassette adaptor (SH-CDM9A)
For securing the unit and connecting the power supply:

- Car adaptor (SH-CDC9)
- Car mounting kit (SH-CDF7)
  Car mounting arm, Car mounting base

Note

It may not be possible to use the unit with some types of car stereos owing to restrictions imposed by the construction of the car stereo cassette adaptor or car mounting kit.

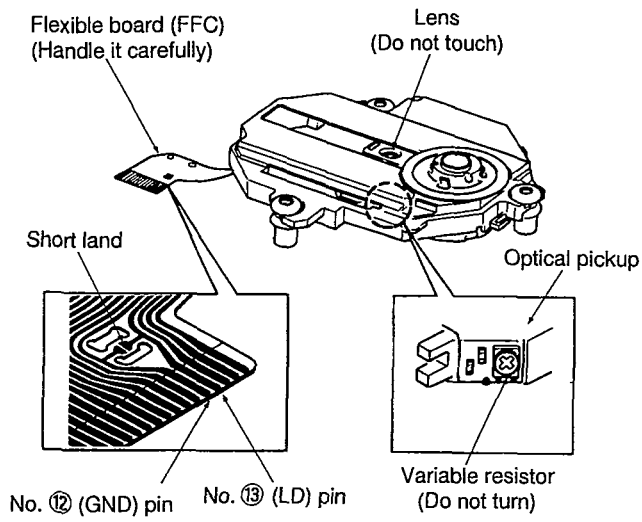
For further details, refer to the instructions of the part concerned.

■HANDLING PRECAUTIONS FOR TRAVERSE DECK

The laser diode in the traverse deck (optical pickup) may break down due to potential difference caused by static electricity of clothes or human body.
So, be careful of electrostatic breakdown during repair of the traverse deck (optical pickup).

● Handling of traverse deck (optical pickup)

1. Do not subject the traverse deck (optical pickup) to static electricity as it is extremely sensitive to electrical shock.
2. The short land between the No. ⑬ (LD) and No. ⑫ (GND) pins on the flexible board (FFC) is shorted with a solder build-up to prevent damage to the laser diode.
   To connect to the PC board, be sure to open by removing the solder build-up, and finish the work quickly.
3. Take care not to apply excessive stress to the flexible board (FFC).
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

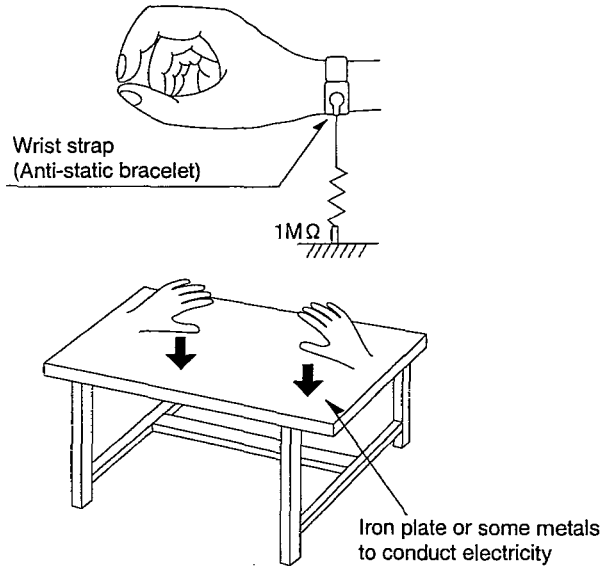


● Grounding for electrostatic breakdown prevention

1. Human body grounding
   Use the anti-static wrist strap to discharge the static electricity from your body.
2. Work table grounding
   Put a conductive material (sheet) or steel sheet on the area where the optical pickup is placed, and ground the sheet.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the traverse deck (optical pickup).



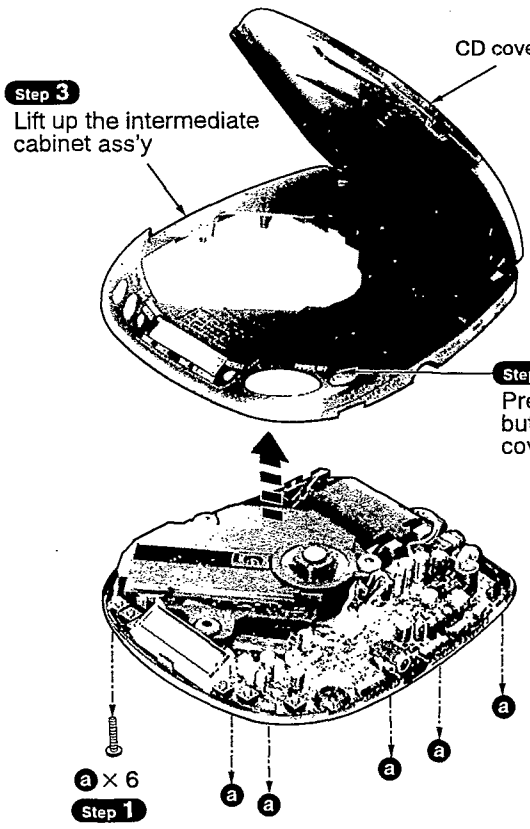
■ OPERATION CHECKS AND MAIN COMPONENT REPLACEMENT PROCEDURES

Warning: This product uses a laser diode. Refer to caution statements on page 2.

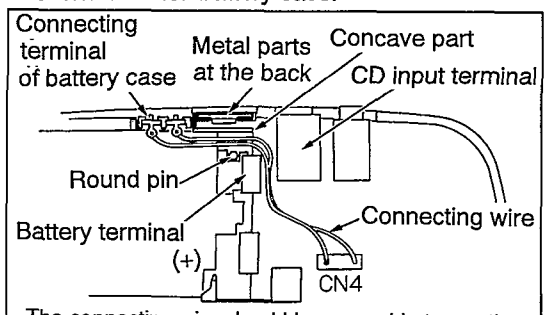
NOTE

1. **This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.**
2. **For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.**
3. **Illustrated screws are equivalent to actual size.**
4. **[ ] indicates parts No.**

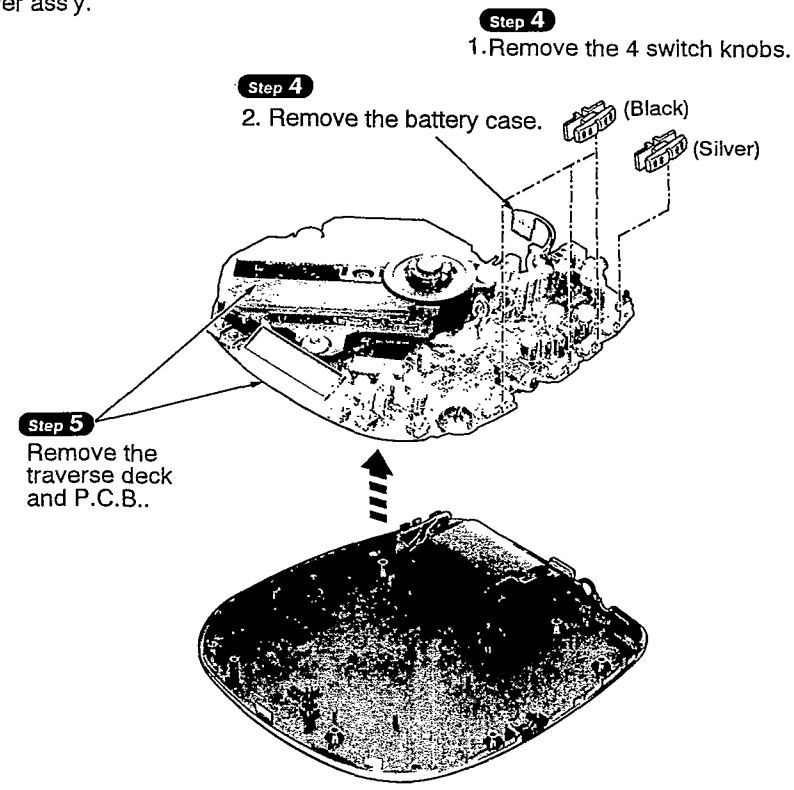
1. Checking for the P.C.B.



