MASH[※]
 multi-stage noise shaping

SL-XP140

※ • MASH is a trademark of NTT.

Colour

(K)...Black Type

**Area**

Suffix for Model No.	Area	Colour
(E)	Europe.	(K)
(EB)	Great Britain.	
(EG)	Germany and Italy.	
(GC)	Asia, Latin America, Middle Near East and Africa.	
(GN)	Oceania.	

TRAVERSE DECK: RAE0141Z MECHANISM SERIES**SPECIFICATIONS****Audio**

No. of channels: 2 channels (left and right, stereo)
Output voltage: 0.6 V (50 k Ω) ϕ 3.5 stereo mini jack
Frequency response: 20~20,000 Hz (+0.5 dB, -1.5 dB)
S/N: More than 94 dB
Wow and flutter: Below measurable limit
DA converter: 1 bit, MASH[※]
Headphone output level: Max. 9 mW+9 mW/16 Ω (variable)
 stereo mini jack ϕ 3.5
Digital filter: 8 times over sampling

Signal Format

Correction system: Technics New
 Super Decoding Algorithm

Pickup

Type: One beam
Light source: Semiconductor laser
Wavelength: 780 nm
Lens: Glass pressed lens

Playing time;

(When the unit is used, at 25°C temperature and on flat and stable surface.)

Rechargeable batteries	About 3 hours
Panasonic alkaline dry cell batteries	About 10 hours

The play time may be less depending on the operating conditions.

Recharging time;

About 3 hours

General**Power requirement:**

AC; with an included panasonic AC adaptor
 RFEA401E-2S (E, EG)
 RFEA404B-1W (EB)
 RFEA403Z-S (GC)
 RFEA403A-S (GN)
 Batteries; DC 3 V (two "AA" size batteries, not included)
 (Panasonic R6P/LR6 or equivalent, not included)
 Rechargeable Batteries; DC 2.4 V with an optional Panasonic Rechargeable Batteries (SH-CDB8D set of 2)
 Car Battery; with an optional Panasonic car adaptor (SH-CDC9)
 DC 4.5 V $\diamond$ - $\odot$ - $\diamond$

DC IN:

Operation temperature range:

0°C-40°C

Rechargeable

temperature range: 5°C-40°C

Power supply:

DC 4.5 V

Power consumption:

Using AC adaptor; 5.5 W

Dimensions (W×H×D):

128×29×140 mm

Weight:

225 g without batteries
 270 g with batteries

Note: Design and specifications are subject to change without notice.
 Weight and dimensions are approximate.

PRECAUTION OF LASER DIODE

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens.

Wave length: 780 nm

Maximum output radiation power from pickup: 100 μ W/VDE

Laser radiation from the pickup lens is safety level, but be sure the followings:

1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

ACHTUNG: Dieses Produkt enthält eine Laserdioden. Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit abgestrahlt.

Wellenlänge: 780 nm

Maximale Strahlungsleistung der Lasereinheit: 100 μ W/VDE

Die Strahlung an der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Laserdioden gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlines blicken.
4. Nicht über längere Zeit in die Fokussierlines blicken.

ADVARSEL: I dette a apparat anvendes laser.

(Bottom side)

RQLS0077-2

ACCESSORIES

- AC adaptor1 pc.
RFEA401E-2S [for (E, EG) areas.] RFEA404B-1W [for (EB) area.] RFEA403Z-S [for (GC) area.] RFEA403A-S [for (GN) area.]
- Power plug adaptor1 pc.
SJP5213-1 [for (GC) area.]
- Stereo earphones1 pc.
RFEV317A-KS [for (E, EB, GC, GN) areas.] RFEV310A-KS [for (EG) area.]

LOCATION OF CONTROLS

- A** Skip/search buttons
(|◀, ▶| •SKIP/ = SEARCH)
- B** Memory/recall button
(MEMORY/RECALL)
- C** Display
- D** Repeat button (REPEAT)
- E** Play/pause button (▶ ||)
- F** Stop/power off button
(■/POWER OFF)
- G** Open button (OPEN)
- H** Headphones volume control
(VOLUME)
- I** XBS switch (XBS)
- J** Headphones jack (◯) 16Ω φ 3.5
- K** Play mode selector (MODE)
- L** Hold switch (HOLD)
- M** Push button (PUSH)
- N** Out jack (OUT)
- O** DC in jack (DC IN 4.5 V ◊-◊)
- P** Hole for car insulator mounting screw

POWER SUPPLY PREPARATIONS

Refer to the specifications (front cover) for the duration of the play time provided when rechargeable or dry cell batteries are used.

Using rechargeable batteries

Obtain the optional rechargeable batteries (SH-CDB8D).

Make sure that the rechargeable batteries have been recharged before use.

