(S)...Silver Type

## SPECIFICATIONS

(\* Measured by EIAJ (CP-307))

### ■ Audio

No. of channels: 2 (left and right, stereo)  
Frequency response: 4—20,000 Hz  $\pm 0.3$  dB\*  
Dynamic range: More than 95 dB\*  
S/N ratio: More than 96 dB\*  
Harmonic distortion: 0.002% (1 kHz, 0 dB)  
Total harmonic distortion: 0.004% (1 kHz, 0 dB)\*  
Channel separation: More than 96 dB\*  
Wow and flutter: Below measurable limit  
Low-pass filter: High-resolution digital filter

### Repeat play:

### Search:

Entire disc or programmed tracks.  
Forward/backward track skip.

Forward/backward manual search.

### Program play:

### Preset edit play:

For up to 20 selections

Up to 99 minutes

(for program play)

Total tracks.

Current track.

• Time display (min.. sec./dB).

• The following four time modes display minutes and seconds according to the time mode select button setting:

- ① Disc remaining playing time.
- ② Track number and remaining playing time of current track.
- ③ Playing time from beginning of first track.
- ④ Track number and elapsed playing time from beginning of current track.

Play indicator.

Pause indicator.

Repeat indicator.

Disc indicator.

Remote control sensor

Motor-driven horizontal type.

15 mW max. 32Ω (fixed)

### ■ Signal Format

Sampling frequency: 44.1 kHz  
Correction system: Technics Super Decoding  
Algorithm  
D-A conversion: 16-bit linear

### Display:

### Time display:

### ■ Pickup

Type: Fine-focus, one beam  
Access time: 1 second  
(access to the last track)\*  
Light source: Semiconductor laser  
Wavelength: 780 nm  
Traverse system: High-speed linear access system  
Spindle system: Brushless DD motor

### Indicator:

### ■ Functions

Automatic play: All tracks.  
Random access play: Track number.

### Disc loading:

### Headphone output level:

## ■ Infrared remote control unit

### Dimensions

(W×D×H): 6.5×15.5×1.8 cm

**Batteries:** UM-3 "AA" batteries or IEC R6 or equivalent (1.5V×2)

**Remote control functions:** Numeric buttons (0—9)  
Memory button  
Clear button  
Repeat button  
Digital volume attenuation buttons  
Time mode select button  
Forward and backward  
skip/search buttons  
Stop button  
Play/pause button

**Weight:** 140 g (including batteries)

For United Kingdom and Australia:  
AC 240V, 50Hz

For Continental Europe:  
AC 220V, 50Hz

For Others:  
AC 110~127/220~240V, 50/60Hz

**Power consumption:**

10 W

**Output voltage:**

2 V (at 0 dB)\*

**Output impedance:**

Approx. 550Ω

**Load impedance:**

More than 10 kΩ

**Dimensions**

(W×D×H):

43×24×7.7 cm

(16-15/16"×9-7/16"×3-1/32")

[When disc holder is opened:

37.2 cm (14-21/32") (D)]

**Weight:**

3.1 kg (6.8 lbs.)

## ■ General

**Power supply:** For U.S.A. and Canada:  
AC 120V, 60Hz

Specifications are subject to change without notice for further improvement.

Weight and dimensions are approximate.

## ■ SAFETY PRECAUTION (This "safety precaution" is applied only in U.S.A.)

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacturer's recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields, etc.
5. Before returning the serviced equipment to the customer, be sure to make the following insulation resistance test to prevent the customer from being exposed to a shock hazard.

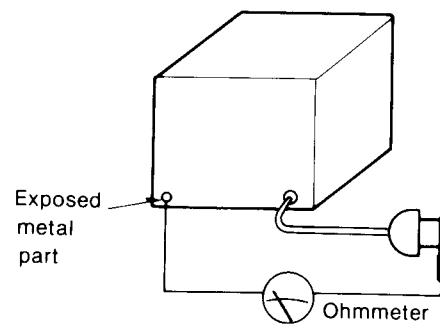

### • INSULATION RESISTANCE TEST

1. Unplug the power cord and short the two prongs of the plug with a jumper wire.
2. Turn on the power switch.
3. Measure the resistance value with ohmmeter between the jumpered AC plug and each exposed metal cabinet part, such as screwheads, antenna, control shafts, handle brackets, etc. Equipment with antenna terminals should read between 3MΩ and 5.2MΩ to all exposed parts. (Fig. A) Equipment without antenna terminals should read approximately infinity to all exposed parts. (Fig. B)

**Note:** Some exposed parts may be isolated from the chassis by design. These will read infinity.

Resistance = 3MΩ—5.2MΩ

Resistance = Approx. ∞

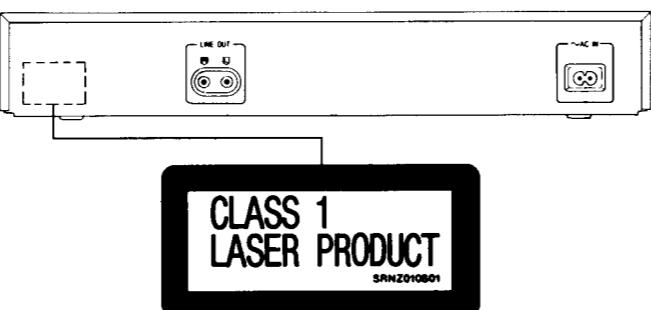

4. If the measurement is outside the specified limits, there is a possibility of a shock hazard. The equipment should be repaired and rechecked before it is returned to the customer.

## ■ PRECAUTION OF LASER DIODE

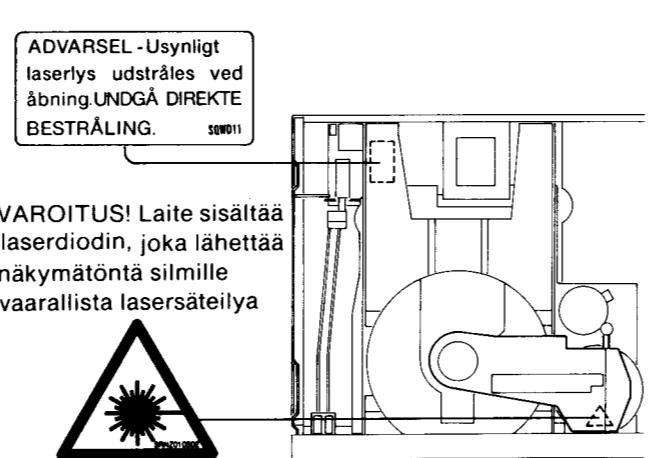

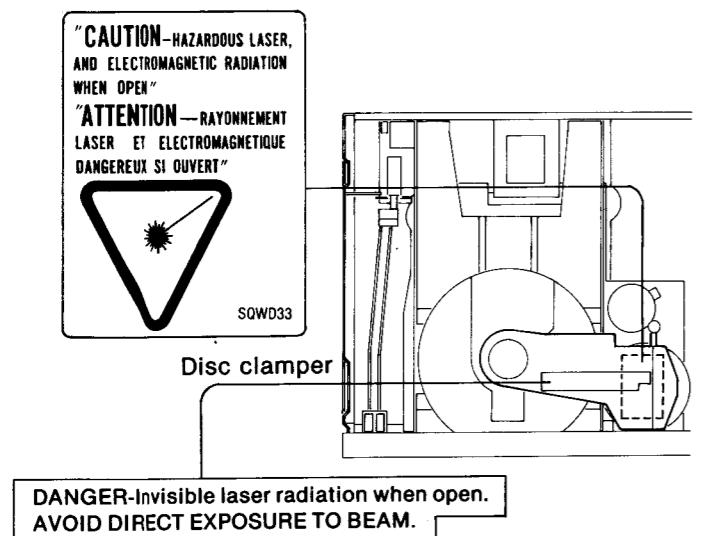

**Caution:** This product utilizes a laser diode.  
**ADVARSEL:** I dette apparat anvendes laser.

### • Use of caution labels Note: ○ Mark is used, X Mark is not used.

Areas	Disc clamer	SQWD33	SQWD11	SRNZ010S01	SRNZ010S02

[EK], [XL], [EG] [EB], [EH], [EF] [EI], [XB], [XA]	○	X	X	○	○

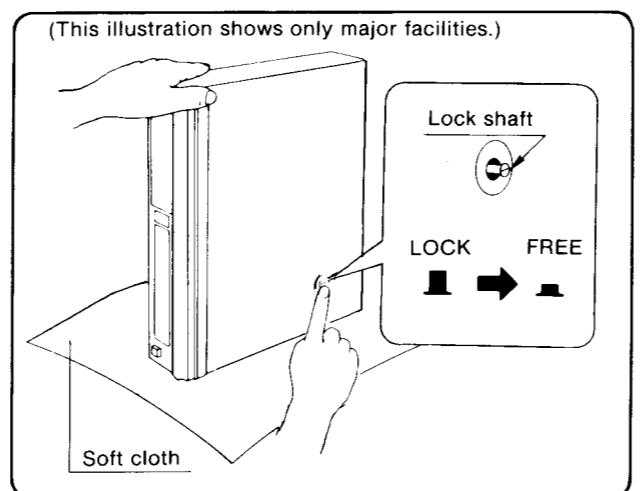

Obs:  
Apparaten innehåller laser  
Komponent av höger laserklass  
än klass 1.

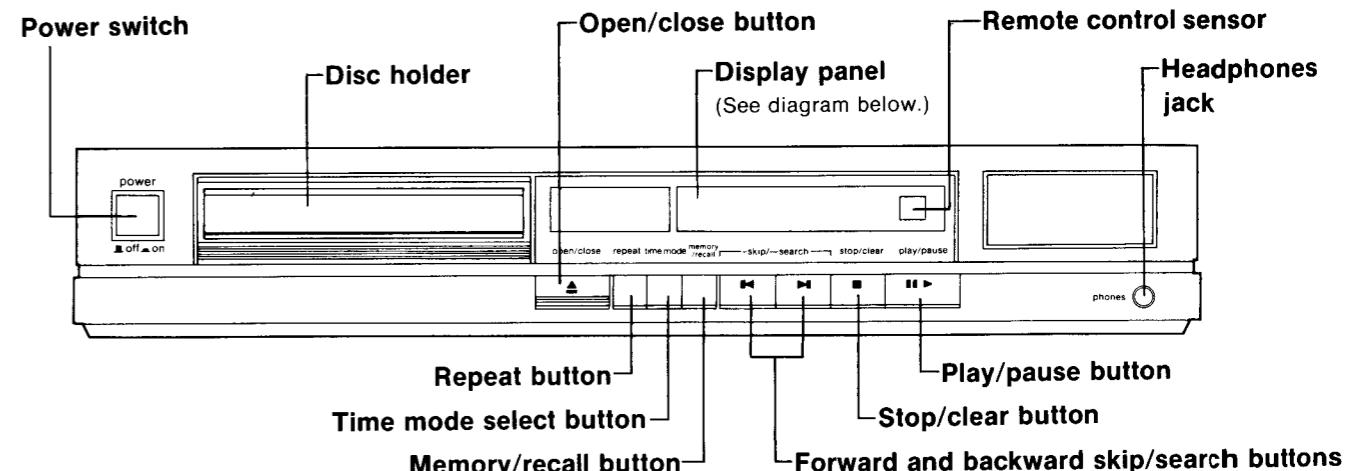

## ■ BEFORE USING THIS UNIT

1. Place a soft cloth under the unit to protect it from scratches.
2. Press the lock shaft on the bottom panel to the in (FREE) position (→).

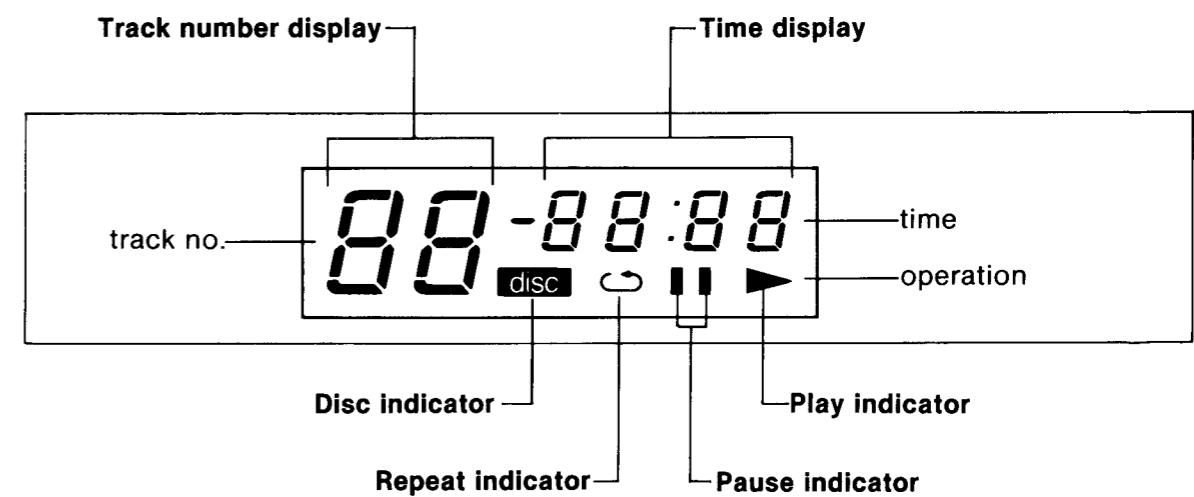

**NOTE:**  
**IF THE UNIT IS TRANSPORTED AGAIN, PERFORM THE FOLLOWING STEPS:**  
1) Remove the disc from the holder.  
2) Pull the lock shaft to the out (LOCK) position (←→).  
**CAUTION:**  
Do not transport the unit without locking the lock shaft.  
**SEVERE DAMAGE WILL RESULT.**

## ■ LOCATION OF CONTROLS

### (Display panel)

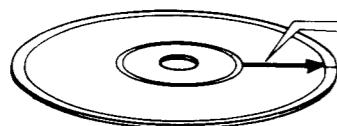

### (Rear panel of player)

## Playing a disc

The following explanation is for a disc containing 7 tracks having a total playing time of 49 minutes and 58 seconds.

Track 1	Track 2	Track 3	Track 4	Track 5	Track 6	Track 7
5 min.	4 min.	21 min. 58 sec.	5 min.	4 min.	4 min.	6 min.

(Stop mode) (Auto-return)

### 1 Automatic play (To play a disc from beginning to end.)

- 1 Press (power). (See ① below.)
- 2 Press (open/close). (See ② below.)
- 3 Insert a disc with the label side facing upward. (See ③ below.)
- 4 Press. (See ④, ⑤ below.)
- 5 Press (play/pause). (See ⑤ below.)
- 6 Press (stop/clear). (See ⑥ below.)
- 7 Press to stop play. (See ⑦ below.)
- 8 Press to briefly interrupt play. (See ⑧ below.)
- 9 Press to resume play. (See ⑨ below.)

① Display illuminates as shown below:

⑤ • The play indicator (▶) illuminates and play begins.

② Insert the disc only after the disc holder has opened all the way. If the disc is inserted too soon, it may be damaged. Do not tilt the unit while the disc holder is opening or closing since the disc could fall out of the holder.

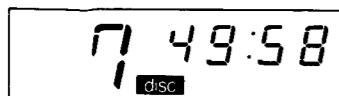

③ Step 4 can be skipped by pressing the play/pause button after inserting a disc. In this case, the holder will close and disc play will begin immediately from track 1, but the tracks and total playing time will not be displayed.

④ If the open/close button is pressed, the display illuminates as shown below.

Disc information is read.

Reading of disc information finished.  
↓  
Stop mode.

⑥ The play indicator (▶) goes out, the pause indicator (■) illuminates and the unit switches to the pause mode.

⑦ The pause mode is cancelled and play is resumed.

⑧ The pickup will return to the beginning of the first track and the unit will switch to the stop mode.

⑨ When the end of the disc is reached, the pickup returns to the beginning of the first track and the unit switches to the stop mode.

- Remove the disc from the disc holder.
- Turn off the power if the unit is not to be used again for a while.

• Since steps 1, 2, 3, 4 and 6 in this procedure are the same for all play procedures, they are not included in the following explanations.

## 2 Program play (When the unit is in the stop mode.)

### Note:

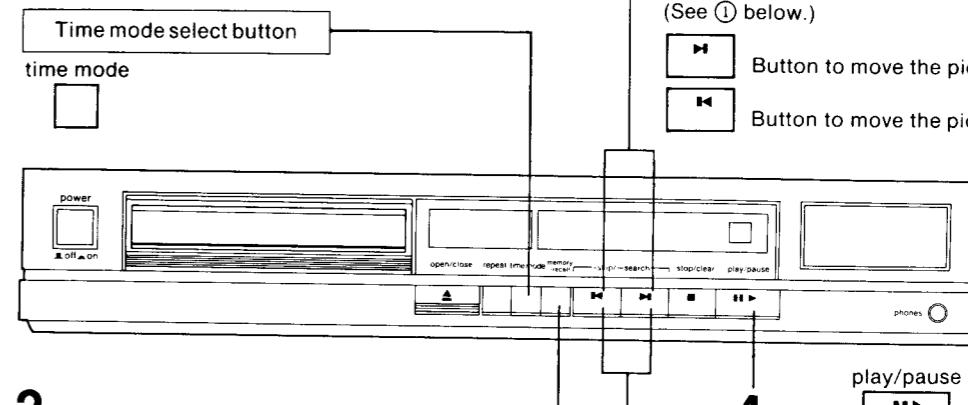

• Program entries cannot be made during play or pause mode, using these forward and backward skip/search buttons. However, it is possible to program during play or pause mode if you use remote control unit's numeric buttons.

### 1 While watching the track number display, press for an instant to specify the desired track number.

(See ① below.)

Button to move the pickup forward.

Button to move the pickup backward.

### 2 Press to enter the displayed track number into memory.

memory/recall

(See ② below.)

### 4 Press

• Play begins from the first programmed track.

### 3 Repeat steps 1 and 2 until the desired programming is complete.

or →

(See ③ below.)

(A maximum of 20 selections can be programmed.)

① • If more than 20 selections are entered "F" (full) is shown in the display panel and no further selections can be programmed.

• Keeping the button (or button) pressed will cause the track number display to advance (or go back) continuously.

• When the button is kept pressed continuously, the track number display returns to the first track after passing the last track on the disc. For example, if there are 7 tracks on the disc, keeping the button pressed, would display the track numbers as follows:

→ 1 → 2 → 3 → 4 → 5 → 6 → 7

• Likewise, keeping the button pressed results in the following display:

1 ← 2 ← 3 ← 4 ← 5 ← 6 ← 7 ←

② To enter the same track number several times in succession, simply press the memory/recall button the same number of times that the track is to be played. Each entry counts as one selection.

### Total playing time confirmation

To display the total playing time of all programmed tracks. Example: If tracks 3, 5 and 1 are specified and the time mode select button is pressed, 30 minutes 58 seconds is displayed.

### time mode

Press.

③ The diagram below shows track 3, track 5 and track 1 programmed in that order.

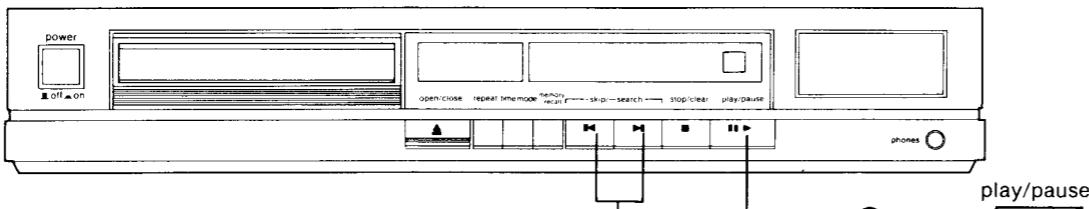

Program selection → Programmed order

Play begins from the first programmed track.

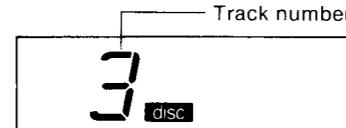

### 3 Random access play (When the unit is in the stop mode.)

1 While watching the track number display, press for an instant (less than one second) to specify the desired track. (See ① below.)

▶ Button to move the pickup forward.   ◀ Button to move the pickup backward.

① The display below shows track 3 is specified.

② The play indicator (▶) illuminates and play begins from track 3.

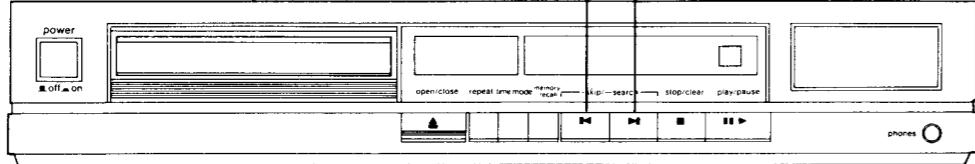

2 Press play/pause button (See ② below.)

### 4 Skip play (During play or the pause mode.)

#### ■ Forward or backward track skip play

■ While watching the track number display, press for an instant the forward or backward skip/search button until the desired track has been located. (See ① below.)

▶ Forward skip/search button (Pickup skips forward)  
◀ Backward skip/search button (Pickup skips backward)

① Pressing one of the skip buttons for an instant activates the quick skip mode.

#### Forward skip

- During automatic play, the pickup skips to the beginning of the next track each time the button is pressed.
- During program play or program repeat play, the pickup skips to the beginning of the next programmed track each time the button is pressed.

#### Backward skip

- During automatic play, the pickup skips to the beginning of the current track. If pressed again quickly, the pickup skips to the beginning of the previous track.

### 5 Manual search play (During play or the pause mode.)

#### ■ To play the disc from a specific point

■ Keep the forward or backward skip/search button pressed to move the pickup forward or backward. Release the button when the desired point has been reached (as shown by the display). (See ② below.)

▶ Forward skip/search button (Pickup moves forward)

◀ Backward skip/search button (Pickup moves backward)

• During program play (repeat function not activated), the pickup skips backward only to the beginning of the current track.

• During program repeat play, the pickup skips to the beginning of the current track. If pressed again quickly, the pickup skips to the beginning of the previous programmed track.

② The pickup moves slowly at first and then rapidly if one of the buttons is held down for more than about 3 seconds.

- If one of the buttons is pressed while a disc is being played, sound from the disc can be heard as the pickup moves. The output level at this time is decreased by 12 dB (1/4) compared with the normal level.

• During program play, the pickup can only be moved between the beginning and end of the track currently being played.

### 6 Preset edit play (When the unit is in the stop mode.)

(When the unit is in the stop mode.)

Note:

It is possible to specify preset edit time using remote control unit.

#### Procedure

Confirm that the unit is in the stop mode.

- Press the time mode select button.
- Press the forward or backward skip/search button to specify the playing time in minutes.
- Press the memory/recall button. (For automatic play or repeat play, this step may be omitted.)
- Press the play/pause button.
- After playing the preset edit time the unit switches to the pause mode.

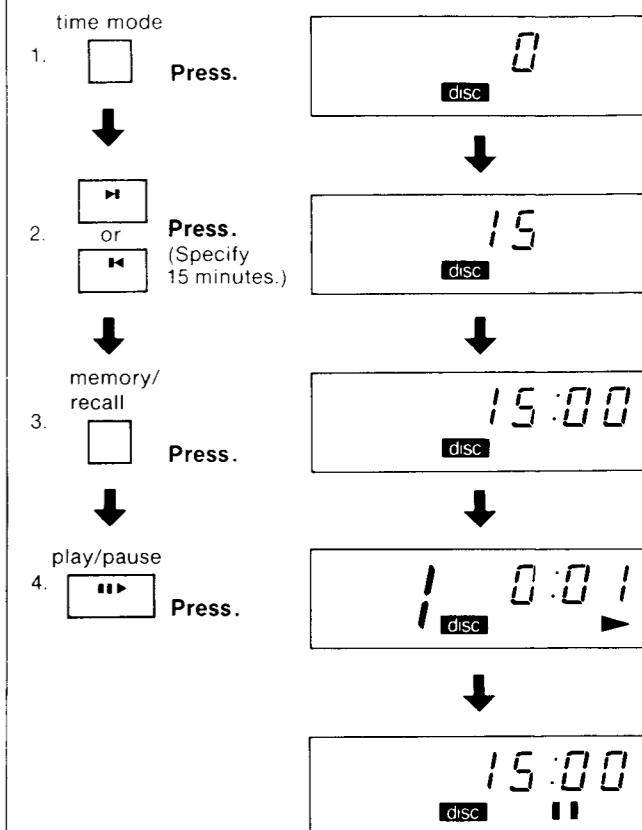

Notes:

- If a preset edit time that is longer than the recorded playing time is specified, the unit switches to the stop mode after the last track has been played.
- A maximum time of 99 minutes may be specified for program disc play.
- If you operate the search or skip function during preset edit play, preset edit play is cancelled.
- For preset edit play during program play, the preset edit time must be specified before the program selections are entered.

#### Function

##### Preset edit play

For example, to play only 15 minutes:

(The above illustration shows a disc containing more than 15 minutes within the first track.)

- During automatic play, the unit switches to the pause mode after playing for 15 minutes.
- During program play, the unit switches to the pause mode after playing for 15 minutes, and the next programmed track is displayed if there is a further programmed track.
- During repeat play, the unit switches every 15 minutes to the pause mode. (Play is restarted by pressing the play/pause button.)

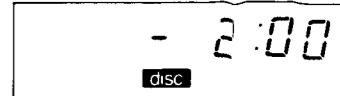

The time mode button can also be used for the following function.

#### Remaining specified time confirmation

##### To display the remaining specified time.

Example: If 15 minutes has been specified and then tracks 2-4-6 are programmed, pressing the time mode select button displays the remaining playing time between the end of the last programmed track and the specified preset edit time of 15 minutes.

In the example, track 2 has a playing time of 4 minutes, track 4 of 5 minutes and track 6 of 4 minutes, therefore the displayed remaining playing time is 2 minutes (15 minutes minus 13 minutes).

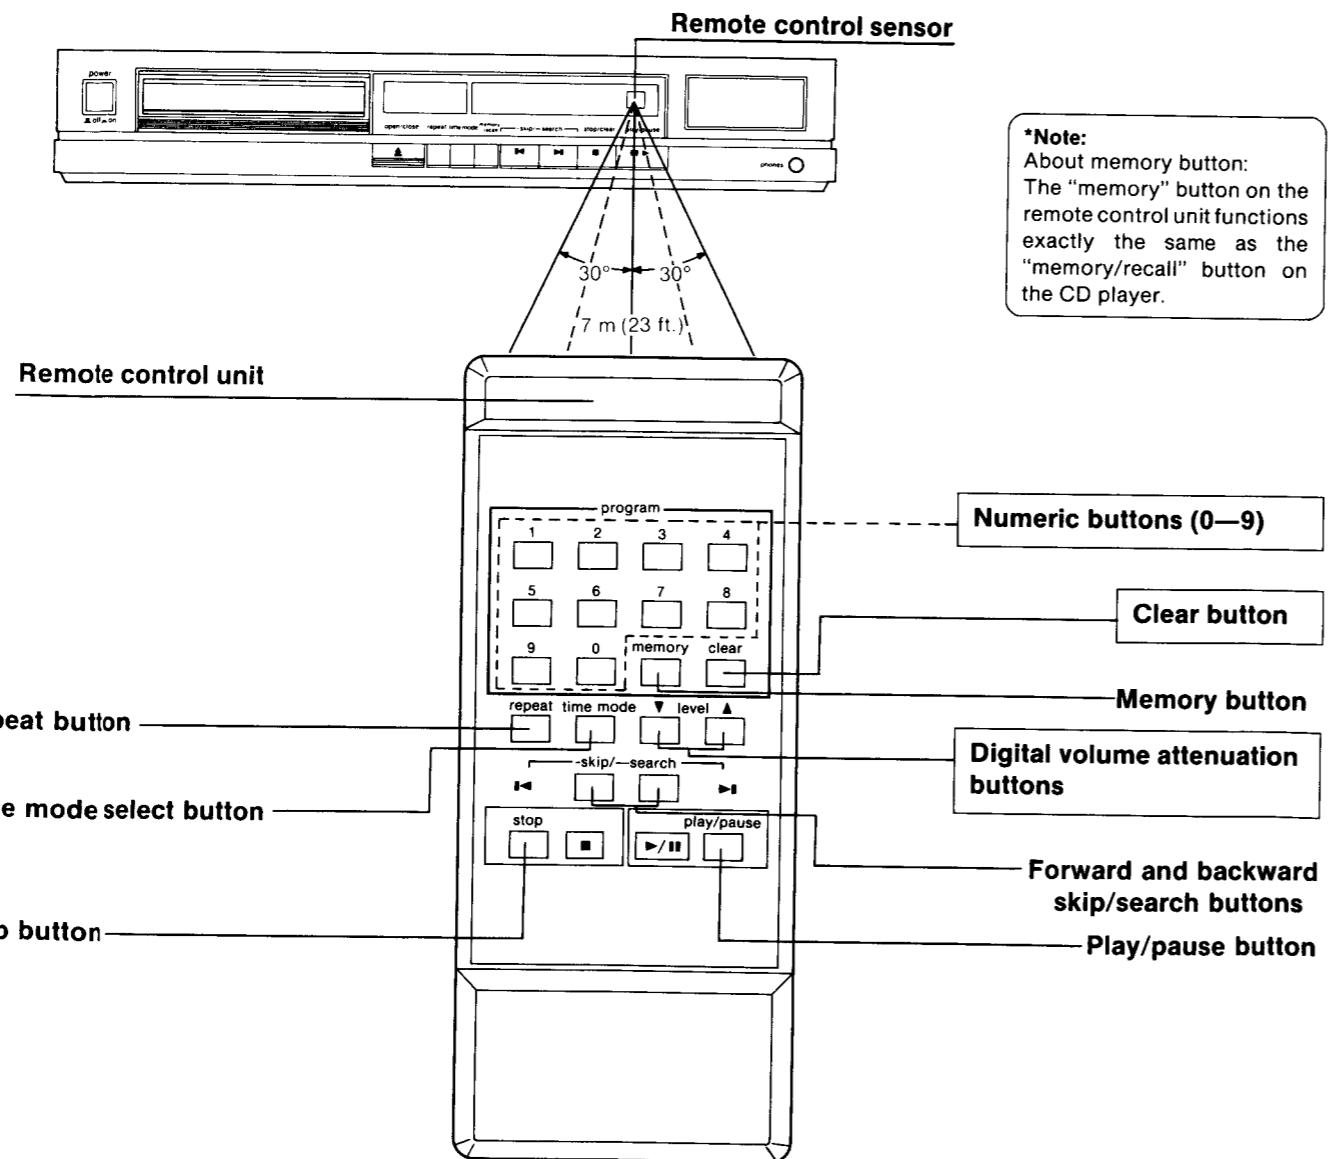

## 7. Remote control unit

### Remote control unit facilities

- ① Automatic play
- ② Program play
- ③ Random access play
- ④ Skip play
- ⑤ Manual search play
- ⑥ Repeat play
- ⑦ Time mode display function
- ⑧ Preset edit play
- ⑨ Digital volume attenuation function
- ⑩ Program clear function
- ⑪ Program recall operation
- The following operations are not possible using the remote control unit.
  - ① Power on/off
  - ② Disc holder open/close

### Parts identification

When using the remote control unit, press the buttons slowly and accurately to avoid mistaken operation.

### ■ Notes

- Always aim the remote control unit at the front panel receiver.
- The remote control unit can be used at an angle range of up to 30° from the direction in which the front panel faces.
- The remote control unit cannot be used from a distance of more than 7 meters (23 ft.).