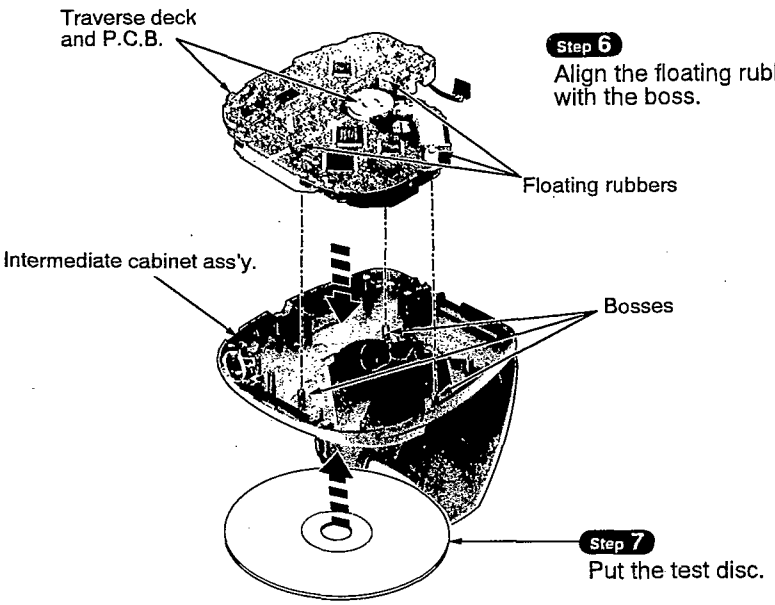
Things to be careful about when connecting the terminal for battery case:



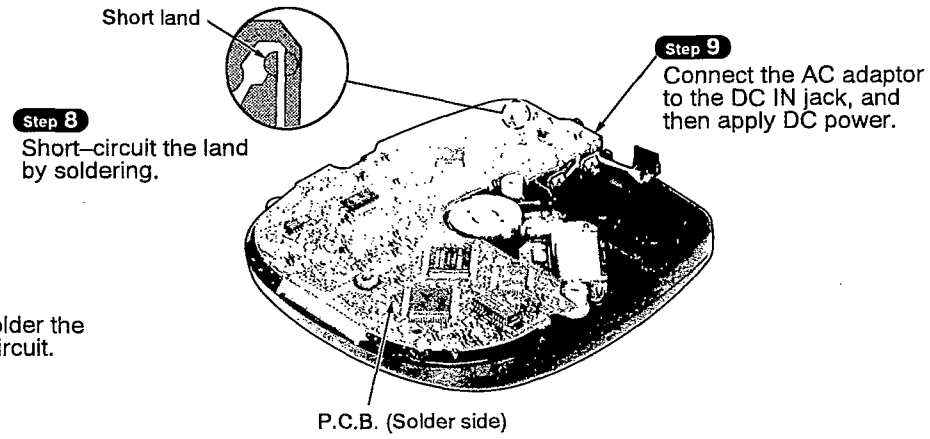
The connecting wire should be passed between the concave part and the round pin.
(Do not let the wire go through the metal parts at the back.)



ⓐ
[XTN17+6GFZ] (Black)



• Check the P.C.B. (Solder side) as shown below.



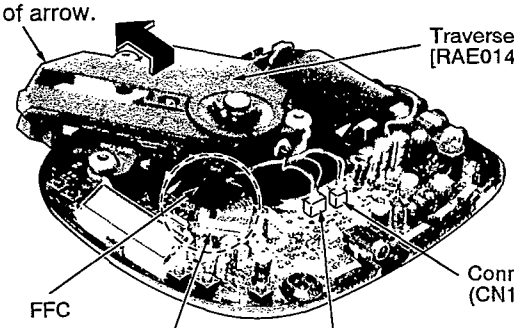
NOTE
After checking, unsolder the short land to open circuit.

2. Replacement for the traverse deck

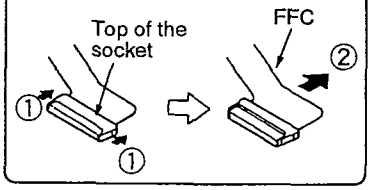
• Follow the Step 1 ~ Step 3 in item 1.

NOTE
Solder the point between pin 4 (LD) and pin 5 (GND) of FFC board. (Refer to "Handing Precautions for Traverse Deck" on page 7.)

Step 1
Pull out the traverse deck in the direction of arrow.



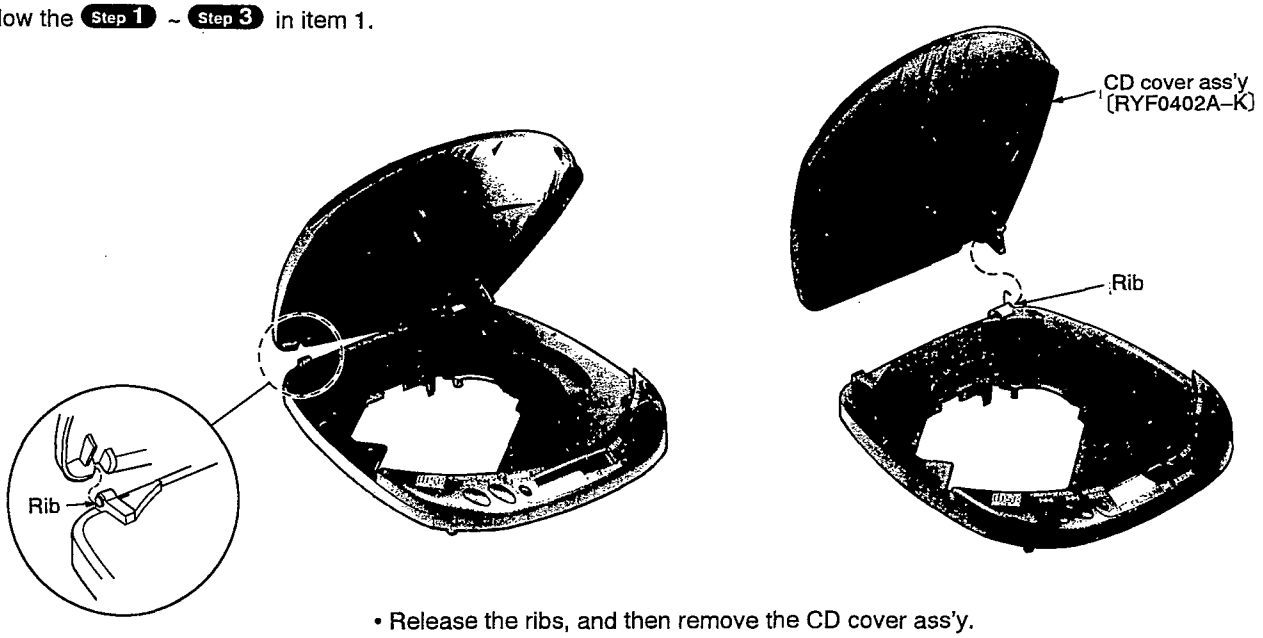
1. Push the top of the socket in the direction of arrow ①.
2. Remove the FFC in the direction of arrow ②.



Step 2
Remove the 2 connectors and socket.

3. Replacement for the CD cover ass'y

• Follow the Step 1 ~ Step 3 in item 1.



• Release the ribs, and then remove the CD cover ass'y.

