Replacement of Component Parts

- I. To remove bottom cover:
 - a. Depress locking spring clip through hole in top of case.
 - b. With spring clip depressed, pull cover carefully out and up off the retaining lugs in the bottom of the case center strip.
- II. To replace batteries:
 - a. Remove bottom cover.
 - b. Remove, either or both, the "A" and "B" battery as may be necessary. The "B" battery snap fasteners can best be removed by inserting a screwdriver under the snap fastener strip and prying upward.
- III. To remove the case center strip:
 - a. Remove bottom cover.
 - b. Remove one screw (A) on the inside at the handle end.
 - c. Tilt case center strip and lift.
- IV. To replace tubes:
 - a. Remove bottom cover.
 - b. Remove "B" battery.
 - c. Remove case center strip.
 - d. Remove and replace tubes as required.
- V. To remove face panel from chassis plate:
 - a. Remove dial knob (pull off).
 - b. Remove bottom cover (I), batteries (II) and case center strip (III).
 - c. Unsolder leads to loop connectors.
 - d. Remove the four Phillips head screws (B) located at three corners and end close to 2nd I.F. transformer, which hold the chassis to face panel.
 - e. The face panel may now be folded back into the case top lid.
- VI. To remove speaker:
 - a. Remove face panel (see item V).
 - b. Unsolder voice coil leads.
 - c. Remove two Phillips head screws (C) on chassis plate holding speaker.
- VII. To remove output transformer:
 - a. Remove speaker (see item VI).
 - b. Unsolder transformer leads.
 - c. Remove rivet (use bolt for replacement).
 - d. Unsolder mounting lug.
- VIII. To remove chassis subassemblies from chassis plate:
 - a. Remove tubes (see item IV).
 - b. Unsolder grounding strap (E) which connects tube shelf to chassis plate.
 - c. Unsolder two wires which connect to speaker.
 - d. Unsolder two wires attached to switch.
 - e. Unsolder leads to loop connectors.
 - f. Remove dial knob (pull off).
 - g. Remove two screws (F) holding tube shelf to chassis plate.
 - h. Remove nut (G) between I.F. transformers.
 - i. Remove screw (G) beneath the negative terminal of "A" battery holder, and also screw (G) adjacent to volume control below "A" battery holder.
- IX. To remove volume control:
 - a. Remove chassis subassembly from chassis plate (see item VIII).
 - b. Unsolder the two leads to the "A" battery holder.
 - c. Lift up the "A" battery holder by removing the one screw (C) in its base. This holder has a hinge action and must be lifted up and back to remove.
 - d. Unsolder volume control leads.
 - e. Remove volume control knob (attached to shaft with set screw)
 - f. Remove volume control assembly by bending back four lugs.
- X. To remove oscillator coil:
 - a. Same procedure and steps as covered in item VIII for removal of chassis subassembly plus the following.
 - b. Unsolder oscillator coil leads.
 - c. Remove coil by unsnapping spring mounting clips from angle bracket.
- XI. To remove tuning condenser:
 - a. Remove case center strip (III).
 - b. Unsolder two leads and two ceramic capacitors (C2, C20) from tuning condenser.
 - c. Remove tuning knob (pull off).
 - d. Remove the two screws (H) (accessible through dial knob opening) which hold the tuning condenser to the chassis subassembly.
- XII. To remove 1st I-F transformer:
 - a. Remove chassis subassemblies (see item VIII).
 - b. Unsolder four leads from 1st I-F transformer.
 1. Blue to screen of 1R5 tube.
 2. Green to grid of 1U4 tube.
 3. Red to B+ terminal of 5 lug terminal board TB5.
 4. Black to terminal board TB2.
 - c. Unsolder and bend mounting lugs straight on the I-F transformer can.
- XIII. To remove 2nd I-F transformer:

 - b. Unsolder leads to loop connectors.
 - c. Remove snap fasteners holding loop in cover.
 - d. Carefully pry out on edge next to catch (opposite hinges).
 - e. When reassembling press loop assembly into top lid on the side next to the connectors to cause the plastic projections on the loop assembly to engage in the detents in the top lid.
- XV. To remove switch:
 - a. Remove case center strip (III).
 - b. Remove screw (I) which holds switch to chassis plate.
 - c. Unsolder the two wires which connect to the switch.
