■ GENERAL

Power consumption

15 W

Power supply

For Great Britain and Oceania:

AC 50/60 Hz, 240 V

For F.R. Germany, Italy and Continental Europe:

AC 50/60 Hz, 220 V

For others:

AC 50/60 Hz, 110 V/127 V/220 V/240 V

Dimensions (W × H × D)

430 × 136 × 290 mm

(16-15/16" × 5-3/8" × 11-13/32")

Weight

4.8 kg (10.6 lb.)

Note:

Specifications are subject to change without notice.

Weight and dimensions are approximate.

CONNECTIONS

Make connections in the numbered sequence by using the included cables.

- 1 Connect the stereo connection cables.
- 2 Connect the L-type cables.
- 3 Connect the AC power supply cord.

The illustration at the left shows an example of connections made when this unit is combined with a Technics hi-fi component system, and shows only the connections to be made to and from this unit in that combination.

Refer to the illustration together with the instructions provided below.

"REMOTE CONTROL IN" terminal

Make a connection from this terminal to the control terminal for a cassette deck with a Technics receiver or a Technics amplifier. (For detailed information, refer to the operating instructions of the Technics receiver or the Technics amplifier.)

"REMOTE CONTROL OUT" terminal

Make a connection from this terminal to the "REMOTE INPUT" terminal of a Technics graphic equalizer or to the "REMOTE" terminal of a Technics compact disc player. (For detailed information, refer to the operating instructions of the Technics graphic equalizer or the Technics compact disc player.)

"SYNCHRO EDIT" terminal

Make a connection from this terminal to a terminal that has the synchro-edit function of a Technics compact disc player.

Refer to page 5. (Contact your dealer for details.)

AC power supply cord (3)

The configuration of the AC outlet and AC power supply cord differs according to area.

For United Kingdom

Household AC outlet

Placements hints

If this unit is placed near a receiver or a tuner, a "hum" noise may be heard during tape playback, recording, or AM reception of the receiver or the tuner.

If this occurs, leave as much space as possible between the units, or place them where there is the least amount of "hum".

■ LOCATION OF CONTROLS

Controls common to both tape decks

1 Power “standby / on ” switch (power/ standby on)

This switch switches ON and OFF the secondary circuit power only. The unit is in the “standby” condition when this switch is set to the standby  position. Regardless of the switch setting, the primary circuit is always “live” as long as the power cord is connected to an electrical outlet.

2 Dolby noise-reduction indicators (,)

One of these indicators illuminates to show the type of Dolby noise-reduction system selected by pressing one of the Dolby noise-reduction buttons.

3 Input level meter (peak level)

During tape playback, this meter indicates the level of the recorded sound source.
During recording, it indicates the level to which the recording-level controls have been adjusted.

4 Reverse-mode indicators (, ,)

One of these indicators illuminates to show which of the reverse modes was selected by the reverse-mode selectors.

5 Edit-recording tape-speed indicators (,)

One of these indicators illuminates to show which of the tape-to-tape recording speeds was selected by pressing one of the edit-recording tape-speed buttons.

6 Timer switch (timer)

This switch is used to automatically begin a tape recording or tape playback at a certain time, selected by an optional timer. (Refer to page 5.)

7 Headphones jack (phones)

8 Synchro-start button (synchro start)

This button can be used to start a tape-to-tape recording, simultaneously starting tape deck 1 (the playback deck) and tape deck 2 (the recording deck).

9 Reverse-mode selectors (reverse mode)

These selectors can be used for selection of the reverse mode (for either playback or recording).

10 Dolby noise-reduction buttons (Dolby NR)

These buttons can be used to reduce the hiss noise that is characteristic of tape. This unit is provided with both the B-type and C-type noise-reduction systems.

11 Recording-level controls (rec level)

These controls can be used to regulate the recording level of tape deck 2.

12 Edit-recording tape-speed buttons (speed)

These buttons can be used to select the recording speed when a tape-to-tape recording is made.

Controls applicable to tape deck 1 and/or 2

Indicators applicable only to deck 1 or 2

1 Cassette holder

2 Fast-forward/cue, rewind/review buttons (cue/review/▶▶/◀◀)

These buttons can be used to advance or rewind the tape. During playback these buttons are used to cue or review while listening to the contents at high speed. (Refer to page 8.)