### ■ Remote control operation

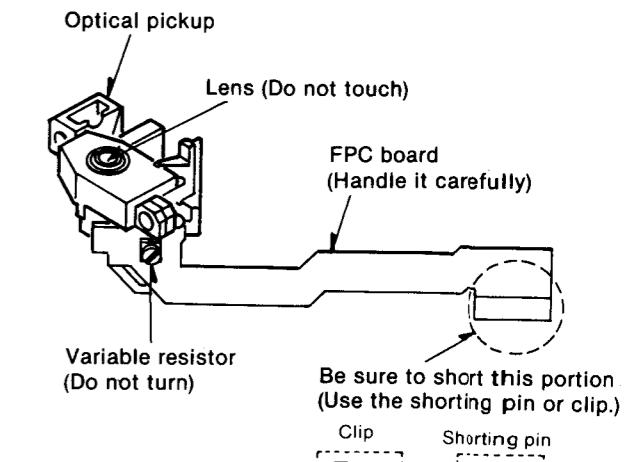

Point the remote control unit at the front panel receiver and press the appropriate button(s).

## ■ HANDLING PRECAUTIONS FOR OPTICAL PICKUP

The laser diode in the optical pickup may break down due to potential difference caused by static electricity of clothes or human body. So, be careful of electrostatic breakdown during repair of the optical pickup.

### • Handling of optical pickup

1. Do not give excessive shock to the optical pickup because it is of extremely precise structure.
2. To prevent the breakdown of the laser diode, an anti-static shorting pin is inserted into the flexible board. (FPC board)  
When removing or connecting the short pin, finish the job in as short time as possible.
3. Take care not to apply excessive stress to the flexible board. (FPC board)
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

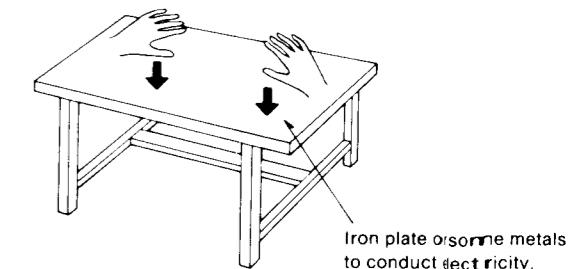

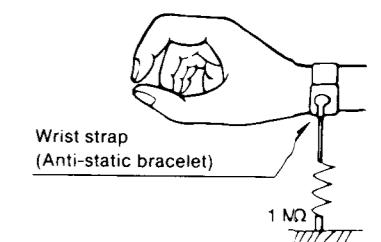

### • Grounding for electrostatic breakdown prevention

1. Human body grounding  
Use the anti-static wrist strap to relieve the static electricity from your body.
2. Work table grounding  
Put a conductive material (sheet) or steel sheet on the area where the optical pickup is placed, and ground the sheet.

#### Caution:

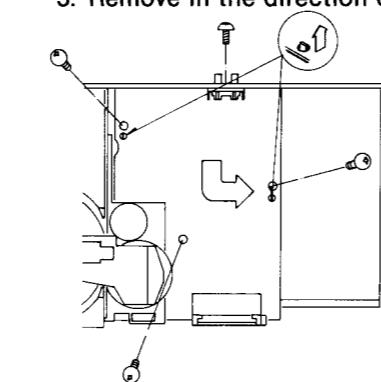

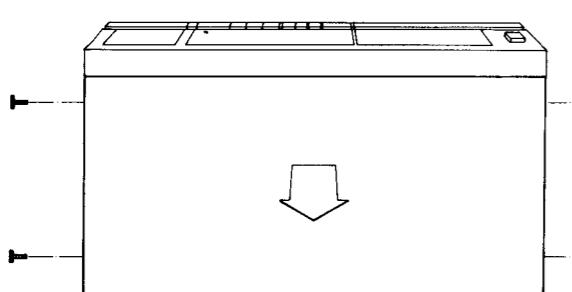

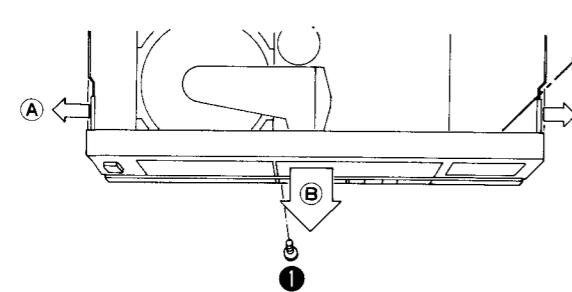

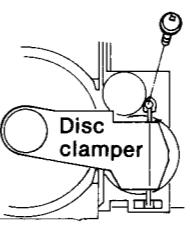

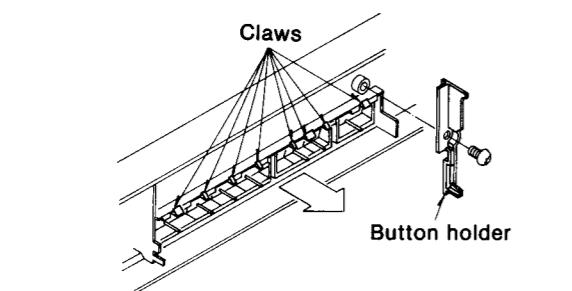

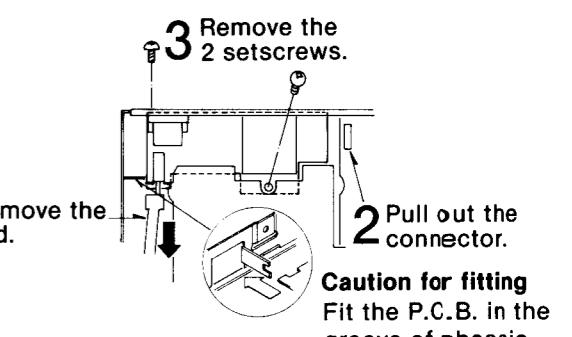

The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the optical pickup.

## ■ DISASSEMBLY INSTRUCTIONS

### CAUTION:

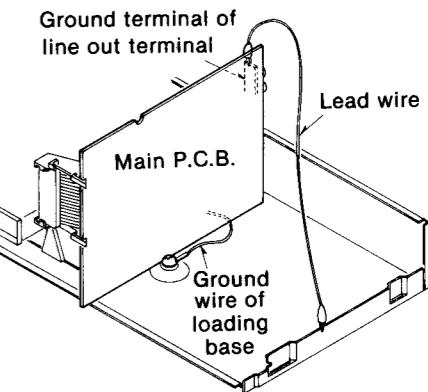

- It is very dangerous to look at or touch laser radiation. (Laser radiation is invisible.)
- With the unit turned "on", laser radiation is emitted from the pickup lens.
- When doing the job, removing the cabinet and disc clamper of this unit, be sure to turn the power supply off.

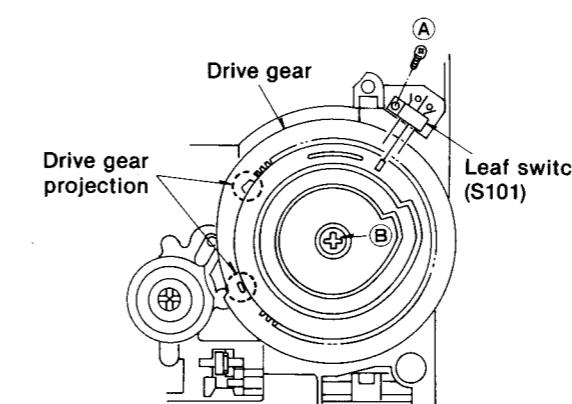

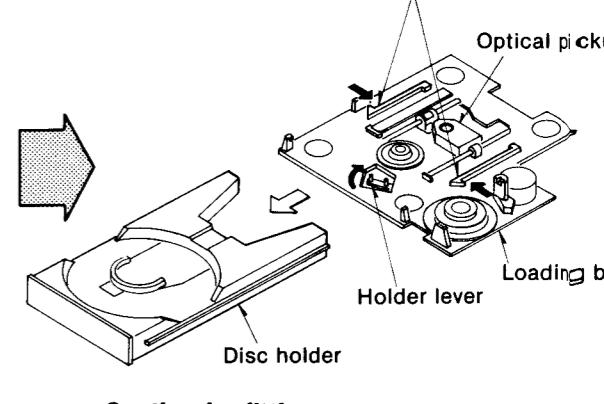

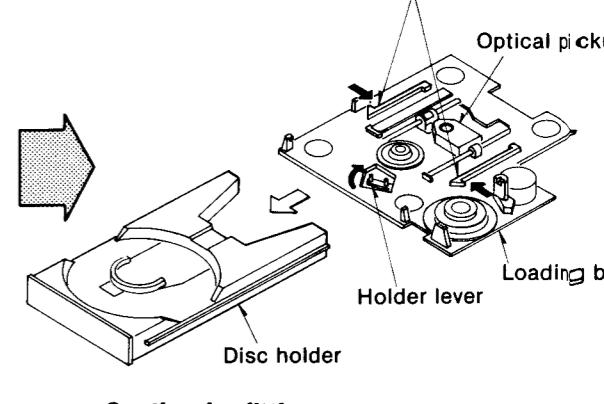

Ref. No. 1	How to remove the top case	Ref. No. 4	How to remove the main P.C.B.
Procedure 1	• Remove the 4 setscrews.	Procedure 1 → 2 → 4	<p>1. Remove the 4 setscrews.</p> <p>2. Lift the P.C.B. to remove it from the chassis tabs.</p> <p>3. Remove in the direction of the arrow.</p> 
			
	<b>Note:</b> When doing the job, Lock the lock shaft at bottom of the unit. (See page 3)		
Ref. No. 2	How to remove the front panel	Ref. No. 5	How to remove the disc clamper
Procedure 1 → 2	<p>1. Remove the 2 setscrew ①, ②.</p> <p>2. Slightly pull the tabs outward (arrows ④).</p> <p>3. Remove in the direction of the arrow ⑤.</p> 	Procedure 1 → 5	• Remove the setscrew.
			
Ref. No. 3	How to remove the operation button	Ref. No. 6	How to remove the power supply P.C.B.
Procedure 1 → 2 → 3	<p>1. Remove the setscrew and button holder.</p> <p>2. Release the 8 claws.</p> 	Procedure 1 → 6	<p>• Remove in the numerical order shown. (Shift the disc holder forward.)</p> 

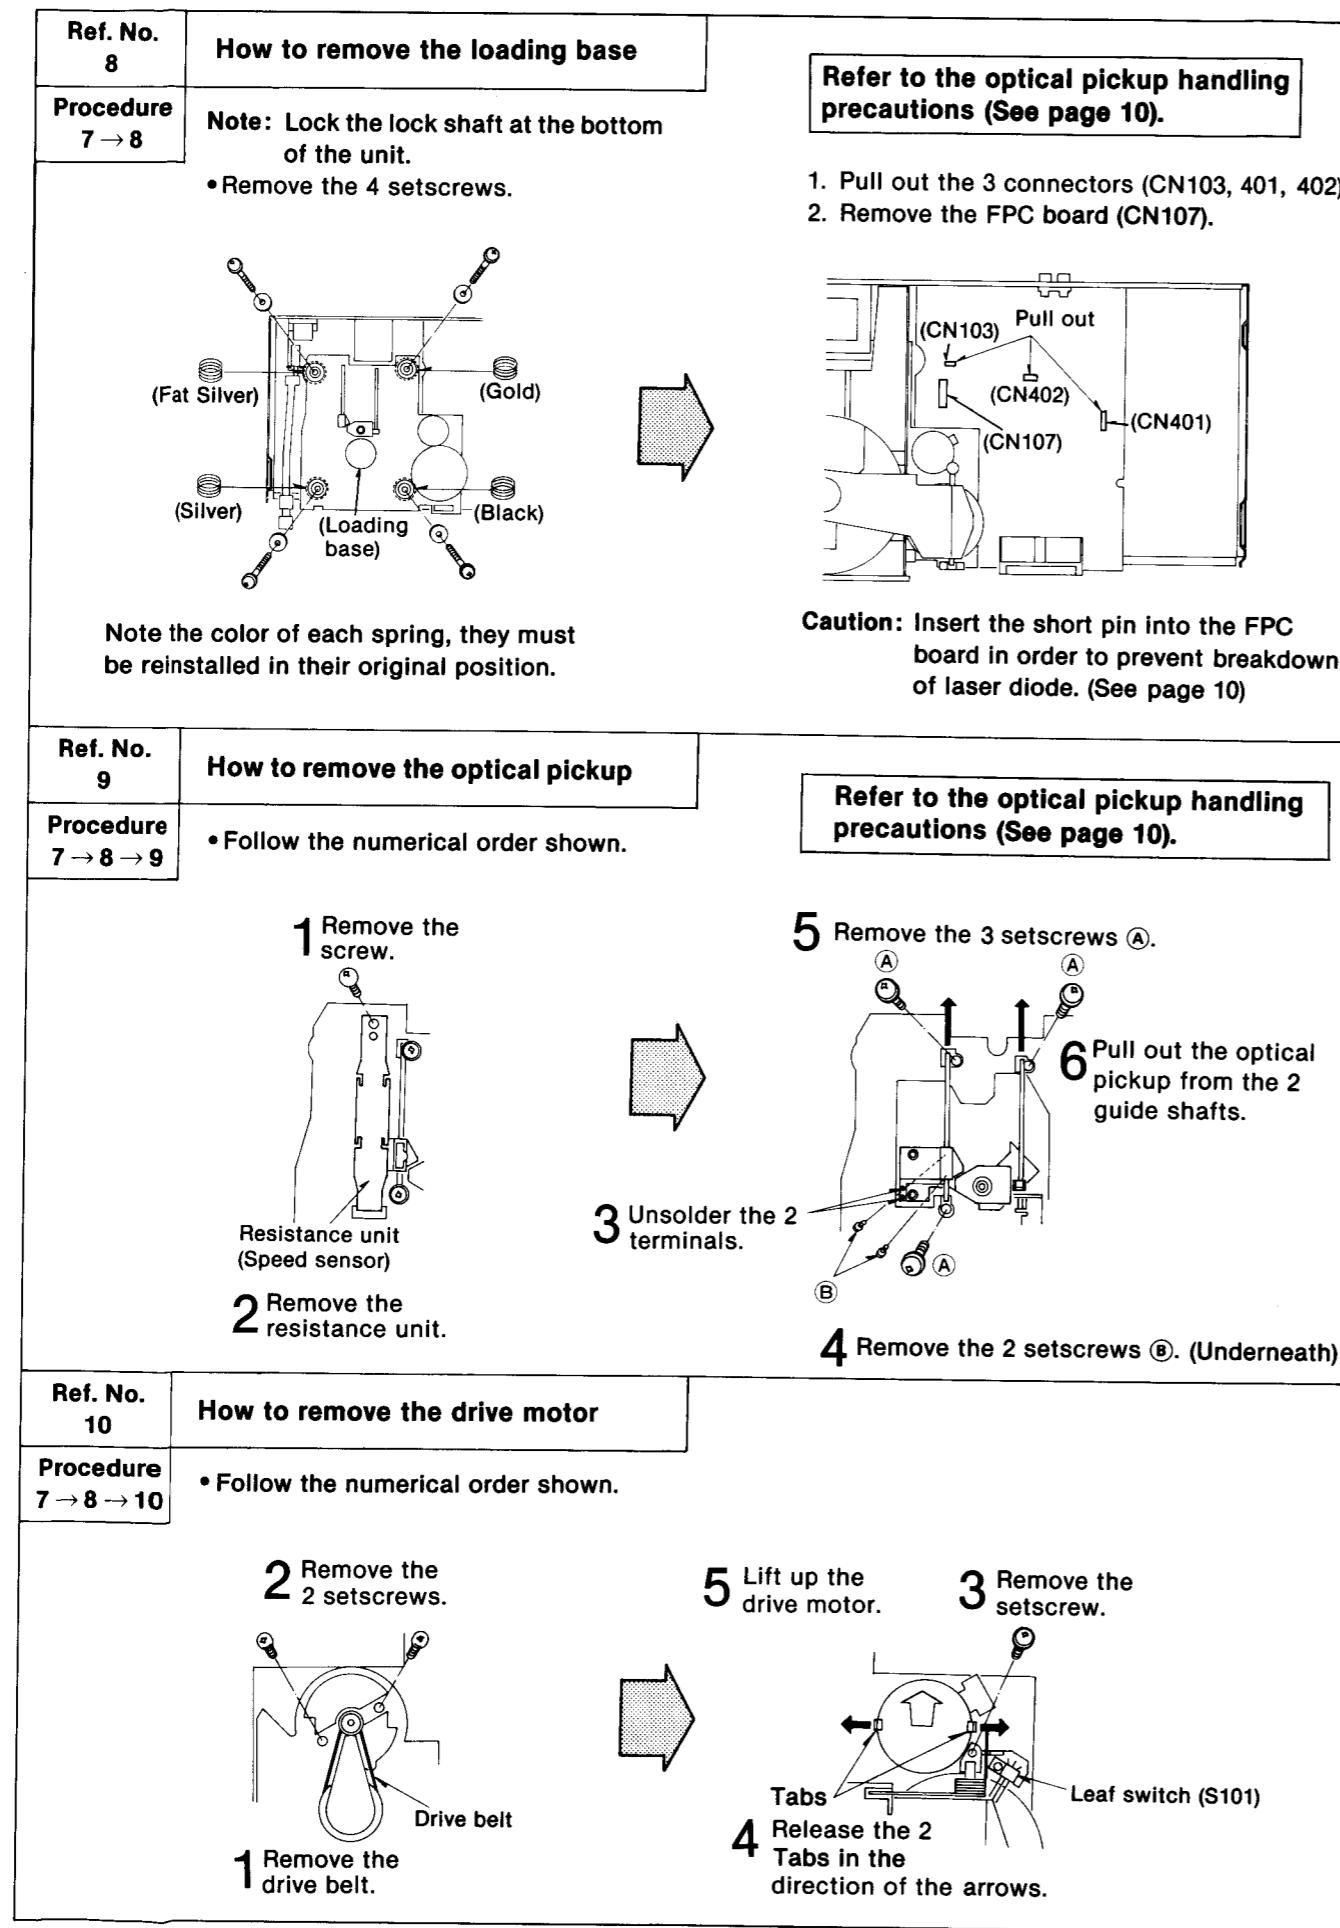

6. Place the main P.C.B. as shown in the figure.

### Cautions:

1. Be sure to connect the P.C.B. ground terminal (line out terminal) and chassis lead wire.
2. Connect the ground wire of loading base to the chassis.

Ref. No. 7	How to remove the disc holder (disc tray)
Procedure 1 → 2 → 5 → 7	<p>• Set the drive gear as shown below. (Turn it completely to the right, then turn it to the left by about 20° so that drive gear teeth or projection will not touch the rack of disc holder.)</p>  <p>• To remove the drive gear</p> <p>Remove the screw ① of leaf switch (S101), then remove the drive gear setscrew ②.</p> 
	<p>1. Push the holder lever backward, (From underneath the loading base.)</p> <p>2. Pull the disc holder and bend the 2 claws of disc holder stopper of loading base toward the optical pickup.</p> <p>3. Further pull out the disc holder to remove it.</p>  <p><b>Caution for fitting</b> When fitting the disc holder, make the drive gear as shown on the left, and then insert the disc holder along the guide of loading base. After inserting the disc holder completely, turn the drive gear to the right completely.</p>

## ■ HOW TO REPLACE IC'S (Small outline type)

Replacing procedure		Cautions
1	Reduce the amount of solder on each pin of the integrated circuit by use of a solder sucker.	(Example) H-130 
2	Melt the solder on the pin (one electrode) with the soldering iron.	
3	While the solder is melting, shift the pin upward by the soldering iron to remove it from the foil.	
4	Remove each pin from the foil according to the above-mentioned procedure.	

### \* Special soldering iron

(Refer to Technical Information, ORDER NO. GAD84125486T1)...For U.S.A. and Canada

(Refer to Technical Information, ORDER NO. GAD84115476T8)...For others

### • H-605 Spot Heater (hot-air solder iron)

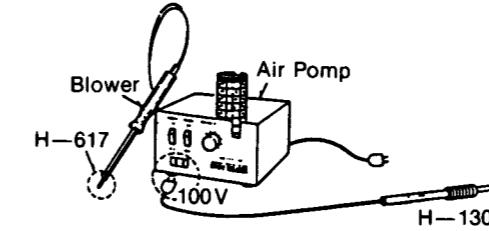

This device that uses hot air to melt solder was developed to remove Flat-Package ICs, RHCs and chip parts.

### • H-605M (For 120V power source)

• H-605E (For 200V/220V/240V power source)

### • H-617 Twin Nozzle (for spot heater)

Special nozzle for the removal of RHCs and chip resistors. (Nozzle diameter: 1.0mm×2)

### • H-130 Slim Pencil Solder Iron

An ultrasmall ceramic heater solder iron is extremely handy for soldering chip parts, RHCs, ICs etc, to high-density circuit boards.

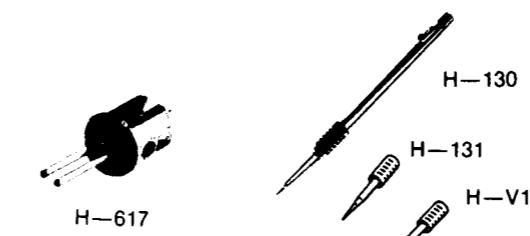

#### Features:

- Rated power: 100V, 15W
- Max. temp.: 400°C
- Heater: ceramic (long life)
- Insulation resistance: 100MΩ
- Length: 178mm
- Weight: 16g (not including cord)

### • H-131, H-V13 Cap Bits

Solder tip for the slim pencil Solder Iron is composed of a bit holder and a corrosion resistance solder tip. Permits changing of solder tips even while still hot.

- Solder tip: 0.3mm

## ■ TERMINAL FUNCTION OF LSI

22	IPFLAG	O	Interpolation flag (interpolation at "H")
23	FLAG0	O	Error flag (error at "H")
24	FLAG6	O	16 K RAM address reset signal (reset at "H")
25	XCK	O	Clock (16.9344 MHz) output (Not used, open)
26	DA15/SRDATA	O	16-bit data output/serial data output (MSB first)
27	DA14/SRDATAX	O	16-bit data output/serial data output (LSB first)
28	DA13/SRCK	O	16-bit data output/serial data beat clock.
29	DA12/WDCK	O	16-bit data output/serial data word clock (Not used)
30	DA11/BYTCK	O	16-bit data output/serial data byte clock (Not used)
31	GND	I	GND terminal
32	DA10/RIL	O	16-bit data output/RIL signal
33	DA9/RESY	O	16-bit data output/Resynchronizing signal
34	DA8/FCLV	O	16-bit data output/Synchronizing detection signal (Not used)
35	DA7/IPBYTE	O	16-bit data output/Interpolation flag for each byte (Not used)
36	DA6/IPSEL	I/O	16-bit data output/interpolation inhibit (Not used)
37	DA5/FLAG5	O	16-bit data output/C2 decoder correction flag 3 (Not used)
38	DA4/FLAG4	O	16-bit data output/C2 decoder correction flag 2 (Not used)
39	DA3/FLAG3	O	16-bit data output/C2 decoder correction flag 1 (Not used)
40	DA2/FLAG2	O	16-bit data output/C1 decoder correction flag 2 (Not used)
41	DA1/FLAG1	O	16-bit data output/C1 decoder correction flag 1 (Not used)
42	DA0/FLCK0	O	16-bit data output/Crystal frame clock
43	D7 50 D0	I/O	16 K RAM data output
51	RAMOE	O	16 K RAM OE signal
52	RAMWE	O	16 K RAM WE signal
53	RAMA 0 RAMA10	O	16 K RAM address signal (RAMA0 : LSB, RAMA10 : MSB)
64	PC	O	Spindle motor ON signal (ON at "L")
65	EC	O	Spindle motor drive signal
66	FG	I	Spindle motor FG signal input
67	—	—	—
68	—	—	—
69	—	—	—
70	—	—	—
71	—	—	—
72	PCK	I	PLL extract clock input
73	VDD	I	Power supply (connected to +5V)
74	EFM	I	EFM signal input (PLL)
75	SRF	I	EFM signal input (DSL)
76	DO	I	Drop-out signal (Drop-out at "H")
77	CLVS	O	11T servo OK signal (OK at "H")
78	FPC	O	PLL frequency comparison signal
79	BSSEL	O	PLL frequency in take operation signal.
80	—	—	—
81	—	—	—
82	—	—	—
83	SUBC	O	Sub-code serial output data
84	SBCK	I	Clock for sub-code serial output

• AN8370S (Optical Servo Control)

Pin No.	Mark	I/O Devision	Function
1	VEE	I	Power supply (connected to -5V)
2	LSA	I	Phase difference input (A)
3	GND	I	GND terminal
4	LSB	I	Phase difference input (B)
5	APC	O	Auto laser power control output
6	TEOUT	O	Tracking error signal output
7	TEG	I	Tracking error gain adjusting input
8	TE-	I	Phase difference-voltage conversion (-)
9	TE +	I	Phase difference-voltage conversion (+)
10	APC -	O	Laser power inversion input
11	C-MEM	I	Capacitor connection for phase difference memory
12	APC +	I	Laser power non-inversion input
13	VREF	O	Reference current generation
14	SENSE	O	Selector output (track-crossed)
15	HIN	I	Tracking hold circuit input
16	HOUT	O	Tracking hold circuit output
17	SPCNT	O	Track-cross speed control output (not used, grounded)
18	C-MSP	I	Track-cross reference speed setting capacitor connection (not used, grounded)
19	C-AF	I	Auto focus timer capacitor connection
20	KICK R/F	O	Track kick signal output
21	VCC	I	Power supply (connected to +5V)
22	CNT1	I	Control input (FOON : Focus servo ON signal)

• EHDGA1243 (Data Slice and PLL)

Pin No.	Mark	I/O Devision	Function
1	PCK	O	Clock output extracted from SRF
2	EFM	O	EFM signal output synchronized with PCK
3	D-GND	I	GND terminal (digital system)
4	SRF	O	RF signal output data-sliced into digital value
5	SLC	I	Slice level control signal input
6	DO	O	Drop-out detection pulse output
7	FPC	I	Frequency comparison error signal input.
8	VCC	I	Power supply (connected to +5V)

Pin No.	Mark	I/O Devision	Function
23	CNT2	I	Control input (TRON : Tracking servo ON signal)
24	CNT3	I	Control input (KICKF : Kick direction [forward] command)
25	CNT4	I	Control input (KICKR : Kick direction [reverse] command)
26	F-LOCK	O	Focus lock signal output
27	C-FBDO	O	Capacitor connection for inversion RF high speed detection
28	C-SBDO	O	Capacitor connection for inversion RF low speed detection
29	C-SBRT	O	Capacitor connection for non-inversion RF low speed detection
30	C-FBRT	O	Capacitor connection for non-inversion RF high speed detection
31	RF OUT	O	RF signal output
32	BDO	O	Drop-out detection output
33	RFIN	I	RF signal input
34	S-OUT	O	Focus search signal output
35	C-LW	I	Capacitor connection for triangular wave generation
36	FE-OUT	O	Focus error signal output
37	FEG	I	Focus error gain adjusting input
38	FE-REF	I	Focus error comparison voltage generation
39	PDB	I	Photo detector current input (B)
40	IVB	O	Current/voltage conversion output (B)
41	IVA	O	Current/voltage conversion output (A)
42	PDA	I	Photo detector current input (A)

• MN6618 (Digital Filter)

Pin No.	Mark	I/O Device	Function
1	—	—	—
2	D012	O	16-bit parallel data output
3	D011/SCK	O	16-bit parallel data output/serial output bit clock
4	D010/SOUT	O	16-bit parallel data output/serial output data
5	GND	I	GND terminal
6	D09	O	16-bit parallel data
7	—	—	—
8	D08	O	16-bit parallel data
9	D07	O	16-bit parallel data
10	—	—	—
11	—	—	—
12	D06	O	16-bit parallel data
13	D05	O	16-bit parallel data
14	D04	O	16-bit parallel data
15	D03/2RLCK	O	16-bit parallel data/RL signal
16	—	—	—
17	—	—	—
18	D02/WCK	O	16-bit parallel data/serial output word clock
19	D01	O	16-bit parallel data
20	D00	O	16-bit parallel data (LSB)
21	MDATA	I	Command data input

Pin No.	Mark	I/O Device	Function
22	—	—	—
23	MCLK	I	Command clock input
24	MLD	I	Command load input
25	—	—	—
26	RST	I	Reset signal input (reset at "L")
27	VDD	I	Power supply (connected to +5V)
28	LRCK	I	R/L signal
29	—	—	—
30	SFT	I	Serial data input clock
31	SIN	I	Serial data input
32	—	—	—
33	X OUT	O	Clock output (Not used)
34	X IN	I	Clock input (16.9344 MHz)
35	OSEL	I	DA output parallel/serial selection. (parallel at "H")
36	LDGL	O	L channel deglitch signal
37	RDGL	O	R channel deglitch signal
38	VDD	I	Power supply (connected to +5V)
39	D015	O	16-bit parallel data (MSB)
40	D014	O	16-bit parallel data
41	—	—	—
42	D013	O	16-bit parallel data

• AN8290S (Spindle Motor Drive)

Pin No.	Mark	I/O Devision	Function
1	GND	I	Minimum potential of IC control. (In this unit, it is connected to VEE [-8.5V])
2	DCR	I	Standard voltage of FAI, PC, CLK. (In this unit, it is connected to 2.5V.)
3	FAI	I	Torque command filter amp. input. (Normal rotation command when FAI < DCR.)
4	FAO	O	Filter amp. output.
5	DI	I	Absolute value circuit input.
6	LPF	I	Capacitor terminal for low pass filter of current feedback loop.
7	A1	O	Drive signal output.
8	A2	O	
9	A3	O	
10	PGND	I	Minimum potential of IC power. (In this unit, it is connected to VEE [-8.5V])
11	CS	I	Drive current detection resistor terminal.
12	PVCC	I	Power input for IC power.

Pin No.	Mark	I/O Devision	Function
13	H3-	I	Not used in this unit.
14	H3+	I	
15	H2-	I	Negative output of Hall element is input.
16	H2+	I	Positive output of Hall element is input.
17	H1-	I	Negative output of Hall element is input.
18	H1+	I	Positive output of Hall element is input.
19	HSW	I	Bias switch of Hall element. (OFF when PC > DCR)
20	HB	I	Bias power of Hall element.
21	VCC	I	Power input for IC control.
22	PC	I	Power control. (Power down mode when PC > DCR)
23	CLK	I	Clock input. (DCR standard, operated at the edge of rise.)
24	TC	I	Triangular wave generation capacitor terminal.

## ■ RESISTORS AND CAPACITORS

Notes: 1. Part numbers are indicated on most mechanical parts.

Please use this part number for parts orders.

2. Important safety notice:

Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.

### Numbering System of Resistor

#### Example

ERD	S2	T	J	101
Type	Wattage (1/4W)	Shape	Tolerance ( $\pm 5\%$ )	Value (1k $\Omega$ )
ERJ	8	GEY	J	102
Type	Wattage (1/8W)	Shape	Tolerance ( $\pm 5\%$ )	Value (1k $\Omega$ )
<b>Resistor Type</b>	<b>Wattage</b>	<b>Tolerance</b>		
ERD : Carbon	S2 : 1/4W	J : $\pm 5\%$		
ERJ : Chip Type Carbon	8 : 1/8W	K : $\pm 10\%$		

### ● Indication of RCBS type capacitor (Axial type)

### ● Rated voltage

The rated voltages are indicated by insulating paint colors.

Rated voltage (DC)	Paint color
16V	Pink
50V	Light-green

### ● Electrostatic capacity and characteristics

The nominal electrostatic capacities (PF), tolerances and temperature characteristics are indicated by color codes.