Recharging procedure

1 Place the rechargeable batteries inside the unit.

(No batteries other than RP-BP60/SH-CDB8D can be recharged.)

If the battery compartment lid becomes disengaged, position it horizontally and press it back into position.

2 Connect the AC adaptor.

- a** DC IN jack (DC IN 4.5 V ◊-◊)
- b** Back panel of the unit
- c** AC power outlet
- d** AC adaptor

Note

The configuration of the AC adaptor differs according to the area.

- It takes about 3 hours to fully recharge the batteries.

3 Upon completion of the recharging, disconnect the AC adaptor from the DC IN jack and power outlet.

Removing the batteries **A**

Push the batteries upward in the direction of the arrow to remove them.

- The batteries can be used for about 10 months (300 times) if they are used every day. They will need to be replaced if the duration of their operation drops drastically.
- You can operate the unit with the AC adaptor while recharging the batteries, but it will lengthen the recharging time.
- Recharging should be performed at 5°C–40°C.
- While recharging, the AC adaptor and rechargeable batteries may get warm. This is normal.

Using the dry cell batteries (not included)

Disconnect the AC adaptor and then install two LR6 (UM-3) type alkaline batteries.

The batteries are inserted and removed in the same way as for the rechargeable batteries.

Using the AC adaptor

Connect the AC adaptor supplied.

Refer to the section on "Using the rechargeable batteries" for details on the connections.

Note

The unit is in the standby condition when the AC adaptor is connected. The primary circuit is always "live" as long as the AC adaptor is connected to an electrical outlet.

Using the car adaptor

Be sure to obtain the car adaptor (SH-CDC9), available as an optional accessory. The batteries can be recharged inside the car using the car adaptor.

Battery indicator

Ⓐ Battery indicator

It starts flashing when the batteries have run down. After a short while the power is automatically cut off.

(The amount of time the unit will continue to play after the indicator has started flashing differs slightly, depending on the type of batteries used.)

Type of battery	Action
Rechargeable batteries	Recharge the batteries again.
Dry cell batteries	Replace with new batteries.

(The battery indicator may not flash if rechargeable batteries, other than those designated by Panasonic, are used.)

■ ACCIDENTAL OPERATION PREVENTION FUNCTION

This function prevents the unit from operating even if a control button is pressed in error. (The disc lid can still be opened and closed.) Use the function to prevent the following situations:

Example 1:

While the unit is not in use, the power is inadvertently turned on and the batteries run down.

Example 2:

Play is interrupted while the unit is in use.

■ To use the accidental operation prevention function

Set HOLD to the HOLD position.

Ⓐ Hold mode

■ "hold" indicator

If the unit is in the hold mode, the "hold" indicator appears when any of the unit's function buttons (except OPEN) is pressed.

When the unit is turned off

The "hold" indicator appears only when ► II is pressed.

Before operating the buttons

Be absolutely sure to move HOLD to release the unit from the hold mode.

■ SEQUENTIAL PLAY

1 Press OPEN to open the lid, and insert the disc.

Ⓐ Label must face upward.

Press the area near the center hole of the disc until it clicks into position.

Ⓑ Close the lid.

2 Release the hold mode.

3 Set MODE to NORMAL.

4 Connect the stereo earphones to the jack. (Plug in firmly.)

5 Press ► II.

Play now starts.

Ⓒ Track number in play

Ⓓ Elapsed playing time of each track

Play stops automatically when all the tracks have been played.

6 Adjust the volume level.

(If the unit has been connected to the car audio system, adjust the volume level between 4 and 6 on the unit, then adjust the volume level on the system.)

"OPEN" display

This appears for about 10 minutes after the lid is opened. (It does not appear when the unit is turned off.)

Automatic Shut-OFF function

When the unit is left for about 10 minutes in the stop or pause mode, this function automatically shuts off the power in order to prevent the batteries, etc. from discharging needlessly.

■ To temporarily stop disc play [A]

Press ► II during play.

Press again to resume play.

■ To stop play [B]

Press ■/POWER OFF during play. [Stop mode]

Ⓐ Total number of tracks.

Ⓑ Total playing time.

■ To turn off the unit [B] (F)

Press ■/POWER OFF during stop mode.

[Off mode]

For your reference:

"no disc" display

This appears for about 30 seconds when a disc has not been inserted or when a disc has not been inserted properly and then ► II is pressed.

■ Removing the disc [C]

After the disc has stopped rotating, open lid, press PUSH to release the disc. (Do not open the lid during play.)

Note [D]

Do not put anything inside the unit.

Skip function

(skip forward/backward) [A]

Press << or >> during play.

- During program play the tracks are skipped in the forward or backward direction in the programmed sequence.
- During random play, it is not possible to skip to the track which has already been played.

■ USING THE UNIT WITH OPTIONAL ACCESSORIES

Using the unit with an audio system [A]

Using the stereo connection cable (not included), you can hear CDs on your audio system.