3 Pause button (pause/||)

This button can be used to temporarily stop the tape playback or recording of tape deck 2 only.

4 Automatic-record-muting button (auto rec mute/⊙)

This button can be used to make a silent interval on the tape being recorded on tape deck 2.

5 Record button (rec/●)

This button can be used to change tape deck 2 to the recording stand-by mode.

6 Eject button (eject)

This button can be used to open the cassette holder.

7 Reverse-side playback button (play/◀)

This button can be used to start the playback or recording (of tape deck 2 only) of side "B" of the cassette. (The tape will then begin moving in the right-to-left direction.)

8 Stop button (stop/■)

This button can be used to stop tape movement.

9 Forward-side playback button (play/▶)

This button can be used to start the playback or recording (of tape deck 2 only) of side "A" of the cassette. (The tape will then begin moving in the left-to-right direction.)

A Tape deck 2 counter/reset button (DECK 2 counter/reset)

This tape counter shows the amount of tape movement of the tape in tape deck 2.

The reset button can be used to reset the tape counter reading to "000".

B Reverse-side Indicator (rev/◀)

Illuminates during playback or recording (of tape deck 2 only), to indicate that side "B" of the tape is being used.

C Remote-control indicator (R.C./■)

This indicator illuminates to indicate that this tape deck can now be controlled by the remote-control transmitter.

D Recording indicator (rec/●)

This indicator illuminates to indicate that tape deck 2 is in the recording stand-by mode, or is recording.

E Playback indicator (play/■)

When this indicator illuminates steadily, it indicates that this tape deck is in the playback mode or the recording mode (of tape deck 2 only).

When it flashes continually, this is an indication that tape deck 2 is in the pause mode or the recording stand-by mode.

F Forward-side indicator (fwd/▶)

Illuminates during playback or recording (of tape deck 2 only), to indicate that side "A" of the tape is being used.

■ CONVENIENT FEATURES FOR RECORDING

Compact disc synchro-edit-recording

When a Technics compact disc player with the compact disc synchro-edit function is used in combination with this unit, recordings can be made on side "A" and side "B" of the tape, without interruptions of tracks, in conjunction with the tape length.

Procedure for this unit

1. Follow steps 1 through 9 in the section concerning recording.

Procedure for the compact disc player

2. **Press the stop button.** (Disc play will stop.)
3. **Press the edit-tape-length button and specify the length of the tape to be used.**
The tracks to be recorded to side "A" of the tape and those to be recorded to side "B" will then be automatically selected according to the tape's length.
4. **Press the play button.**
The recording will start at the same time that play starts at the compact disc player.

For more detailed information, refer to the operating instructions of the Technics compact disc player to be used.

Notes:

- Recordings cannot be made on the leader tape (attached to each end of recording tape), so advance the tape slightly from its end before starting a recording. Also check to be sure that side A ("fwd") indicator is illuminated.
- If the CD program contents to be recorded on side "A" of the tape are shorter than the actual tape length, this unit will continue to record until it reaches the end of side "A", while the compact disc player switches to the pause mode. At the end of side "A", deck 2 automatically switches to side "B" and after few seconds the compact disc player will resume play.
- When canceling the synchro-edit recording mode, press the stop button on the compact disc player and then press the stop button on this unit. (To cancel mid-way through a performance, press the stop button on the compact disc player twice in succession.)

■ TIMER RECORDING/PLAYBACK

If an audio timer (not included) is connected to this unit, recording of a radio broadcasts, or tape playback, will automatically begin at the preset time.

Timer recording or playback is also possible by using a tuner with a timer.

Connect the AC power cord of this unit to the power source outlet of the timer. (See the operating instructions of the timer for detailed information.)

Note:

Playback by one deck only can only be done by tape deck 2.

Timer recording (tape deck 2 only)

- 1 **Prepare for recording.**
Follow steps 1 through 9 of "Recording" on page 9. After adjusting the recording level, press the stop button. Check the tape side ("A" or "B") to be recorded on to be sure it is correct.
- 2 **Set the timer to the desired recording-start time.**
(Switch the power of this unit to standby mode.)
- 3 **Set the timer switch to the "rec" position.**
(At the set time, the power will be switched ON and the broadcast will be recorded.)