Color band	Brown	Red	Orange	Yellow	Green	Blue	Purple	Gray	White	Black	Gold	Silver
1st, 2nd color bands (Effective number of nominal electrostatic capacity)	1	2	3	4	5	6	7	8	9	0	—	—
3rd color band (Multiplier of nominal electrostatic capacity)	$10^1$	$10^2$	$10^3$	$10^4$	—	—	—	—	$10^0$	$10^{-1}$	$10^{-2}$	
4th color band (Tolerances)	—	—	—	—	—	—	—	N	Z	M	J	K
5th color band (Temperature characteristic)												

### Numbering System of Capacitor

#### Example

ECKD	1H	102	K	C
Type	Voltage (50V)	Value (0.001 $\mu$ F)	Tolerance ( $\pm 10\%$ )	Peculiarity
ECEA	0G	KS	470	L
Type	Voltage (4V DC)	Peculiarity use	Value (47 $\mu$ F)	Special use
GR426	B	273	K	25
Type	Peculiarity	Value (0.027 $\mu$ F)	Tolerance ( $\pm 10\%$ )	Voltage (25V)

Type	Voltage	Tolerance
ECEA : Electrolytic	ECEA, AR, REC, ECEV Types	F : $\pm 1 \mu$ F J : $\pm 5\%$ K : $\pm 10\%$
ECEA..N : Non-Polar Electrolytic	OG : 4V OJ : 6.3V 1A : 10V 1C : 16V 1E : 25V 1V : 35V 1H : 50V	M : $\pm 20\%$ Z : $\pm 20\%$ N : $\pm 30\%$ P : $\pm 100\%$
ECEV : Electrolytic (Chip Type)		
ECQM : Polyester		
ECFR ECKF ECFF ECCD : Ceramic	Others	
GR426 : Ceramic (Chip Type)	1E : 25V DC 1H : 50V DC 50 : 50V DC	
RCBS : Ceramic (Axial Type)	2B : 125V DC KC : 125V AC

## ■ REPLACEMENT PARTS LIST

**Notes:**

1. Part numbers are indicated on most mechanical parts.  
Please use this part number for parts order.
2. Important safety notice:  
Components identified by  mark have special characteristics important for safety.  
When replacing any of these components, use only manufacturer's specified parts.
3. Bracketed indications in Ref. No. columns specify the area.  
Parts without these indications can be used for all areas.
4. The "S" mark is service standard parts and may differ from production parts.
5. -marked parts are used for black type only, while -marked parts are for silver type only.
6. Part other than -marked are used for both black and silver types.
7. The parenthesized numbers in the columns of description stand for the quantity per set.

## ■ TROUBLESHOOTING

Notes:

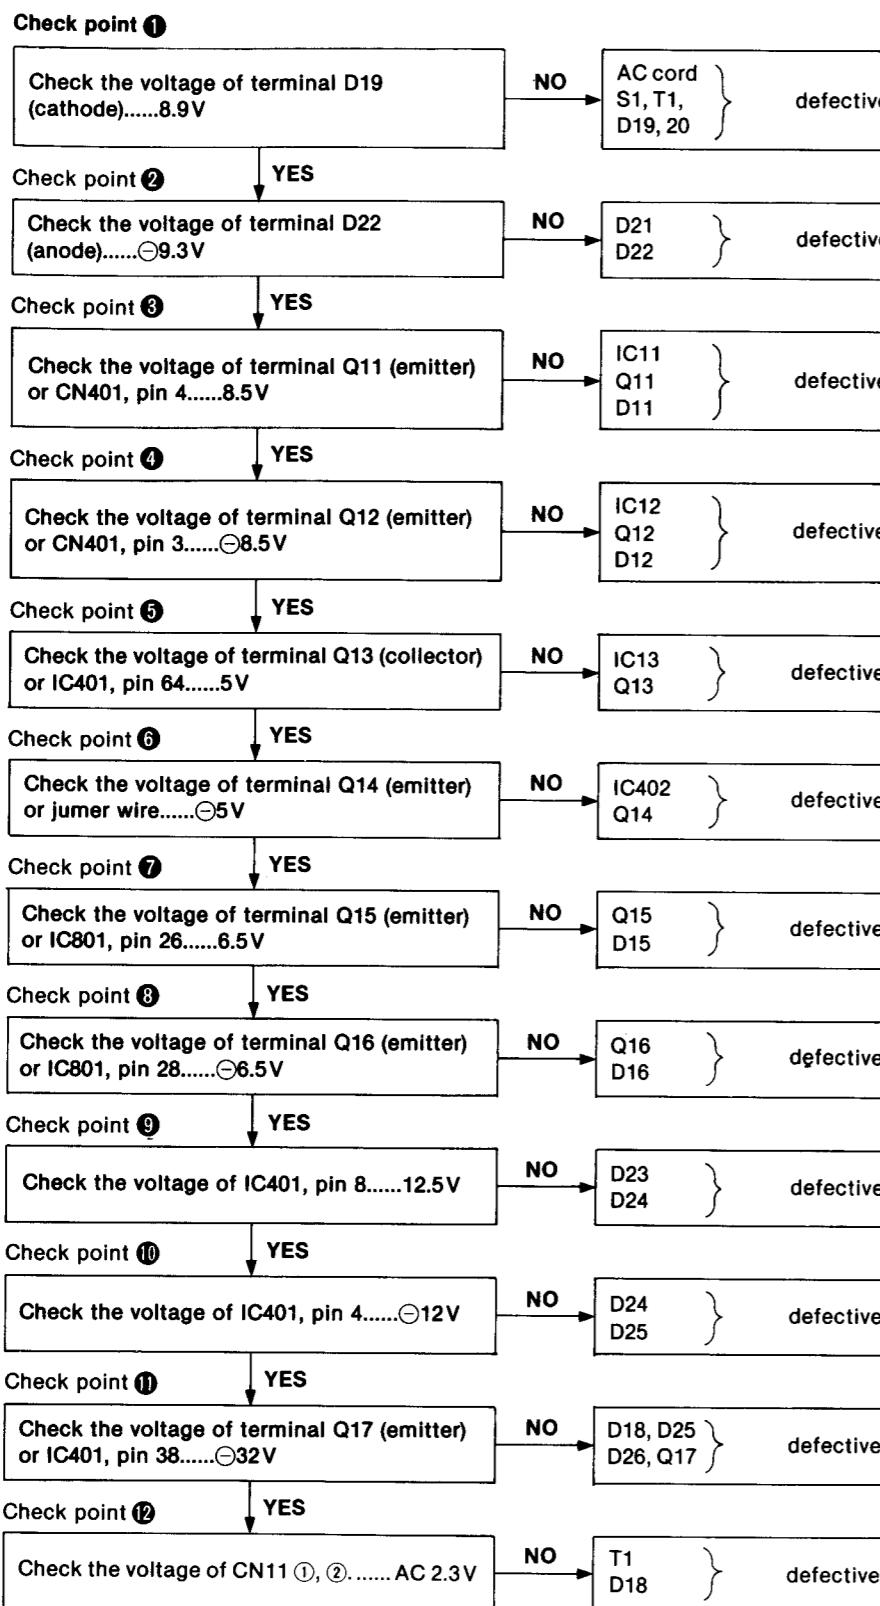

1. Carefully handle the compact disc because stains, dust or warping may cause generation of noise.
2. For the voltage value and waveform, refer to the schematic diagram. (The voltage value and waveform slightly varies depending on the measuring set and tester.)
3. Possible defects are mainly shown by the name of semi-conductor. The adjacent electronic circuits (such as C and R) are omitted.

### • Check points

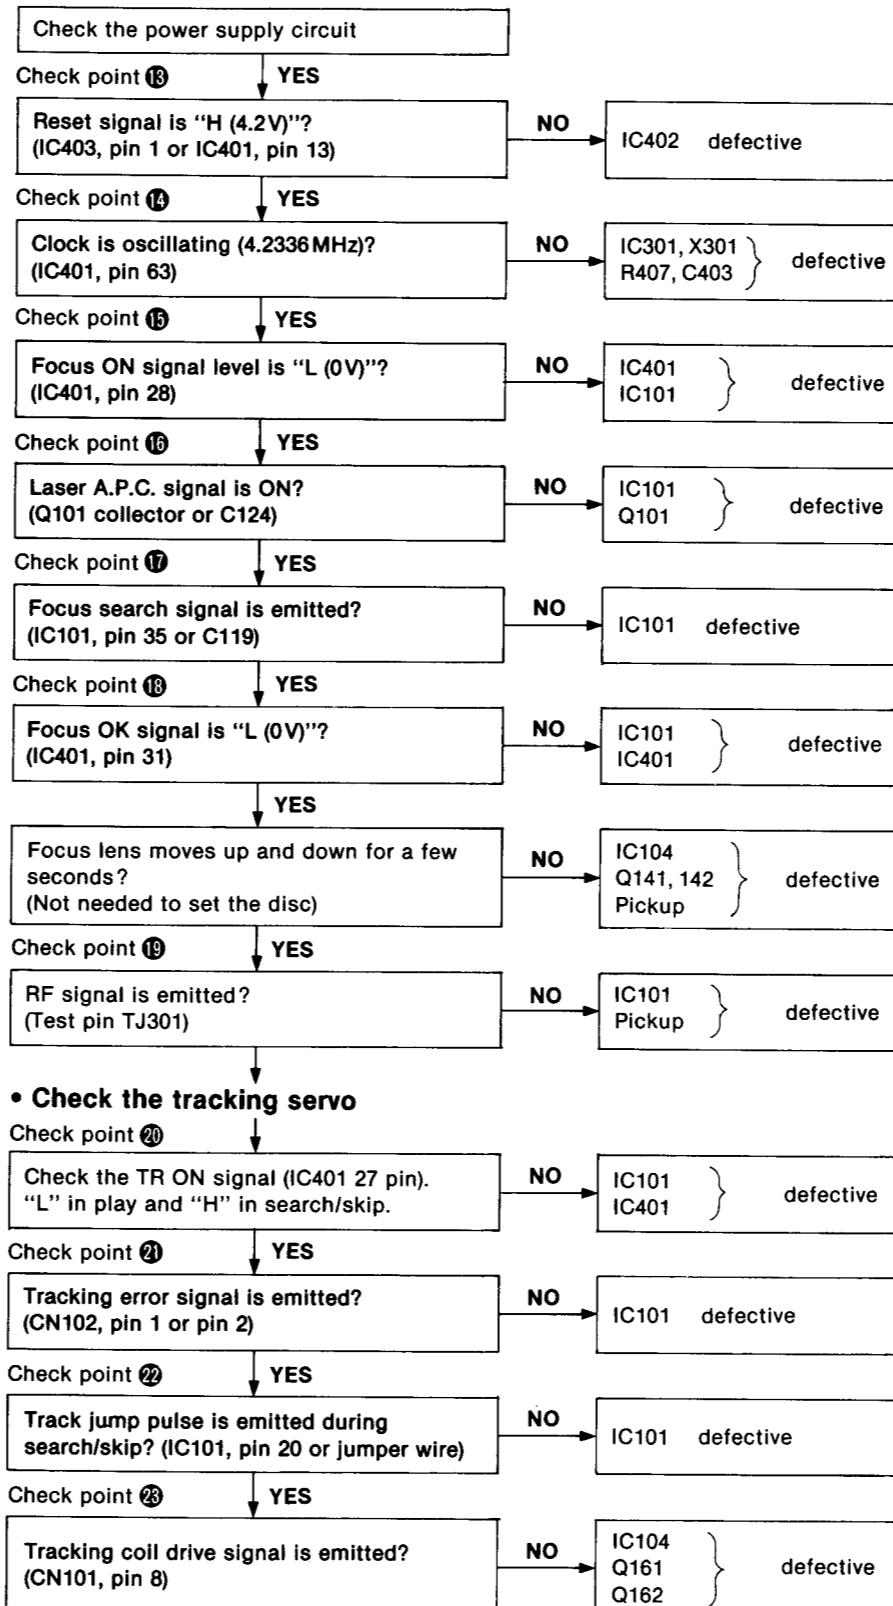

rm slightly  
(such as C)

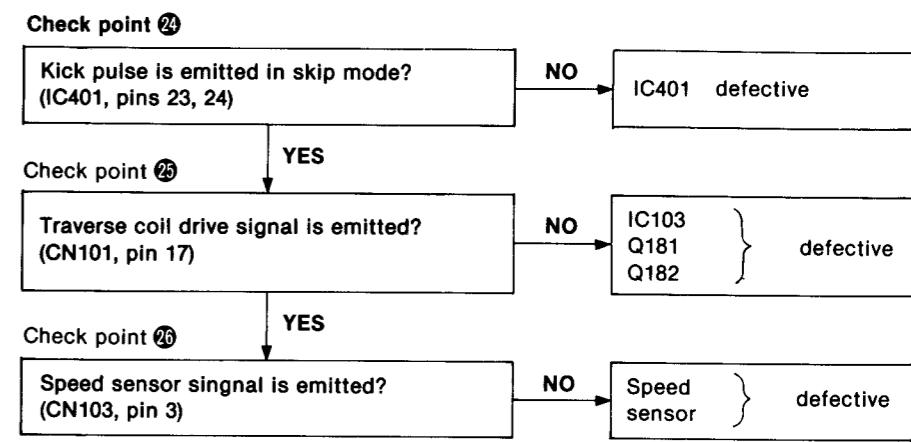

#### • Check the power supply circuit

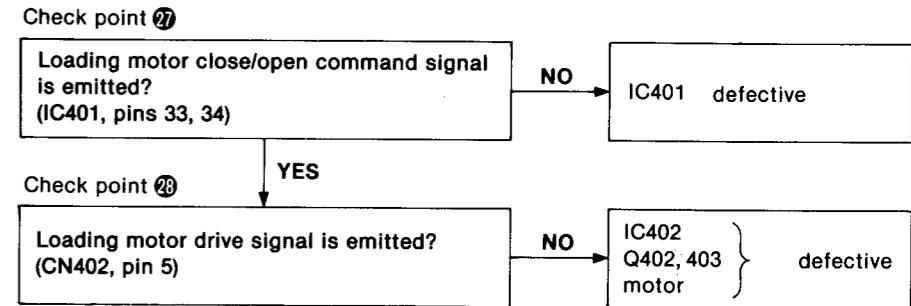

#### • Check the focus servo

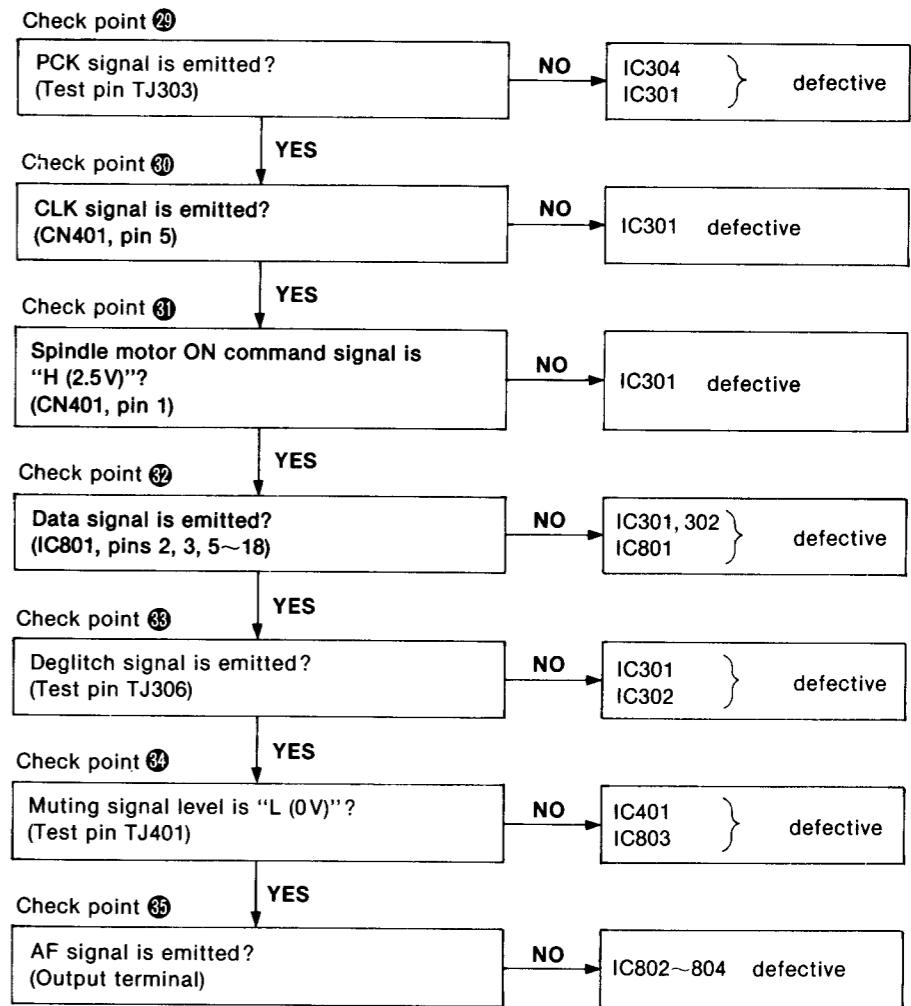

#### • Check the traverse servo

#### • Check the loading motor drive

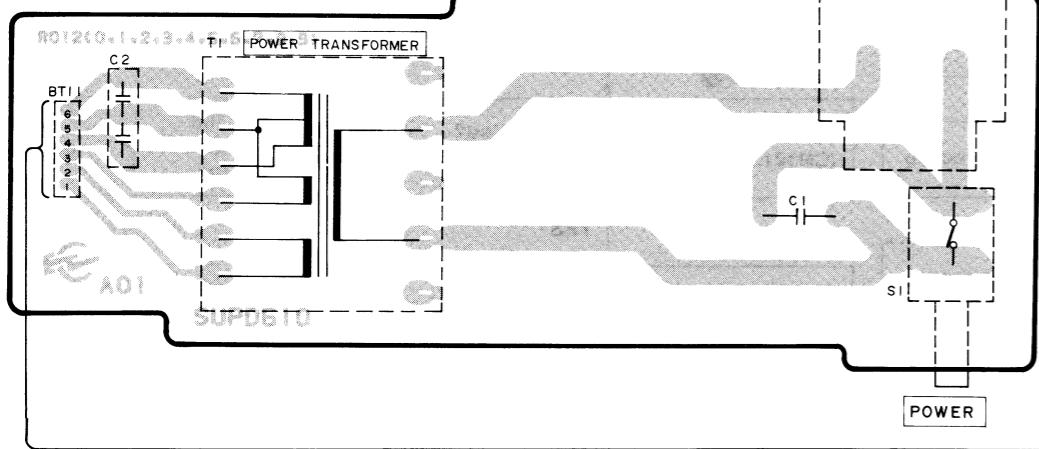

#### • Check the digital and audio

- \* Do not touch the

- **Remote**

### **\* Caution**

IC and LSI are aensitive to static electricity.  
Secondary trouble can be prevented by taking care during repair.

- \* Cover the parts boxes made of plastics with aluminum foil
- \* Ground the soldering iron.
- \* Put a conductive mat on the work table.
- \* Do not touch the legs of IC or LSI with the fingers directly

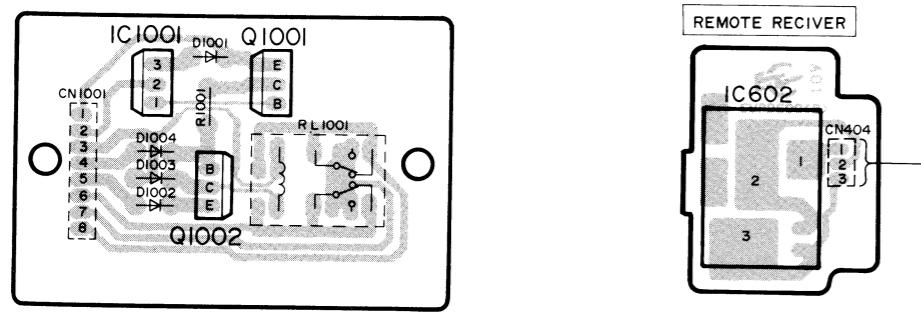

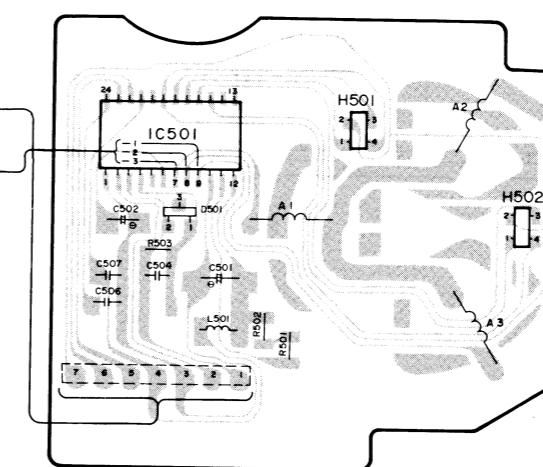

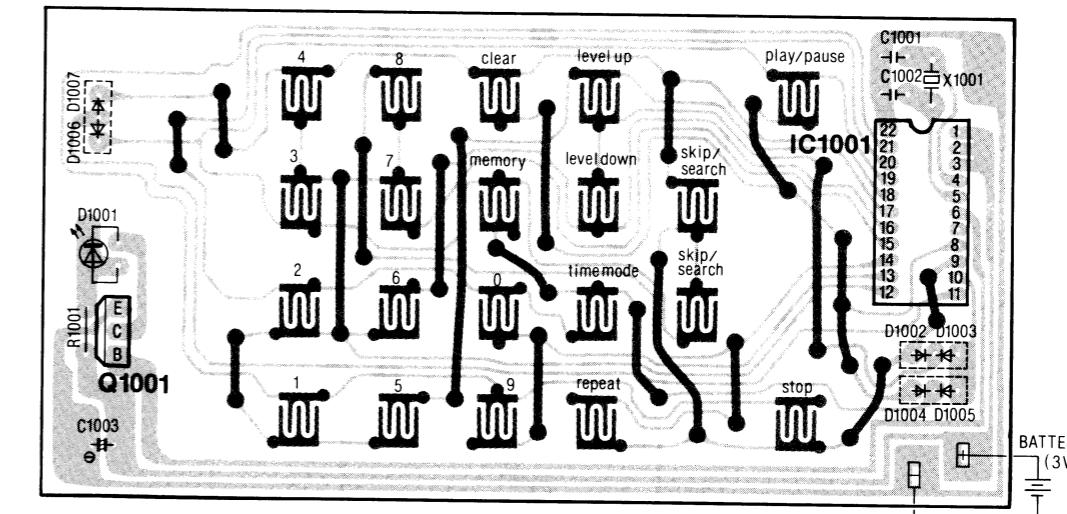

## ■ SCHEMATIC DIAGRAM

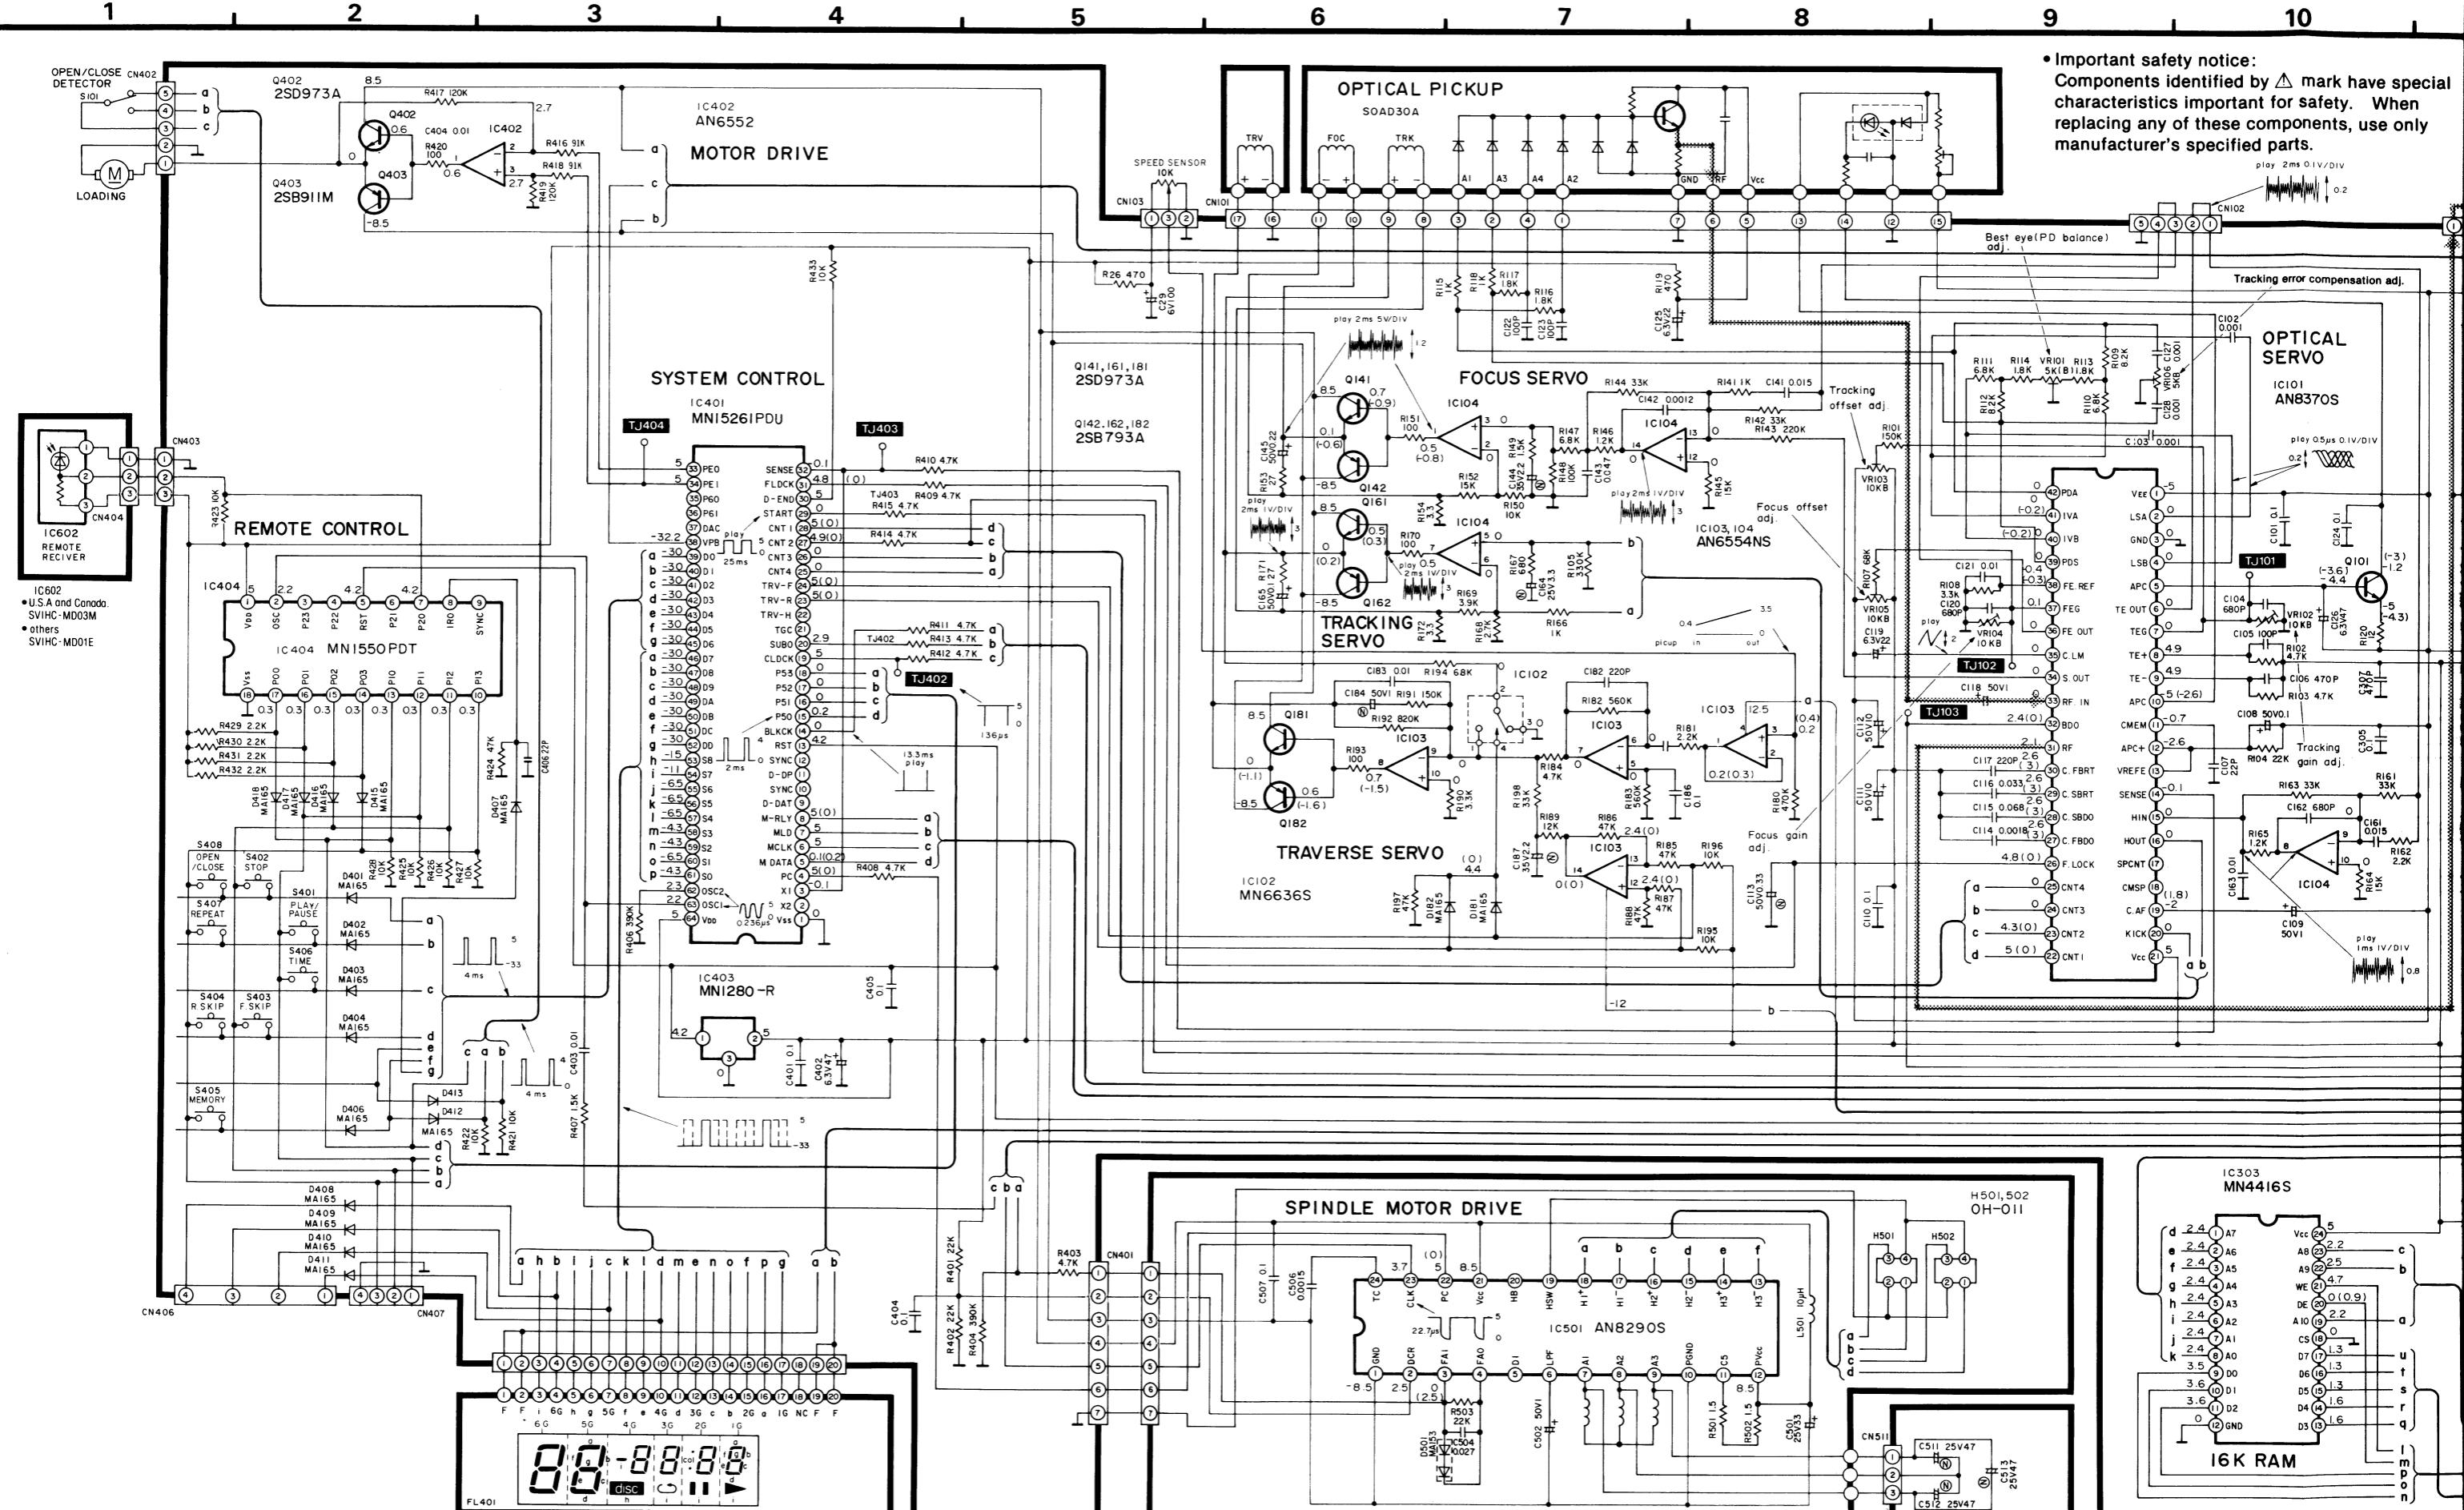

(This schematic diagram may be modified at any time with the development of new technology.)