● Terminal guide of IC's, transistors and diodes

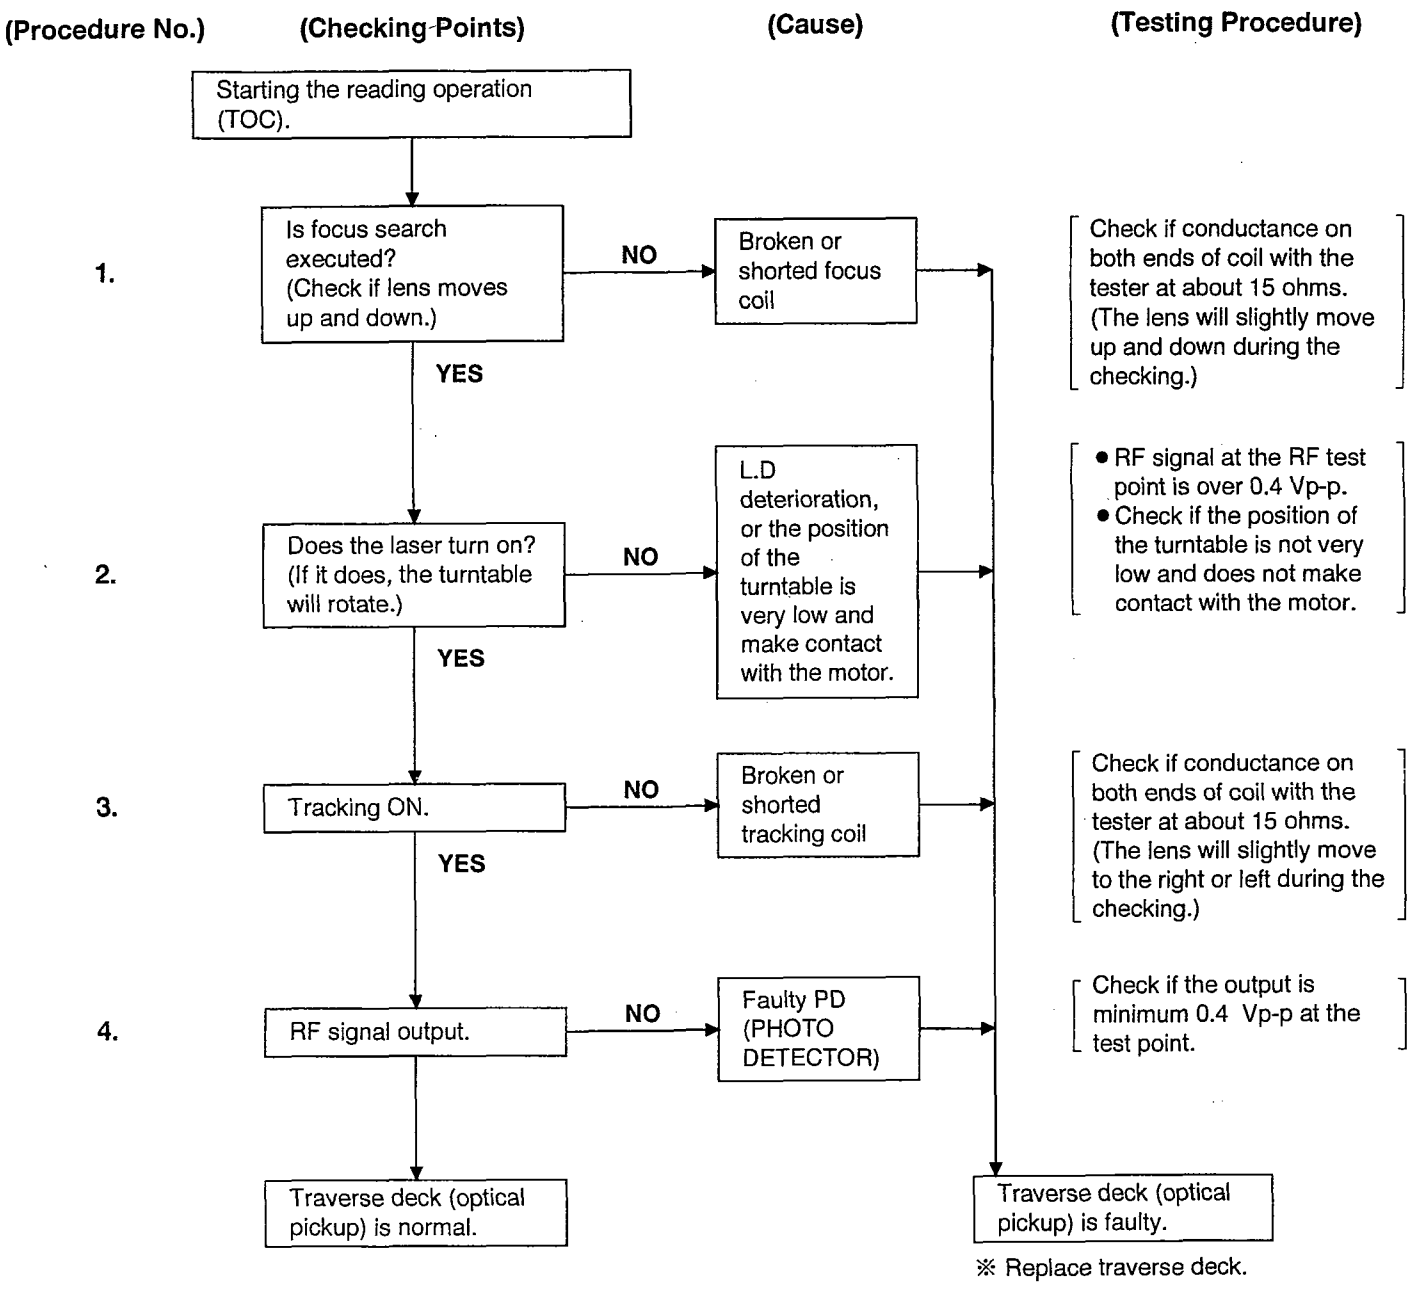
■CHECKING THE OPERATION PROBLEMS ON THE TRAVERSE DECK (OPTICAL PICKUP)

Make sure to follow the procedures below to check the operation problems of the traverse deck (optical pickup) before replacing it. Replace the traverse deck only after the problem is identified.



- Check electrical circuit.
- Check for flaws on disc or if it is warped or not centered.

• Check the operations described below on the traverse deck after replacing it.

＊ Checking Skip Search
1. Play an ordinary musical program disc.
2. Press the skip button to check for normal skip search operation (in both the forward and reverse directions).

＊ Checking Manual Search
1. Play an ordinary musical program disc.
2. Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and reverse directions).

＊ Checking Playability
1. Play the 0.7 mm black dot and the 0.7 mm wedge on the playability test disc (SZZP1054C) and verify that no sound skip or noise occurs.
2. Play the middle tracks of the uneven test disc (SZZP1056C) and verify that no sound skip or noise occurs.

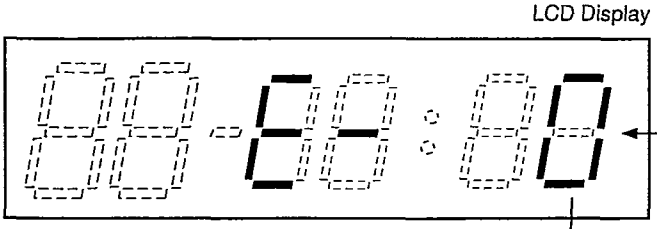
■ AUTOMATIC ADJUSTMENT RESULTS DISPLAY FUNCTION (SELF-CHECK FUNCTION)

On this unit (SL-S240), each automatic adjustment result are displayed on the LCD. This function is convenient to check or identify which automatic adjustment circuit is incorrect. The followings are the contents of the automatic adjustment result displays (self-check function).

• How to display automatic adjustment results

1. Load the test disc (SZZP1054C).
2. Press the |◀◀ (SKIP/SEARCH) and ▶▶| (SKIP/SEARCH) Buttons simultaneously and hold them, and additionally press the ▶ / ❚❚ (PLAY/PAUSE) Button.
3. Press the ■ (STOP/POWER OFF) Button once.
4. An automatic adjustment result is displayed on the LCD.

• Display of automatic adjustment results (self-check function)



4 bits (TGC, FGC, TBC, FBC) are displayed in hexadecimal system from 0~F.

MSB LSB

〈Example〉

TGC	FGC	TBC	FBC

(Each bit ... TGC, FGC, TBC, FBC)
0 ... OK
1 ... NG

1) 0 0 0 0 ⇨ "**E—0**" is displayed.
(All adjustments are OK.) ..... Normal

2) 0 0 0 1 ⇨ "**E—1**" is displayed.
(OK) (OK) (OK) (NG)
(Focus balance adjustment is NG (incorrect.))

3) 0 1 0 0 ⇨ "**E—4**" is displayed.
(OK) (NG) (OK) (OK)
(Focus gain adjustment is NG.)

4) 1 1 1 1 ⇨ "**E—F**" is displayed.
(All adjustments are NG.)

5) 1 0 0 0 ⇨ "**E—8**" is displayed.
(NG) (OK) (OK) (OK)
(Tracking gain adjustment is NG.)

Note: If any other disc than the test disc (SZZP1054C) is used, an "**E—8**" may be displayed.

〈Example〉 **Follow the below steps when "E—1" is displayed.**

(Cause: Focus balance (FBC) is set beyond the limit.)
- Check if

(1) the waveform or voltage of the focus servo circuit is correct, and
(2) the optical pickup returns to the normal state by exchanging the traverse deck.

Follow the below steps when "E—4" is displayed.

(Cause: Focus gain (FGC) is set beyond the limit.)
- Check if

(1) the waveform or voltage of the focus servo circuit is correct,
(2) the focus coil of the optical pickup is correct (around 15 ohms), and
(3) the optical pickup returns to the normal state by exchanging the traverse deck.

Follow the below steps when "E—F" is displayed.

(Cause : All adjustments (TGC, FGC, TBC, FBC) are set beyond the limit.)
- Check if

(1) the optical pickup returns to the normal state by exchanging the traverse deck, and
(2) the waveform or voltage of the servo IC's (IC101, 501) are correct.

Note:
It is not always necessary to exchange the traverse deck when an error message is displayed.
Be sure to check if the circuit is defective or not before exchanging the traverse deck.

Note:
If any other disc than the test disc (SZZP1054C) is used, an error message may be displayed. This is not a malfunction.

■ MEASUREMENTS AND ADJUSTMENTS

Warning: This product uses a laser diode. Refer to caution statements on page 2.