- Connect the cable to the amplifier after turning off its power.
- Do not connect the cable to the PHONO jacks on the amplifier.
- Obtain the optional connecting cable if the amplifier comes with mini-phone jacks.
- Adjust the volume level on the amplifier.

- a OUT jack
- b Back panel of the unit
- c (White)
- d (Red)
- e Amplifier
- f To CD or AUX terminals
- g Stereo connection cable

■ CAUTIONS

AC adaptor

- Handle the AC adaptor carefully. Improper handling is dangerous.
 - Do not touch it with wet hands.
 - Do not place heavy objects on top of it.
 - Do not forcibly bend it.
- Be sure to connect only the AC adaptor provided with the unit.
- Disconnect the AC adaptor from the power outlet if the unit is not going to be used for a long time.

Unit

No altering or remodeling

This can cause malfunctioning.

No dropping or strong impacts

This may damage the unit.

Locations to be avoided

Avoid using the unit in the following locations since they can cause malfunctioning.

1. Bathrooms and other moisture-prone places
2. Warehouses and other dusty places
3. Very hot places near heating appliances, etc.

Do not leave the unit exposed to direct sunlight for long periods of time.

This may deform or discolor the cabinet and may also cause malfunctioning.

Rechargeable batteries

- Only the RP-BP60 (SH-CDB8D) batteries can be recharged.
- If the power delivered by the batteries lasts for a very short time after recharging, it means that the batteries' service life is over. Do not use them any more, please replace the batteries.
- Recharging already charged batteries will shorten their service life.
- When recharging batteries for the first time or when they have not been used for a long period of time, the play time may be shorter than usual. In a case like this, repeatedly recharge and discharge the batteries. This will restore them to their regular charged state.
- Do not allow any metal objects to touch the terminals of rechargeable batteries since this may cause short-circuiting which is dangerous.
- Do not peel off the plastic covering on the rechargeable batteries. Short-circuiting may occur, which is dangerous.

Search function

(rapid forward/backward) [A]

Keep depressed << or >> during play.

- During program play, random play or 1-track repeat play, only the track being played is searched.

<<: Backward direction >>: Forward direction

Using the unit with a car audio system

Items to be purchased

For connection to the car audio system:

Car stereo cassette adaptor (SH-CDM9D)

For securing the unit and connecting the power supply:

- Car adaptor (SH-CDC9)
- Car Mount Kit (SH-CDF7)
- Car mounting arm, Car insulator

Note

It may not be possible to use the unit with some types of car audio systems owing to restrictions imposed by the construction of the car stereo cassette adaptor or Car Mount Kit.

For further details, refer to the instructions of the part concerned.

Dry cell batteries/rechargeable batteries

To prevent damage to the batteries and electrolyte leakage, heed the following points into the unit.

- Align the ⊕ and ⊖ polarities properly when inserting the batteries.
- Do not mix different types or makes of batteries or old and new batteries.
- Remove the batteries if you do not plan to use the unit for an extended period of time.
- Do not throw batteries into a fire, and do not short-circuit, disassemble or subject them to excessive heat.
- Do not attempt to recharge dry cell batteries.

Carrying dry cell batteries or rechargeable batteries around

When putting dry cell or rechargeable batteries in a pocket or bag, ensure that no other metal objects, such as a necklace, are placed in the pocket or bag with them. Contact with metal may cause short-circuiting which, in turn, may cause a fire.

Be absolutely sure to carry the rechargeable batteries in the battery carrying case.

When driving a car

For safety reasons, do not operate the unit while driving.

Precautions for Listening with the Headphones

- Do not play your headset at a high volume. Hearing experts advise against continuous extended play.
- If you experience a ringing in your ears, reduce volume or discontinue use.
- Do not use while operating a motorized vehicle. It may create a traffic hazard and is illegal in many areas.
- You should use extreme caution or temporarily discontinue use in potentially hazardous situations.

- Even if your headset is an open-air type designed to let you hear outside sounds, don't turn up the volume so high that you can't hear what's around you.

When purchasing rechargeable batteries [A]

As a safety precaution, the portable CD players made by our company have a construction designed to make it impossible to recharge ordinary batteries.

To use rechargeable batteries, be absolutely sure to purchase the rechargeable Ni-Cd batteries designed especially for this unit.

Special rechargeable Ni-Cd batteries:

SH-CDB8D (set of 2)

For details, check with your dealer.

- Ⓐ Special rechargeable batteries
- Ⓑ Ordinary dry cell batteries/rechargeable batteries

[For (E, EB) areas.]

Notice about the rechargeable battery

The battery is designated recyclable. Please follow your local recycling regulations.