## Notes:

1. **S1** : Power switch in "on" position.
2. **S2** : Voltage selector switch.  
(For [XA], [XB], [PA], [PE] and [PC] areas)
3. **S101** : Disc holder open/close detection switch.
4. **S401** : Play/pause switch.
5. **S402** : Stop/clear switch.
6. **S403** : Forward skip/search switch.
7. **S404** : Backward skip/search switch.
8. **S405** : Memory/recall switch.
9. **S406** : Time mode select switch.
10. **S407** : Repeat switch.
11. **S408** : Open/close switch.
12. The voltage value and waveform are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis. Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.  
\* The parenthesized are the values of voltage generated during playing (Test disc 1kHz, L+R, 0dB), others are voltage values in stop mode.
13. Important safety notice:  
Components identified by  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.
14. ——— : Positive voltage lines and negative voltage lines.  
———— : Audio signal lines.

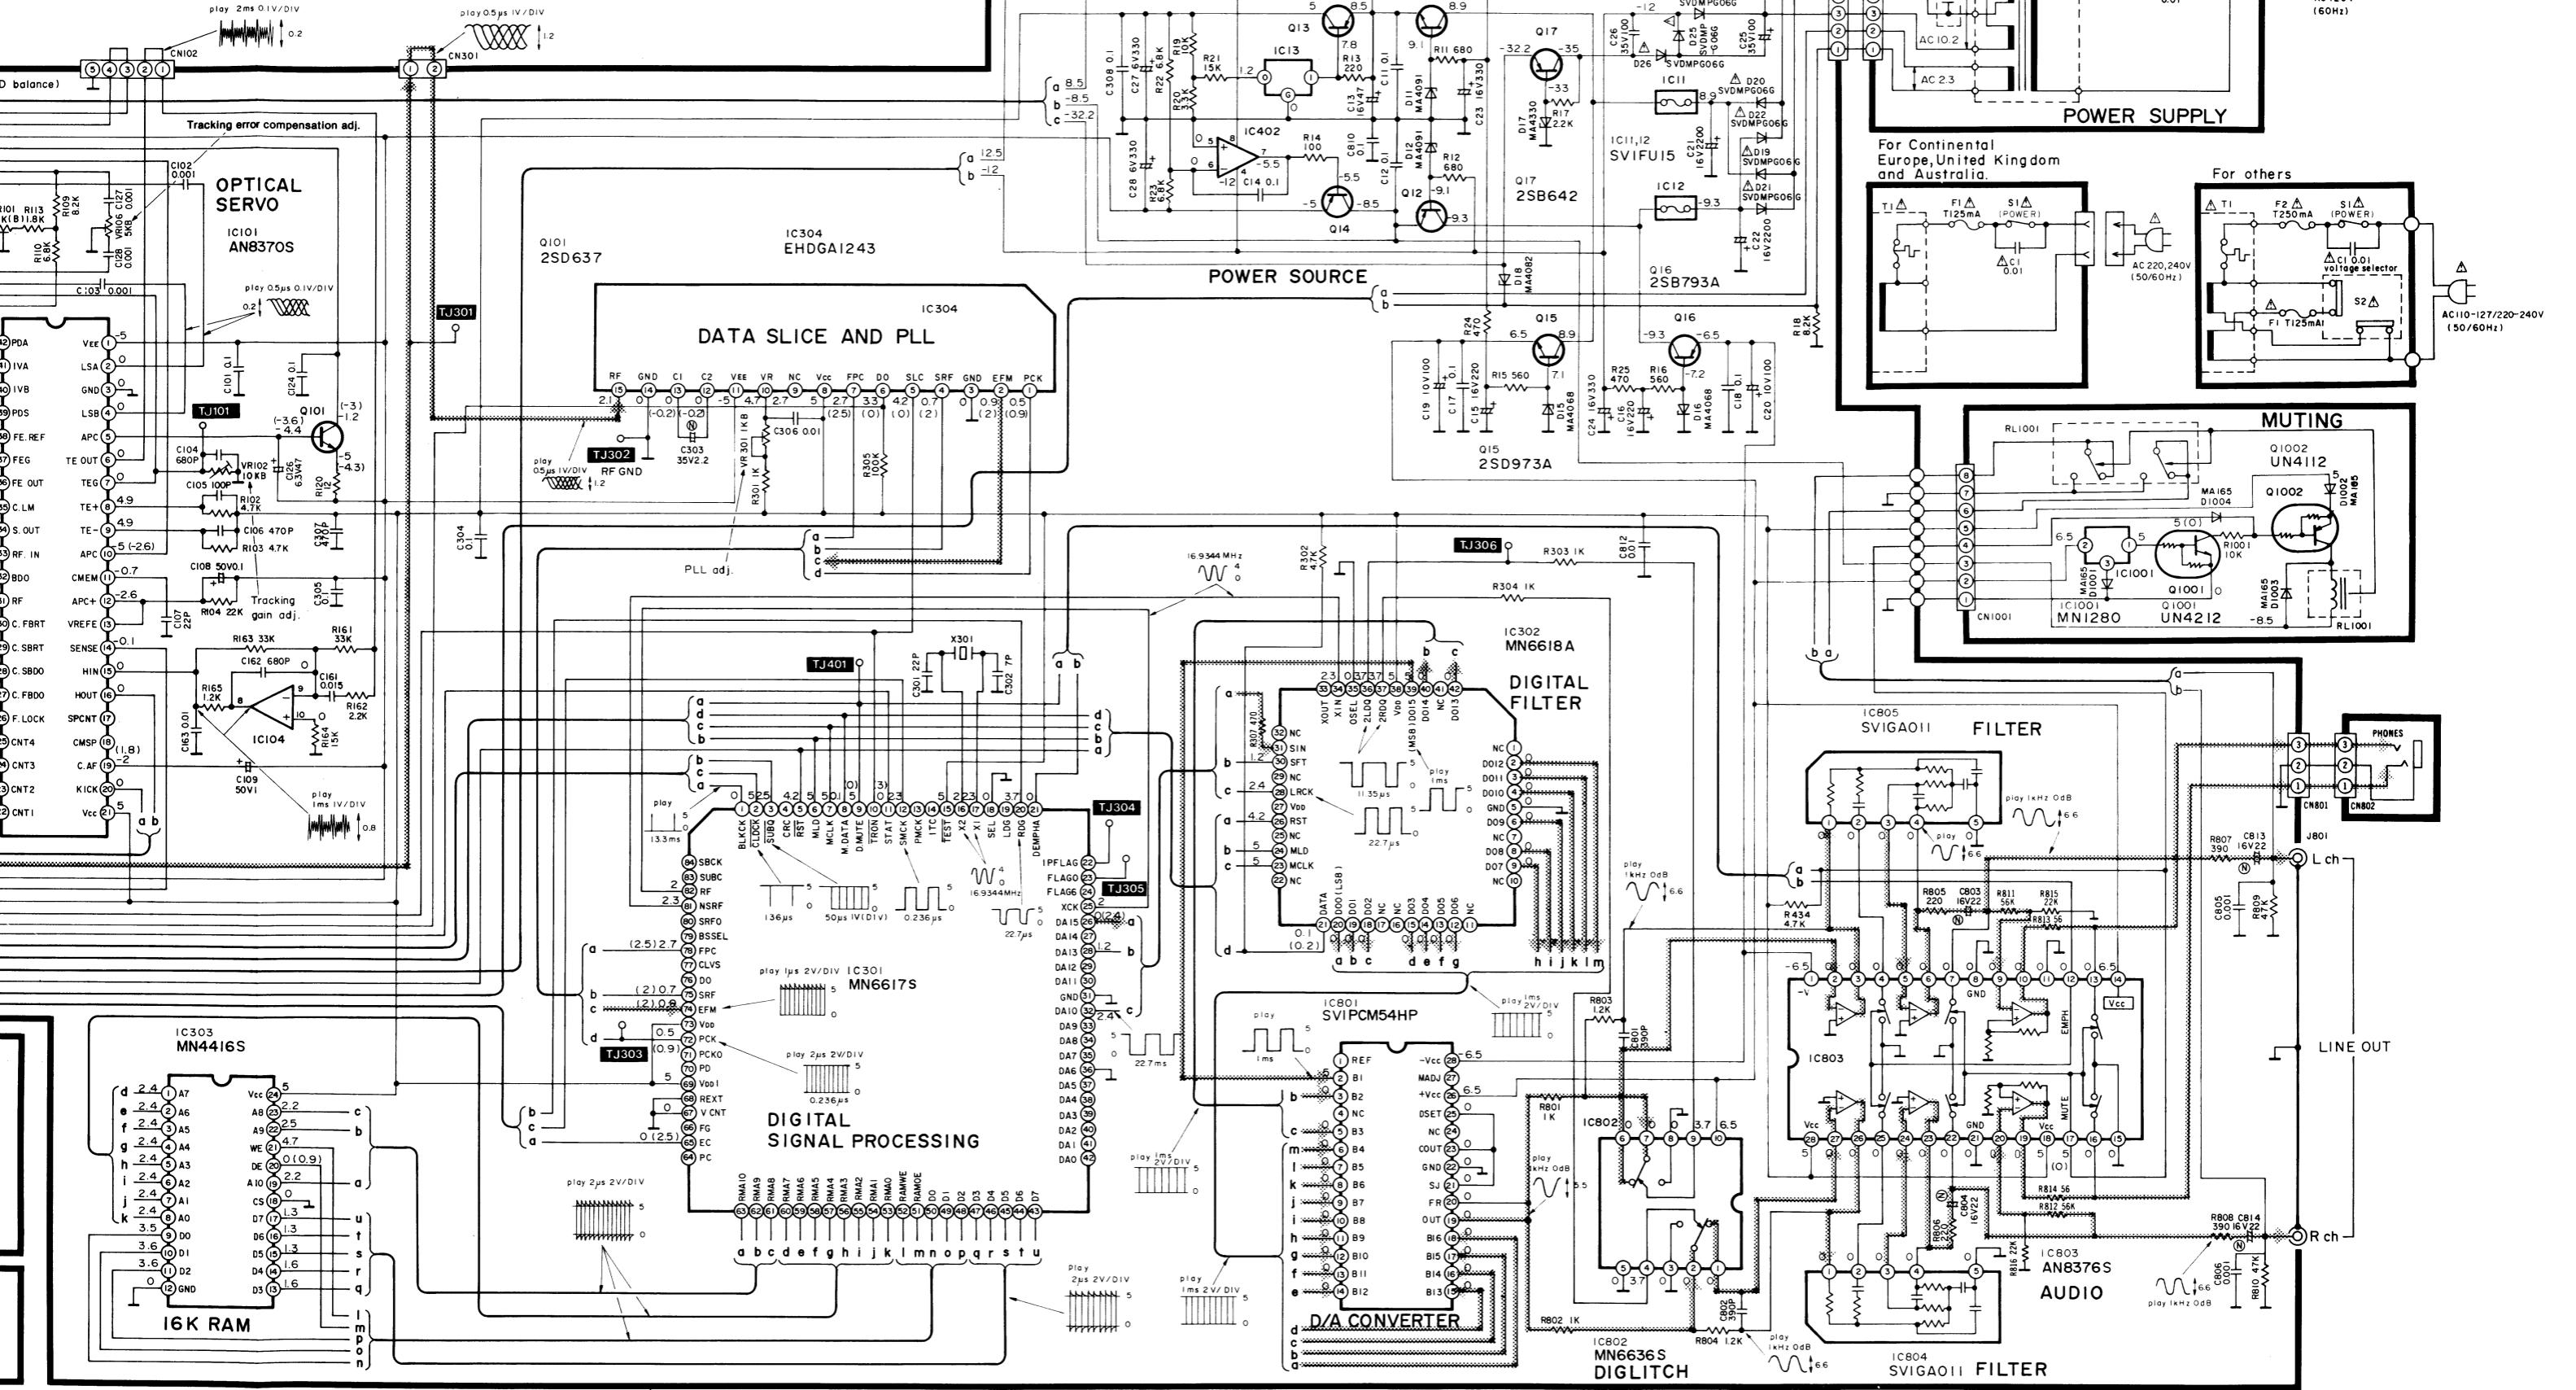

- Remote Control

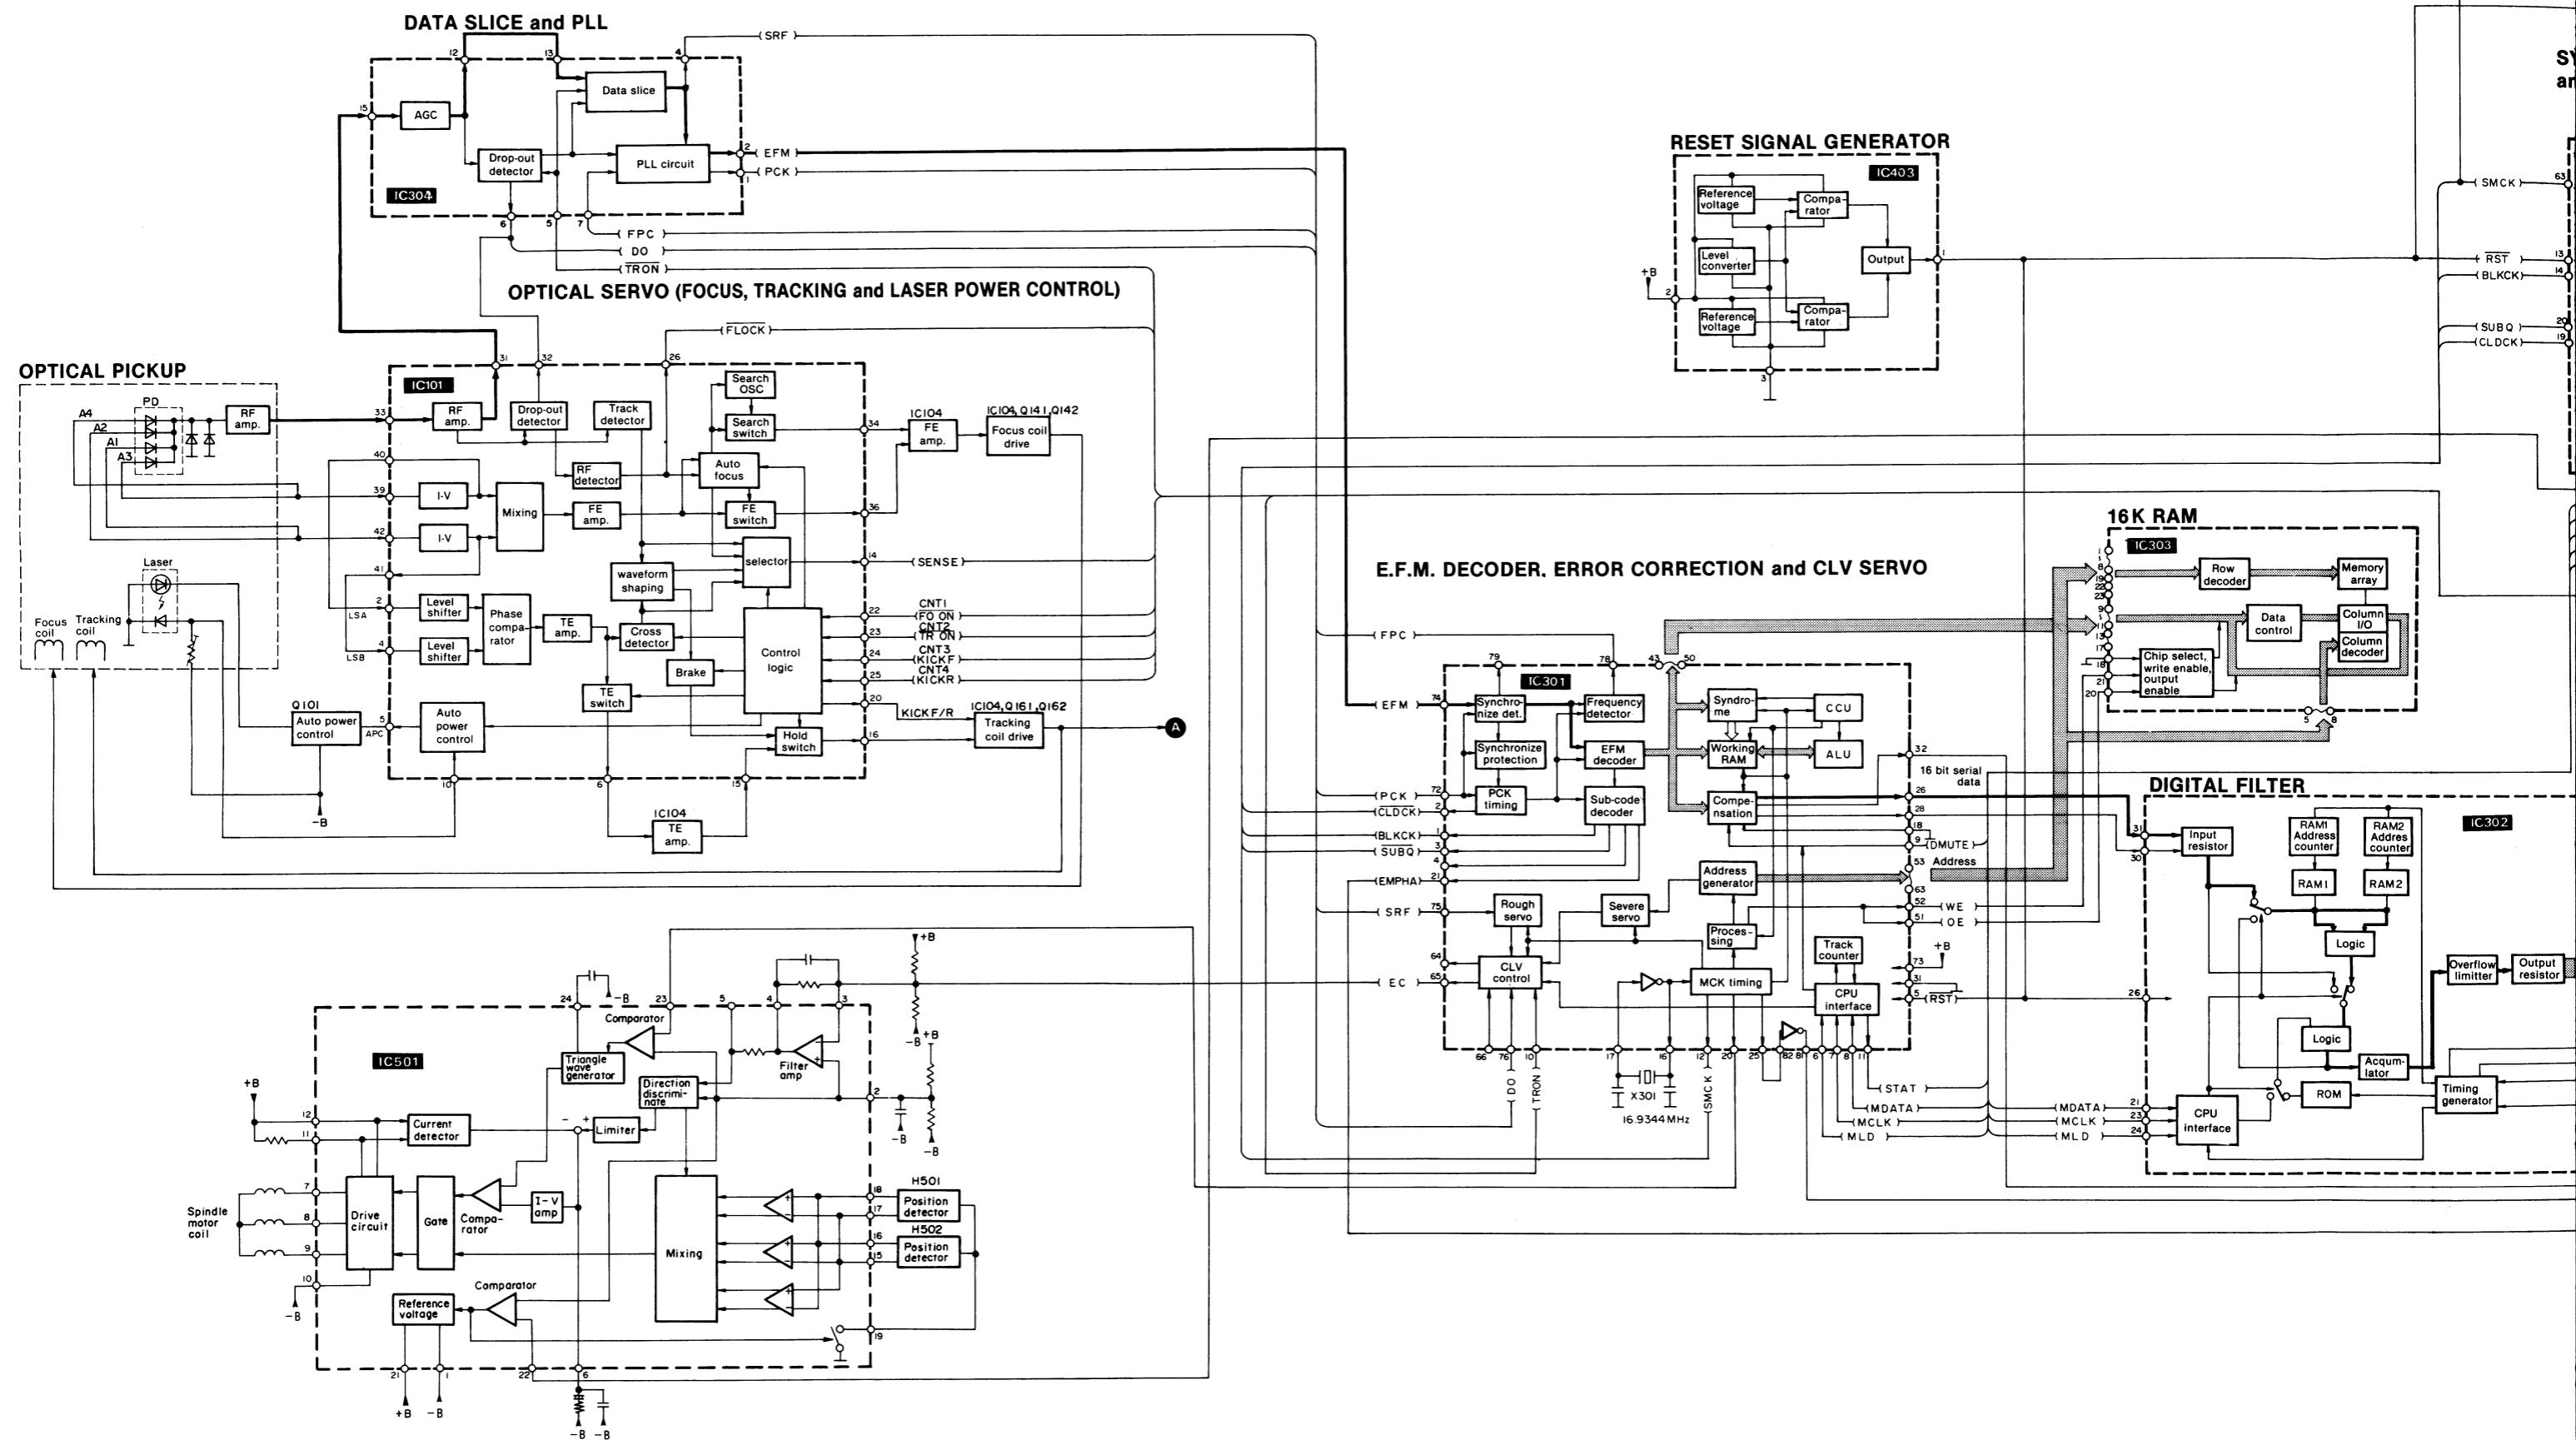

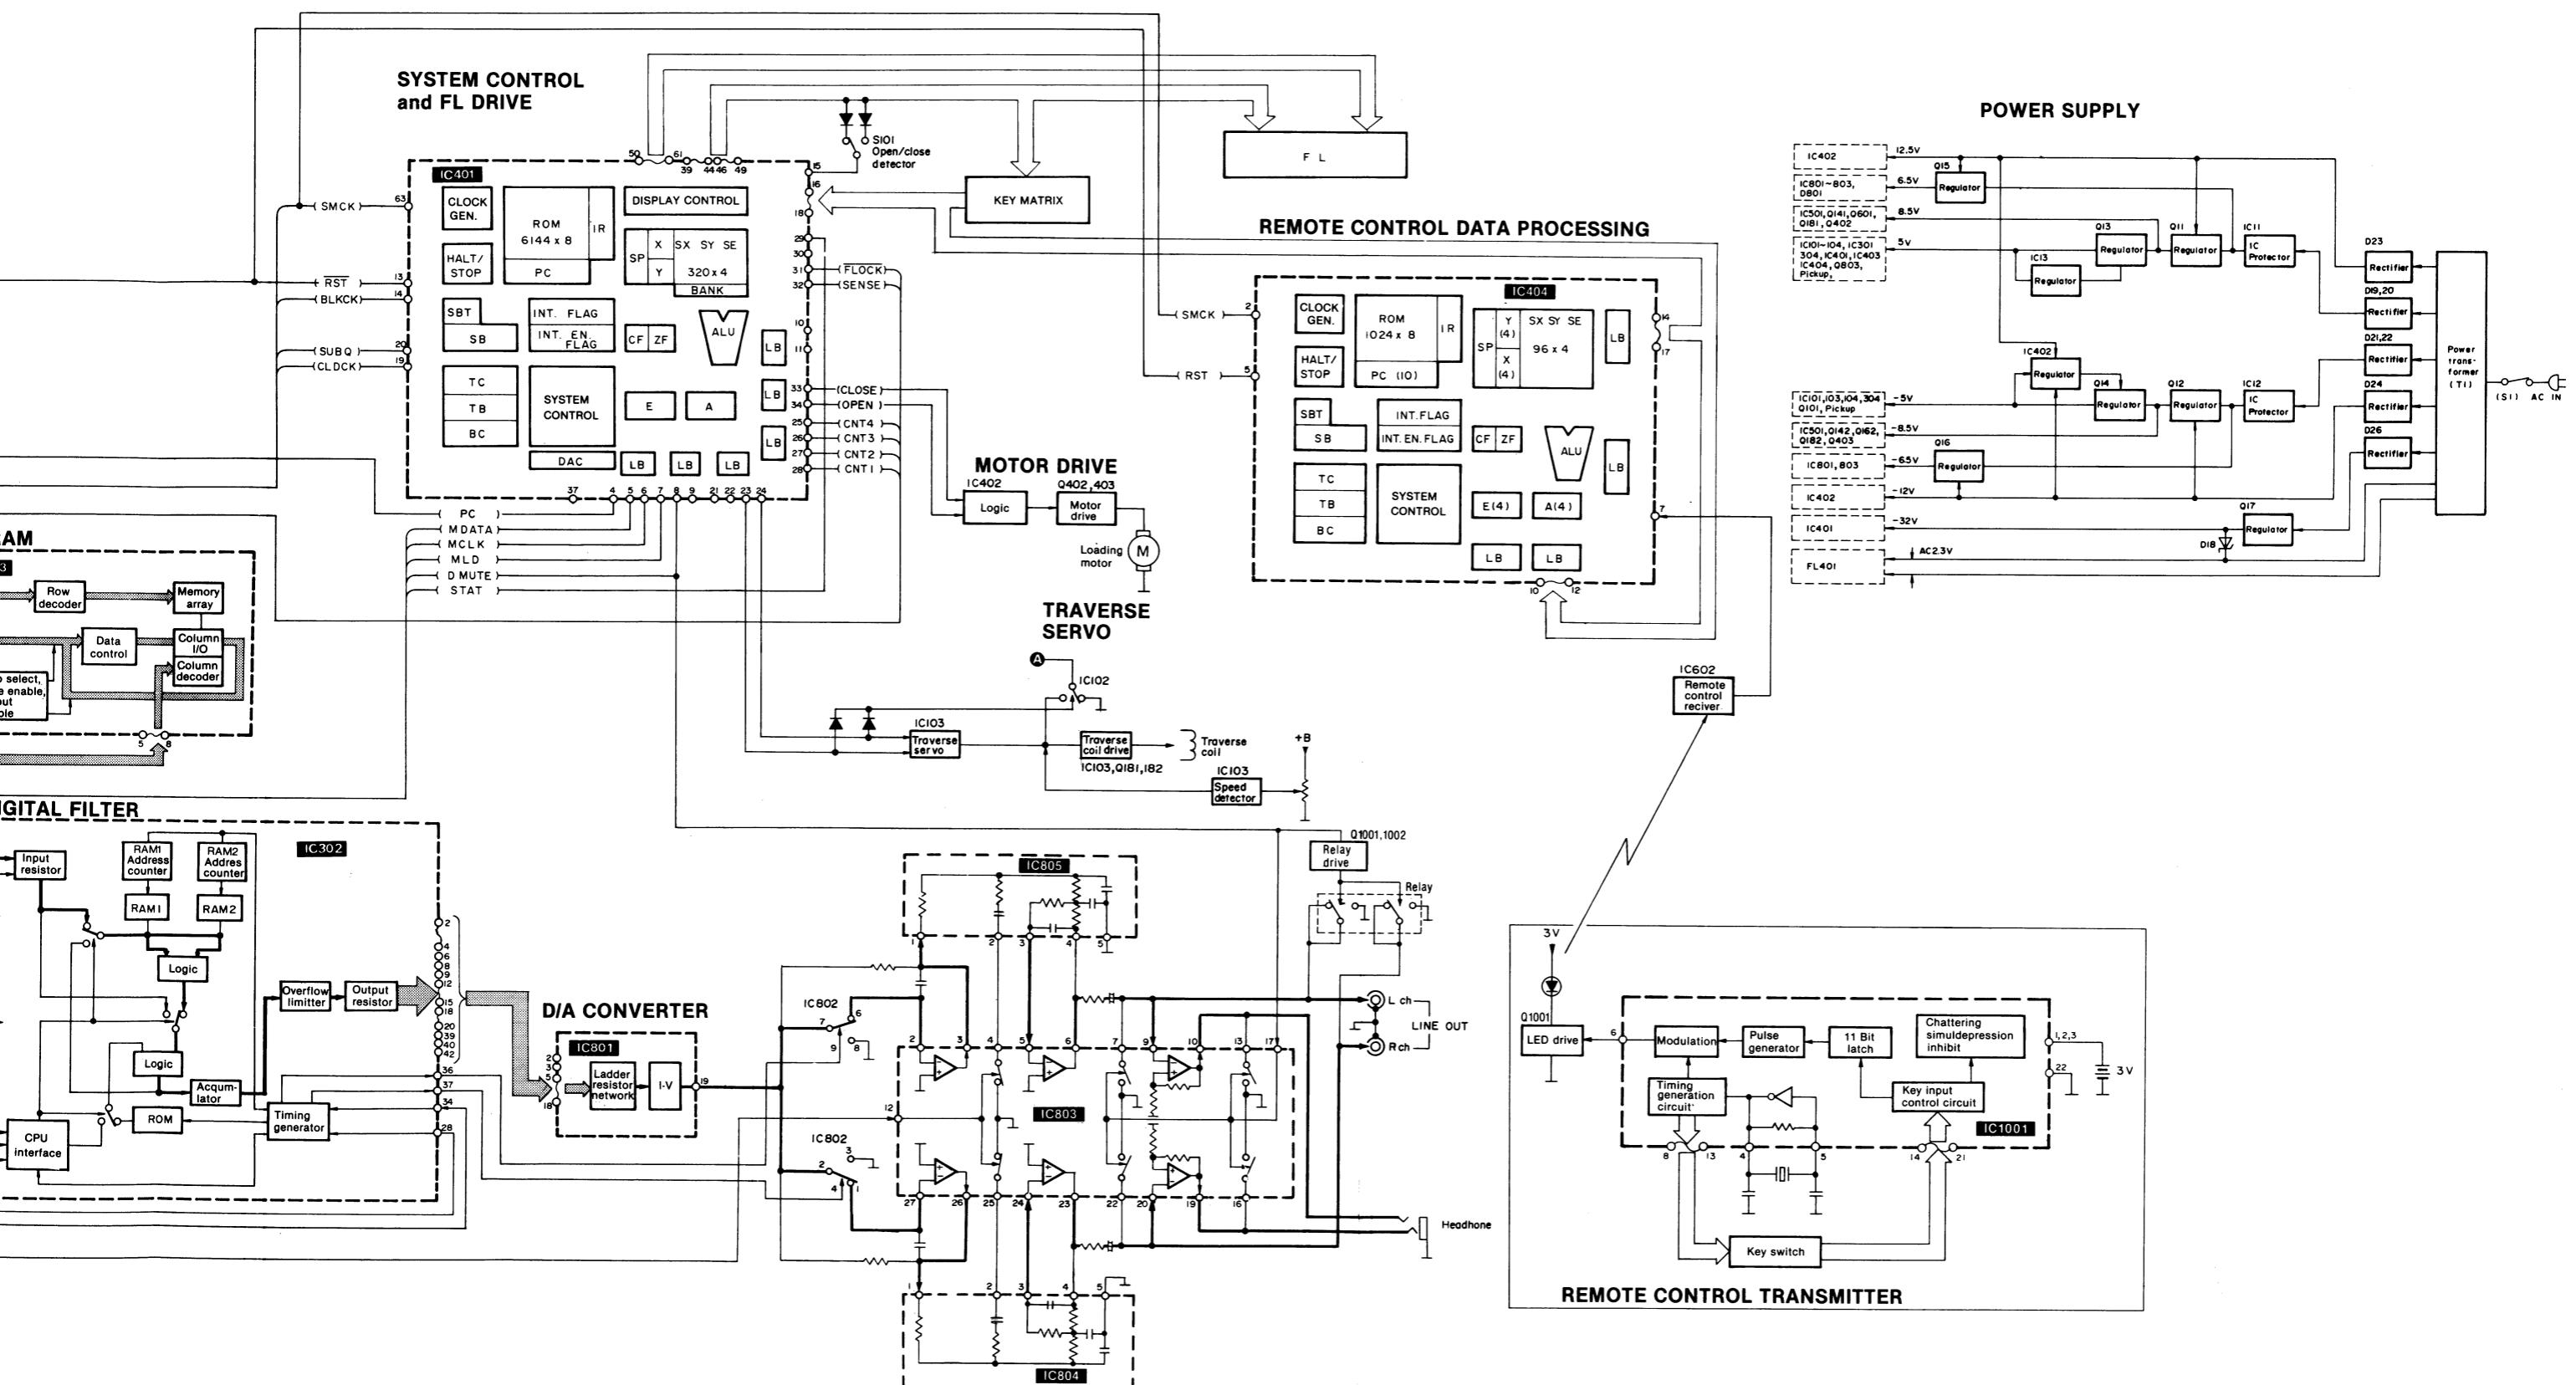

**Important safety notice:**  
Components identified by  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

# Parts Change Notice

Model No. SL-P110/P115/P116/P210/P310

Service Manual  
 Order No. HAD8606593C0  
 Order No. HAD8607634A1  
 Order No. HAD8607635A1  
 Order No. HAD8607631C0  
 Order No. HAD8607667C0

Please revise the original parts list in the Service Manual to conform to the change (s) shown herein. If new part numbers are shown, be sure to use them when ordering parts.

<b>Reason for Change</b>		*The circled item indicates the reason. If no marking, see the Notes in the bottom column.			
1. Improve performance					
2. Change of material or dimension					
3. To meet approved specification					
4. Standardization					
5. Addition					
6. Deletion					
7. Correction					
8. Other					
<b>Interchangeability Code</b>		**The circled item indicates the interchangeability. If no marking, see the Notes in the bottom column.			
Parts	Set Production				
A Original	Original  Early	Original or new parts may be used in early or late production set. Use original parts until exhausted, then stock new parts.			
A New	New  Late				
B Original	Original  Early	Original parts may be used in early production sets only. New parts may be used in early or late production sets. Use original parts where possible, then stock new parts.

## ■ SCHEMATIC DIAGRAM

OLD

NEW

Please use this manual together with the service manual for Model No. SL-P210, Order No. HAD8607631C0.

### Notes:

- ★ The main P.C.B. of this unit was changed at the production. Be careful about this point during servicing.
- (Main changes)
  1. Mounting the muting relay circuit into main P.C.B
  2. Discontinuing of parts mounted on the foil side of P.C.B.
- ★ This supplement should be filed with the service manual for Model No. SL-P210, Order No. HAD8607631C0.

## ■ PRINTED CIRCUIT BOARD

## 1-2. Measuring Instruments and Special Tools

Must provide special tools prior to starting electric adjustment and optical pick-up adjustment. The special tools are available through the ordinary part supply route. Specify the part numbers (SZZP ----) when placing your order.

1. Servo gain adjuster  
(SZZP1017F)

2. Test disc

- Test disc (SZZP1014F) old type
- Test disc (SZZP1014F) new type
- Inspection test disc (SZZ1054C)
- Uneven disc (SZZP1056C)
- Black band disc (SZZP1057C)

3. Ordinary disc

4. 2-channel oscilloscope  
(with external trigger more than 30MHz)

5. Low frequency oscillator

6. Adjusting screwdriver ----- SZZP1043C

7. Allen wrench ----- SZZP1044C

9. General servicing tools

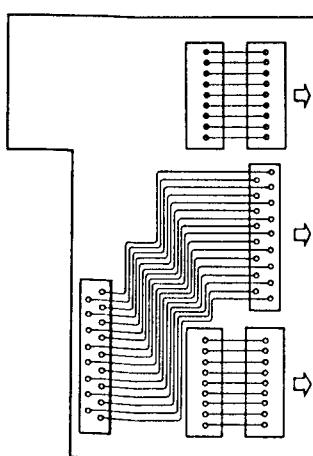

6. Adjusting screwdriver  
(SZZP1043C)