• Measuring instruments and special tools

- **Test discs**
  1. Playability test disc (SZZP1054C)
  2. Uneven test disc (SZZP1056C)
- Musical program disc (ordinary)
- DC voltmeter
- Lead wire (for test points)

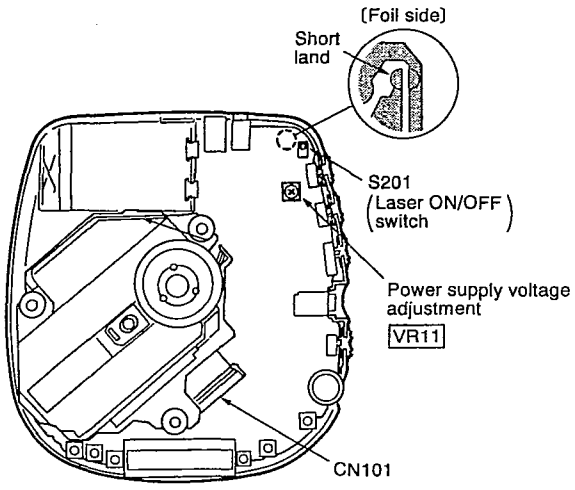
• Test short land

Short-circuit the lands of the laser ON/OFF switch (S201) by soldering them. It turns "ON" position. (Refer to below figure or printed circuit board and wiring connection diagram for short land location on page 24.)

Note: Remove the solders from the lands after adjustment.

• Adjustment point

Notes: 1. Please refer to the printed circuit board and wiring connection diagram for test point locations.
2. Take care to connect CN101.



• Adjustment procedure

(1) POWER SUPPLY VOLTAGE ADJUSTMENT

1. Connect the DC voltmeter to TP2 (VCC) (+) and TP3 (GND) on the P.C.B.
2. Connect the AC adaptor cord to the DC (IN) port and move the PLAY switch to the ON position. (Use a new dry cell battery or a rechargeable battery that is full charged.)
3. Insert the test disc, and switch the player power ON.
4. Adjust VR11 on the P.C.B. at **3.32±0.02 V.**

(2) CHECK OF PLAY OPERATION

*** Checking Skip Search**

1. Play an ordinary musical program disc.
2. Press the skip button to check for normal skip search operation (in both the forward and backward directions).

*** Checking Manual Search**

1. Play an ordinary musical program disc.
2. Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and backward directions).

*** Checking Playability**

1. Play the 0.7 mm black dot and the 0.7 mm wedge on the playability test disc (SZZP1054C) and verify that no sound skip or noise occurs.
2. Play the middle tracks of the uneven test disc (SZZP1056C) and verify that no sound skip or noise occurs.

• Automatic adjustment

On our conventional type portable CD player, there were mounted 6 semi-fixed controls for each adjustment. Since the SL-S270 servo circuit is equipped with an automatic adjusting circuit, these controls are removed from SL-S270.

On conventional portable CD player Use for Old Servo IC (AN8373SE2, AN8374SE2)		**On SL-S270** Use for New Servo IC (AN8837SBE1, MN662745RPC)
1. Tracking Offset Adjustment VR (TOC)	➡	Non Adjustment
2. Focus Offset Adjustment VR (FOC)	➡	Non Adjustment
3. Tracking Gain Adjustment VR (TGC)	➡	Automatic Adjusting Circuit
4. Focus Gain Adjustment VR (FGC)	➡	Automatic Adjusting Circuit
5. Tracking Balance Adjustment VR (TBC)	➡	Automatic Adjusting Circuit
6. Focus Balance Adjustment VR (FBC)	➡	Automatic Adjusting Circuit
Total 6 Adjustment VRs	➡	No Adjustment VR

Although all discs are manufactured according to the same specifications, their characteristics are not always precisely the same because they are produced by different manufacturers in various lots, or have different warp etc.
SL-S270 automatically controls the servo circuit to obtain optimum performance according to any disc's characteristics. Therefore, no malfunction occurs because of mis-adjustment.

■SCHEMATIC DIAGRAM (See parts list on pages 33 ~ 35)

(This schematic diagram may be modified at any time with the development of new technology.)

Notes:

- **S201**: Laser ON/OFF switch in "OFF" position.
  (It turns "ON" with disc holder closed.)
- **S202**: Rest detector in "OFF" position.
  (It turns "ON" when optical pickup comes to innermost periphery.)
- **S301**: Memory/recall (MEMORY/RECALL) switch.
- **S302**: Repeat (REPEAT) switch.
- **S303, 304**: Skip/search (|◀◀ -SKIP/--SEARCH ▶▶|)switches.
  (S303: |◀◀ , S304 : ▶▶|)
- **S305**: Stop/power off (■ POWER OFF) switch.
- **S306**: Play/pause (▶ ❚❚) switch.
- **S307**: Play mode selector (MODE) in "RANDOM" position.
  (RANDOM←→NORMAL←→RESUME)
- **S308**: Hold (HOLD) switch in "ON" position.
- **S501**: Anti-shock (ANTI-SHOCK) switch.
- **S701**: XBS selector in "ON" position.
- The voltage value and waveforms are the reference voltage of this measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of GND terminal (DC IN Jack). Accordingly, there may arise some errors in the voltage values and waveforms depending upon the internal impedance of the tester or measuring unit.
  * The parenthesized is the voltage for test disc (1 kHz, L+R, 0 dB) in play mode, and the other, for no disc in stop mode.
  * AC adaptor is used for power supply.
- ▬▬ : Positive voltage lines.
- ⟹ : Audio signal lines.
- Important safety notice:
  Components identified by ⚠ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.
- ※marks indicate printed resistor.

Caution!

IC and LSI are sensitive to static electricity.
Secondary trouble can be prevented by taking care during repair.

- Cover the parts boxes made of plastics with aluminum foil.
- Ground the soldering iron.
- Put a conductive mat on the work table.
- Do not touch the pins of IC or LSI with fingers directly.

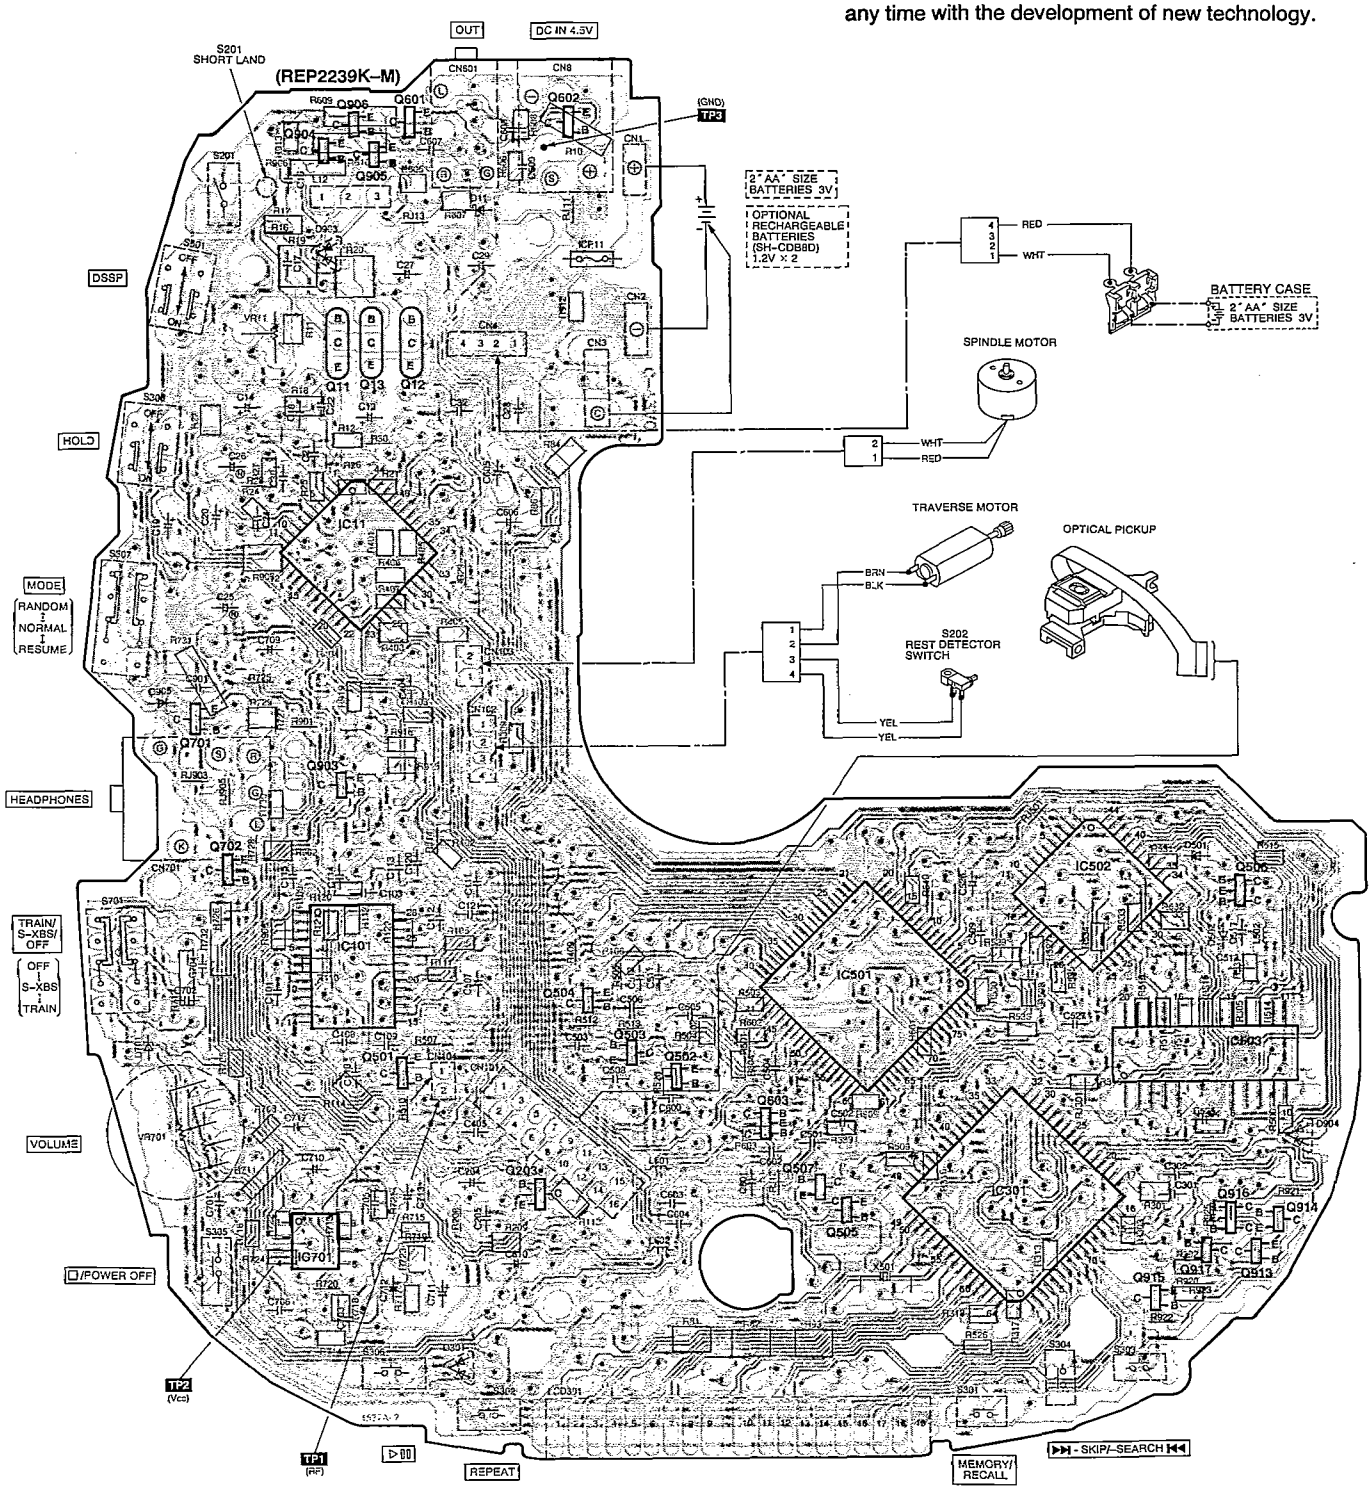
■PRINTED CIRCUIT BOARD AND WIRING CONNECTION DIAGRAM