■ After setting the timer

Check to be sure that the power switch is set to the "on" position.

Timer playback

Series playback (tape deck 2 to tape deck 1) is also possible.

- 1 **Rewind the tape to the position from which you want playback to begin.**
Check the tape side ("A" or "B") to be played back to be sure it is correct.
- 2 **Set the timer to the desired playback-start time.**
(Switch the power of this unit to standby mode.)
- 3 **Set the timer switch to the "play" position.**
(At the set time, the power will be switched ON and the playback will begin.)

■ After setting the timer

Check to be sure that the power switch is set to the "on" position.

DISASSEMBLY INSTRUCTIONS

"ATTENTION SERVICER"

Some chassis components may have sharp edges. Be careful when disassembling and servicing.

Ref. No. 1	Removal of the cabinet	Ref. No. 2	Removal of the main P.C.B.
Procedure 1	Remove the 6 screws (①~⑥).	Procedure 1→2	- Remove the 7 screws (①~⑦). - Remove the rear panel in the direction of the arrow.
			
	- Remove the 6 screws (⑧~⑬). - Remove the 2 connectors (CP1, CP2). - Remove the 8 flat cables (CN3, CN4, CN5, CN6, CN7, CN8, CN9, CN10). - Remove the main P.C.B. in the direction of the arrow.		
	How to remove the flat cable Pull out the flat cable while pressing the connector and pull out the connector. 		
	How to check the main P.C.B. - When checking the soldered surfaces of main P.C.B. and replacing the parts, do as show. - Remove the 14 screws (①, ③, ⑦~⑱). - Remove the front panel in the direction of the arrow A. 	- Remove the bottom board in direction of the arrow B. - Reinstall the front panel to the main P.C.B.	

Ref. No. 3	Removal of the front panel ass'y	2. Remove the 2 connectors (CP1, CP2). 3. Remove the 8 flat cables (CN3, CN4, CN5, CN6, CN7, CN8, CN9, CN10). 4. Remove the front panel in the direction of the arrow.	
Procedure 1→3	1. Remove the 5 screws (①~⑤).		
Ref. No. 4	Removal of the LED meter P.C.B.	Ref. No. 5	Removal of the mechanism units
Procedure 1→3→4	1. Remove the 3 screws (①~③). 2. Remove the meter P.C.B. in the direction of the arrow.	Procedure 1→3→4→5	• Mechanism unit (DECK 2)
		1. Push the eject button. 2. Remove the 4 screws (①~④). 3. Remove the counter belt. • Mechanism unit (DECK 1) 1. Push the eject button. 2. Remove the 4 screws (⑤~⑧).	
Ref. No. 6	Removal of the tape counter		
Procedure 1→3→4→6	• Release the 3 claws.		

Ref. No.
11

Removal of the eject angle, eject buttons, and eject lever

Procedure
3→4→5→11

1. Remove the 1 screw (1).
2. Pull out the eject angle in the direction of the arrow A.

3. Pull out the eject buttons in the direction of the arrow B.

4. Turn the eject lever in the direction of the arrow C, and remove the eject lever in the direction of the arrow D.

Ref. No.
12

Removal of the cassette holder (DECK 1 & DECK 2)

Procedure
5→8→12

1. Remove the 2 screws (1, 2).
2. Remove the damper gear (L) and damper gear (R).

3. Remove the rib in the direction of the arrow.
4. Remove the cassette holder in the direction of the arrow.

Ref. No.
13

Removal of the operation button ornament and edit button ornament

Procedure
9→10→
12→13

- A. Removal of the operation button ornament (DECK 1, DECK 2).**
1. Release the 14 claws.

- B. Removal of the edit button ornament.**
1. Release the 4 claws.