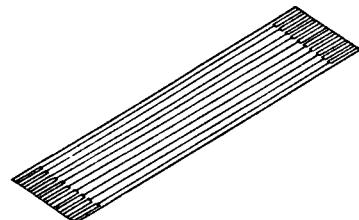

7. Allen wrench (1.5 mm)  
(SZZP1044C)

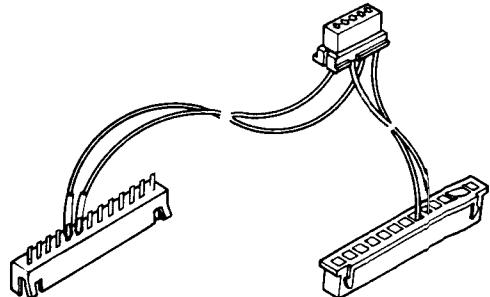

10. Junction PCB  
(SZZP1070C)

11. Junction FPC cord  
(SZZP1071C)

8. Conversion connector  
(SZZP1032F)

# Adjustment Manual

## 1. ADJUSTMENT PROCEDURE

Refer to the service manual for the disassembling methods of each parts.

(Note) Avoid the direct entrance of laser rays into the eyes and exposure of the body to laser rays which are dangerous. Especially be carefull in the electric and optical pick-up adjustments because a laser beam is radiated from the lens of the optical pick-up when the power supply of unit is turned on. Also follow the adjusting procedures given in the manual.

### 1-1. Preparation for Electric Adjustments

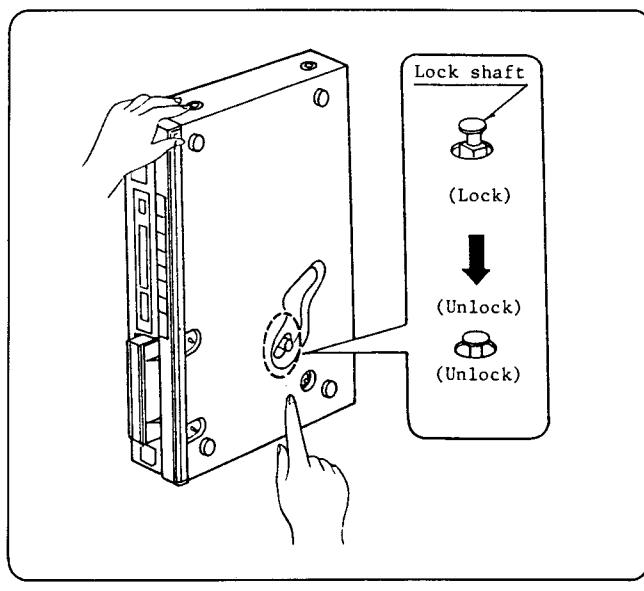

- ① Remove the cabinet, and front panel.
- ② Remove the power switch rod.
- ③ Release the optical pick-up lock by pressing in the lock shaft located on the bottom side of unit (■ (Lock) → ▲ (Free)).

(Note 1)

The pick-up detects signals recorded on the disc with a laser beam. The pick-up moves as the programs are played back but the movement is not visible from outside.

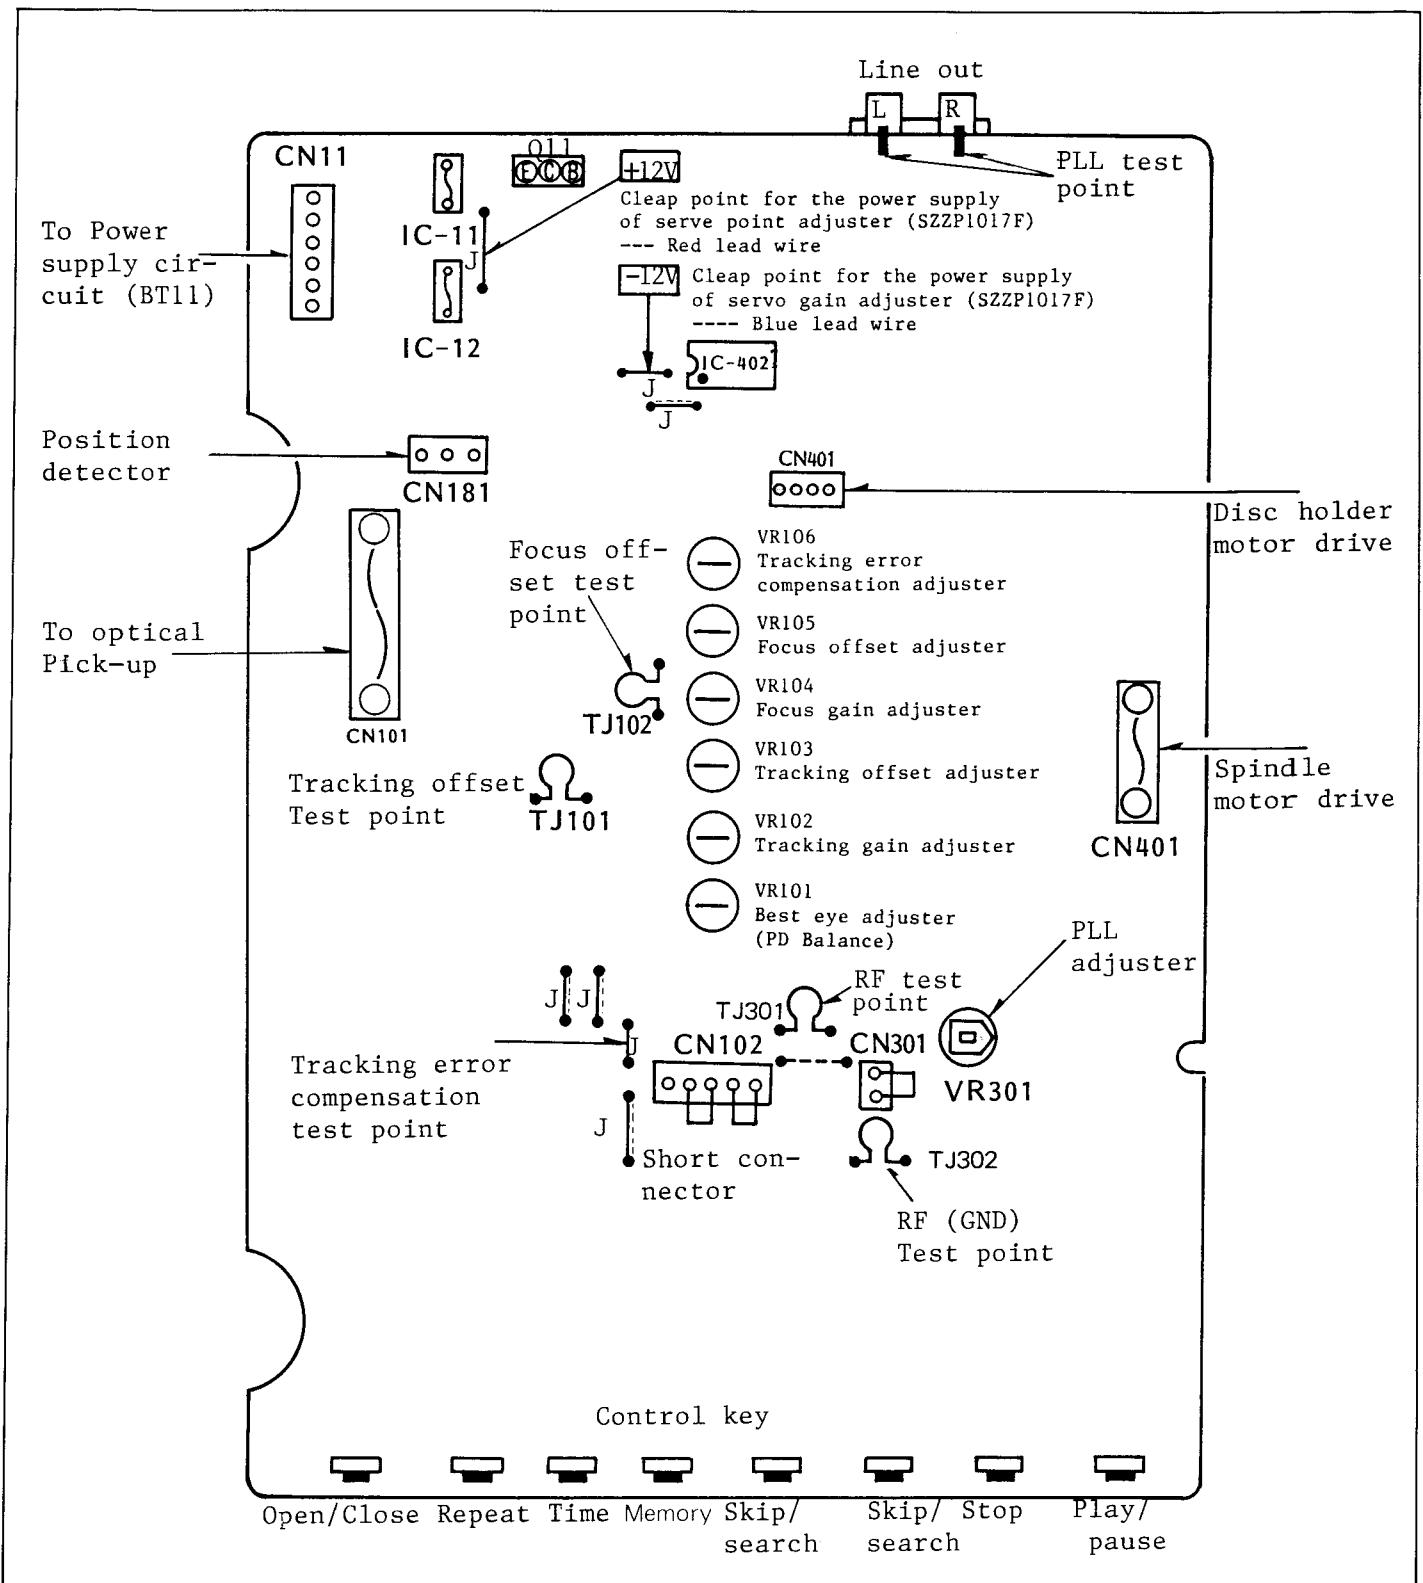

Caution:

- Must remove a disc from the player and lock the pick-up by pressing in the lock shaft when the player is transported as in moving.  
Otherwise, the disc loading mechanism is moved and damaged.
- Also lock the pick-up by pressing in the lock shaft in (▲→■) prior to disassembling the player.

Lock Shaft

## 2-1. Servo gain adjuster and its connection

CN102 of the main PCB is provided with a short circuiting connector.

Remove the CN102 connector and install the conversion connector (SZZP1032F) for adjustment.

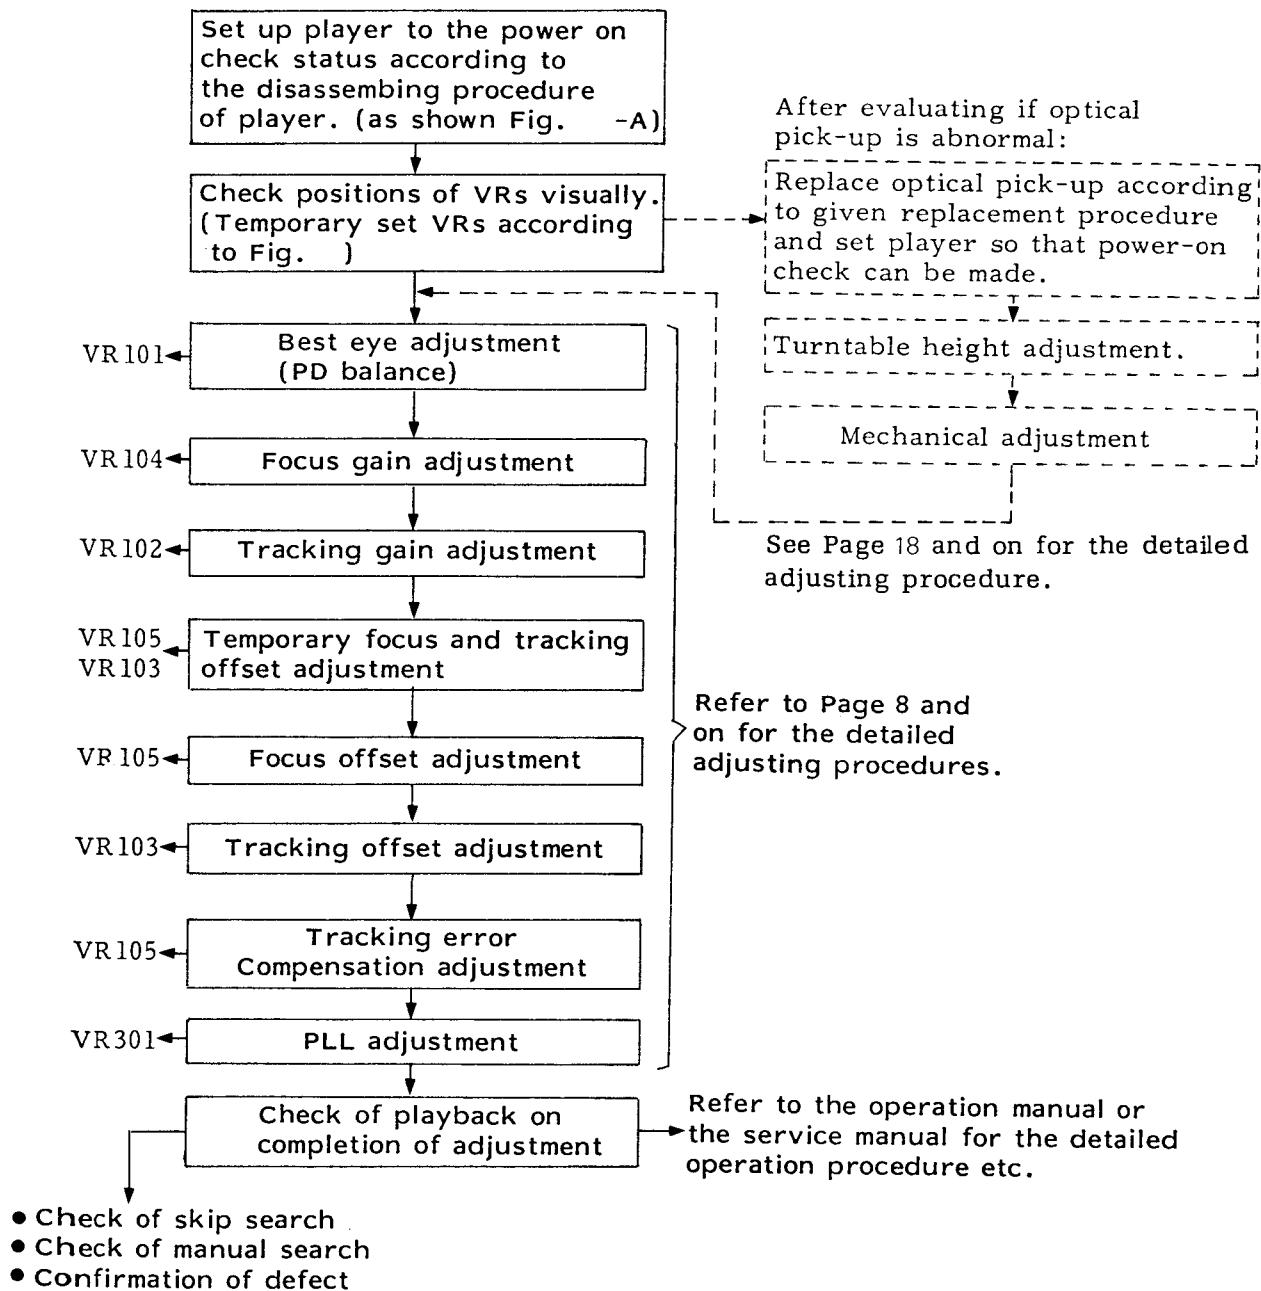

On completion of adjustment, must return the short-circuiting connector to its place.

Servo Gain Adjuster

### Caution:

- (1) Do not look into the lens when power is applied to the unit, since there is laser radiation (H.H.S./D.H.W./etc., regulation).
- (2) These steps must be followed in order.

### 3. ELECTRIC ADJUSTMENT STEPS AND POINTS

By setting the VRs temporarily as shown in Fig., the player runs somehow that the optical pick-up is satisfactory but VRs must be adjusted optimally finally.

## 5. ELECTRICAL ADJUSTMENT PROCEDURE

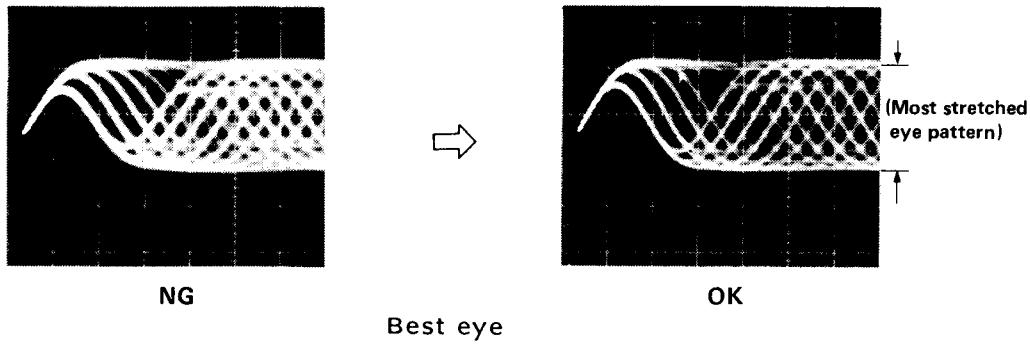

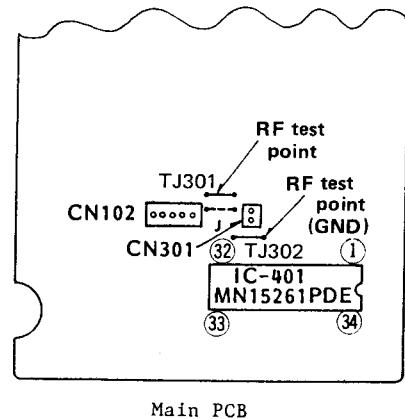

### A. Best Eye (PD Balance) Adjustment

(1) Connect CH-1 of the oscilloscope to the RF test point (TJ301) and the grounding test point (TJ302) on the main PCB as shown in illustration.

Oscilloscope setting ---

Volt	: 500 mV
Sweep	: 0.5 $\mu$ sec
Input	: AC

(2) Turn on the power supply switch of the player.  
 (3) Place the test disc (SZZP1014F) or (SZZP1054C) in to the disc holder by open/close key.  
 (4) The player to the play mode.  
 (5) Play of the test disc. (BS 0.5mm)  
     SZZP1014F (Old) ----- Track 13  
     (New) ----- Track 8  
     SZZP1054C ----- Track 11  
 (6) Adjust VR101 so that the eye pattern of RF signal is stretched most as shown in illustration.

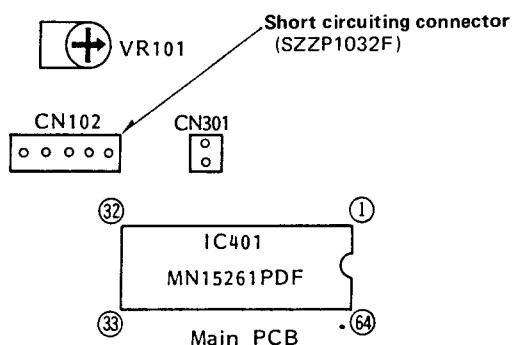

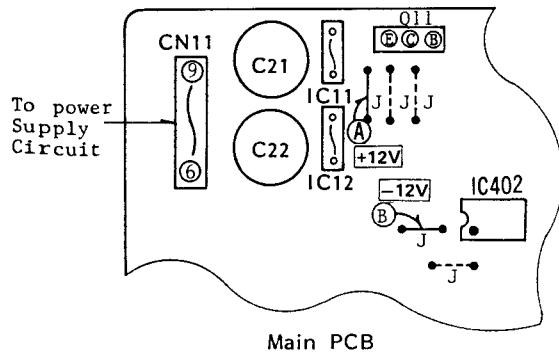

(7) Turn off the power supply switch of the player.

### B. Focus Gain Adjustment

(1) Connect the servo gain adjuster (SZZP1017F) with conversion connector (SZZP1032F) to the player as shown in illustration.

Connecting points

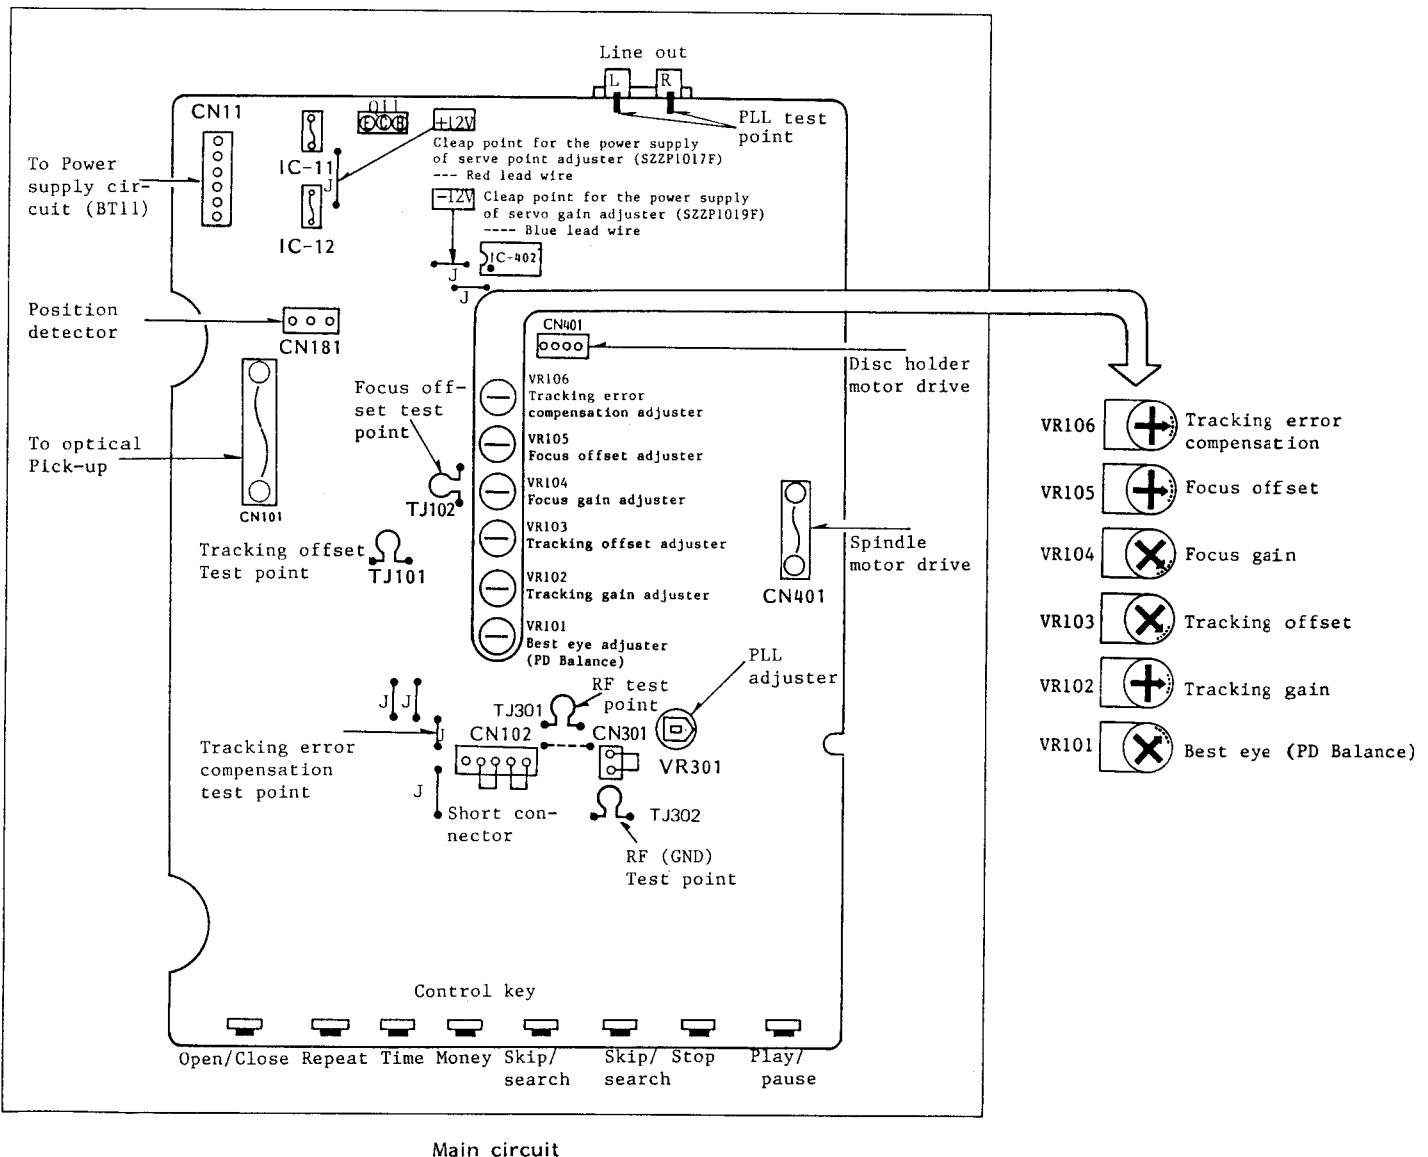

Red lead wire -----	(A) Jumper +12V	beside the Q11 terminals on the main PCB.
Blue lead wire -----	(B) Jumper -12V	beside the IC402 terminal on the main PCB.
Green read wire ---	Chassis	
Connector -----	Remove the short-circuiting pin of CN102 on the Main PCB and connect the conversion connector (SZZP1032F). Connect the conversion connector side (5 pins) to CN102.	