HANDLING PRECAUTIONS FOR TRAVERSE DECK

The laser diode in the traverse deck (optical pickup) may break down due to potential difference caused by static electricity of clothes or human body.

So, be careful of electrostatic breakdown during repair of the traverse deck (optical pickup).

• Handling of traverse deck (optical pickup)

1. Do not subject the traverse deck (optical pickup) to static electricity as it is extremely sensitive to electrical shock.
2. The short land between the No. ④ (LD) and No. ⑤ (GND) pins on the flexible board (FFC) is shorted with a solder build-up to prevent damage to the laser diode. To connect to the PC board, be sure to open by removing the solder build-up, and finish the work quickly.
3. Take care not to apply excessive stress to the flexible board (FFC).
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

• Grounding for electrostatic breakdown prevention

1. Human body grounding
Use the anti-static wrist strap to discharge the static electricity from your body.
2. Work table grounding
Put a conductive material (sheet) or steel sheet on the area where the optical pickup is placed, and ground the sheet.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the traverse deck (optical pickup).

■ OPERATION CHECKS AND MAIN COMPONENT REPLACEMENT PROCEDURES

Warning: This product uses a laser diode. Refer to caution statements on page 2.

ACHTUNG: • Die Lasereinheit nicht zerlegen.

• Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.

- NOTE**
1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
 2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
 3. Illustrated screws are equivalent to actual size.
 4. [] indicates parts No.

1. Checking for the P.C.B.

[XTN17+6GFZ] (Black)

• Check the P.C.B. (Solder side) as shown below.

NOTE

After checking, unsolder the short land to open circuit.

2. Replacement for the traverse deck

• Follow the **Step 1** ~ **Step 3** in item 1.

NOTE

Solder the point between pin 4 (LD) and pin 5 (GND) of FFC board.
(Refer to "Handling Precautions for Traverse Deck" on page 6.)

3. Replacement for the CD cover ass'y

- Follow the **Step 1** ~ **Step 3** in item 1.

- Release the ribs, and then remove the CD cover ass'y.

■ CHECKING THE OPERATION PROBLEMS ON THE TRAVERSE DECK (OPTICAL PICKUP)

Make sure to follow the procedures below to check the operation problems of the traverse deck (optical pickup) before replacing it. Replace the traverse deck only after the problem is identified.

- Check electrical circuit.
- Check for flaws on disc or if it is warped or not centered.

• Check the operations described below on the traverse deck after replacing it.

* Checking Skip Search

1. Play an ordinary musical program disc.
2. Press the skip button to check for normal skip search operation (in both the forward and reverse directions).

* Checking Manual Search

1. Play an ordinary musical program disc.
2. Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and reverse directions).

* Checking Playability

1. Play the 0.7 mm black dot and the 0.7 mm wedge on the playability test disc (SZZP1054C) and verify that no sound skip or noise occurs.
2. Play the middle tracks of the uneven test disc (SZZP1056C) and verify that no sound skip or noise occurs.

AUTOMATIC ADJUSTMENT RESULTS DISPLAY FUNCTION (SELF-CHECK FUNCTION)

On this unit (SL-XP140), each automatic adjustment result are displayed on the LCD. This function is convenient to check or identify which automatic adjustment circuit is incorrect. The followings are the contents of the automatic adjustment result displays (self-check function).

• How to display automatic adjustment results

1. Load the test disc (SZZP1054C).
2. Press the ◀◀ (SKIP/SEARCH) and ▶▶ (SKIP/SEARCH) Buttons simultaneously and hold them, and additionally press the ▶/|| (PLAY/PAUSE) Button.
3. Press the ■ (STOP/POWER OFF) Button once.
4. An automatic adjustment result is displayed on the LCD.

• Display of automatic adjustment results (self-check function)

〈Example〉 Follow the below steps when “E—1” is displayed.

(Cause: Focus balance (FBC) is set beyond the limit.)

• Check if

- (1) the waveform or voltage of the focus servo circuit is correct, and
- (2) the optical pickup returns to the normal state by exchanging the traverse deck.

Follow the below steps when “E—4” is displayed.

(Cause: Focus gain (FGC) is set beyond the limit.)

• Check if

- (1) the waveform or voltage of the focus servo circuit is correct,
- (2) the focus coil of the optical pickup is correct (around 15 ohms), and
- (3) the optical pickup returns to the normal state by exchanging the traverse deck.

Follow the below steps when “E—F” is displayed.

(Cause : All adjustments (TGC, FGC, TBC, FBC) are set beyond the limit.)

• Check if

- (1) the optical pickup returns to the normal state by exchanging the traverse deck, and
- (2) the waveform or voltage of the servo IC's (IC101, 501) are correct.

Note:

It is not always necessary to exchange the traverse deck when an error message is displayed.
Be sure to check if the circuit is defective or not before exchanging the traverse deck.