Notes:

- In this printed circuit board diagram, the parts and foil patterns on the board facing toward you are printed in black.
  The opposite side is printed in blue.
- The "●" mark denotes the connection points of double-faced foil patterns (through holes) on both sides of the printed circuit board.
- This printed circuit board diagram may be modified at any time with the development of new technology.

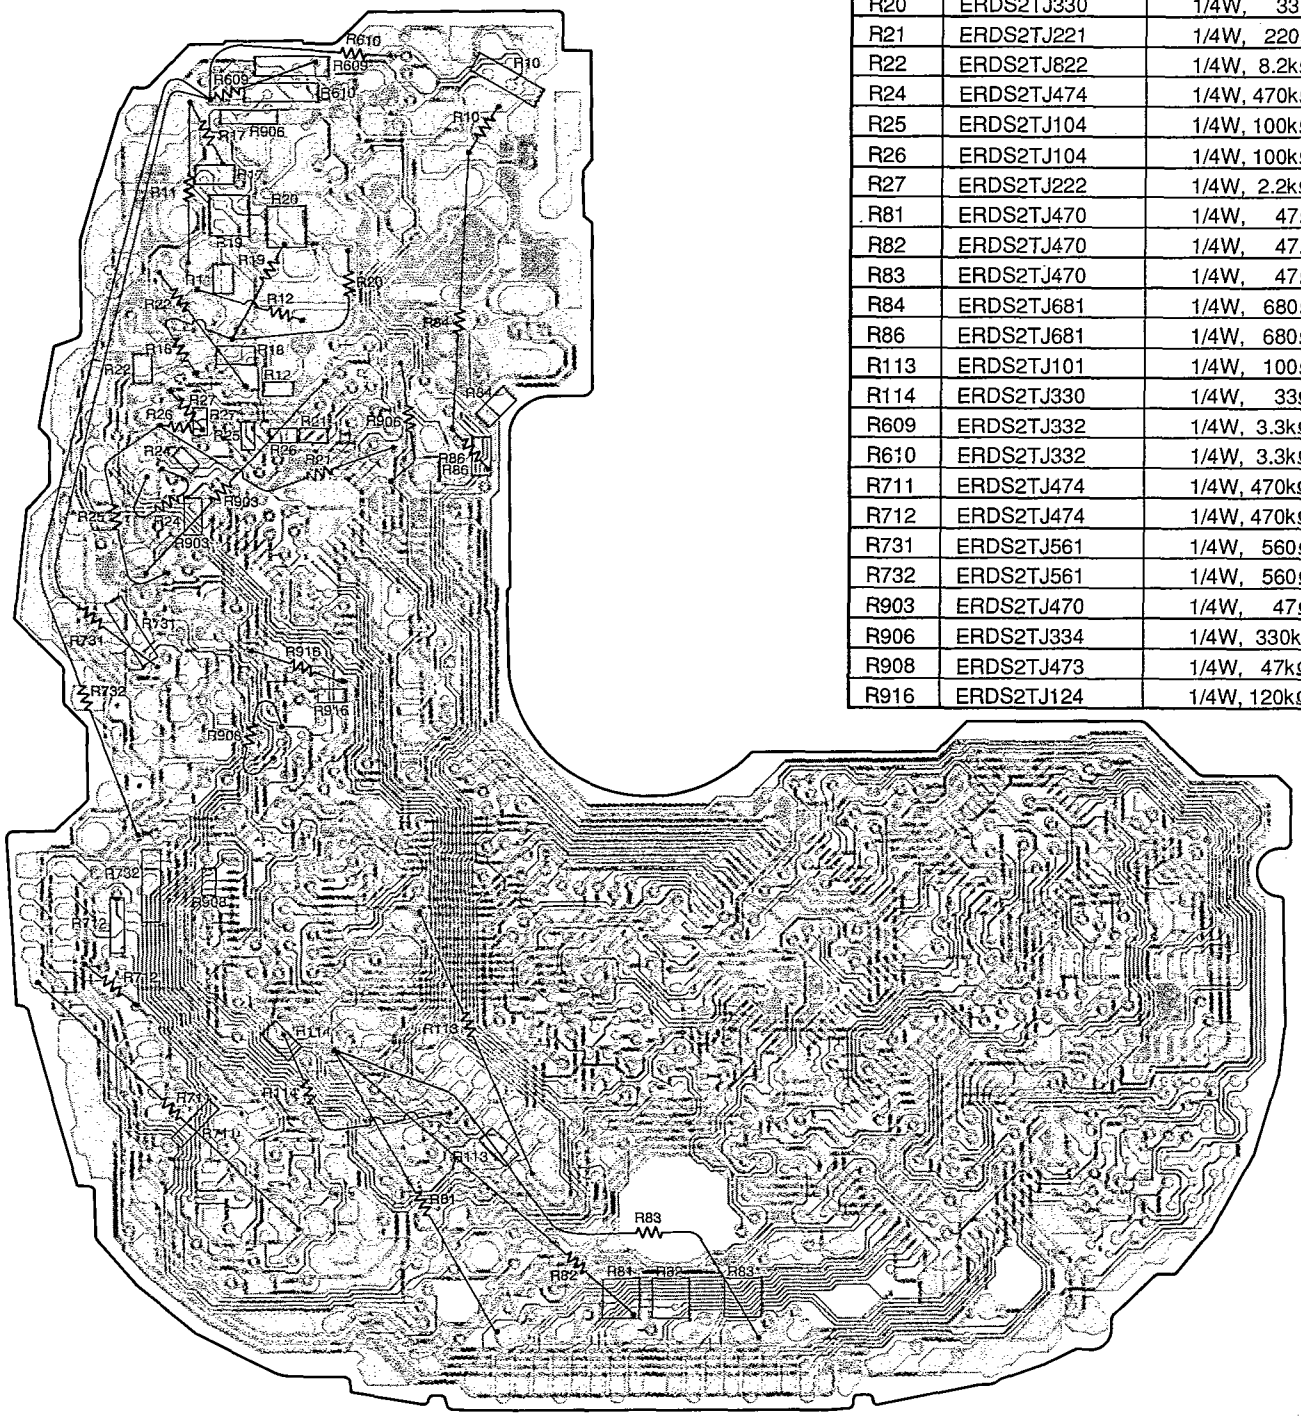


■REPAIRING THE PRINTED RESISTOR

This unit uses a printed resistor for the printed circuit board. If the printed resistor is insulated, all maintenance should be done with reference to the following repair parts connection diagram and repair parts list.