## 4. INITIAL SETTING POINTS OF ADJUSTING VARIABLE RESISTORS (VR)

### • Adjusting Variable Resistors and Test Points

The player operates but not optimum at the above settings of the adjusting variable resistors. Adjust them according to the adjusting procedure.

Most conduct the electric adjustment when any electric part is replaced. Perform ①optical pick-up adjustment and ②electric adjustment in the stated order when the optical pick-up (SOAD30A) is replaced.

Arrangement of the adjusting variable resistors viewing the side face. All the electric adjustments are possible by setting as shown in Fig. .  
(Removed the power supply switch rod for the convenience of adjustment.)

## D. Temporary focus and tracking offset adjustment

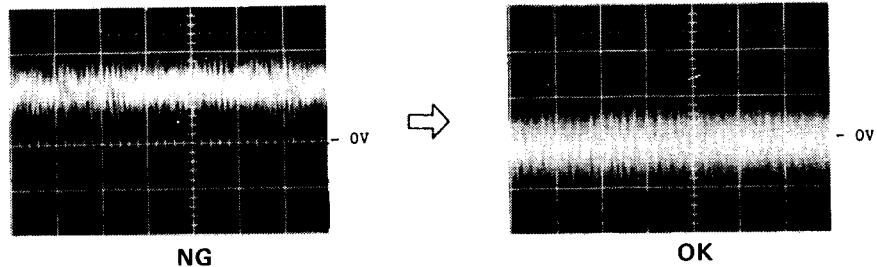

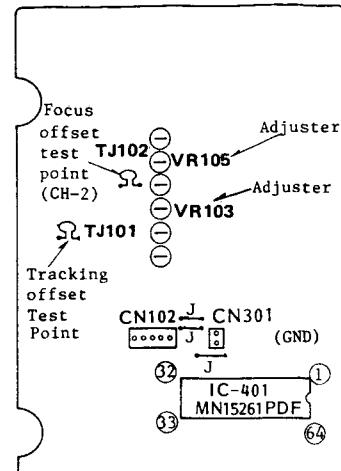

### (Focus offset)

(1) Connect CH-1 of the oscilloscope of the TJ102 (Focus offset test point) and GND to the chassis.

Oscilloscope setting ---

Volt	: 100mV
Sweep	: 5ms
Input selector	: DC

(2) Turn on the power supply switch of the player.  
 (3) Place the test disc (SZZP1057C . . . Black band disc) in to the disc holder by open/close key.  
 (4) After TOC reading, the set will become stop mode, then check the waveform on the oscilloscope and adjust VR105, so that the waveform at TJ102 shall be **Ground level** as shown in illustration.

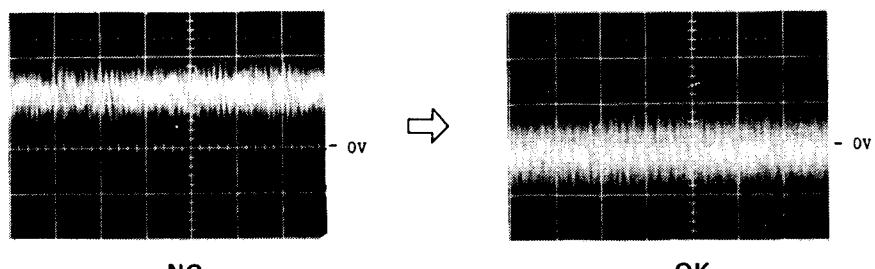

### (Tracking offset)

(1) Connect CH-1 of the oscilloscope to the TJ101 (tracking offset test point) and GND to the chassis.

(2) Turn on the power supply switch of the Player.  
 (3) Place the test disc (SZZP1057C . . . Black band disc) in to the disc holder by open/close key.  
 (4) After TOC reading the set will become stop mode, then check the waveform on the oscilloscope and adjust VR103, so that the waveform at TJ101 shall be **Ground level** as shown in illustration.

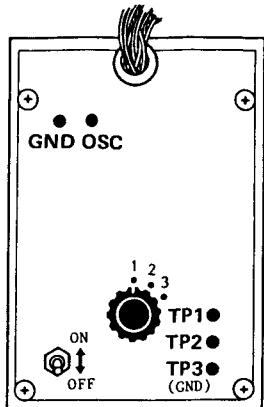

Oscilloscope setting ---

Volt	: 100mV
Sweep	: 5ms
Input selector	: DC

(5) Turn off the power supply switch of the Player.

## Initial setting mode of servo gain adjuster

Servo Gain Adjuster (SZZP1017F)

- (1) mode select switch to "2" position.
- (2) ON/OFF switch to "ON" position.

- (2) Set the low frequency oscillator to a frequency 750 Hz and an output voltage of 150m Vp-p then connect the oscillator to the terminals OSC IN and GND of the servo gain adjuster (SZZP1017F).

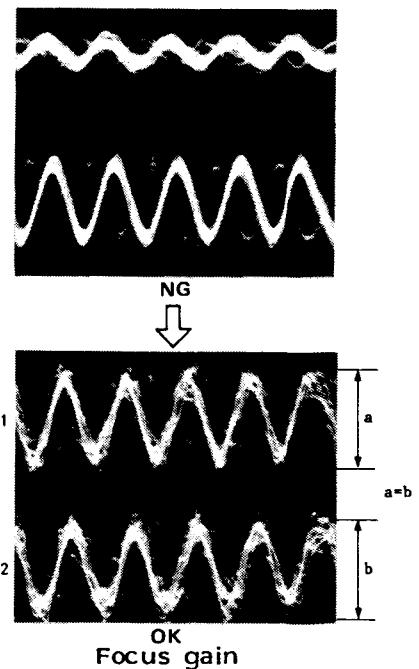

- (3) Connect CH-1 and CH-2 of the oscilloscope to TP1 and TP2 of the Servo gain adjuster (SZZP1017F). (TP3 is the grounding terminal.)

Oscilloscope setting --

Volt .....	..... 100 mV
Sweep .....	..... 1 ms
Input selector.....	DC

- (4) Turn on the power supply switch of the player.
- (5) Place the test disc (SZZP1014F) or (SZZP1054C) in to the disc holder by open/close key and in the Playback mode.
- (6) Set the rotary switch of the servo gain adjuster (SZZP1017F) to "2" → "1".
- (7) The player to the Play mode and the 750 Hz signal will be displayed on the oscilloscope, then adjust VR104 so that the waveforms and amplitudes of the both channels shall be equal as shown in illustration.
- (8) Turn off the power supply switch of the player.

(Note) Please do not remove the servo gain adjuster also shorting connector.

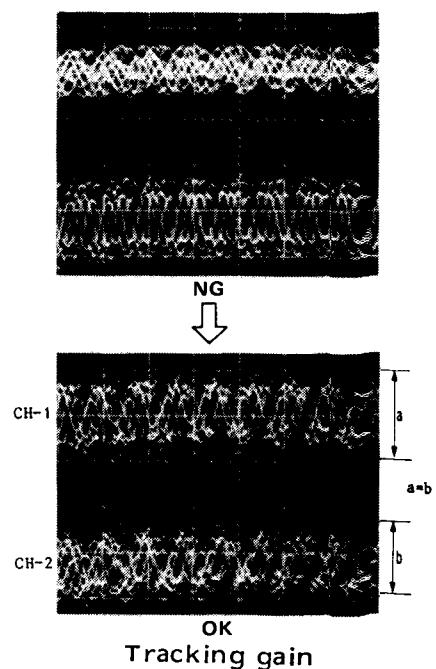

## C. Tracking Gain Adjustment

- (1) Set the low frequency oscillator to a frequency of 1.0 kHz and an output of 150 mVp-p, and connect the oscillator to the OSC IN and GND of the gain adjuster (SZZP1017F).
- (2) Connect the CH-1 and CH-2 of the oscilloscope to the TP1 and TP2 of the gain adjuster (SZZP1017F). (TP3 is a grounding terminal.)

Oscilloscope setting ---

Volt	: 100mV
Sweep	: 1.0ms
Input selector:	DC

- (3) Turn on the power supply switch of the Player.
- (4) Place the test disc (SZZP1014F) or (SZZP1054C) in the disc holder by open/close key and in the Playback mode.
- (5) Set the rotary switch of the servo gain adjuster (SZZP1017F) to "2" → "3".
- (6) The player to the play mode and the 1.0 kHz signal will be displayed on the oscilloscope, then adjust VR102 so that the waveforms and amplitudes of the both channels shall be equal as shown in illustration.
- (7) Turn off the power supply switch of the player.
- (8) After completing the above mentioned adjustment, remove the servo gain adjuster and insert the shorting connector into CN102 as it was.

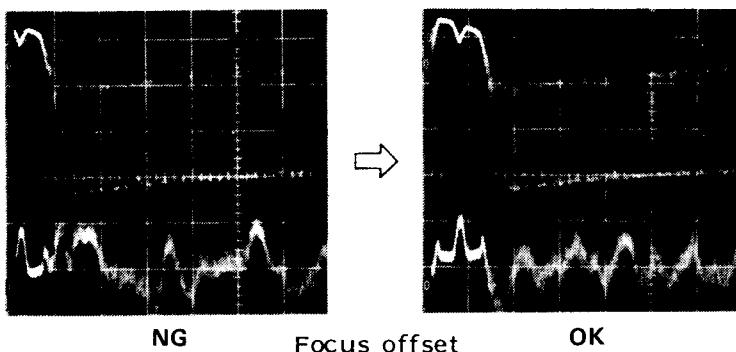

## E. Focus offset Adjustment

(1) Connect CH-1 of the oscilloscope to the TJ301 (RF test point) and CH-2 to the terminal TJ102. (Focus offset test point) on the main PCB. TJ302 of RF test point (GND) on the main PCB as shown in illustration.

	TJ301(CH-1)	TJ102(CH-2)
Volt	: 500mV	100mV
Sweep	: 0.5msec	
Input Selector	: AC	DC
Mode	: NORM(Triggering Via CH-1).	

- (2) Turn on the power supply switch of the player.
- (3) Place the test disc (SZP1057C . . . Black band disc) in to the disc holder by open/close key.
- (4) The player to the play mode.
- (5) Play TR9 of the test disc.
- (6) Check the waveforms of CH-1 and CH-2 on the oscilloscope and adjust VR105 so that the waveform around the triggering point as shown in illustration.

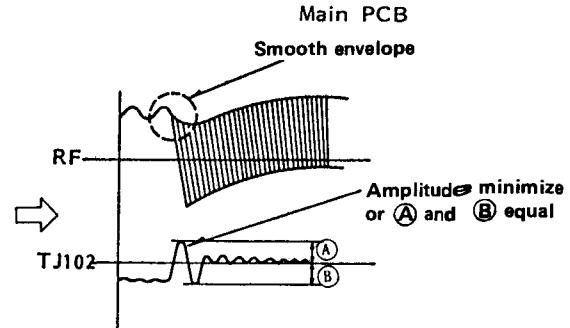

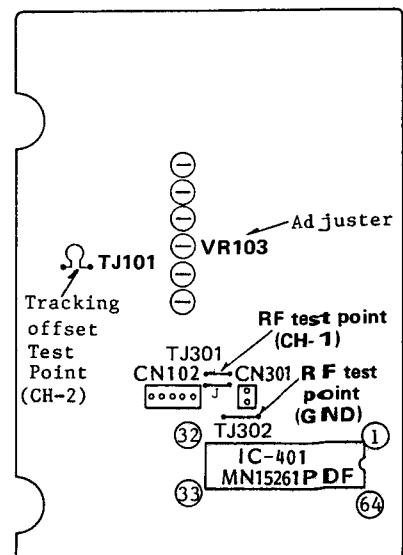

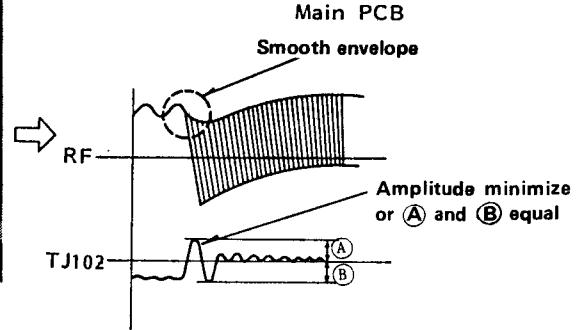

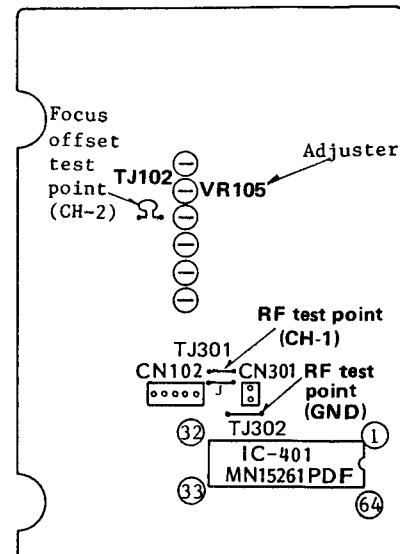

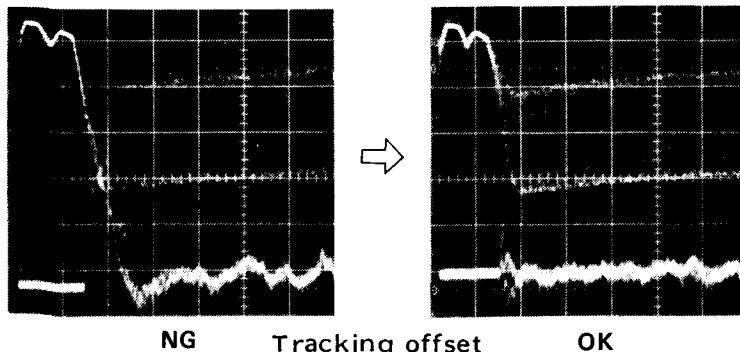

(7) Turn off the power supply switch of the player.

## F. Tracking offset Adjustment

(1) Connect CH-1 of the oscilloscope to the TJ301 (RF test point) and CH-2 to the terminal **TJ101**. (Tracking offset test point) on the main PCB. Connect GND of the oscilloscope to the RF test point (TJ302) on the main PCB as shown in illustration.

	TJ301 (CH-1)		TJ101(CH-2)	
<b>Oscilloscope setting</b>	Volt	:	500mV	100mV
	Sweep	:	0.5msec	
	Input Selector:		AC	DC
	Mode	:	NORM(Triggering Via CH-1)	

(2) Turn on the power supply switch of the player.  
(3) Place the test disc (SZZP1057C . . . Black band disc)  
(4) The player to the play mode.  
(5) Play TR9 of the test disc.  
(6) Check CH-1 and CH-2 waveforms displayed on the oscilloscope and adjust VR103 so that the waveforms as shown in illustration.

(7) Turn off the power supply switch of the player.

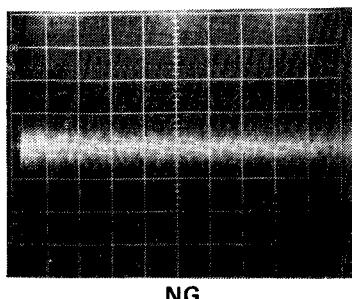

## G. Tracking error Compensation Adjustment

(1) Connect CH-1 of the oscilloscope to the tracking error compensation test point (Jumper) and GND to chassis as shown in illustration.

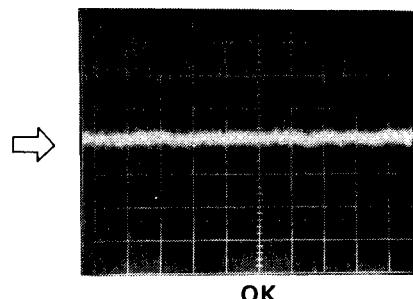

Oscilloscope setting

Volt	: 50mv
Sweep	: 1ms
Input selector	: DC

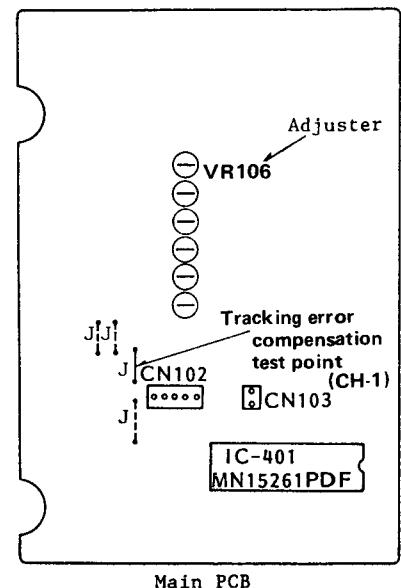

(2) Turn on the power supply switch of the player.  
 (3) Place the test disc (SZZP1014F or SZZP1054C) in to the disc holder by open/close key.  
 (4) The player to the play mode.  
 (5) Play TR1 of the test disc.  
 (6) Check the waveform on the oscilloscope and adjust VR106, so that the waveform of DC level less than  $0\pm5\text{mV}$  as shown in illustration.

NG

OK

Main PCB

(7) Turn off the power supply switch of the player.

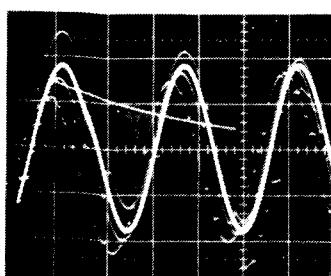

## H. PLL Adjustment

(1) Connect CH-1 of the oscilloscope to the line out terminal (either of L-CH or R-CH) of the main PCB and the terminal GND of the chassis.

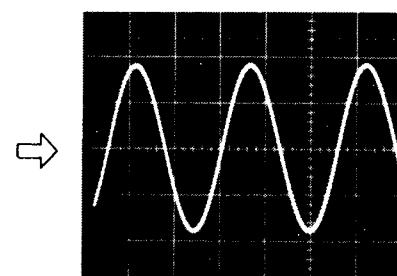

Oscilloscope setting

Volt	: 1.0V
Sweep	: 1msec.
Input selector	: DC

(2) Turn on the power supply switch of the player.  
 (3) Place the test disc (SZZP1054C) in to the disc holder by open/close key.  
 (4) The player to the play mode.  
 (5) Play of the test disc Track 7 (WG 0.8mm).  
 (6) Check the waveform displayed on the oscilloscope and adjust VR301 in the following steps.  
 (a) Turn VR301 upwards slowly and learn the point at which the waveform on the oscilloscope begins to be disturbed as shown in waveform NG.  
 (b) Turn VR301 downwards slowly (opposite direction to that in the above para. "a") and learn the point at which the waveform on the oscilloscope begins to be disturbed.  
 (c) Set VR301 in the middle between the points learned in the above steps "a" and "b".

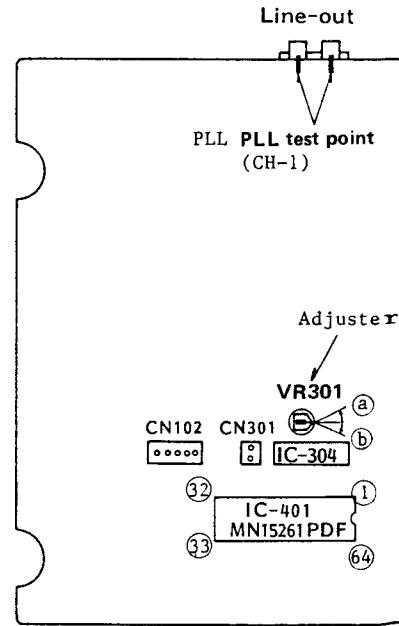

NG

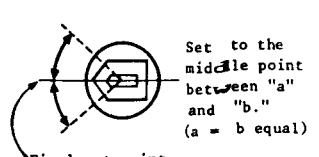

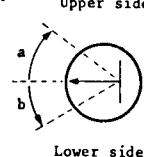

PLL

OK

Main PCB

Example: Upper side

(7) Turn off the power switch of the player.

## I. Check of Play Operation after Adjustment

- (1) Check of skip search
  - 1) Play an ordinary disc.
  - 2) Press the skip button and check to see that skip search is given (Forward and reverse)
- (2) Check of manual search
  - 1) Play an ordinary disc.
  - 2) Press the manual search button and check to see that smooth manual search can be done at low and high speeds (Forward and reverse)
- (3) Check to make sure the best adjusted condition for defects.
  - 1) Play the Technics test disc "SZZP1054C".
  - 2) Play the track 12 (Wedge 0.6 mm), track 13 (Wedge 0.7mm), and see that there is no sound skip or noise.
  - 3) Play the tracks (Black spot 0.6mm), track 6 (Black spot 0.7mm) and see that there is no sound skip or noise.

Technics Test Disc "SZZP1054C"	
Track number 12	0.6mm Wedge
Track number 13	0.7mm Wedge
Track number 5	0.6mm Black spot
Track number 6	0.7mm Black spot

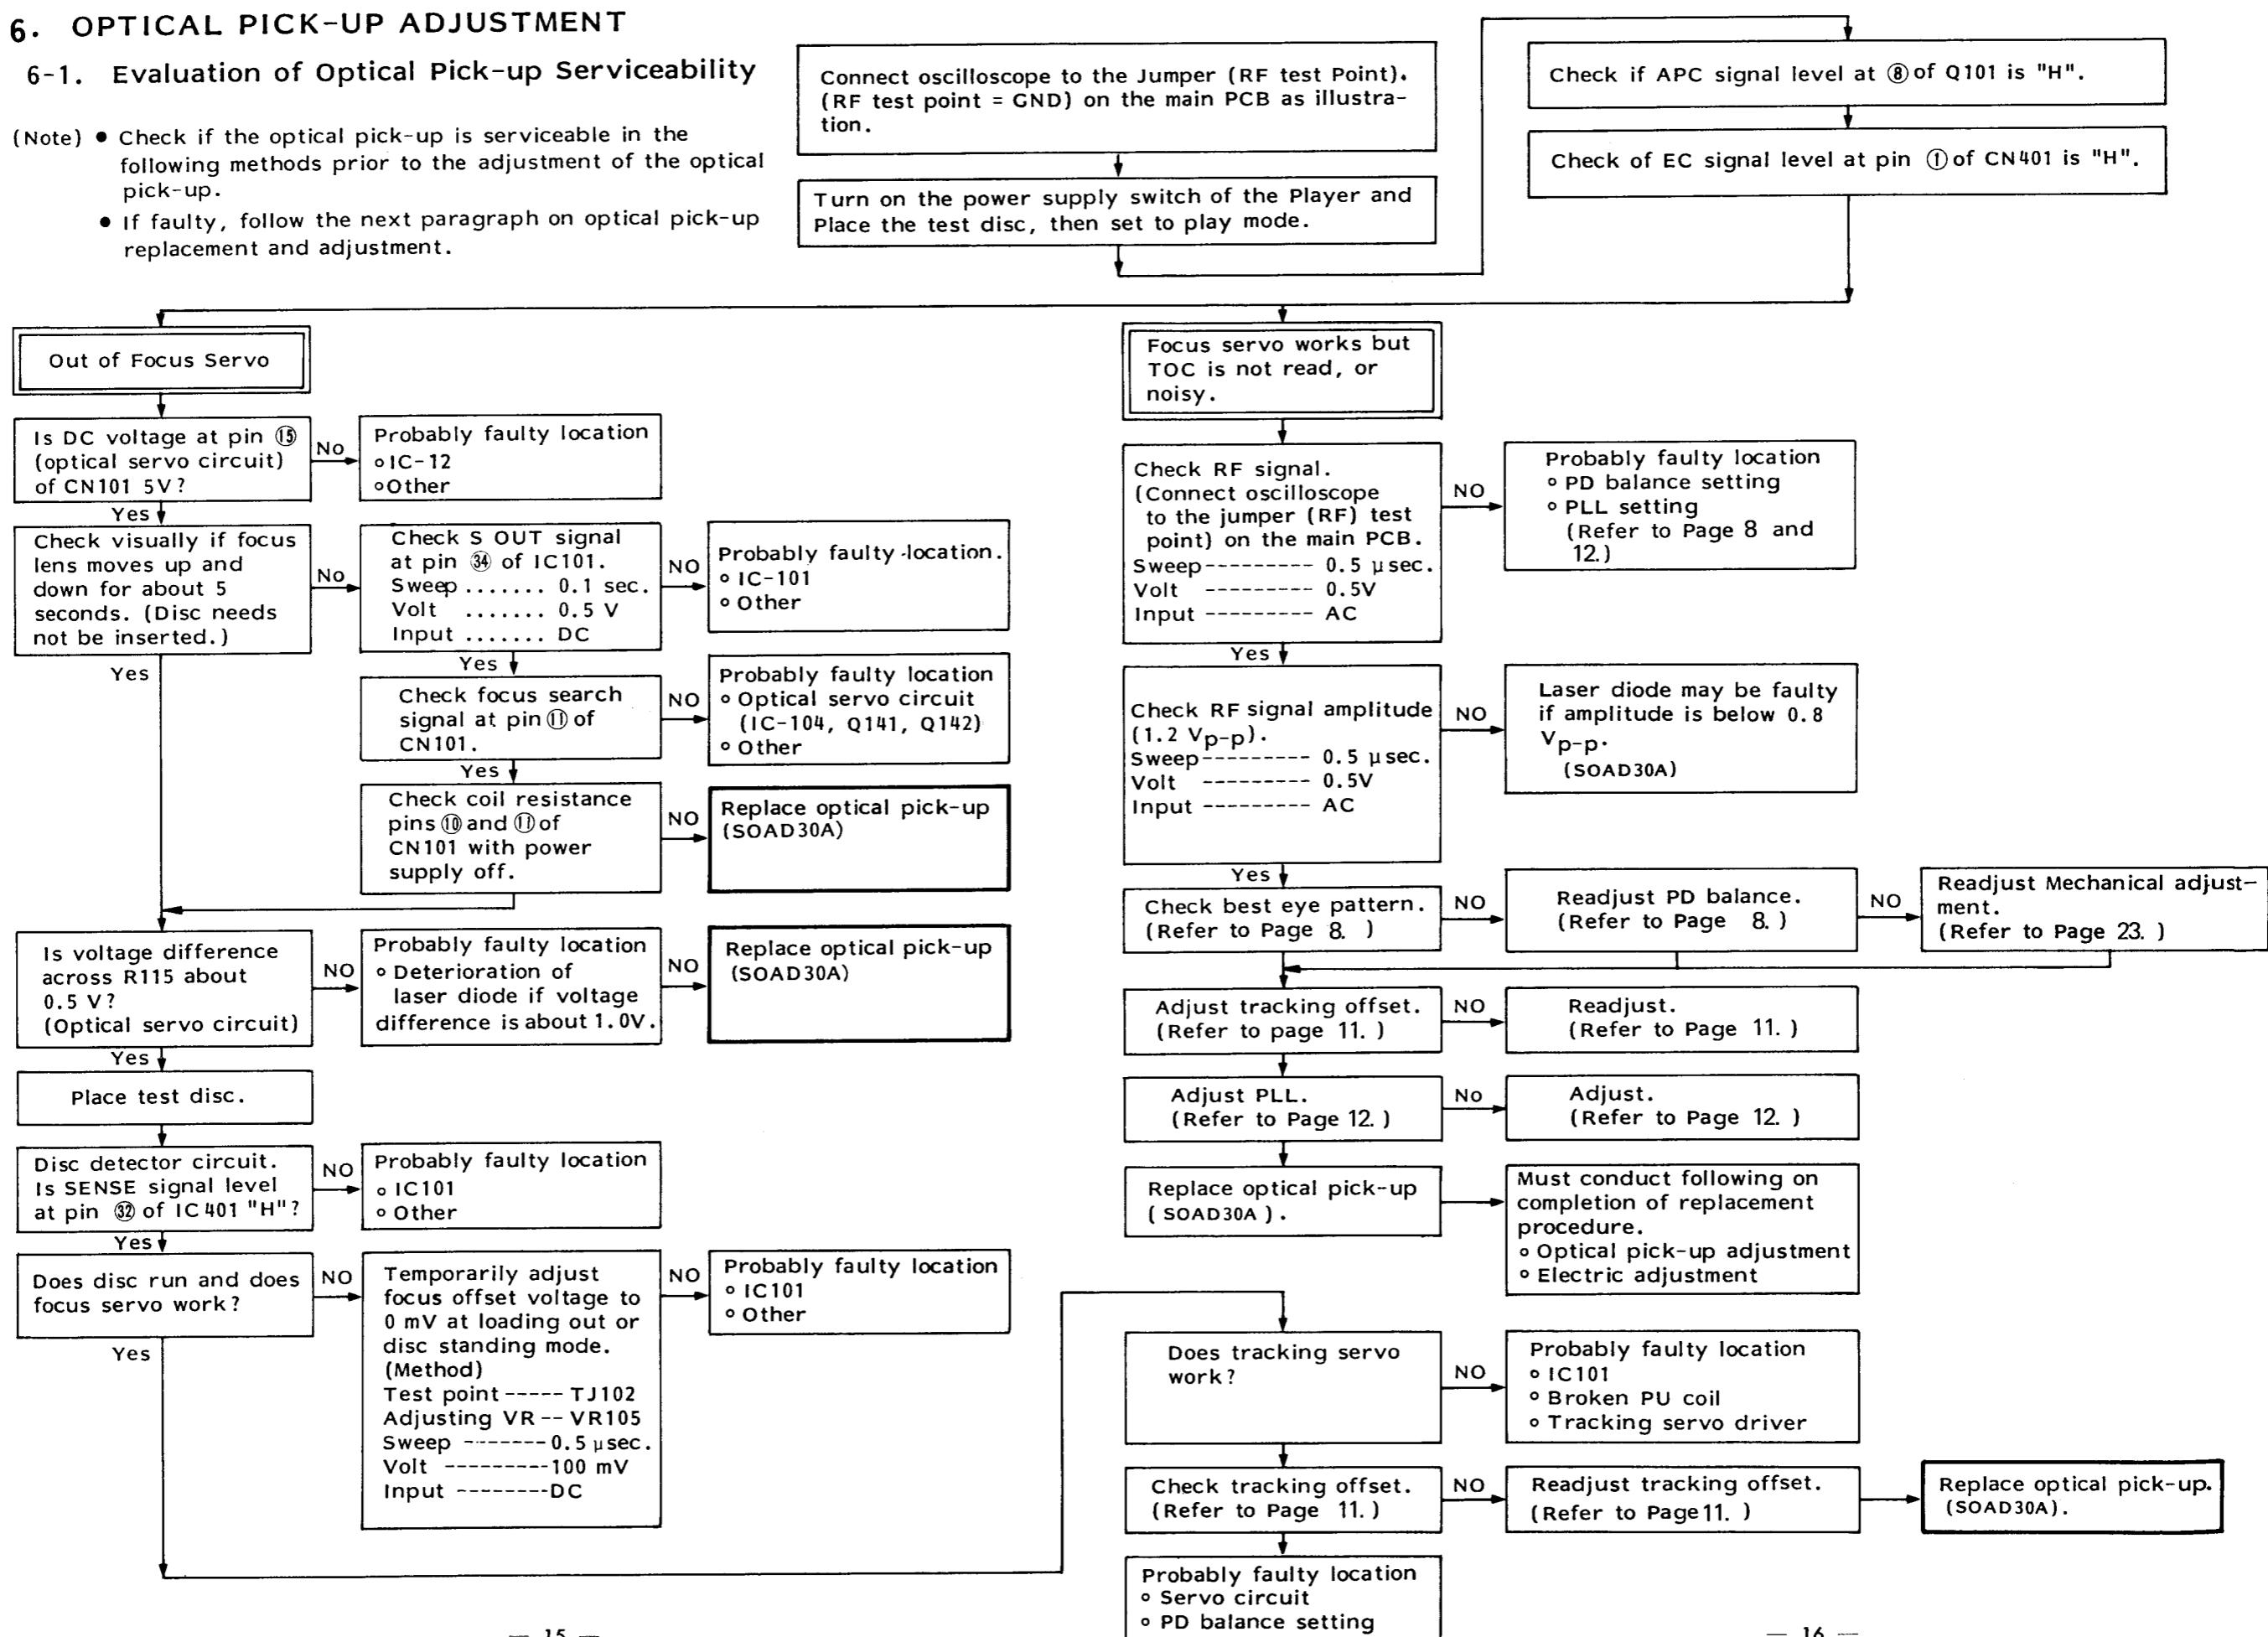

**— MEMO —**

## 6. OPTICAL PICK-UP ADJUSTMENT

## 6-1. Evaluation of Optical Pick-up Serviceability

(Note) • Check if the optical pick-up is serviceable in the following methods prior to the adjustment of the optical pick-up.