MEASUREMENT AND ADJUSTMENT METHODES

Measurement Condition

- Rec. level control; Maximum
- Timer switch; Off
- Reverse-mode selector switch; $\rightleftarrows$
- Edit-recording tape-speed selector; X1

- Dolby NR switch; Off
- Make sure heads are clean
- Make sure capstan and pressure roller are clean
- Judgeable room temperature $20 \pm 5^\circ\text{C}$ ($68 \pm 9^\circ\text{F}$)

Measuring instrument

- EVM (Electronic Voltmeter)
- Oscilloscope
- Digital frequency counter
- AF oscillator

- ATT (Attenuator)
- DC voltmeter
- Resistor (600Ω)

Test tape

- Head azimuth adjustment (8kHz, -20dB); QZZCFM
- Tape speed adjustment (3kHz, -10dB); QZZCWAT
- Playback frequency response (315Hz, 12.5kHz, 10kHz, 8kHz, 4kHz, 1kHz, 250Hz, 125Hz, 63Hz, -20dB); QZZCFM

- Playback gain adjustment (315Hz, 0dB); QZZCFM
- Overall frequency response, Overall gain adjustment
Normal reference blank tape; QZZCRA
CrO₂ reference blank tape; QZZCRX
Metal reference blank tape; QZZCRZ

Adjustment Points

HEAD AZIMUTH ADJUSTMENT (DECK 2/1)

1. Playback the azimuth adjustment portion (8kHz, -20dB) of the test tape (QZZCFM). Vary the azimuth adjusting screw until the outputs of the L-CH and R-CH are maximized and the lissajous waveform, as illustrated, approaches 0 degrees.

Note: If L-CH and R-CH are not maximized at the same point, adjust to the point where the levels of each channel are maximized and equal.

2. Perform the same adjustment in the play mode.
3. After the adjustment, apply screwlock to the azimuth adjusting screw.

Fig. 1

Fig. 2

TAPE SPEED ADJUSTMENT (DECK 2/1)

Normal speed

1. Shift the edit-recording tape-speed selector to "X1".
2. Playback the middle portion of the test tape (QZZCWAT).
3. Adjust Deck 1=VR902 and Deck 2=VR903 so that the output is within the standard value.

High speed

4. Shift the edit-recording tape speed switch to "X2".
5. Playback the middle portion of the test tape (QZZCWAT).
6. Adjust Deck 1=VR901 so that the output is within the standard value.

Note: The Normal speed adjustment must be done before the High speed adjustment.

Standard value: 3000 ± 15 Hz (Normal), 6000 ± 600 Hz (High)

Fig. 3

PLAYBACK GAIN ADJUSTMENT (DECK 2/1)

1. Playback the gain adjusted portion (315Hz, 0dB) of the test tape (QZZCFM).
2. Adjust Deck 1=VR3 (L-CH) [[VR4 (R-CH)]] and Deck 2=VR5 (L-CH) [[VR6 (R-CH)]] so that the output is within the standard value.

Standard value: 0.4V ± 0.5dB

Fig. 4

PLAYBACK FREQUENCY RESPONSE (DECK 2/1)

1. Playback the frequency response portion (315Hz, 12.5kHz~63Hz, -20dB) of the test tape (QZZCFM).
2. Assure that the frequency response is within the range shown in Fig. 6 for both L-CH and R-CH.

Fig. 5

Fig. 6

ERASE CURRENT ADJUSTMENT (DECK 2)

1. Insert the Metal blank test tape (QZZCRZ) and set the unit to the Record Pause mode.
2. Adjust **VR301** so that the output between **TP3** and GND is within the standard value.

Standard value: $190 \pm 5 \text{ mA (Metal) ... EVM Reading: } 190 \pm 5 \text{ mV}$

**Fig. 7****OVERALL FREQUENCY RESPONSE (DECK 2)**

1. Insert the Normal blank test tape (QZZCRA) and set the unit to the Record Pause mode.
2. Apply a reference input signal (1 kHz, -24 dB) through an attenuator.
3. Attenuate the signal by 20 dB and adjust the frequency from 50 Hz ~ 10 kHz.
4. Record the frequency sweep.
5. Playback the recorded signal and assure that it is within the range shown in **Fig. 8** in comparison to the reference frequency (1 kHz).
6. If it is not within the standard range, adjust **VR303** (L-CH) and **VR302** (R-CH) so that the frequency level is within the standard range.
 - Level up in high frequency rangeIncrease the bias current.
 - Level down in high frequency range ...Decrease the bias current.
7. Repeat steps 2~6 above using the CrO₂ tape (QZZCRX) and the Metal tape (QZZCRZ) increasing the frequency range to 12.5 kHz (50 Hz ~ 12.5 kHz).
8. Assure that the level is within the range shown in **Fig. 9**.