Note:

If any other disc than the test disc (SZZP1054C) is used, an error message may be displayed. This is not a malfunction.

■ MEASUREMENTS AND ADJUSTMENTS

Warning: This product uses a laser diode. Refer to caution statements on page 2.

ACHTUNG: • Die lasereinheit nicht zerlegen.

• Die lasereinheit darf nur gegen eine vom hersteller spezifizierte einheit ausgetauscht werden.

• Measuring instruments and special tools

• **Test discs**

1. Playability test disc (SZZP1054C)
2. Uneven test disc (SZZP1056C)

• Musical program disc (ordinary)

- DC voltmeter
- Lead wire (for test points)

• Test short land

Short-circuit the lands of the laser ON/OFF switch (S201) by soldering them. It turns “ON” position. (Refer to below figure or printed circuit board and wiring connection diagram for short land location on page 22.)

Note: Remove the solders from the lands after adjustment.

• Adjustment point

Notes: 1. Please refer to the printed circuit board and wiring connection diagram for test point locations.

• Adjustment procedure

(1) POWER SUPPLY VOLTAGE ADJUSTMENT

1. Connect the DC voltmeter to **TP2** (VCC) (+) and **TP3** (GND) on the P.C.B.
2. Connect the AC adaptor cord to the DC (IN) port and move the PLAY switch to the ON position.
(Use a new dry cell battery or a rechargeable battery that is full charged.)
3. Insert the test disc, and switch the player power ON.
4. Adjust **VR11** on the P.C.B. at 3.32 ± 0.02 V.

(2) CHECK OF PLAY OPERATION

* Checking Skip Search

1. Play an ordinary musical program disc.
2. Press the skip button to check for normal skip search operation (in both the forward and backward directions).

* Checking Manual Search

1. Play an ordinary musical program disc.
2. Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and backward directions).

* Checking Playability

1. Play the 0.7 mm black dot and the 0.7 mm wedge on the playability test disc (SZZP1054C) and verify that no sound skip or noise occurs.
2. Play the middle tracks of the uneven test disc (SZZP1056C) and verify that no sound skip or noise occurs.

• Automatic adjustment

On our conventional type portable CD player, there were mounted 6 semi-fixed controls for each adjustment. Since the SL-XP140 servo circuit is equipped with an automatic adjusting circuit, these controls are removed from SL-XP140.

On conventional portable CD player

Use for Old Servo IC (AN8373SE2, AN8374SE2)

1. Tracking Offset Adjustment VR (TOC) ☐
2. Focus Offset Adjustment VR (FOC) ☐
3. Tracking Gain Adjustment VR (TGC) ☐
4. Focus Gain Adjustment VR (FGC) ☐
5. Tracking Balance Adjustment VR (TBC) ☐
6. Focus Balance Adjustment VR (FBC) ☐

On SL-XP140

Use for New Servo IC (AN8837SBE1, MN662745RPC)

- ➡ Non Adjustment
- ➡ Automatic Adjusting Circuit

Total 6 Adjustment VRs

➡ No Adjustment VR

Although all discs are manufactured according to the same specifications, their characteristics are not always precisely the same because they are produced by different manufacturers in various lots, or have different warp etc. SL-XP140 automatically controls the servo circuit to obtain optimum performance according to any disc's characteristics. Therefore, no malfunction occurs because of mis-adjustment.

BLOCK DIAGRAM

■ SCHEMATIC DIAGRAM (See parts list on pages 30, 31.)

(This schematic diagram may be modified at any time with the development of new technology.)

Notes:

- **S201:** Laser ON/OFF switch in "OFF" position.
(It turns "ON" with disc holder closed.)
- **S202:** Rest detector in "OFF" position.
(It turns "ON" when optical pickup comes to innermost periphery.)
- **S301:** Memory/recall (MEMORY/RECALL) switch.
- **S302:** Repeat (REPEAT) switch.
- **S303, 304:** Skip/search (◀◀-SKIP/--SEARCH▶▶) switches.
(S303: ▶▶, S304: ◀◀)
- **S305:** Stop/power off (■ POWER OFF) switch.
- **S306:** Play/pause (▶ ||) switch.
- **S307:** Play mode selector (MODE) in "RANDOM" position.
(RANDOM↔NORMAL↔RESUME)
- **S308:** Hold (HOLD) switch in "ON" position.
- **S701:** XBS selector in "OFF" position.
- The voltage value and waveforms are the reference voltage of this measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of GND terminal (DC IN Jack). Accordingly, there may arise some errors in the voltage values and waveforms depending upon the internal impedance of the tester or measuring unit.
- * The parenthesized is the voltage for test disc (1 kHz, L+R, 0 dB) in play mode, and the other, for no disc in stop mode.
- * AC adaptor is used for power supply.
-  : Positive voltage lines.
-  : Audio signal lines.
- Important safety notice:
Components identified by  mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.
- ※ marks indicate printed resistor.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

- Cover the parts boxes made of plastics with aluminum foil.
- Ground the soldering iron.
- Put a conductive mat on the work table.
- Do not touch the pins of IC or LSI with fingers directly.