• If faulty, follow the next paragraph on optical pick-up replacement and adjustment.

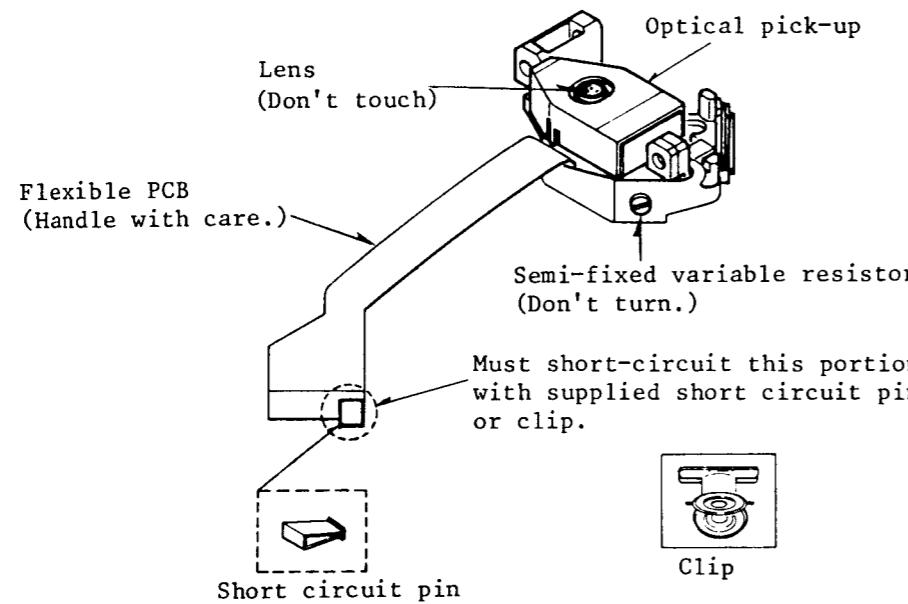

## 6-2. HOW TO HANDLING OPTICAL PICK-UP

The laser diode in the optical pick-up may be damaged by potential difference caused by static charge on clothing or body. Pay careful attention to damage by static charge when repaired.

### • Handling of Optical Pick-up

1. Don't give a heavy shock to the optical pick-up which is very precisely constructed.
2. A charge prevention pin is inserted in the flexible PCB for preventing damage to the laser diode. The pin should be removed or installed in a short time.
3. Handle the flexible PCB with care because PCB may be cut if an excessive stress is applied.
4. Don't meddle with the laser power adjusting VR which is adjusted prior to shipping.

### • Grounding for Preventing Static Charge Damage

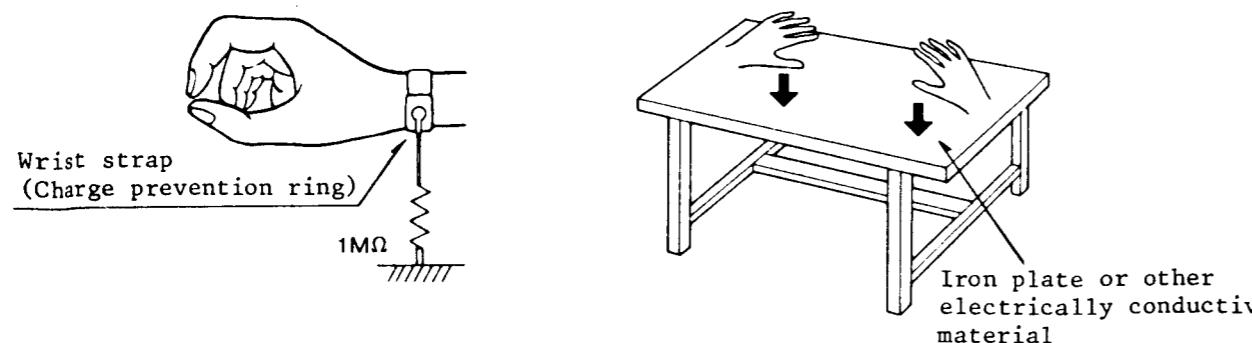

#### 1. Body Grounding

Put on the charge preventing wrist strap for discharging electricity from the body.

#### 2. Working Table Grounding

Lay electrically conductive material (conductive sheet) or an iron plate on the table where the optical pick-up is placed, and ground the material or sheet to the floor.

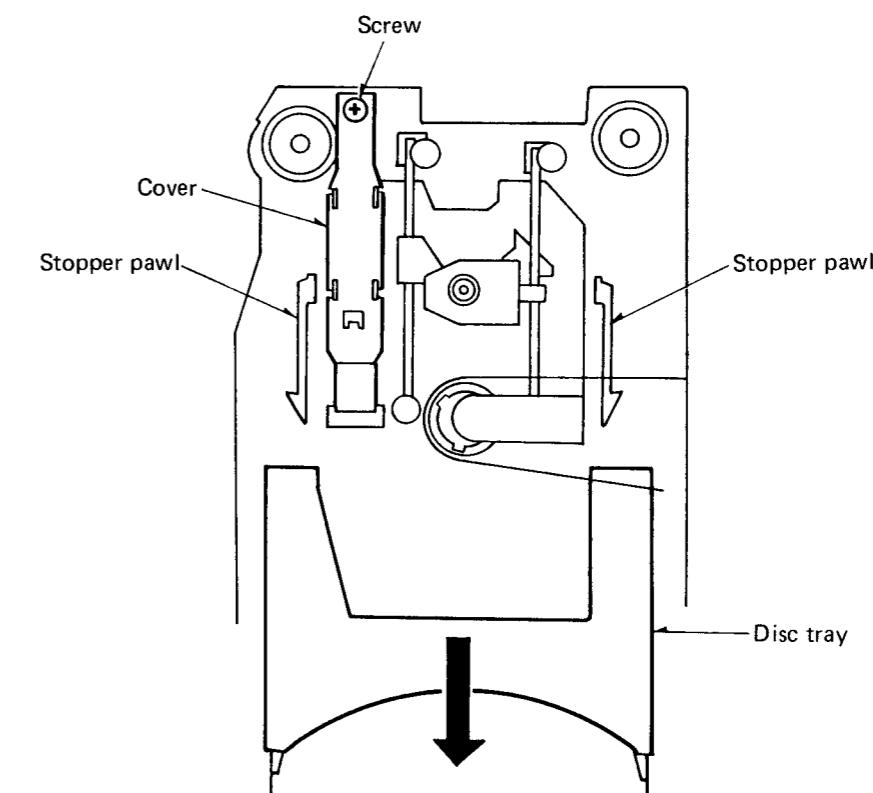

Note: Static charge of clothing is not discharged from the wrist strap. Exercise care so that clothing shall not touch the wrist strap.

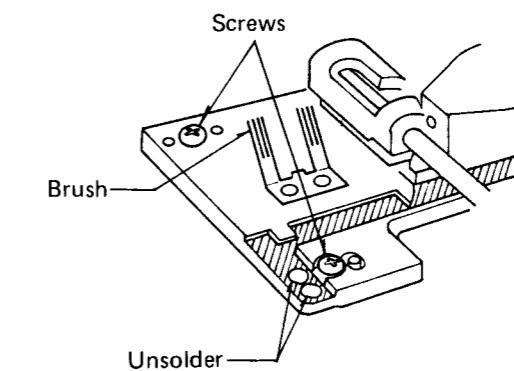

## 7. OPTICAL PICK-UP REPLACEMENT PROCEDURE

Note: Exercise care so that disassembled parts shall not be lost.  
Set up the player so that it can be power on checked as shown in illustration according to the disassembly procedure outlined in the service manual.

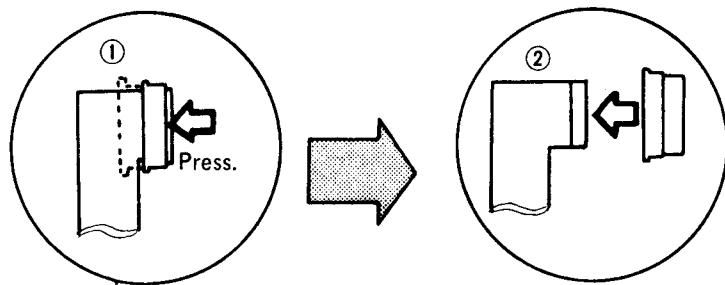

- (1) Remove the front panel.
- (2) Pushing the two stopper pawls of the disc holder inward simultaneously, pull the holder to remove it.  
Note: The stopper pawls are nothing to reassembling.
- (3) Remove the resisting plate for the position detector.

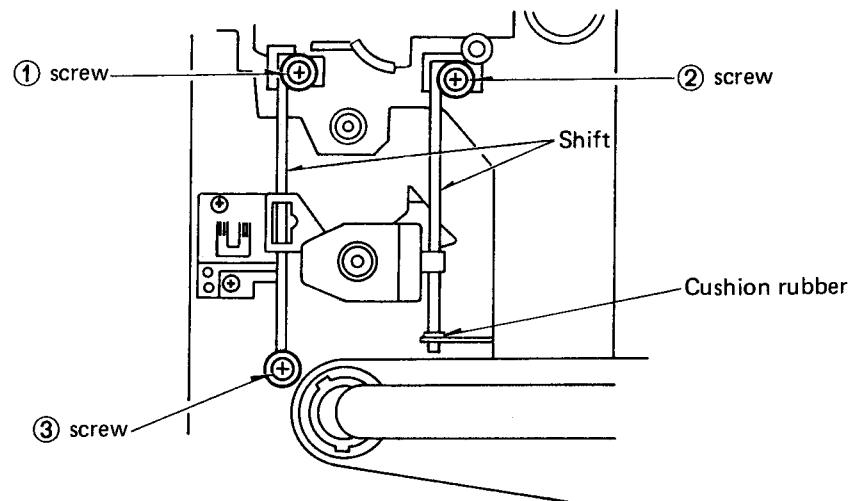

- (4) Remove the linear motor drive coil and optical pick-up to separate them.
- (5) Remove the two linear motor drive coil fastening screws.  
Note: Pay due attention to the contact brush.

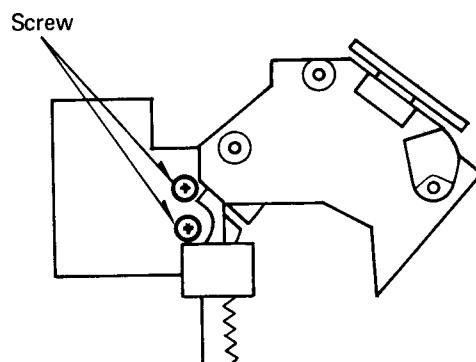

(7) Disconnect the optical pick-up 17-pin flexible cord from connector CN101 on the main PCB.  
Note: 1. Pull out the connector at the point indicated by the arrow side.  
2. Pull out the flexible cord.

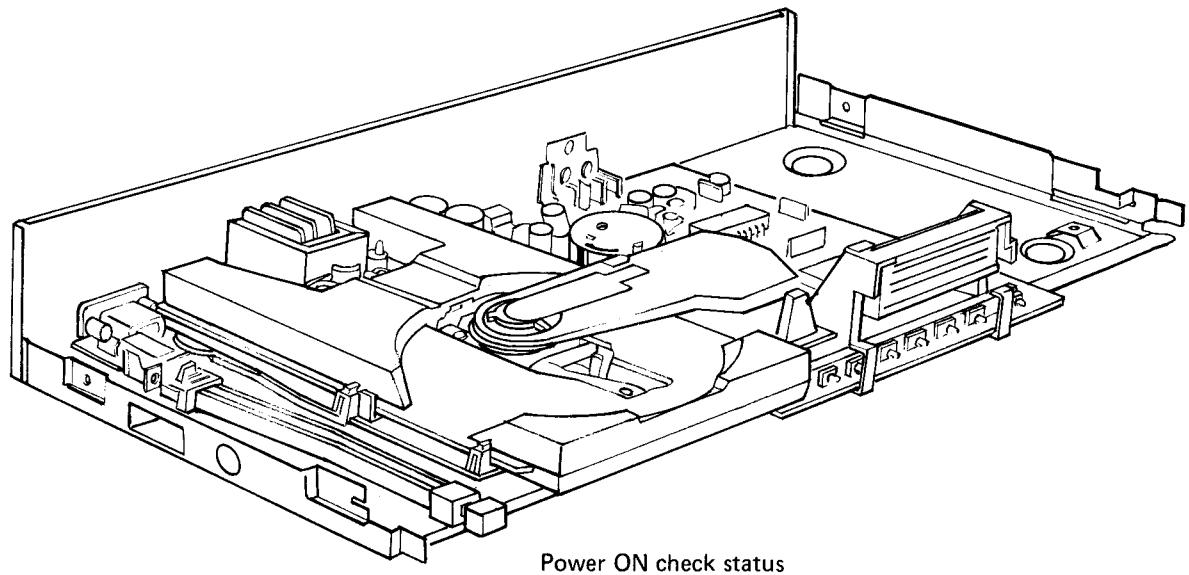

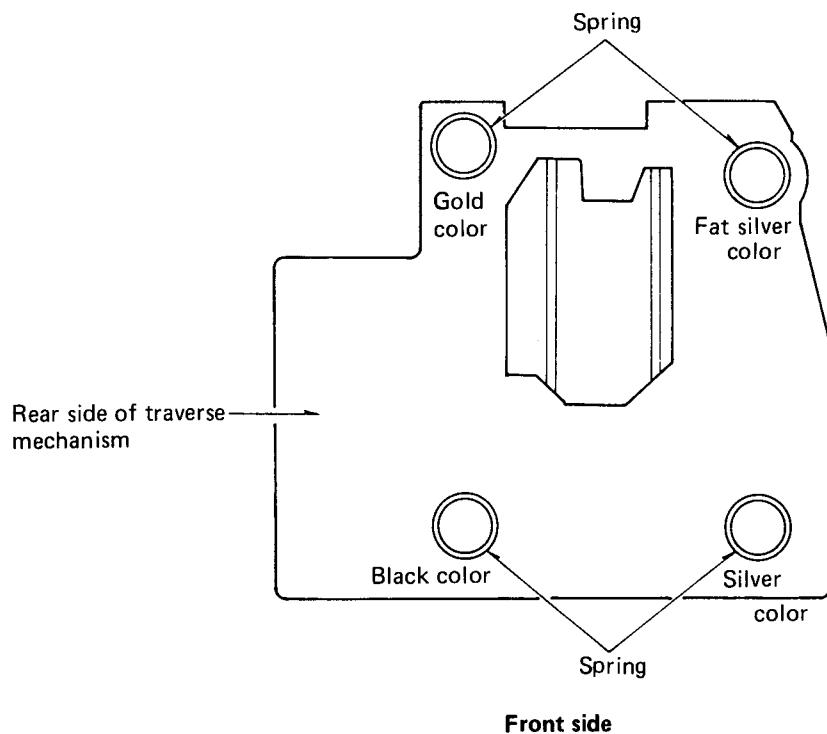

(8) Remove the three optical pick-up fastening screws.  
(9) Remove the optical pick-up fastening shaft.  
Note: Be careful not to lose or misplace the cushion rubber.  
(10) The optical pick-up has been completely separated with this.  
It is not necessary to remove the traverse unit as before. If the unit needs to be removed, pay attention to the four springs during removing.

(11) Remove the linear motor coil fastening bracket.

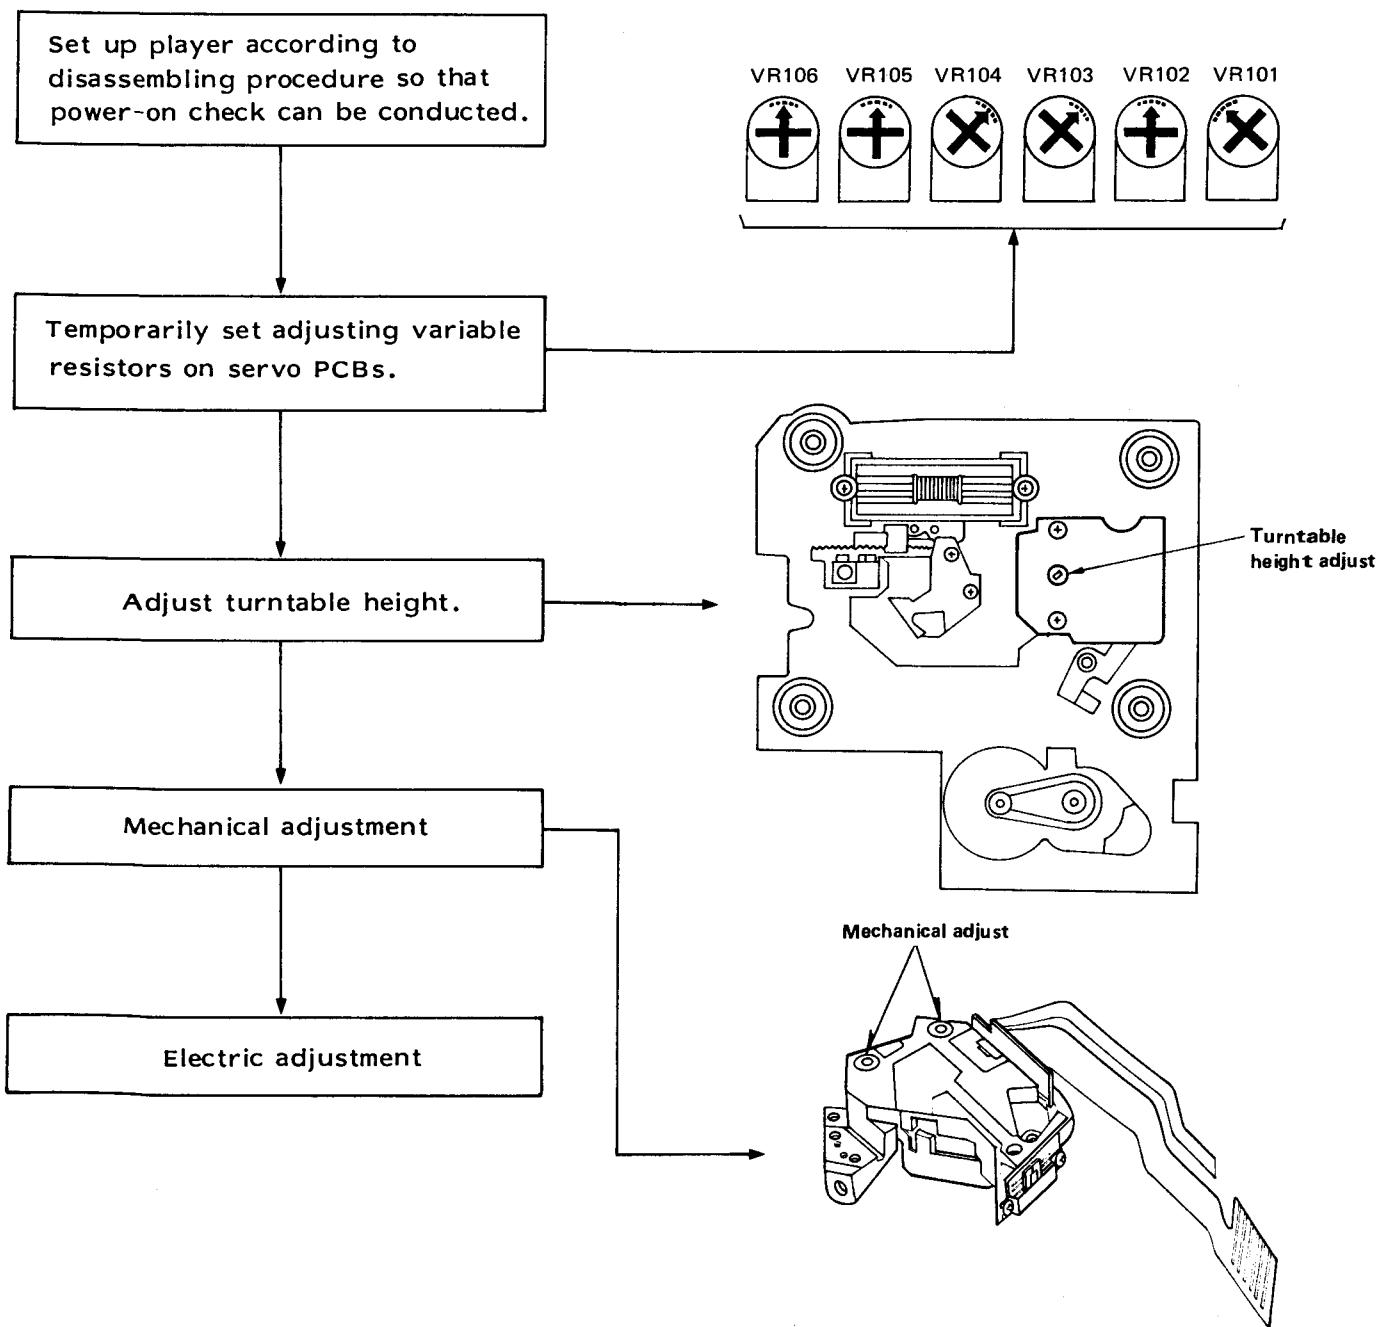

(12) Install the optical pick-up in the reverse order of disassembling so that Power On check can be conducted as shown in illustration.

## 8. ADJUSTING PROCEDURE OF OPTICAL PICK-UP

### 8-1. Adjusting steps and Points of optical pick-up

### 8-2. Required Measuring Instruments and Tools

1. Two-channel oscilloscope (with external trigger), over 30 MHz.
2. Test desc (SZZP1014F) or (SZZP1054C)
3. Allen wrench ----- 1.5 mm (SZZP1044C)
4. General tools

## 9. MECHANICAL ADJUSTMENT PROCEDURE

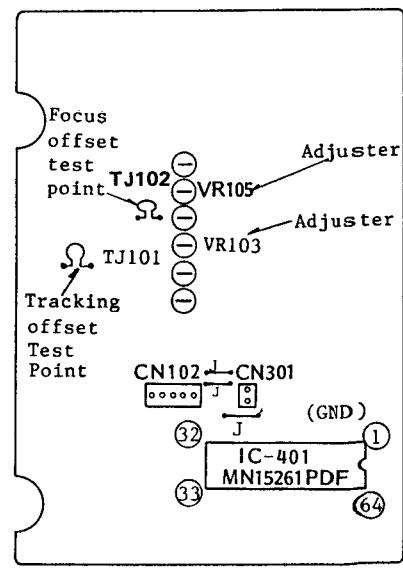

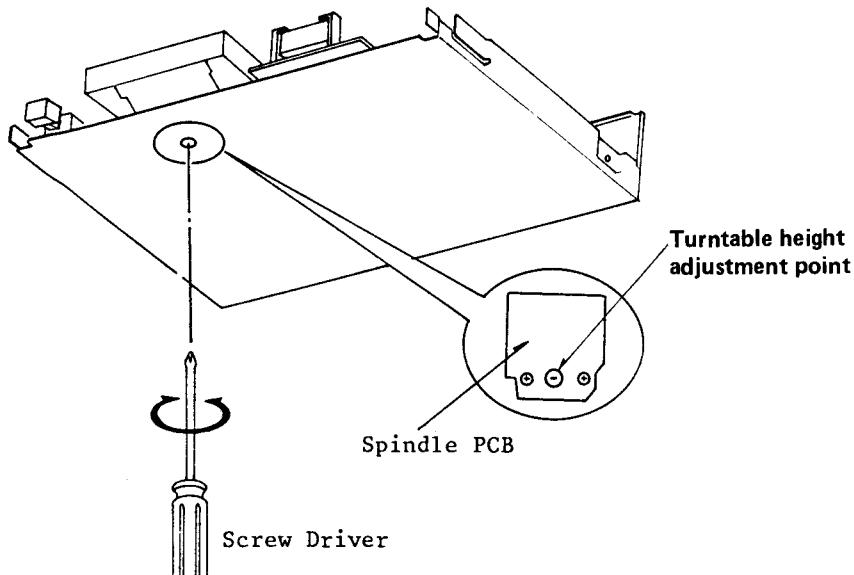

### A. Turntable Height Adjustment

- (1) Turn on the power supply switch of the player.
- (2) Place the test disc (SZZP1014F) or (SZZP1054C) to the disc holder
- (3) Turn off the power supply switch of the player.
- (4) Set the oscilloscope to **DC zero balance**.
- (5) Connect the CH-1 of the oscilloscope to **TJ102** of the servo circuit and GND to the chassis.

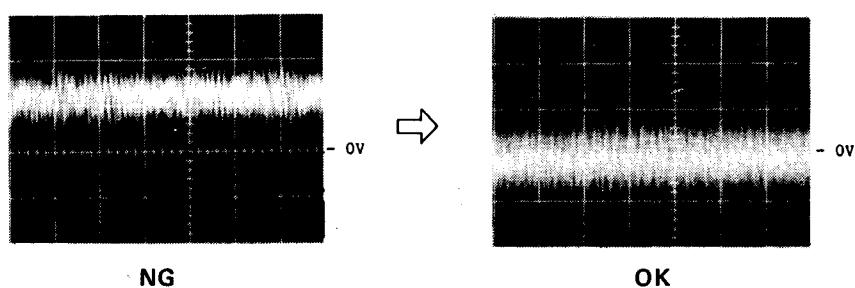

Oscilloscope settings --

Sweep	: 5m sec.
Volt	: 100mV
Input selector	: DC

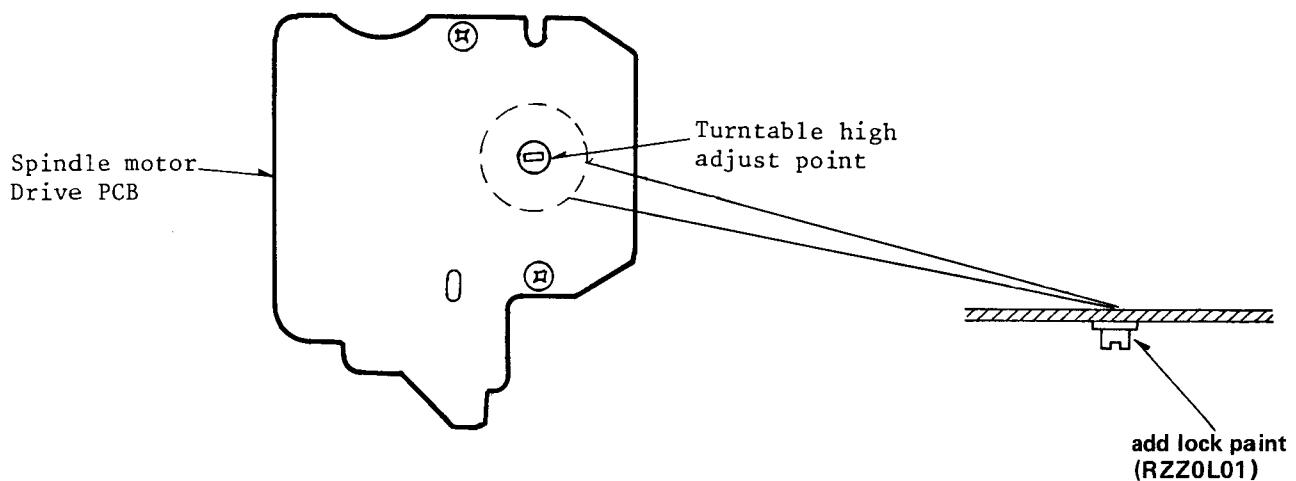

- (6) Turn on the power supply switch of the player.
- (7) Play back a desired track.
- (8) Place the unit in the corner of the workbench -- in the place that allows the adjustment -- and set it as illustrated with care not to give vibration to the unit.

- (9) Turn the adjusting screw on the underside of the spindle motor PCB by a flat screwdriver so that the waveform at **TJ102** shall be  $0 \pm 50mV$  as shown in illustration.

(10) Turn off the power supply switch of the player.  
 (11) Lock the adjusting screw with "Screw lock paint (RZZ0L01)" on completion of adjustment.

## B. Mechanical Adjustment

- (1) Turn on the power supply switch of the player.
- (2) Insert the test disc (SZZP1056C) in the disc holder.
- (3) Turn off the power supply switch of the player.
- (4) Set the oscilloscope as stated below.