Normal Overall frequency response chart (NR OUT)**Fig. 8****CrO₂/Metal Overall frequency response chart (NR OUT)****Fig. 9****Fig. 10****OVERALL GAIN ADJUSTMENT (DECK 2)**

1. Insert the Normal blank test tape (QZZCRA) and set the unit to the Record pause mode.
2. Apply a reference input signal (1 kHz, -24 dB). Attenuate the output so that its level becomes 0.4 V.
3. Record this input signal.
4. Playback the signal recorded in step 3 above, and assure that the output is within the standard value.
5. If it is not within the standard value, adjust **VR7** (L-CH) and **VR8** (R-CH).
6. Repeat the step 2~5 above until the output is within the standard value.

Standard value: $0.4 \text{ V} \pm 0.5 \text{ dB}$

**Fig. 11**

■ TERMINAL FUNCTION OF IC's

SCHEMATIC DIAGRAM

(Parts list on pages 39~42.)

(This schematic diagram may be modified at any time with development of new technology.)

Notes:

- S601: Voltage selector switch in "240" position.
(110V ← 127V ← 220V ← 240V) ((GC, PX) areas)
- S701: DECK 1 Stop switch in "off" position.
- S702: DECK 1 F.F. switch in "off" position.
- S703: DECK 1 Rew. switch in "off" position.
- S704: DECK 1 For. Playback switch in "off" position.
- S705: Reverse mode switch (→) in "off" position.
- S706: Reverse mode switch (↺) in "off" position.
- S707: Reverse mode switch (↻) in "off" position.
- S708: DECK 2 Auto rec. mute switch in "off" position.
- S709: DECK 1 Rev. Playback switch in "off" position.
- S711: DECK 2 Stop switch in "off" position.
- S712: DECK 2 F.F. switch in "off" position.
- S713: DECK 2 Rew. switch in "off" position.
- S714: DECK 2 For. Playback switch in "off" position.
- S715: DECK 2 Rev. Playback switch in "off" position.
- S716: DECK 2 Record switch in "off" position.
- S717: DECK 2 Pause switch in "off" position.
- S718: Synchro-start switch in "off" position.
- S719: Editing tape speed selector (X2) in "off" position.
- S720: Editing tape speed selector (X1) in "off" position.
- S721: Dolby NR C switch in "off" position.
- S722: Dolby NR B switch in "off" position.
- S725: Power switch in "on" position.
- S726: Timer switch in "off" position.
- S951: DECK 1 Mode switch in "off" position.
- S952: DECK 1 Cassette half detection switch in "off" position.
- S953: DECK 1 ATS (CrO₂) switch in "off" position.
- S971: DECK 2 Mode switch in "off" position.
- S972: DECK 2 Cassette half detection switch in "off" position.
- S973: DECK 2 Rev. Rec Inhibit switch in "off" position.
- S974: DECK 2 For. Rec Inhibit switch in "off" position.
- S975: DECK 2 ATS (CrO₂) switch in "off" position.
- S976: DECK 2 ATS (Metal) switch in "off" position.
- Resistance are in ohms (Ω), 1/4 watt unless specified otherwise.

- 1K=1,000 (Ω), 1M=1,000k (Ω)
- Capacity are in micro-farads (μF) unless specified otherwise.
- All voltage values shown in circuitry are under no signal condition and playback mode with volume control at minimum position otherwise specified.

() Voltage values at record mode.

For measurement us EVM.

Important safety notice

Components identified by Δ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

- ($\text{---} < +B > \text{---}$) indicates +B (bias).
- ($\text{---} < -B > \text{---}$) indicates -B (bias).
- ($\text{---} < \text{playback signal} > \text{---}$) indicates the flow of the playback signal.
- ($\text{---} < \text{record signal} > \text{---}$) indicates the flow of the record signal.

* Caution!

- IC and LSI are sensitive to static electricity.
- Secondary trouble can be prevented by taking care during repair.
- * Cover the parts boxes made of plastics with aluminum foil.
- * Ground the soldering iron.
- * Put a conductive mat on the work table.
- * Do not touch the legs of IC or LSI with the fingers directly.