• → : Audio signal lines.

(P.C.Board: on page 22)

• → : Audio signal lines.

PRINTED CIRCUIT BOARD AND WIRING CONNECTION DIAGRAM

Notes:

- In this printed circuit board diagram, the parts and foil patterns on the board facing toward you are printed in black. The opposite side is printed in blue.
- The "●" mark denotes the connection points of double-faced foil patterns (through holes) on both sides of the printed circuit board.
- This printed circuit board diagram may be modified at any time with the development of new technology.

REPAIRING THE PRINTED RESISTOR

This unit uses a printed resistor for the printed circuit board. If the printed resistor is insulated, all maintenance should be done with reference to the following repair parts connection diagram and repair parts list.

Note: Reading the repair parts connection diagram.

- The pattern foil and repair parts are printed in blue.
- The connection points (•••••) for the pattern foil and repair parts are printed in black.

■ TERMINAL GUIDE

● IC501 (MN662745RPC): Servo processor/Digital signal processor/Digital filter/D/A converter

Pin No.	Mark	I/O Division	Function
1	BCLK	O	Serial bit clock output
2	LRCK	O	L/R discriminating signal output
3	SRDATA	O	Serial data signal output
4	DVDD1	I	Power supply (digital circuit) terminal
5	DVSS1	—	GND (digital circuit) terminal
6	TX	—	Digital audio interface signal (Not used, open)
7	MCLK	I	Command clock signal
8	MDATA	I	Command data signal
9	MLD	I	Command load signal ("L" : LOAD)
10	SENSE	—	Sense signal (OFT, FESL, NACEND, NAJEND, POSAD, SFG) (Not used, open)
11	FLOCK	—	Optical servo condition (focus) ("L" : lead-in) (Not used, open)
12	TLOCK	—	Optical servo condition (tracking) ("L" : lead-in) (Not used, open)
13	BLKCK	O	Sub-code block clock (f=75 Hz)
14	SQCK	I	Sub-code Q register clock
15	SUBQ	O	Sub-code Q data
16	DMUTE	I	Muting input ("H" : MUTE) (Not used, connected to GND)
17	STAT	O	Status signal (CRC, CUE, CLVS, TTSTOP, FCLV, SQCK)
18	RESET	I	Reset signal ("L" : reset)
19	SMCK	O	System clock (f=4.2336 MHz)
20	PMCK	O	Frequency division clock signal ($f = \frac{1}{1.92} \times ck = 88.2 \text{ kHz}$)
21	TRV	O	Traverse servo control

Pin No.	Mark	I/O Division	Function
22	TVD	O	Traverse drive signal
23	PC	O	Turntable motor drive signal ("L" : ON)
24	ECM	O	Turntable motor drive signal (Forced mode)
25	ECS	O	Turntable motor drive signal (Servo error signal)
26	KICK	O	Kick pulse output
27	TRD	O	Tracking drive signal output
28	FOD	O	Focus drive signal output
29	VREF	I	D/A drive output (TVD, ECS, TRD, FOD, FBAL, TBAL) normal voltage input terminal
30	FBAL	O	Focus balance adj. output (Not used, open)
31	TBAL	O	Tracking balance adj. output
32	FE	I	Focus error signal (analog input)
33	TE	I	Tracking error signal (analog input)
34	RFENV	I	RF envelope signal
35	VDET	I	Oscillation det. signal ("H" : det.)
36	OFTR	I	Off track signal ("H" : Off track)
37	TRCRS	I	Track cross signal input
38	RFDET	I	RF detection signal ("L" : detection)
39	BDO	I	Dropout detection signal ("H" : dropout)
40	LDON	O	Laser power control ("H" : ON)
41	TES	—	Tracking error shunt output ("H" : dropout) (Not used, open)
42	PLAY	—	Play signal ("H" : play) (Not used, open)

Pin No.	Mark	I/O Division	Function
43	WVEL	—	Double velocity status signal ("H" : double) (Not used, open)
44	ARF	I	RF signal input
45	IREF	I	Reference current input
46	DRF	—	DSL bias terminal (Not used, connected to GND)
47	DSL F	O	DSL loop filter terminal
48	PLL F	I	PLL loop filter terminal
49	VCO F	I	VCO loop filter terminal (Not used, connected to AVDD2)
50	AVDD2	I	Power supply (analog circuit) terminal (2)
51	AVSS2	—	GND (analog circuit) terminal
52	FS384	—	384 fs (16.9344 MHz) output (Not used, open)
53	PCK	—	PLL extract clock (f=4.3218 MHz) (Not used, open)
54	TROF	—	Tracking servo OFF signal (Not used, open)
55	SUBC	—	Sub-code serial output data (Not used, open)
56	SBCK	—	Sub-code serial input clock (Not used, connected to GND)
57	VSS	—	GND terminal
58	X1	I	Crystal oscillator terminal (f=16.9344 MHz)
59	X2	O	
60	VDD	I	Power supply terminal
61	TRVSTOP	O	Traverse motor stop control terminal
62	CLDCK	—	Sub-code frame clock signal (f CLDCK=7.35 kHz: Normal) (Not used, open)