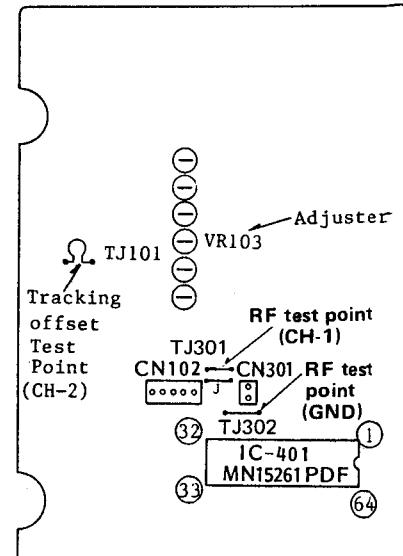

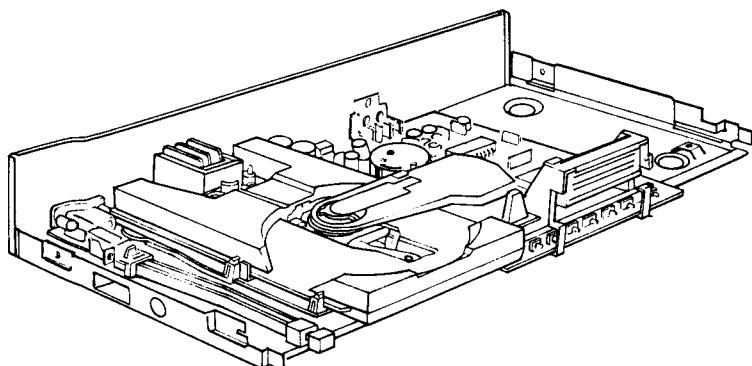

Oscilloscope settings

Sweep	:	0.5 $\mu$ sec.
Volt	:	0.5V
Input selector:		AC

- (5) Connect CH-1 of the oscilloscope to TJ301 of RF test point and GND to TJ302 of RF test point (GND).
- (6) Turn on the power supply switch of the player.
- (7) Play back TR9.

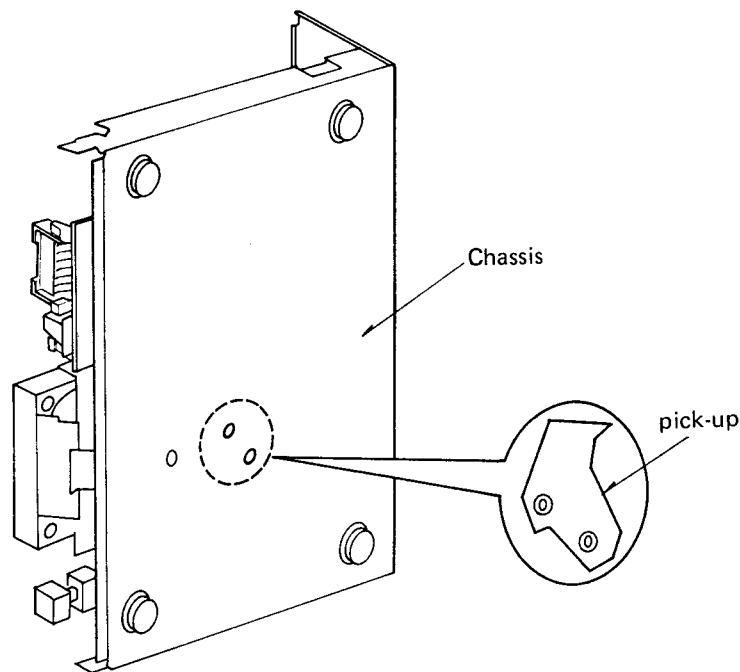

**Note:** If any track other than TR9 is played back, this adjustment cannot be achieved.  
 If the temporary adjustment takes much time, it is advisable to set the player in the repeat mode.

- (8) Set the player in the playback mode as shown in illustration with care not to give vibration to the unit.

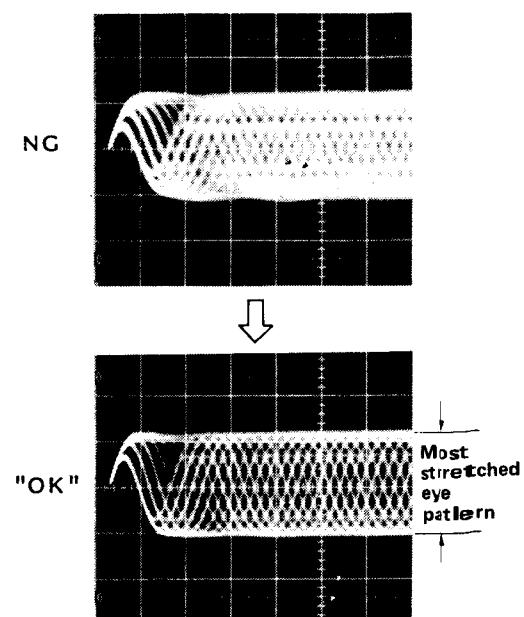

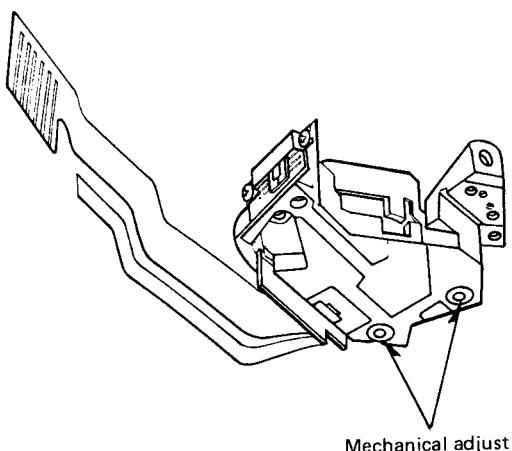

Main PCB

(9) Keeping the player in the playback mode, place it as illustrated (stand it on its left side).  
**Note :** If the player is stood on its right side, the adjustment cannot be accomplished perfectly.

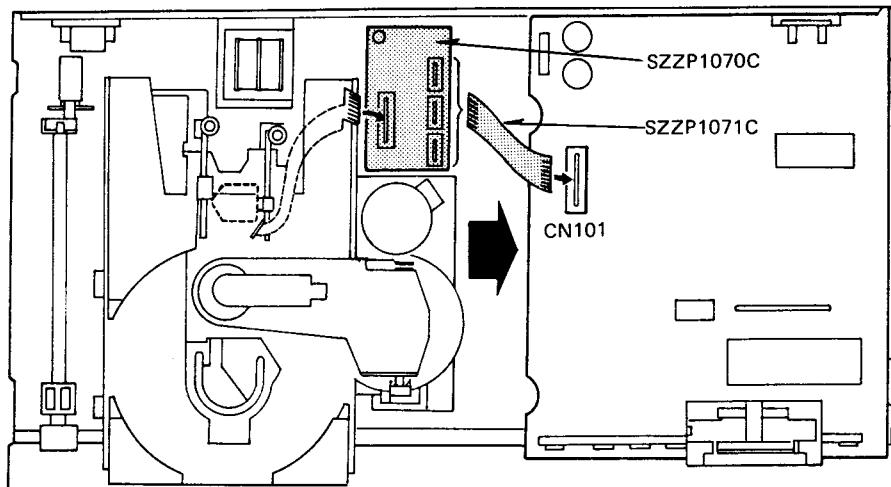

(10) Check if the RF signal waveform is as shown in illustration (NG). If the waveform can not be checked or is unlike the given waveform, proceed to the following steps.  
(11) Set the allen wrench (SZZP1044C...1.5mm) into the socket in the heads of the mechanical adjusting screws shown in illustration and turn the both screws right or left to optimum positions.

(12) Turn off the power supply switch of the player.  
(13) Lock the adjusting both screw with screw lock paint (RZZ0L01) on completion of adjustment.

## 10. CHECKING PROCEDURE FOR THE WHOLE ELECTRICAL CIRCUIT (IN TROUBLESHOOTING)

The FPC cord from the optical pick-up is too short to check the back of the main PCB with case. So use the servicing fixture (SZZP1070C) and (SZZP1071C) and follow the procedure shown below. This fixture is not a must in the electrical and mechanical adjustments.

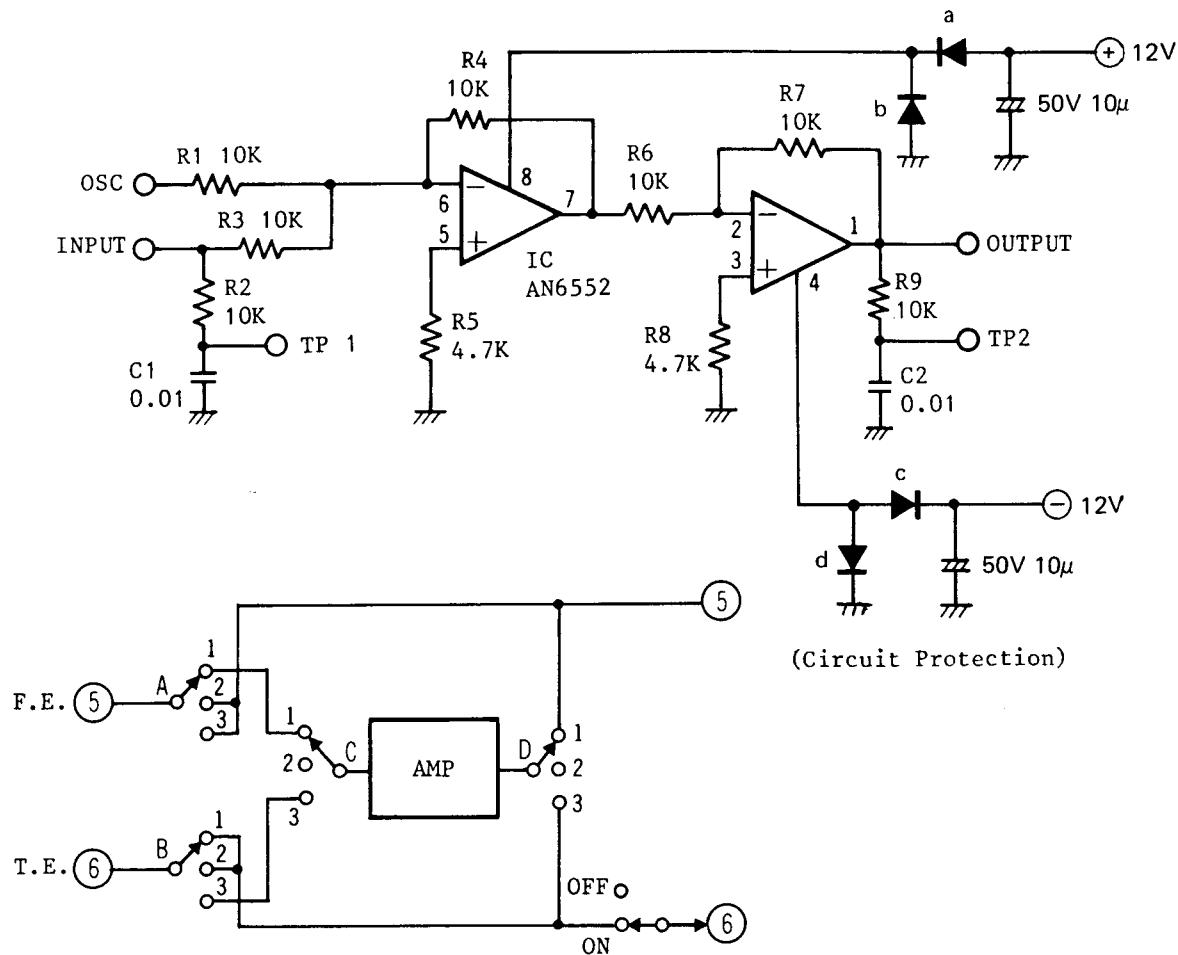

- (1) Disconnect the FPC cord from CN101.
- (2) Attach a clip to the top end of the FPC cord. (This is for protecting the optical pick-up against the breakdown due to static electricity. The clip is not a must, however, when a destaticizing mat or the like is already in use in servicing.)
- (3) Remove the four main PCB fastening screws.
- (4) Shift the main PCB to the right side.
- (5) Attach the servicing fixture (SZZP1070C) as illustrated.
- (6) Connect the FPC cord from the optical pick-up to the connector of the fixture. (The other connectors are for the SL-P1200. Use care not to mistake any of these for the above connector.)
- (7) Connect further the junction FPC cord (SZZP1071C) to the output connector from the fixture, then connect the cord to CN101 on the main PCB.

Each part on the back of the main PCB can easily be checked now.

**Please use this manual together with the service manual for Model No. SL-P210. Order No. HAD8607631C0.**

**Notes:**

- ★ The muting circuit relay was changed partway through production from a 6V drive relay to a 12V drive relay.
- ★ This unit is manufactured to use either relay.
- ★ When exchanging the relay during servicing, take particular care to follow the instructions below describing how to distinguish between the two relays.
- ★ This supplement should be filed with the service manual for Model No. SL-P210. (Order No. HAD8607631C0.)

## ■ HOW TO DISTINGUISH BETWEEN THE 6V DRIVE RELAY AND 12V DRIVE RELAY

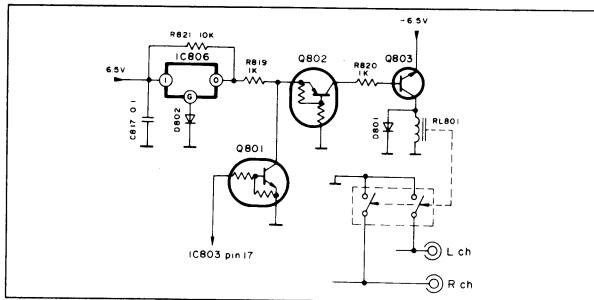

(Upper view of unit after removal of top case)

Units with a red mark near the lower side of the relay were manufactured using a 12V drive relay (Part No. SSYD3).

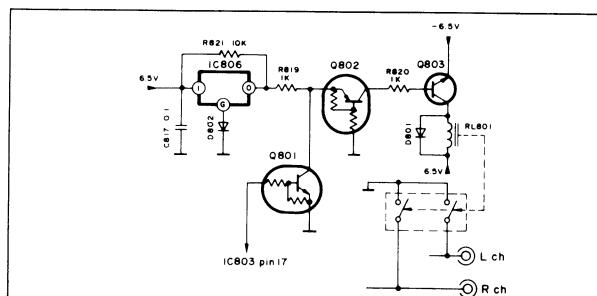

**Note:** The 6V drive relay and 12V drive relay look exactly the same. They cannot be distinguished by appearance or shape.

## ■ SCHEMATIC DIAGRAM

# ■ PRINTED CIRCUIT BOARD AND SERVICE

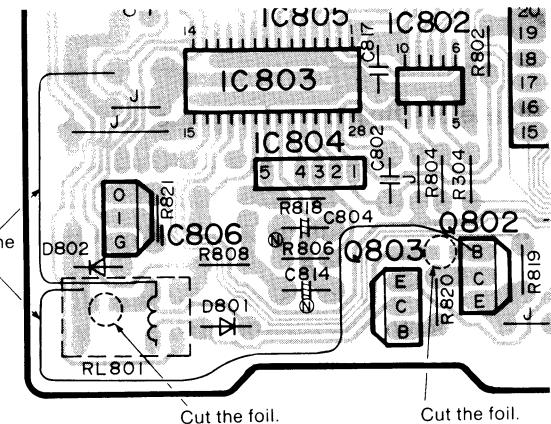

## When a 6V drive relay (Part No. SSYD2) is used

### • Printed circuit board

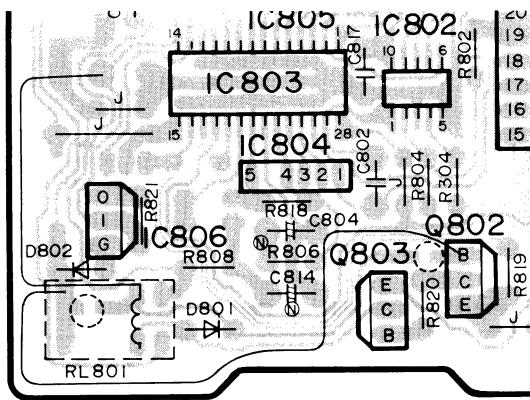

### • Service

1. To replace with a 6V drive relay (Part No. SSYD2).
  - Detach the relay. Replace with another of the same type.
2. To replace with a 12V drive relay (Part No. SSYD3).
  - Cut the foil on the P.C.B. as shown in the figure below.
  - Connect the 2 lead wires as shown below.

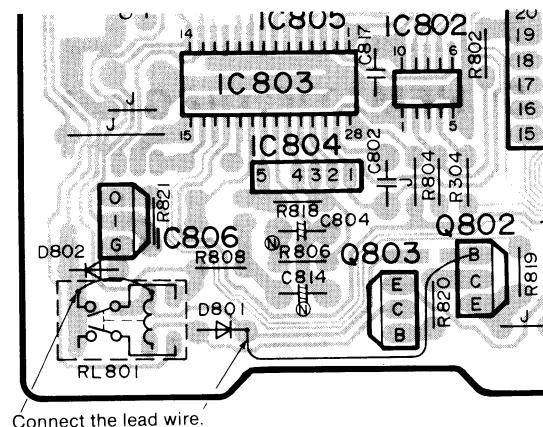

## When a 12V drive relay (Part No. SSYD3) is used

### • Printed circuit board

### • Service

1. To replace with a 12V drive relay (Part No. SSYD3).
  - Detach the relay, and replace with another of the same type.
2. To replace with a 6V drive relay (Part No. SSYD2).
  - Detach the 2 lead wires.
  - Attach the 2 lead wires at the place shown in the figure below.

### ■ REPLACEMENT PARTS LIST

Ref. No.	Change of Part No.		Part Name & Description	Per Set (Pcs.)	Remarks
	OLD	→ NEW			
<b>INTEGRATED CIRCUITS</b>					
IC806	-----	MN1280-S	IC, Reset Signal Generator	1	Addition
IC1001	MN1280-S	-----	IC, Reset Signal Generator	0	Deletion
<b>TRANSISTORS</b>					
Q801	-----	UN4212	Transistor, Switching	1	Addition
Q802	-----	UN4113	Transistor, Switching	1	Addition
Q803	-----	2SC3311-Q	Transistor, Relay Drive	1	Addition
Q1001	UN4212	-----	Transistor, Switching	0	Deletion
Q1002	UN4112	-----	Transistor, Relay Drive	0	Deletion
<b>DIODES</b>					
D801	-----	MA165	Diode	1	Addtion
D1001~1004	MA165	-----	Diode	0	Deletion
<b>RELAYS</b>					
RL801	SSYD2	-----	Relay, Muting	1	Addtion
RL1001	-----	SFDYG5A237P	Relay, Muting	0	Deletion
<b>RESISTORS</b>					
R819	ERDS2TJ102	-----	Carbon, 1/4W, 1kΩ, ±5%	1	Addtion
R820	ERDS2TJ102	-----	Carbon, 1/4W, 1kΩ, ±5%	1	Addtion
R821	ERDS2TJ103	-----	Carbon, 1/4W, 10kΩ, ±5%	1	Addtion
R1001	-----	ERDS2TJ103	Carbon, 1/4W, 10kΩ, ±5%	0	Deletion
<b>CAPACITOR</b>					
C817	ECFD1H104ZF	-----	Semiconductor, 50V, 0.1μF, ±80% <sub>20</sub>	1	Addtion

Matsushita Services Company  
50 Meadowland Parkway,  
Secaucus, New Jersey 07094

Panasonic Sales Company,  
Division of Matsushita Electric  
of Puerto Rico, Inc.  
Ave. 65 De Infanteria, KM 9.7  
Victoria Industrial Park  
Carolina, Puerto Rico 00630

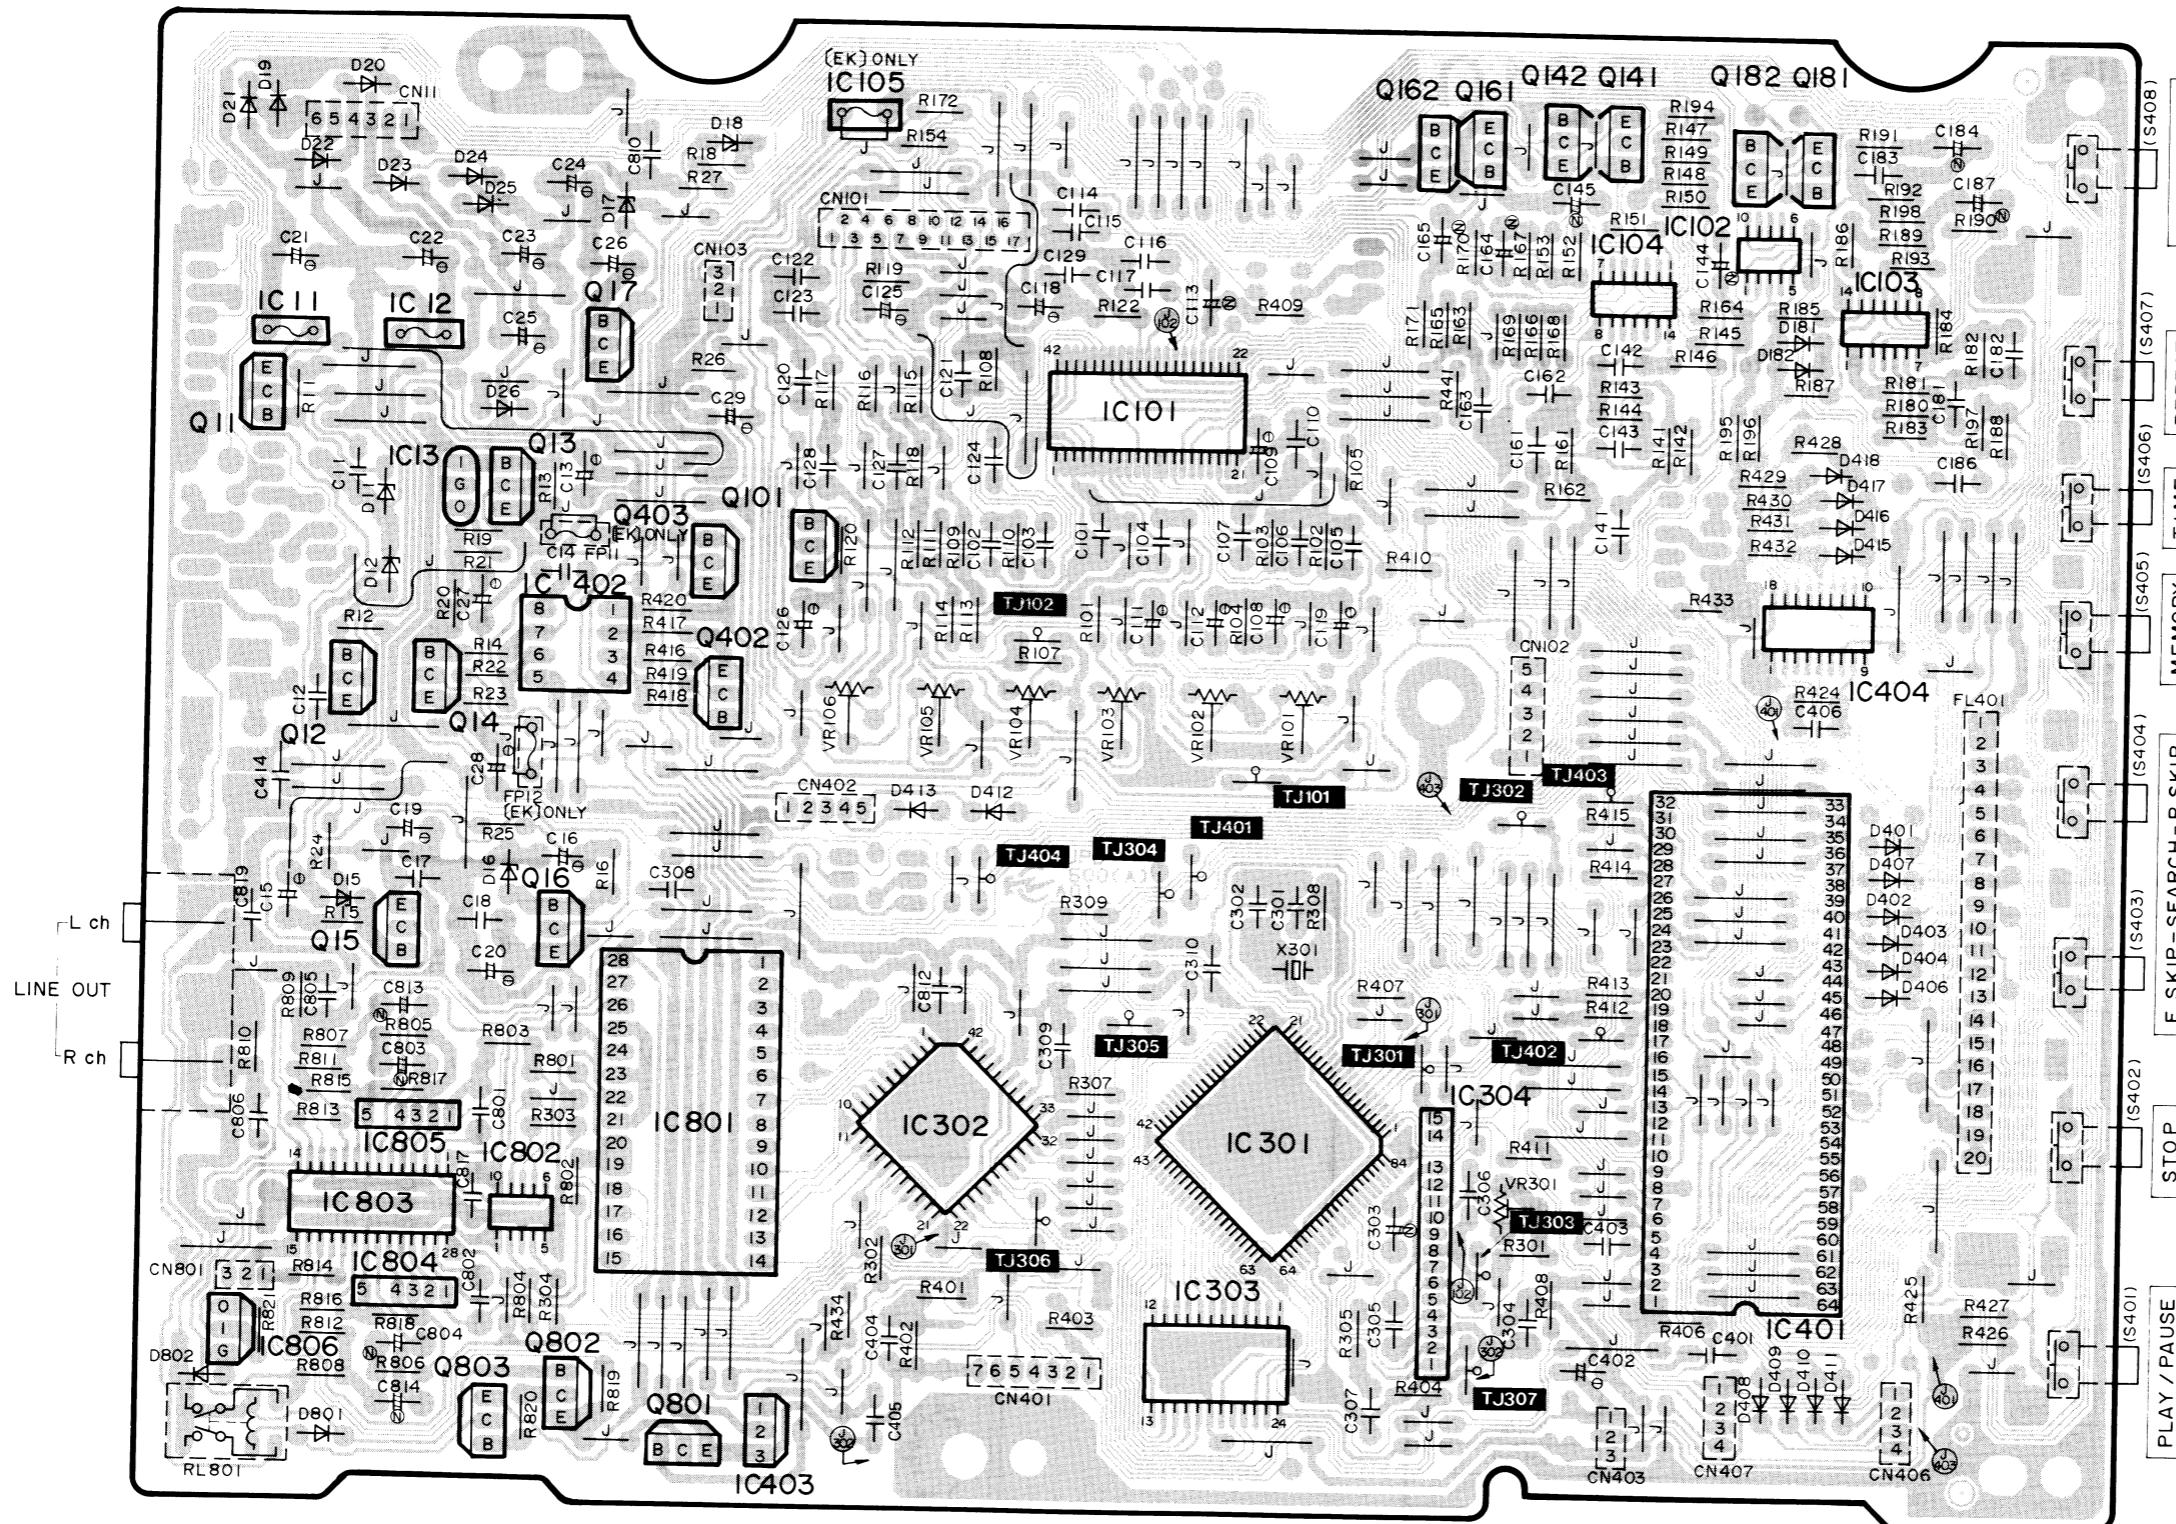

Panasonic Hawaii Inc.  
91-238 Kauhi St. Ewa Beach  
P.O. Box 774  
Honolulu, Hawaii 96808-0774

Matsushita Electric Trading Co., Ltd.  
P.O. Box 288, Central Osaka Japan

Panasonic Tokyo Office  
Matsushita Electric Trading Co., Ltd.  
6th Floor, World Trade Center Bldg.,  
No. 4-1, Hamamatsu-cho 2-Chome, Minato-ku,  
Tokyo 105, Japan

# Parts Change Notice

Model No. SL-P110/P210

Service Manual  
 Order No. HAD8606593C0  
 Order No. HAD8607631C0

Please revise the original parts list in the Service Manual to conform to the change (s) shown herein. If new part numbers are shown, be sure to use them when ordering parts.

<b>Reason for Change</b>		*The circled item indicates the reason. If no marking, see the Notes in the bottom column.				
1. Improve performance						
2. Change of material or dimension						
3. To meet approved specification						
4. Standardization						
5. Addition						
6. Deletion						
7. Correction						
8. Other						
<b>Interchangeability Code</b>		**The circled item indicates the interchangeability. If no marking, see the Notes in the bottom column.				
Parts	Set Production					
A	Original  Early New  Late	Original or new parts may be used in early or late production set. Use original parts until exhausted, then stock new parts.				
B	Original  Early New  Late	Original parts may be used in early production sets only. New parts may be used in early or late production sets. Use original parts where possible, then stock new parts.				
C	Original  Early New  Late	New parts only may be used in early or late production sets. Stock new parts.				
D	Original  Early New  Late	Original parts may be used in early production sets only. New parts may be used in late production sets only. Stock both original and new parts.				
E	Other					
<b>Part Number</b>						
Model No.	Ref. No.	Original Part No.	New Part No.	Notes (****)	Part Name & Descriptions	
SL-P110/210	C110	ECFR1H104ZF	ECQV1H104JZ	1, C	Polyester, 50V, 0.1μF, ±5%	
SL-P110	C812	ECKF1H103KB	ECQV1H104JZ	1, C	Polyester, 50V, 0.1μF, ±5%	
SL-P110/210	Q11	2SD973A	2SD1227M-Q	1, C	Transistor	
SL-P210	C120	RCBS1H681KB	RCBS1H681KBY	8, C	Ceramic, 50V, 680pF, ±10%	
SL-P210	C812	ECKD1H103KB	ECQV1H104JZ	1, C	Polyester, 50V, 0.1μF, ±5%	

File this Parts Change Notice with your copy of the Service Manual.