Note: Reading the repair parts connection diagram.

- The pattern foil and repair parts are printed in blue.
- The connection points (•-WW-•) for the pattern foil and repair parts are printed in black.



REPLACEMENT PARTS LIST		
Ref. No.	Part No.	Values & Remarks
R10	ERDS2TJ102	1/4W, 1kΩ
R11	ERDS2TJ103	1/4W, 10kΩ
R12	ERDS2TJ472	1/4W, 4.7kΩ
R17	ERDS2TJ152	1/4W, 1.5kΩ
R18	ERDS2TJ101	1/4W, 100Ω
R19	ERDS2TJ330	1/4W, 33Ω
R20	ERDS2TJ330	1/4W, 33Ω
R21	ERDS2TJ221	1/4W, 220Ω
R22	ERDS2TJ822	1/4W, 8.2kΩ
R24	ERDS2TJ474	1/4W, 470kΩ
R25	ERDS2TJ104	1/4W, 100kΩ
R26	ERDS2TJ104	1/4W, 100kΩ
R27	ERDS2TJ222	1/4W, 2.2kΩ
R81	ERDS2TJ470	1/4W, 47Ω
R82	ERDS2TJ470	1/4W, 47Ω
R83	ERDS2TJ470	1/4W, 47Ω
R84	ERDS2TJ681	1/4W, 680Ω
R86	ERDS2TJ681	1/4W, 680Ω
R113	ERDS2TJ101	1/4W, 100Ω
R114	ERDS2TJ330	1/4W, 33Ω
R609	ERDS2TJ332	1/4W, 3.3kΩ
R610	ERDS2TJ332	1/4W, 3.3kΩ
R711	ERDS2TJ474	1/4W, 470kΩ
R712	ERDS2TJ474	1/4W, 470kΩ
R731	ERDS2TJ561	1/4W, 560Ω
R732	ERDS2TJ561	1/4W, 560Ω
R903	ERDS2TJ470	1/4W, 47Ω
R906	ERDS2TJ334	1/4W, 330kΩ
R908	ERDS2TJ473	1/4W, 47kΩ
R916	ERDS2TJ124	1/4W, 120kΩ

■TERMINAL GUIDE

• IC501 (MN662745RPC): Servo processor/Digital signal processor/Digital filter/D/A converter

Pin No.	Mark	I/O Division	Function
1	BCLK	O	Serial bit clock output
2	LRCK	O	L/R discriminating signal output
3	SRDATA	O	Serial data signal output
4	DV_{DD1}	I	Power supply (digital circuit) terminal
5	DV_{SS1}	—	GND (digital circuit) terminal
6	TX	—	Digital audio interface signal (Not used, open)
7	MCLK	I	Command clock signal
8	MDATA	I	Command data signal
9	MLD	I	Command load signal ("L" : LOAD)
10	SENSE	—	Sense signal (OFT, FESL, NACEND, NAJEND, POSAD, SFG) (Not used, open)
11	FLOCK	—	Optical servo condition (focus) ("L" : lead-in) (Not used, open)
12	TLOCK	—	Optical servo condition (tracking) ("L" : lead-in) (Not used, open)
13	BLKCK	O	Sub-code block clock (f=75 Hz)
14	SQCK	I	Sub-code Q register clock
15	SUBQ	O	Sub-code Q data
16	DMUTE	I	Muting input ("H" : MUTE) (Not used, connected to GND)
17	STAT	O	Status signal (CRC, CUE, CLVS, TTSTOP, FCLV, SQCK)
18	RESET	I	Reset signal ("L" : reset)
19	SMCK	O	System clock (f=4.2336 MHz)
20	PMCK	O	Frequency division clock signal ($f=\frac{1}{1.92}\times ck=88.2$ kHz)
21	TRV	O	Traverse servo control
22	TVD	O	Traverse drive signal
23	PC	O	Turntable motor drive signal ("L" : ON)
24	ECM	O	Turntable motor drive signal (Forced mode)
25	ECS	O	Turntable motor drive signal (Servo error signal)
26	KICK	O	Kick pulse output
27	TRD	O	Tracking drive signal output
28	FOD	O	Focus drive signal output
29	VREF	I	D/A drive output (TVD, ECS, TRD, FOD, FBAL, TBAL) normal voltage input terminal
30	FBAL	O	Focus balance adj. output (Not used, open)
31	TBAL	O	Tracking balance adj. output
32	FE	I	Focus error signal (analog input)
33	TE	I	Tracking error signal (analog input)
34	RFENV	I	RF envelope signal
35	VDET	I	Oscillation det. signal ("H" : det.)
36	OFTR	I	Off track signal ("H" : Off track)
37	TRCRS	I	Track cross signal input
38	RFDET	I	RF detection signal ("L" : detection)
39	BDO	I	Dropout detection signal ("H" : dropout)
40	LDON	O	Laser power control ("H" : ON)
41	TES	—	Tracking error shunt output ("H" : dropout) (Not used, open)
42	PLAY	—	Play signal ("H" : play) (Not used, open)

Pin No.	Mark	I/O Division	Function
43	WVEL	—	Double velocity status signal ("H" : double) (Not used, open)
44	ARF	I	RF signal input
45	IREF	I	Reference current input
46	DRF	—	DSL bias terminal (Not used, connected to GND)
47	DSLF	O	DSL loop filter terminal
48	PLLF	I	PLL loop filter terminal
49	VCOF	I	VCO loop filter terminal (Not used, connected to $AV_{DD}2$)
50	$AV_{DD}2$	I	Power supply (analog circuit) terminal (2)
51	$AV_{SS}2$	—	GND (analog circuit) terminal
52	FS384	—	384 fs (16.9344 MHz) output (Not used, open)
53	PCK	—	PLL extract clock (f=4.3218 MHz) (Not used, open)
54	TROF	—	Tracking servo OFF signal (Not used, open)
55	SUBC	—	Sub-code serial output data (Not used, open)
56	SBCK	—	Sub-code serial input clock (Not used, connected to GND)
57	V_{SS}	—	GND terminal
58	X1	I	Crystal oscillator terminal (f=16.9344 MHz)
59	X2	O	
60	V_{DD}	I	Power supply terminal
61	TRVSTOP	O	Traverse motor stop control terminal
62	CLDCK	—	Sub-code frame clock signal (f CLDCK=7.35 kHz: Normal) (Not used, open)

Pin No.	Mark	I/O Division	Function
63	FCLK	—	Crystal frame clock (Not used, open)
64	IPFLAG	—	Interpolation flag terminal
65	FLAGO	—	Flag terminal
66	CLVS	—	Turntable servo phase synchro signal ("H" : CLV, "L" : Rough servo) (Not used, open)
67	CRC	—	Sub-code CRC check terminal ("H" : OK, "L" : NG) (Not used, open)
68	DEMPHA	—	De-emphasis ON signal ("H" : ON) (Not used, open)
69	FLAG6	—	Flag terminal
70	SEL	—	Not used, connected to GND
71	TEST	I	Test terminal (Normal: "H")
72	$AV_{DD}1$	I	Power supply (analog circuit) terminal (1)
73	OUTL	O	Lch audio signal
74	$AV_{SS}1$	—	GND (analog circuit) terminal (1)
75	OUTR	O	Rch audio signal
76	RSEL	I	Polarity direction control terminal of RF signal (Not used, connected to power supply)
77	CSEL	I	Frequency control terminal of crystal oscillator (Not used, connected to GND)
78	ISRDATA	I	Serial data signal input
79	ILRCK	I	L/R discriminating signal input
80	IBCLK	I	Serial bit clock input