Pin No.	Mark	I/O Division	Function
63	FCLK	—	Crystal frame clock (Not used, open)
64	IPFLAG	—	Interpolation flag terminal
65	FLAGO	—	Flag terminal
66	CLVS	—	Turntable servo phase synchro signal ("H" : CLV, "L" : Rough servo) (Not used, open)
67	CRC	—	Sub-code CRC check terminal ("H" : OK, "L" : NG) (Not used, open)
68	DEMPHA	—	De-emphasis ON signal ("H" : ON) (Not used, open)
69	FLAG6	—	Flag terminal
70	SEL	—	Not used, connected to GND
71	TEST	I	Test terminal (Normal: "H")
72	AVDD1	I	Power supply (analog circuit) terminal (1)
73	OUTL	O	Lch audio signal
74	AVSS1	—	GND (analog circuit) terminal (1)
75	OUTR	O	Rch audio signal
76	RSEL	I	Polarity direction control terminal of RF signal (Not used, connected to power supply)
77	CSEL	I	Frequency control terminal of crystal oscillator (Not used, connected to GND)
78	ISRDATA	I	Serial data signal input
79	ILRCK	I	L/R discriminating signal input
80	IBCLK	I	Serial bit clock input

● IC11 (AN8788FB): DC-DC converter & motor drive

Pin No.	Mark	I/O Division	Function
1	RESET	O	Reset signal input terminal
2	DED	I	Dead time input terminal
3	OUT	O	DC-DC converter output terminal
4	FB	O	Error amp output terminal
5	IN	I	Error amp input terminal
6	ROUT	O	Remote control interface output terminal
7	SGND	—	GND terminal
8	SPRO	I	Short protection input terminal
9	CT	I	Triangular wave oscillator terminal
10	AREF	O	1/2 AVDD output terminal
11	SV _{CC}	I	Power supply terminal
12	CRIP	I	Capacitor connection terminal for ripple filter
13	AV _{DD}	O	Ripple filter output terminal
14	DRV _{CC}	I	Power supply terminal
15	VREF	I	1/2 VCC input terminal
16	INFO	I	Focus coil drive input terminal
17	INTR	I	Tracking coil drive input terminal
18	LDON	I	Laser ON/ OFF drive control terminal
19	INSP	I	Spindle motor drive input terminal
20	PC	I	Spindle motor drive ON/OFF control terminal
21	INTV	I	Traverse motor drive control terminal
22	TRVSTOP	I	Traverse motor ON/ OFF control terminal

Pin No.	Mark	I/O Division	Function
23	TR-	O	Tracking coil drive output terminal
24	TR+		
25	FO-	O	Focus coil drive output terminal
26	FO+		
27 28	PGND	—	GND terminal
29	SP+	O	Spindle motor drive output terminal
30	SP-		
31	TRV+	O	Traverse motor drive output terminal
32	TRV-		
33	ICNT	I	Rechargeable current setting terminal
34	MRST	O	Muting reset output terminal
35	VSEN	I	Empty det. input terminal
36	EMPTY	O	Empty det. output terminal
37	PV _{CC1}	I	Power supply terminal
38	CLK	I	External synch. clock input terminal
39	START	I	Start oscillator input terminal
40	POWER	I	Power ON/ OFF input terminal
41	PV _{CC2}	I	Power supply terminal
42	I OUT	O	Rechargeable and battery det. terminal
43	DRGND	—	GND terminal
44	RIN	I	Remote control signal input terminal