• IC11 (AN8788FB): DC-DC converter & motor drive

Pin No.	Mark	I/O Division	Function
1	RESET	O	Reset signal input terminal
2	DED	I	Dead time input terminal
3	OUT	O	DC-DC converter output terminal
4	FB	O	Error amp output terminal
5	IN	I	Error amp input terminal
6	ROUT	O	Remote control interface output terminal
7	SGND	—	GND terminal
8	SPRO	I	Short protection input terminal
9	CT	I	Triangular wave oscillator terminal
10	AREF	O	1/2 AVDD output terminal
11	SV_{CC}	I	Power supply terminal
12	CRIP	I	Capacitor connection terminal for ripple filter
13	AV_{DD}	O	Ripple filter output terminal
14	DRV_{CC}	I	Power supply terminal
15	VREF	I	1/2 VCC input terminal
16	INFO	I	Focus coil driver input terminal
17	INTR	I	Tracking coil driver input terminal
18	LDON	I	Laser ON/ OFF driver control terminal
19	INSP	I	Spindle motor drive input terminal
20	PC	I	Spindle motor drivr ON/OFF control terminal
21	INTV	I	Traverse motor driver control terminal
22	TRVSTOP	I	Traverse motor ON/ OFF control terminal

Pin No.	Mark	I/O Division	Function
23	TR−	O	Tracking coil driver output terminal
24	TR+		
25	FO−	O	Focus coil driver output terminal
26	FO+		
27 · 28	PGND	—	GND terminal
29	SP+	O	Spindle motor driver output terminal
30	SP−		
31	TRV+	O	Traverse motor driver output terminal
32	TRV−		
33	ICNT	I	Rechargeable current setting terminal
34	MRST	O	Muting reset output terminal
35	VSEN	I	Empty det. input terminal
36	EMPTY	O	Empty det. output terminal
37	$PV_{CC}1$	I	Power supply terminal
38	CLK	I	External synch. clock input terminal
39	START	I	Start oscillator input terminal
40	POWER	I	Power ON/ OFF input terminal
41	$PV_{CC}2$	I	Power supply terminal
42	I OUT	O	Rechargeable and battery det. terminal
43	DRGND	—	GND terminal
44	RIN	I	Remote control signal input terminal

• IC301 (SC440301FU): System control & LCD drive

Pin No.	Mark	I/O Division	Function
1 ⟆ 6	FP6 ⟆ FP1	O	LCD segment signal output terminal
7	BP3/FP0		
8 ⟆ 10	BP2 ⟆ BP0		
11 ⟆ 13	VLCD3 ⟆ VLCD1	I	Voltage control input terminal
14	V_{DD}	I	Power supply terminal
15	OSC1	I	Main system clock input terminal
16	OSC2	—	Not used, open
17	XOSC2	—	Not used, open
18	XOSC1	—	Not used, connected to GND
19	V_{SS}	—	GND terminal
20	RESET	O	Reset signal output terminal
21	STAT	I	Status signal input (CRC, CUE, CLVS, TT STOP, FCLV, SQOK)
22	BLKCK	I	Sub-code block clock (F=75Hz with normal play)
23	SUBQ	I	Sub-code Q data input terminal
24	SQCK	O	Sub-code Q register clock signal output terminal
25	MEMORY	I	Key switch input terminal (MEMORY)
26	REPEAT	I	Key switch input terminal (REPEAT)
27	STOP	I	Key switch input terminal (STOP)
28	PLAY	I	Key switch input terminal (PLAY/PAUSE)
29	RESUME	I	Key switch input terminal (RESUME)
30	RANDOM	I	Key switch input terminal (RANDOM)
31	HOLD	I	Key switch input terminal (HOLD)
32	EMPTY	I	Empty det. input terminal
33	OPEN	I	Disc holder open det. terminal ("L" with open)
34	SKIP. R	I	Key switch input terminal (SKIP/SEARCH. R)
35	SKIP. F	I	Key switch input terminal (SKIP/SEARCH. F)
36	WRDRCN/ RSENSE	I/O	Remote control signal terminal
37	BUZ	O	Beep control signal output terminal
38	MODE2	—	Not used, connected to GND
39	POWER	O	Power ON/OFF signal output terminal
40	MUTE	O	Muting signal output terminal ("H" : mute)
41	MLD	O	Command load signal output terminal ("L" : load)
42	MDATA/ BATTERY	O	Command data signal output terminal
43	MCLK/ MODE1	O	Command clock signal output terminal
44	REST	I	Rest det. input terminal
45	RCLK/ STROBE1	O	Remote control clock signal output terminal
46	RDATA/ STROBE2	I/O	Remote control data signal terminal
47	ACDET	I	Power det. input terminal
48	CHARGE/ LIGHT	—	Not used, open
49	LCDREM	—	Not used, open
50	SHOCK. P	I	Key switch input terminal (not used connected to power supply)
51	ZSENSE	I	Sense signal input terminal
52	VUP	O	Reference current control output terminal
53 · 54	FP18 · FP17	—	Not used, open
55 ⟆ 63	FP16 ⟆ FP8	O	LCD segment signal output terminal
64	FP7	—	Not used, open

• IC502 (SM5856A1F) : Shock proof controller

Pin No.	Mark	I/O Division	Function
1	$V_{DD}1$	I	Power supply terminal
2	UC1	I	Key input terminal (ANTI-SHOCK MEMORY)
3	XBS	—	Key input terminal (Not used, open)
4	BASS	—	Not used, open
5	ASC	—	Sound quality/sound field control terminal (Not used, open)
6	UC5	O	Sound quality/sound field control terminal
7	NTEST1	—	Test terminal (Not used, open)
8	NTEST2		
9	CLK	I	Clock signal input (f=16.9344MHz)
10	V_{SS}	—	GND terminal
11	YSRDATA	I	Serial data input terminal
12	YLRCK	I	L/R clock input terminal
13	YSCK	I	Serial bit clock input terminal
14	ZSCK	O	Serial bit clock output terminal
15	ZLRCK	O	L/R clock output terminal

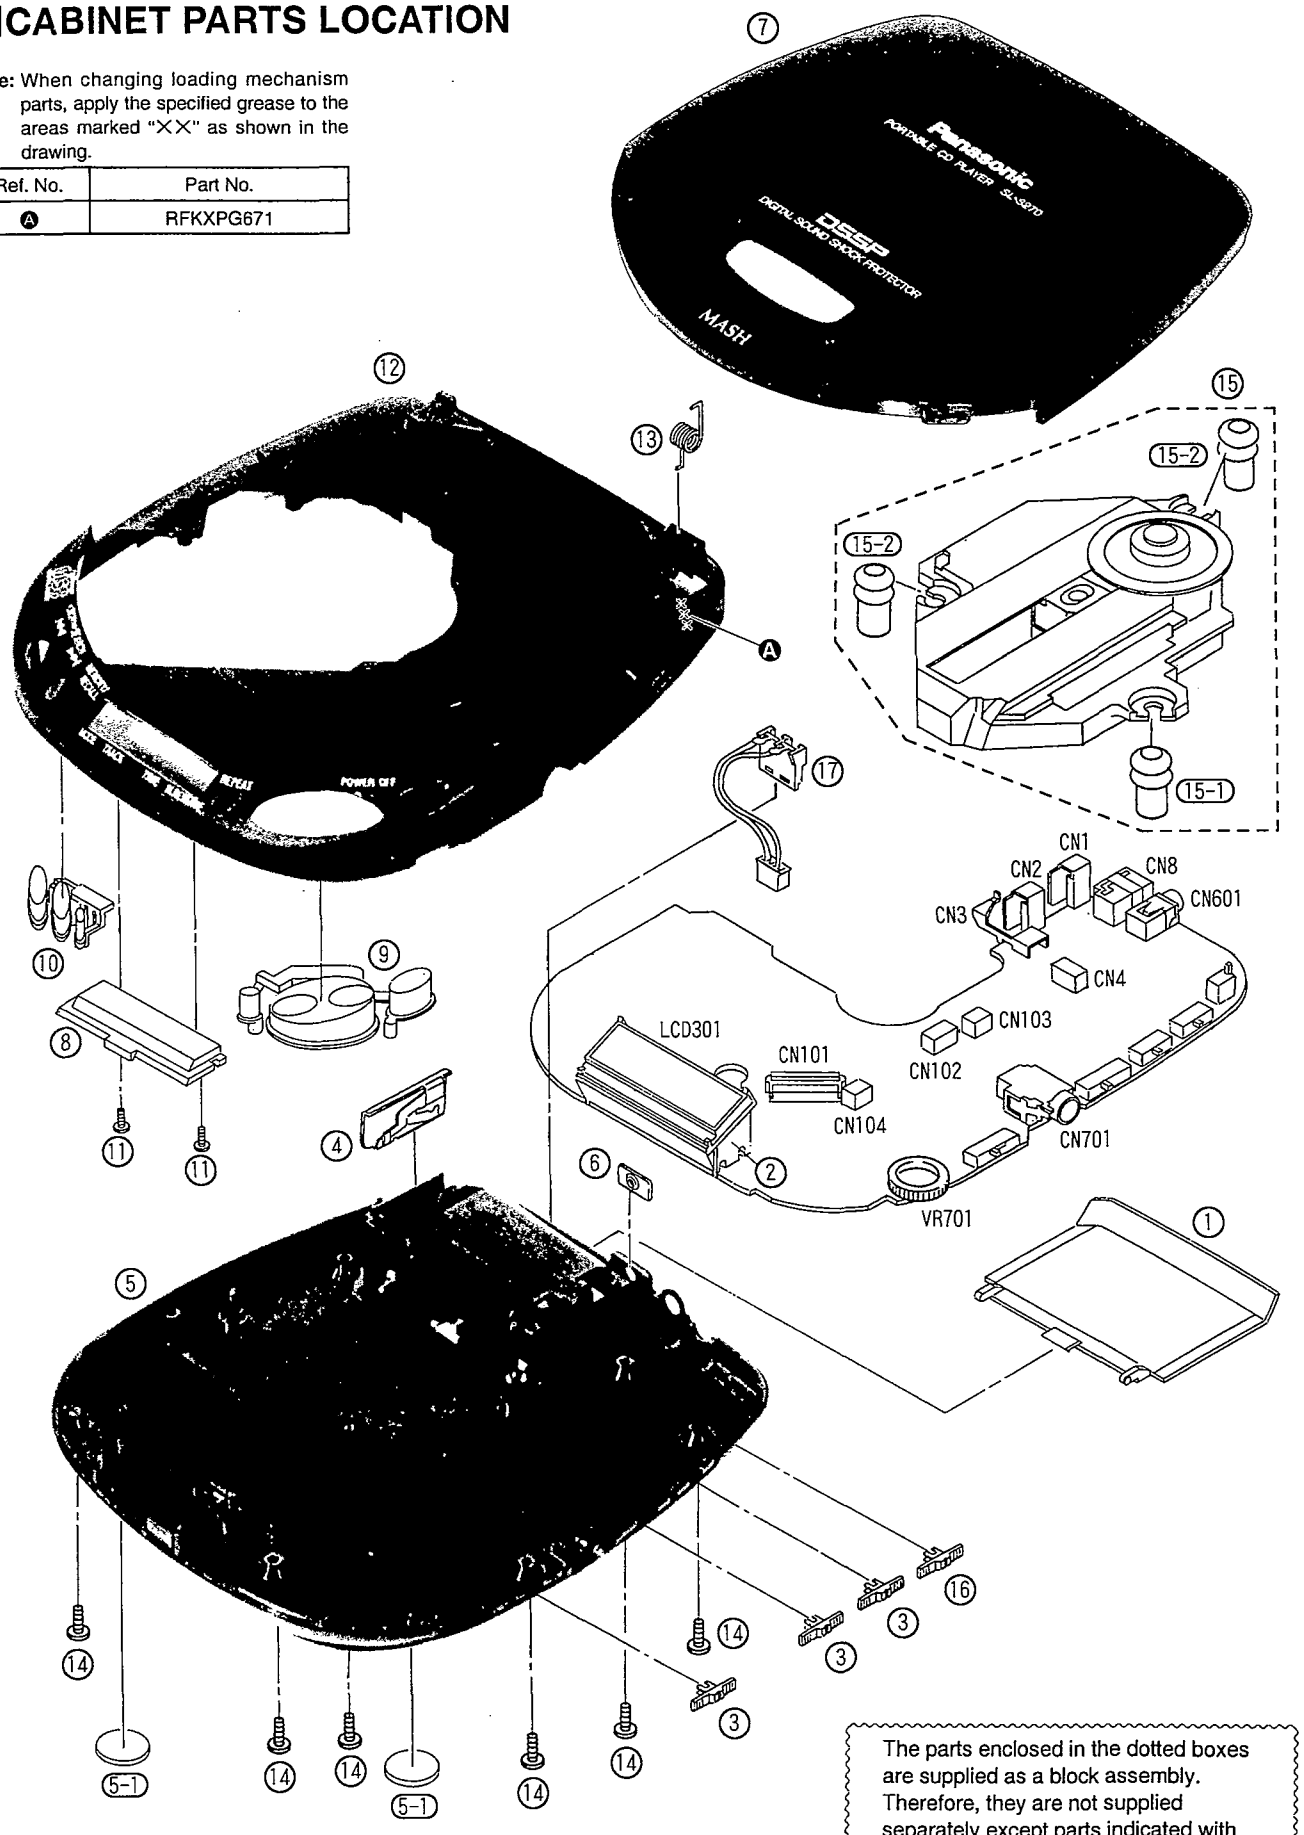
13	LDON	I	APC control input terminal
14	GND	—	GND terminal

Pin No.	Mark	I/O Division	Function
15	/RFDET	O	RF det. signal output terminal ("L" : Det.)
16	CROSS	O	Track cross signal output terminal
17	OFTR	O	Off track signal output terminal ("H" : Off track)
18	VDET	O	Vibration det. signal output terminal ("H" : Det.)
19	ENV	O	RF envelope signal output terminal
20	ENV OFF	I	ENV control input terminal
21	TEBPF	I	VDET input terminal
22	TE IN	I	Tracking error amp input terminal
23	TE OUT	O	Tracking error amp output terminal
24	FE OUT	O	Focus error amp output terminal
25	FE IN	I	Focus error amp input terminal
26	VREF	O	Reference voltage output terminal
27	TBAL	I	Tracking balance signal input terminal
28	FBAL	I	Focus balance signal input terminal

■CABINET PARTS LOCATION

Note: When changing loading mechanism parts, apply the specified grease to the areas marked "XX" as shown in the drawing.

Ref. No.	Part No.
Ⓐ	RFKXPG671



The parts enclosed in the dotted boxes are supplied as a block assembly. Therefore, they are not supplied separately except parts indicated with Ref. No.

■REPLACEMENT PARTS LIST

Notes: * Important safety notice:
Components identified by ⚠ mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.
When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
* Warning: This product uses a laser diode. Refer to caution statements on page 2.

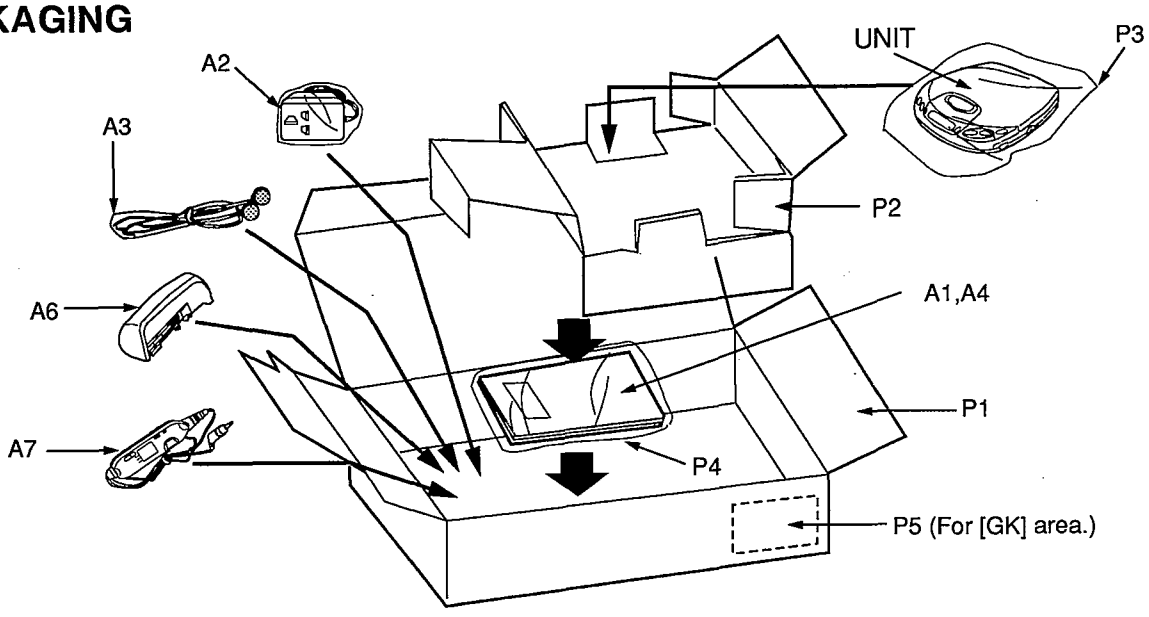
*1: This item can be provided only when listed on the replaceable part list.

The marked items (RTL) will be in stock for a limited period. These items will be provided only in a specified period after the discontinuance of production. Valid period will differ depending on types of parts, and accord with the concerned regulations about parts and products in stock.

■PACKAGING



■RESISTORS AND CAPACITORS

Notes: * Capacity values are in microfarads (uF) unless specified otherwise, P=Pico-farads (pF) F=Farads (F)
* Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM)