● IC301 (SC435609FU): System control/LCD drive

Pin No.	Mark	I/O Division	Function
1 } 6	FP6 } FP1	O	LCD segment signal output terminal
7	BP3/FP0		
8 } 10	BP2 } BP0		
11 } 13	VLCD3 } VLCD1	I	Voltage control input terminal
14	V _{DD}	I	Power supply terminal
15	OSC1	I	Main system clock input terminal
16	OSC2	—	Not used, open
17	XOSC2	—	Not used, open
18	XOSC1	—	Not used, connected to GND
19	V _{SS}	—	GND terminal
20	RESET	O	Reset signal output terminal
21	STAT	I	Status signal input (CRC, CUE, CLVS, TT STOP, FCLV, SQOK)
22	BLKCK	I	Sub-code block clock (F=75Hz with normal play)
23	SUBQ	I	Sub-code Q data input terminal
24	SQCK	O	Sub-code Q register clock signal output terminal
25	MEMORY	I	Key switch input terminal (MEMORY)
26	REPEAT	I	Key switch input terminal (REPEAT)
27	STOP	I	Key switch input terminal (STOP)
28	PLAY	I	Key switch input terminal (PLAY/PAUSE)
29	RESUME	I	Key switch input terminal (RESUME)
30	RANDOM	I	Key switch input terminal (RANDOM)
31	HOLD	I	Key switch input terminal (HOLD)
32	EMPTY	I	Empty det. input terminal

Pin No.	Mark	I/O Division	Function
33	OPEN	I	Disc holder open det. terminal ("L" with open)
34	SKIP. R	I	Key switch input terminal (SKIP/SEARCH. R)
35	SKIP. F	I	Key switch input terminal (SKIP/SEARCH. F)
36	WRDRCN/RSENSE	I/O	Remote control signal terminal
37	BUZ	O	Beep control signal output terminal
38	MODE2	—	Not used, connected to GND
39	POWER	O	Power ON/OFF signal output terminal
40	MUTE	O	Muting signal output terminal ("H" : mute)
41	MLD	O	Command load signal output terminal ("L" : load)
42	MDATA/BATTERY	O	Command data signal output terminal
43	MCLK/MODE1	O	Command clock signal output terminal
44	REST	I	Rest det. input terminal
45	RCLK/STROBE1	O	Remote control clock signal output terminal
46	RDATA/STROBE2	I/O	Remote control data signal terminal
47	ACDET	I	Power det. input terminal
48	CHARGE/LIGHT	—	Not used, open
49	LCDREM	—	Not used, open
50	SHOCK. P	I	Key switch input terminal (not used connected to power supply)
51	ZSENSE	I	Sense signal input terminal
52	VUP	O	Reference current control output terminal
53 } 54	FP18 } FP17	—	Not used, open
55 } 63	FP16 } FP8	O	
64	FP7	—	Not used, open

● IC101 (AN8837SBE1): Servo amp.

Pin No.	Mark	I/O Division	Function
1	PDE	I	Tracking signal input terminal (1)
2	PDF	I	Tracking signal input terminal (2)
3	V _{CC}	I	Power supply terminal
4	PDA	I	Focus signal input terminal (1)
5	PDB	I	Focus signal input terminal (2)
6	LPD	I	APC amp input terminal
7	LD	O	APC amp output terminal
8	RF	O	RF summing output terminal
9	RF IN	I	RF signal input terminal
10	CSBRT	O	Capacitor connection terminal for OFTR
11	CEA	O	Capacitor connection terminal for H.P.F. amp
12	BDO	O	Dropout signal output terminal ("H" : Dropout)
13	LDON	I	APC control input terminal
14	GND	—	GND terminal

Pin No.	Mark	I/O Division	Function
15	/RFDET	O	RF det. signal output terminal ("L" : Det.)
16	CROSS	O	Track cross signal output terminal
17	OFTR	O	Off track signal output terminal ("H" : Off track)
18	VDET	O	Vibration det. signal output terminal ("H" : Det.)
19	ENV	O	RF envelope signal output terminal
20	ENV OFF	I	ENV control input terminal
21	TEBPF	I	VDET input terminal
22	TE IN	I	Tracking error amp input terminal
23	TE OUT	O	Tracking error amp output terminal
24	FE OUT	O	Focus error amp output terminal
25	FE IN	I	Focus error amp input terminal
26	VREF	O	Reference voltage output terminal
27	TBAL	I	Tracking balance signal input terminal
28	FBAL	I	Focus balance signal input terminal

■ REPLACEMENT PARTS LIST

Notes: * Important safety notice:
 Components identified by $\triangle$ mark have special characteristics important for safety.
 Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.
 When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
 * Warning: This product uses a laser diode. Refer to caution statements on page 2.
 * ACHTUNG: Die Lasereinheit nicht zerlegen.
 Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.

REPLACEMENT PARTS LIST

Notes:

- * Important safety notice:
Components identified by Δ mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.
When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
- * The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)
Parts without these indications can be used for all areas.
- * Warning: This product uses a laser diode. Refer to caution statements on page 2-
- * ACHTUNG: Die Lasereinheit nicht zerlegen.
Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.

* This item is not attached to merchandise, but it is supplied as a replacement part.

- The marking (RTL) indicates that the Retention Time is limited for this item. After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.

■ RESISTORS AND CAPACITORS

Notes: • Capacity values are in microfarads (uF) unless specified otherwise, P=Pico-farads (pF) F=Farads (F)
• Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM)
